

GCE

Chemistry A

Advanced GCE

Unit **F324**: Rings, Polymers and Analysis

Mark Scheme for January 2011

OCR (Oxford Cambridge and RSA) is a leading UK awarding body, providing a wide range of qualifications to meet the needs of pupils of all ages and abilities. OCR qualifications include AS/A Levels, Diplomas, GCSEs, OCR Nationals, Functional Skills, Key Skills, Entry Level qualifications, NVQs and vocational qualifications in areas such as IT, business, languages, teaching/training, administration and secretarial skills.

It is also responsible for developing new specifications to meet national requirements and the needs of students and teachers. OCR is a not-for-profit organisation; any surplus made is invested back into the establishment to help towards the development of qualifications and support which keep pace with the changing needs of today's society.

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which marks were awarded by Examiners. It does not indicate the details of the discussions which took place at an Examiners' meeting before marking commenced.

All Examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes should be read in conjunction with the published question papers and the Report on the Examination.

OCR will not enter into any discussion or correspondence in connection with this mark scheme.

F324

Mark Scheme

January 2011

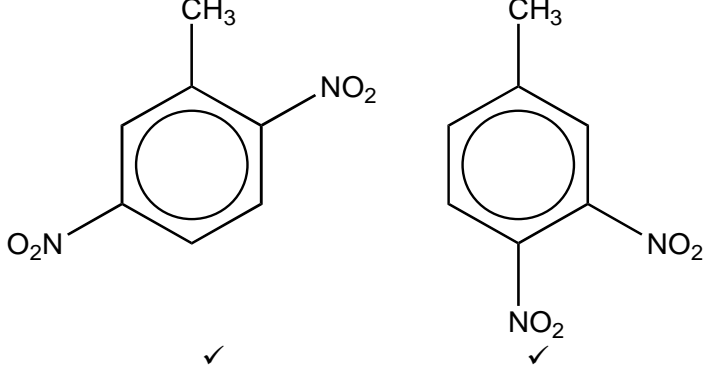

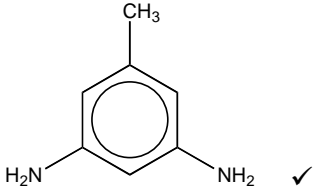

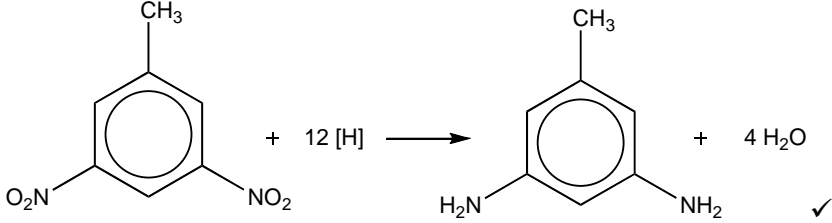

ALLOW Kekulé structures throughout

Question	Answer	Mark	Guidance
1 (a)	 <p>curly arrow from ring to NO_2^+</p> <p>correct intermediate</p> <p>curly arrow from C-H bond back to reform ring</p> <p>correct products</p> <p>✓</p> <p>✓ ✓</p> <p>✓</p> <p>1 mark for intermediate</p> <p>1 mark for curly arrow</p>	4	<p>ANNOTATIONS MUST BE USED</p> <p>ALLOW skeletal CH_3</p> <p>ALLOW $^+\text{NO}_2$ OR NO_2^+</p> <p>ALLOW 1st curly arrow from the ring OR from within the ring to any part of the NO_2^+ including the + charge</p> <p>DO NOT ALLOW intermediate with broken ring less than halfway down:</p>  <p>Horseshoe must have open end towards NO_2</p> <p>ALLOW Kekulé mechanism:</p>  <p>ALLOW double bonds shown in other Kekulé arrangement</p> <p>IF CH_3 has been omitted completely (<i>ie</i> benzene shown), DO NOT AWARD intermediate mark OR products mark (max 2)</p> <p>IF NO_2 is shown in incorrect position in intermediate or product, DO NOT AWARD intermediate mark but award other marks (max 3)</p>

F324

Mark Scheme

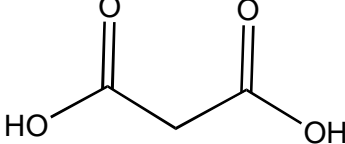

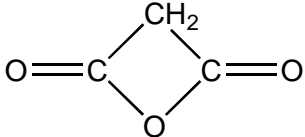

January 2011

Question	Answer	Mark	Guidance
1 (b)		2	<p>ALLOW any correct unambiguous structures</p> <p>ALLOW NO₂-</p> <p>Note: connectivity is NOT being assessed in this part</p>
1 (c)	<p>1st stage <i>isomer: isomer 3</i> ✓ <i>product:</i></p>  <p><i>reagents: Sn AND (conc) HCl</i> ✓</p> <p><i>equation:</i></p> 		<p>ANNOTATIONS MUST BE USED</p> <p>ALLOW structure of isomer 3 shown separately OR in equation</p> <p>ALLOW structure of product shown separately OR in equation ALLOW correct name (3,5-diaminomethylbenzene) IGNORE incorrect name DO NOT ALLOW CH₃C₆H₃(NH₂)₂</p> <p>ALLOW Zn + HCl/H₂ + metal catalyst/LiAlH₄/Na in ethanol IGNORE NaBH₄ ALLOW Sn and HCl followed by NaOH DO NOT ALLOW Sn and HCl and NaOH</p> <p>IF isomer 3 OR product are given in equation but not shown previously then credit here</p> <p>Also credit reagents here if shown (eg above arrow)</p> <p>ALLOW correct structural OR displayed OR skeletal formula ALLOW combination of formulae as long as unambiguous</p>

