## UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS International General Certificate of Secondary Education

## MARK SCHEME for the October/November 2008 question paper

## 0610 BIOLOGY

0610/02

Paper 2 (Core Theory), maximum raw mark 80

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began.

All Examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

• CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the October/November 2008 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

## **General notes**

Symbols used in mark scheme and guidance notes.

/	separates alternatives for a marking point
•	separates points for the award of a mark
MP	mark point – used in guidance notes when referring to numbered marking points
ORA	or reverse argument/reasoning
OWTTE	or words to that effect
R	reject – this is marked with a cross and any following correct statements do not gain any marks
I	ignore/irrelevant – this response gains no mark, but any following correct answers can gain marks.
( )	the word/phrase in brackets is not required to gain marks but sets context of response for credit. e.g. (waxy) cuticle. Waxy not needed but if it was described as a cellulose cuticle then no mark.
<u>Small</u>	underlined words – this word only

PMT

					Guidance
1	(a)		genus – Elephas		A – elephas ( <i>lower case e</i> )
			species– maximus;	[1]	both responses needed for the single mark.
	(b)	(i)	<b>EITHER</b> (Bob)cat; European (lynx); Iberian (lynx); any two – 1 mark each		the first response identifies the selected genus ( <i>Lynx or Panthera</i> ). the second must be from the same genus to gain the second mark.
			<b>OR</b> jaguar; leopard; lion; tiger;		I – scientific names
			any two – 1 mark each	[2]	
		(ii)	Acinonyx;	[1]	I – jubatus I – cheetah
			[Total	: 4]	
2	(a)	(i)	smoking/cigarettes/tobacco;	[1]	I – smoke
		(ii)	smoking/cigarettes/tobacco; the % of smokers is higher than in non-smok ORA; in both day and night groups/OWTTE;	ers/	A – numbers must refer to day and night drivers
			the difference is 3.4(%); Any 3 – 1 mark each	[3]	
		(iii)	1.3%; greater amount of traffic during the day/ OWTTE;	[2]	A – ORA
	(b)	(i)	nicotine; acts as a stimulant drug/raises heart rate/ raises blood pressure/is addictive;		if no component named then no mark can be awarded for effect A – OWTTE for addictive
			tar; is carcinogenic/can cause cancers/ named cancer/(is an irritant and) can increas mucus production/cause bronchitis/ coughing/emphysema;	e	named cancer must be relevant
			smoke particles; (is an irritant and) can increase mucus production/cause bronchitis/coughing/ emphysema;		
			any two pairs – 2 marks each	[4]

(c)	1	(stimulate) production of sperm;	
	2	growth/development of pubic/axillary hair;	MP2 & 3 R – hair unqualified
	3	growth/development of facial/body hair;	MP2 & 3 no credit for ref. to hair on
	4	breaking of the voice/OWTTE;	scalp MP4 I – change of voice
	5	widening of shoulder (girdle);	
	6	development of more muscle/more muscular;	
	7	increased aggressive behaviour/OWTTE;	
	8	growth of penis;	MP8 I – enlargement (could be ref. to erection)
		any two – 1 mark each [2]	
<ul> <li>(d) across placenta/mixing of blood during birth; from (infected) mother to fetus/baby; (infected person pierced by) "sharp"/needle/ blade etc; used while still infected/not sterilised before reuse; collection/donation of infected blood/blood to blood transfer; transfused/passed into uninfected patient;</li> <li>any two pairs – 2 marks each [4]</li> </ul>			<ul> <li>A – reference to any relevant sharp item/process e.g. tattooing</li> <li>It is important that it is clear that the "sharp" is still contaminated.</li> <li>It is important that the transfer is to an uninfected person.</li> </ul>
(a)	(i)	1 base to be wider than layer above;	
		top layer to be narrower again;	MP2 third layer not to be same width or wider than first layer A – parasites for ticks
		ticks,	
	(ii)		I – primary in relation to producer A – tertiary
	(d)	2 3 4 5 6 7 8 (d) acro fron (infe blac use colle tran tran any (a) (i)	<ul> <li>2 growth/development of pubic/axillary hair;</li> <li>3 growth/development of facial/body hair;</li> <li>4 breaking of the voice/OWTTE;</li> <li>5 widening of shoulder (girdle);</li> <li>6 development of more muscle/more muscular;</li> <li>7 increased aggressive behaviour/OWTTE;</li> <li>8 growth of penis; any two – 1 mark each [2]</li> <li>(d) across placenta/mixing of blood during birth; from (infected) mother to fetus/baby; (infected person pierced by) "sharp"/needle/ blade etc; used while still infected/not sterilised before reuse; collection/donation of infected blood/blood to blood transfer; transfused/passed into uninfected patient; any two pairs – 2 marks each [4]</li> <li>(i) 1 base to be wider than layer above;</li> <li>2 third layer to be wider than second layer and top layer to be named grass, (cape) buffalo, ticks, (oxpecker) bird – in ascending order; [3]</li> <li>(ii) 4 layers to successively narrow from base to top; named as (trophic levels) 1 to 4/producers, first consumers/herbivores, second consumers/(1<sup>y</sup>) carnivores, third/top consumer/(2<sup>y</sup>) carnivores</li> </ul>

