

# Chemistry A

Advanced GCE

Unit **F324**: Rings, Polymers and Analysis

## Mark Scheme for June 2012

---

OCR (Oxford Cambridge and RSA) is a leading UK awarding body, providing a wide range of qualifications to meet the needs of candidates of all ages and abilities. OCR qualifications include AS/A Levels, Diplomas, GCSEs, OCR Nationals, Functional Skills, Key Skills, Entry Level qualifications, NVQs and vocational qualifications in areas such as IT, business, languages, teaching/training, administration and secretarial skills.

It is also responsible for developing new specifications to meet national requirements and the needs of students and teachers. OCR is a not-for-profit organisation; any surplus made is invested back into the establishment to help towards the development of qualifications and support, which keep pace with the changing needs of today's society.

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which marks were awarded by examiners. It does not indicate the details of the discussions which took place at an examiners' meeting before marking commenced.

All examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes should be read in conjunction with the published question papers and the report on the examination.

OCR will not enter into any discussion or correspondence in connection with this mark scheme.

Mark Scheme

June 2012

## Annotations

Annotation	Meaning
	Benefit of doubt given
	Contradiction
	Incorrect response
	Error carried forward
	Ignore
	Not answered question
	Benefit of doubt not given
	Power of 10 error
	Omission mark
	Rounding error
	Error in number of significant figures
	Correct response

F324

Mark Scheme

June 2012

<b>Annotation</b>	<b>Meaning</b>
<b>DO NOT ALLOW</b>	Answers which are not worthy of credit
<b>IGNORE</b>	Statements which are irrelevant
<b>ALLOW</b>	Answers that can be accepted
<b>( )</b>	Words which are not essential to gain credit
<b>—</b>	Underlined words must be present in answer to score a mark
<b>ECF</b>	Error carried forward
<b>AW</b>	Alternative wording
<b>ORA</b>	Or reverse argument

The following questions should be annotated with ticks, etc. to show where marks have been awarded in the body of the text:

**Q1(a), Q3(c)(iii), Q4(a), Q4(d)(i), Q5(b).**

Mark Scheme

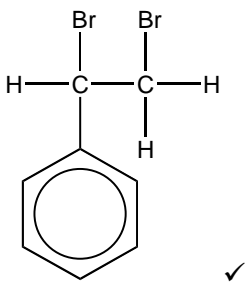

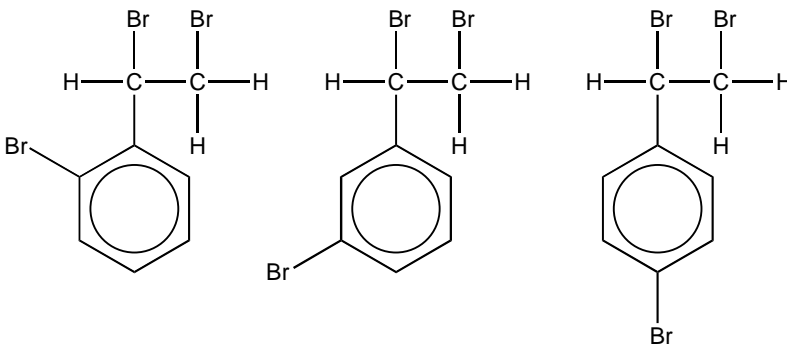

June 2012

Question			Answer	Marks	Guidance
1	(b)	(i)		1	<b>ALLOW</b> correct structural <b>OR</b> displayed <b>OR</b> skeletal formula <b>ALLOW</b> combination of formulae as long as unambiguous
		(ii)	6 ✓	1	<b>NO ECF</b> from (i)
		(iii)	Two of the three structures below with 1 mark for each correct structure ✓✓ 	2	<b>ALLOW</b> correct structural <b>OR</b> displayed <b>OR</b> skeletal formula <b>ALLOW</b> combination of formulae as long as unambiguous  Structures must clearly show position of Br on benzene ring in relation to side chain  <b>ALLOW ECF</b> from (i) if <b>BOTH</b> Br atoms on same carbon on side chain <b>DO NOT ALLOW ECF</b> from (i) if <b>EITHER</b> bromine has been substituted onto the benzene ring
		(iv)	<b>reaction 1:</b> electrophilic addition ✓  <b>reaction 2:</b> electrophilic substitution ✓	2	<b>ALLOW</b> electrophile addition  <b>ALLOW</b> electrophile substitution  <b>ALLOW</b> other phonetic spellings for electrophilic, e.g. electrophylic, etc.
<b>Total</b>				<b>10</b>	

