## MARK SCHEME for the October/November 2013 series

## 0625 PHYSICS

0625/22
Paper 2 (Core Theory), maximum raw mark 80

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the October/November 2013 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

## NOTES ABOUT MARK SCHEME SYMBOLS AND OTHER MATTERS

B marks are independent marks, which do not depend on any other marks. For a B mark to be scored, the point to which it refers must actually be seen in the candidate's answer.

M marks are method marks upon which accuracy marks (A marks) later depend. For an M mark to be scored, the point to which it refers must be seen in a candidate's answer. If a candidate fails to score a particular M mark, then none of the dependent A marks can be scored.

C marks are compensatory method marks which can be scored even if the points to which they refer are not written down by the candidate, provided subsequent working gives evidence that they must have known it e.g. if an equation carries a C mark and the candidate does not write down the actual equation but does correct working which shows he knew the equation, then the C mark is scored.

A marks are accuracy or answer marks which either depend on an M mark, or which are one of the ways which allow a C mark to be scored.
c.a.o. means "correct answer only".
e.c.f. means "error carried forward". This indicates that if a candidate has made an earlier mistake and has carried this incorrect value forward to subsequent stages of working, the candidate may be given marks indicated by e.c.f. provided the subsequent working is correct, bearing in mind this earlier mistake. This prevents a candidate being penalised more than once for a particular mistake, but only applies to marks annotated "e.c.f."
e.e.o.o. means "each error or omission".

Brackets () around words or units in the mark scheme are intended to indicate wording used to clarify the mark scheme, but the marks do not depend on seeing the words or units in brackets, e.g. $10(\mathrm{~J})$ means that the mark is scored for 10, regardless of the unit given.

Underlining indicates that this must be seen in the answer offered, or something very similar.
OR/or indicates alternative answers, any one of which is satisfactory for scoring the marks.
Spelling Be generous about spelling and use of English.
Significant figures
Answers are acceptable to any number of significant figures $\geq 2$, except if specified otherwise, or if only 1 sig. fig. is appropriate.

Units Incorrect units are not penalised, except where specified. More commonly, marks are allocated for specific units.

Fractions These are only acceptable where specified.
Extras Ignore extras in answers if they are irrelevant; if they contradict an otherwise correct response or are forbidden by the mark scheme, use right + wrong $=0$

Ignore indicates that something which is not correct is disregarded and does not cause a right plus wrong penalty.

| Page 3 | Mark Scheme | Syllabus | Paper |
| :---: | :---: | :---: | :---: |
|  | IGCSE - October/November 2013 | 0625 | 22 |

Not/NOT Indicates that an incorrect answer is not to be disregarded, but cancels another otherwise correct alternative offered by the candidate i.e. right plus wrong penalty applies.

$\begin{array}{llll}1 & \text { (a) } 7.02 \quad 7.13 \quad 6.97 & \text { B1 }\end{array}$
(b) evidence of adding three times C1
7.04 e.c.f. (a) A1
(c) distance / length of slope B1
$\left.\begin{array}{l}\text { (d) oil axles (accept oil wheels) } \\ \text { steeper slope / raise plank } \\ \text { push trolley }\end{array}\right\} \quad$ any $1 \quad$ B1 [5]

2 (a) speed $\times$ time
OR
area under graph C1
$8 \times 50$ C1
400 (m) A1
(b) half candidate's (a)

OR
$1 / 2 \times$ base $\times$ height C1
$200(m)$ e.c.f. from (a) A1
(c) $600(\mathrm{~m})$ e.c.f. from (a)(b) B1
(d) (i) equation using candidate's (c)/60 C1

10 e.c.f. (c) C1
$\mathrm{m} / \mathrm{s} \quad \mathrm{B} 1$
$\begin{array}{ll}\text { (ii) horizontal straight line at } 10 \mathrm{~m} / \mathrm{s} \text { e.c.f. (i) } & \text { M1 } \\ \text { from } 0 \mathrm{~s}-60 \mathrm{~s} \text {, not beyond } & \text { A1 [11] }\end{array}$

$\left.\begin{array}{lll}3 & \text { (a) } & \text { (i) } \begin{array}{l}\text { food } \\ \text { coal } \\ \text { oil/diesel/petrol/etc. } \\ \text { gas }\end{array}\end{array}\right\}$ any 1
(ii) waves
wind
hydro (electric)
tides any 1
B1
geothermal
sun (light) / solar
biofuel
wood

$\left.\begin{array}{lc}\text { (b) } \begin{array}{l}\text { fossil fuels will run out/not renewable } \\ \text { fossil fuels increasingly expensive to extract } \\ \text { fossil fuels cause pollution/climate change/global warming }\end{array}\end{array}\right\}$ any $2 \quad$ B1 + B1
4 (a) (i) tick under boy lying down M1
(ii) larger area (of contact with floor) A1
(b) (i) greater/more/stronger/higher than B1
(ii) becomes less / decreases / falls

B1

5 (a) $31 \pm 2(\mathrm{~mm}) \quad \mathrm{C} 1$
(b) (i) number of waves per second/unit time B1
(ii) reference to (vertical) displacement/distance/height/depth B1
half peak to trough distance / distance from mean position A1
(c) reflects $/ 3^{\text {rd }}$ box ticked

B1
$31 \pm 0.2(\mathrm{~mm}) \quad$ A1

## 6 (a) Mark both parts together

## (i)(ii) glycerol highest BP and water highest thermal capacity

$1^{\text {st }}$ explanation, needs to be comparative:
glycerol stops rising at higher temperature than water OR
$290>100$ - both numbers must be seen
$2^{\text {nd }}$ explanation:
more energy to raise temperature (in 1 minute)
OR
$4<8$; water must be stated to score mark B1
(b) (i) conduction

B1
(ii) convection B1
radiation
B1

7 (a) cell OR battery B1
rheostat / variable resistor / resistance B1
lamp / light / bulb B1
switch B1
(b) all 5 components shown in series B1
correct symbol for ammeter B1
(c) $2^{\text {nd }}$ box ticked

B1

8 (a) A and B both B1
(b) C
(c) D B1
(d) (i) attract c.a.o.
(ii) no effect / nothing c.a.o. B1

9 (a) (i) at least 1 complete circle drawn ..... C1
at least two circles not touching each other and centred on hole ..... A1
at least 4 concentric circles not touching each other ..... B1
(ii) iron filings
ORcompass (needle)M1sprinkle / tap card
ORmove around wire / tap compassA1
(b) (i) break circuit when current too high/large
ORbreak circuit when overloadedOR
prevent wires/circuit overheating/damage to circuit / electrocution ..... B1
(ii) $\quad V=I R$ in any form
ORV/RC1
12/4 ..... C1
3.0 (A)
OR
3 (A) ..... A1nothing happens to circuit breakere.c.f. allow correct deduction based on candidate's current
10 (a) (i) normal correct ..... B1
(ii) reflected ray correct ..... B1
(iii) both angles $i$ and $r$ in correct place ..... B1
(b) bottom box/i $=r$ ticked ..... B1
(c) (i) ray continued to upper mirror ..... B1
reflected at correct angle ..... B1
(ii) parallel
OR
same (direction)B1B1 [10]

11 (a) (i) protons and neutrons $\begin{array}{ll}\text { two of each } & \text { M1 } \\ \text { A1 }\end{array}$
$\left.\begin{array}{l}\text { (ii) } \begin{array}{l}\text { easier to get inside body OR can be breathed in } \\ \text { reference to ability of gas to diffuse/spread/move in air } \\ \text { danger to internal organs / damages cells }\end{array}\end{array}\right\} \quad$ any $2 \quad \mathrm{~B} 1+\mathrm{B} 1$
(b) (i) C B1
(ii) B or D any 1 B1
(iii) A B1
(iv) C

B1
$\begin{array}{lll}12 \text { (a) radioactive materials/sources } & \\ \text { OR } \\ \text { any named radioactive material } & \text { B1 }\end{array}$
(b) to prevent access by (unauthorised) people / can only be opened by key holder B1
(c) to reduce/prevent escape of radiation/radioactive emissions C1
to reduce/prevent escape of beta or gamma radiation A1