	Page 6		;	Mark Scheme			Syllabus	Paper
				IGCSE – October/November 2	008		0610	02
	(b)	1		imers require ready made food/supply ical energy;	of	A – c	consumers are hete	rotrophic
		2	gain it organi	t by feeding/eating/digestion of other isms;				
		3		cers make food from raw materials/for selves;		A — p	producers are autot	rophic
		4		otosynthesis/trapping light energy/ erting light to chemical energy;				
			any th	nree – 1 mark each	[3]			
				[Tota	l: 8]			
7	(a)	(i)	<b>B</b> – re	ombustion; espiration; hotosynthesis;			ourning preathing	
				igestion/feeding/eating/assimilation;	[4]	l – n	utrition	
		(ii)	bacter	ria/fungi;	[1]		iicroorganisms/micr aprophytes	obes/
	(b)	1	(increa	ased) use of fossil fuels/OWTTE;				
		2	due to of veh	o (more) energy demands/(increased) nicles;	use	MP2	A – aircraft/indust	rialisation
		3	decrea	ased photosynthesis;				
		4	due to	o deforestation/destruction of vegetatio	n;	MP4	A – ref to slash and	d burn
		5	respira	ation from increased (world) population	ר;			
			any th	nree – 1 mark each	[3]			
				[Tota	ıl: 8]			
8	(a)	(i)	<b>D</b> ;		[1]	A – c	correct name for <b>D</b>	
		(ii)	pulling	of muscles; g/effect of muscles acting/working in site directions/OWTTE;	[2]	A – o relax	one contracts while ces	the other
	(b)	(i)		d/fast/immediate/instantaneous; natic/involuntary response (to a stimulus)	; [2]			
		(ii)	(contro	rolled/coordinated by) spinal cord;	[1]			

Page 7	Mark Scheme	Syllabus	Paper
	IGCSE – October/November 2008	0610	02

	(c)	(i)	adrenaline; [1]	
		(ii)	1 increase in blood pressure;	
			2 increase in heart rate/increased cardiac output/OWTTE;	
			3 increase in breathing rate;	
			4 glycogen converted to glucose/increase in blood glucose;	
			5 more blood flow to (skeletal) muscles/less blood flow to skin/gut;	beware – these are alternatives not separate marking points
			6 pupils dilate;	
			7 hairs raised;	
			any three – 1 mark each [3]	
			[Total: 10]	
9	(a)	(i)	Y – cytoplasm; Z – vacuole/cell sap; [2]	
		(ii)	extension/hair like structure increases surface area; [1]	
		(iii)	cell wall/cellulose; vacuole/ <b>Z</b> ; root hair/extension;	R – chloroplasts
			any two – 1 mark each [2]	
	(b)	(i)	1 movement of water from a higher (water) concentration/water potential;	MP1 A – diffusion of water (molecules) = movement of water. A – movement of water from a dilute solution
			2 to a lower concentration;	MP2 A - to a more concentrated solution A - movement of water down a
			3 through a partially permeable membrane; [3]	concentration gradient = MP1 and MP2 A – semi-permeable
		(ii)	1 cell sap/contents of vacuole has lower water concentration/lower water potential;	MP1 A – cell sap/contents of vacuole is more concentrated solution
			2 than water concentration of soil (water);	MP2 A – than soil water
			3 cell membrane is partially permeable;	
			any two – 1 mark each [2]	
			[Total: 10]	

Page 8	Mark Scheme	Syllabus	Paper
	IGCSE – October/November 2008	0610	02

10	(a)	Dhi			
10	(a)	1 1	<u>oem</u> transport of sugars/amino acids;		A – sucrose/glucose
		2	in solution/translocation;		
		3	from leaves to rest of plant/from supply to demand/ OWTTE;		
		Xyl	em		
		4	transport/movement of water;		
		5	transport/movement of minerals/ions;		A – named mineral/ion
		6	from roots to leaves/rest of plant;		
			any four – 1 mark each	[4]	
	(b)	1	veins have valves (and arteries do not);		I – differences in composition, blood pressure and direction of blood flow
		2	to prevent backflow of blood;		
		3	arteries have more muscular walls/are more muscular;		A – thicker walls = more muscular walls
		4	to resist pressure;		
		5	arteries have a narrower lumen;		
		6	to maintain pressure;		
		7	arteries have more elastic tissue;		
		8	to generate/maintain pulse;		only credit a maximum of 2 differences Read whole paragraph and award
			any two differences + explanation – 2 marks each	[4]	marks consistent with candidate's best performance.
			[Total	: 8]	

PMT