F324

Mark Scheme

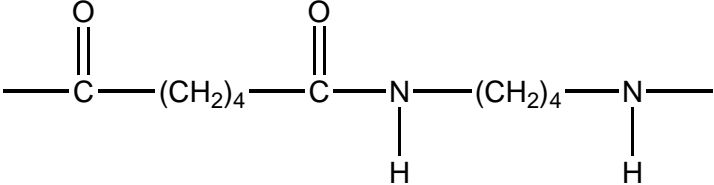

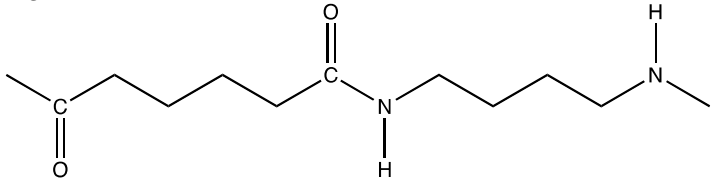

June 2012

Question			Answer	Marks	Guidance
2	(a)	(i)	photodegradable <b>OR</b> light/sunlight/UV ✓	1	<b>IGNORE</b> IR/heat <b>IGNORE</b> bacteria  <b>DO NOT ALLOW</b> burn/combustion
		(ii)	 ✓	1	<b>DO NOT ALLOW</b> structure with any C shown (especially as part of C=O)  <b>DO NOT ALLOW</b> OH—
	(b)	(i)	ammonia/NH <sub>3</sub> <b>AND</b> ethanol <b>OR</b> ethanolic ammonia ✓	1	<b>ALLOW</b> ammonia in a sealed tube <b>IGNORE</b> heat  <b>ALLOW</b> dilute ethanolic ammonia /NH <sub>3</sub>  <b>DO NOT ALLOW</b> any reference to water or hydroxide ions, e.g. <b>DO NOT ALLOW</b> dilute ethanolic NH <sub>3</sub> (aq) e.g. <b>DO NOT ALLOW</b> ethanolic NH <sub>3</sub> + NaOH
		(ii)	<b>Nitrogen</b> electron pair/lone pair accepts a proton/H <sup>+</sup> ✓ <i>Requires position of electron pair on N</i>  Cl <sup>-</sup> H <sub>3</sub> N <sup>+</sup> (CH <sub>2</sub> ) <sub>4</sub> N <sup>+</sup> H <sub>3</sub> Cl <sup>-</sup>  <b>OR</b> ClH <sub>3</sub> N(CH <sub>2</sub> ) <sub>4</sub> NH <sub>3</sub> Cl ✓	2	<b>DO NOT ALLOW</b> Nitrogen/N lone pair accepts hydrogen proton/H <sup>+</sup> required  <b>ALLOW</b> nitrogen donates an electron pair <b>IGNORE</b> NH <sub>2</sub> group donates electron pair  <b>ALLOW</b> + charge (if shown) on N or H of NH <sub>3</sub> e.g. Cl <sup>-</sup> H <sub>3</sub> N <sup>+</sup> (CH <sub>2</sub> ) <sub>4</sub> NH <sub>3</sub> <sup>+</sup> Cl <sup>-</sup>  <b>DO NOT ALLOW</b> just H <sub>3</sub> N <sup>+</sup> (CH <sub>2</sub> ) <sub>4</sub> NH <sub>3</sub> <sup>+</sup> i.e. <b>2 x Cl<sup>-</sup> MUST</b> be included