F324

Mark Scheme

January 2011

Question	Answer	Mark	Guidance
(c) (i)	2nd stage <i>organic compound:</i> $\text{HOOC}-\text{CH}_2-\text{COOH}$ ✓ <i>type of polymer:</i> polyamide ✓	6	<div style="text-align: center;">  </div> <p>DO NOT ALLOW molecular formula</p> <p>ALLOW name of compound: propanedioic acid OR propane-1,3-dioic acid ALLOW absence of 'e' after 'propan'</p> <p>ALLOW acyl dichloride: $\text{ClOC}-\text{CH}_2-\text{COCl}$ ALLOW cyclic acid anhydride of propanedioic acid:</p> <div style="text-align: center;">  </div> <p>ALLOW Nylon or Kevlar DO NOT ALLOW polypeptide DO NOT ALLOW amide</p>
Total		12	

F324

Mark Scheme

January 2011

Question		Answer	Mark	Guidance
2	(a)	propane-1,2,3-triol ✓	1	<p>ALLOW absence of 'e' after 'propan'</p> <p>ALLOW 1,2,3-propanetriol</p> <p>ALLOW absence of hyphens</p> <p>1, 2 and 3 must be clearly separated: ALLOW full stops: 1.2.3 OR spaces: 1 2 3 DO NOT ALLOW 123</p>
2	(b)	(i)		<p>BOTH points required for the mark</p> <p>ALLOW correct structural OR displayed OR skeletal formula</p> <p>DO NOT ALLOW molecular formulae</p>
		methanol OR ethanol		
		AND		
		renewable ✓	1	<p>ALLOW easy/cheap to manufacture/produce as alternative for renewable/from plants/from fermentation/burns more easily/efficiently</p>
	(b)	(ii)		<p>ALLOW equilibrium shifts in forward direction</p> <p>ALLOW more products form</p> <p>ALLOW greater yield OR fully reacts OR goes to completion</p> <p>DO NOT ALLOW improves atom economy</p>
		equilibrium shifts to right ✓	1

January 2011

Question			Answer	Mark	Guidance
4	(b)	(i)		1	DO NOT ALLOW any structure containing C OR H (except in OH)
	(b)	(ii)		2	<p>ALL bond linkages must be correct, eg the chiral C must be linked to the C of the COOH, the C of the CH₂COOH and the N of the NH₂ (connectivity is being tested)</p> <p>The 2nd mark is for the mirror image of an amino acid. This could be any amino acid EXCEPT glycine</p> <p>DO NOT penalise connectivity more than once ALLOW R in equation in place of CH₂COOH (either or both sides) Each structure must have four central bonds, with at least two wedges, one in; one out</p> <p>For bond into paper, accept:</p>
4	(c)		<p>Disadvantages Any two from:</p> <ul style="list-style-type: none"> • (one stereoisomer might have harmful) side effects ✓ • reduces the (pharmacological) activity/effectiveness ✓ • cost OR difficulty in separating stereoisomers ✓ <p>Synthesis of a single optical isomer Any two from:</p> <ul style="list-style-type: none"> • using enzymes or bacteria ✓ • using a chiral catalyst OR transition metal complex/transition metal catalyst ✓ • using chiral synthesis OR chiral starting material OR natural amino acid ✓ 	<p>2 max</p> <p>2 max</p>	<p>ANNOTATIONS MUST BE USED</p> <p>ALLOW optical isomer OR enantiomers as alternative for stereoisomers ALLOW a response that implies an increased dose</p> <p>ALLOW biological catalyst</p> <p>ALLOW 'chiral pool' OR L-amino acids OR D-sugars</p>
Total				8

January 2011

Question			Answer	Mark	Guidance
5	(a)	(i)	Adsorption ✓(onto the stationary phase) Quality of Written Communication 'Adsorption' must be spelled correctly	1	ALLOW adsorbition or adsorb(s) or adsorbed spelled correctly at least once DO NOT ALLOW anything that begins with ab...
	(a)	(ii)	0.2 ✓	1	ALLOW any value in the range 0.1 – 0.3 IGNORE significant figures DO NOT ALLOW fraction/percent as final answer
	(a)	(iii)	Spot may contain more than one compound/component ✓	1	ALLOW compounds have similar R_f values/adsorptions OR compounds have not (fully) separated OR B is spread over a large region OR compounds are similar IGNORE retention times
5	(b)	(i)	GC separates the components/compounds AND MS is compared to a database/reference ✓	1	ALLOW chromatography for GC ALLOW they have different retention times ALLOW MS analyses compounds/gives structural information/gives different mass spectra ALLOW (uses) fragmentation patterns/fragments/peaks/parts of the compound DO NOT ALLOW MS identifies compounds (in question) DO NOT ALLOW molecular ion alone/ M_r etc.
		(ii)	nerol and geraniol AND they are stereoisomers OR primary alcohols ✓	1	Compounds AND reason required for the mark ALLOW they are <i>E/Z</i> isomers OR <i>cis-trans</i> isomers ALLOW straight-chain alcohols OR unsaturated alcohols
		(iii)	stereoisomers have the same structural formula AND different 3D arrangements ✓	1	BOTH points required for the mark ALLOW different arrangements in space
		(iv)		1	Circle must include the correct C=C double bond AND must not extend further than the adjacent atoms in the main chain, ie limit is:
