Paper 4 Alternative to Coursework MARK SCHEME Maximum Mark: 60

Published

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the October/November 2016 series for most Cambridge IGCSE[®], Cambridge International A and AS Level components and some Cambridge O Level components.

® IGCSE is the registered trademark of Cambridge International Examinations.

This syllabus is approved for use in England, Wales and Northern Ireland as a Cambridge International Level 1/Level 2 Certificate.

This document consists of 6 printed pages.

Page 2	Mark Scheme	Syllabus	Paper
	Cambridge IGCSE – October/November 2016	0460	42
	: Confluence : Watershed		[1 + 1 = 2]
(b) (i	Examples Measure set/certain/specific/fixed distance / 5-15 m (<u>No need for ed</u> Put/place/throw <u>float/example or type of float</u> at start of measured of Start <u>stopwatch</u> when float is put in (1) Measure time it takes to travel the measured distance / stop stopwa when float reaches end of measured distance (1)	distance (1) atch or time	
		[– .
(ii	<u>Examples</u> Only measuring surface velocity / different velocities at different po Floats get stuck on vegetation / rocks / obstacles (1) Strong wind may interfere with movement of float / float too light (1) Only measuring once at each site /didn't repeat / may create anom Measurement will depend on where float is put into river (1) Start/finish points not clear (1) Student error with reason e.g. inaccurate timing (1))	[1 + 1 = 2]
(iii	<u>Width</u> : (1 + 1) Measure from one bank to the other/across the river/ one student a Keep tape measure taut/horizontal/stretched (1) Measure perpendicular/at right angles to banks (1)	it each side	(1)
	<u>Depth (1 + 1)</u> Measure vertically (1) Equipment to touch river bed (1) Measure at equal intervals (1) Measure the wet part of equipment (1)	[2 >	(1 + 1 = 4]
(iv	Completion of cross-section; credit each plot – no credit for shading 0.38 m at 5.5m and 0.21 m at 6 m.	g	[4 . 4 0]

[1 + 1 = 2]

PMT

Page 3	Mark Scheme	Syllabus	Paper
 .	Cambridge IGCSE – October/November 2016	0460	42
(v)	Examples: Answers must compare Cross section is wider at site 3/narrower at Site 1 OR accept Cross from left bank at Site 3/shorter from left bank at Site 1 (1) Cross section is deeper at site 3 / shallower at Site 1 (1) Cross section is more irregular/rougher at site 3 / smoother or more Cross section is larger at site 3 / smaller at site 1 (1) Cross section has steeper sides at site 3 / gentler sides or slopes a	e rounded at at Site 1 (1)	-
(vi)	Average depth = 0.46m		[1]
(vii)	6.5 × 0.46 (1) Accept use of • or * as multiplication symbols. = 2.99 m squared (1)		
	OR $6.5 \times \text{answer to (vi) (1)}$ = correct calculation by <u>multiplication</u> (1)		
	This last line avoids Error Carried Forward (ECF) penalty		[1 + 1 = 2]
(c) (i)	Plot discharge at site 3 = 0.9 cumecs; no credit for shading; ignore	e if wrong wi	dth. [1]
(ii)	Hypothesis is correct / true – 1 mark reserve (1)		
	Examples of paired data from Fig 4 for 1 mark. Could choose any Units. Must refer to Site numbers	<u>pair. No nee</u>	<u>d for</u>
	Site 1 is 0.13 but Site 4 is 2.34 (1) Site 4 is 2.21 higher than Site 1 (1)		
	For reference allow tolerance as they are referred to the graph notSite 1 = 0.1-0.14Site 2 = 0.33-0.39Site 3 = 0.9 onlySite 4	<u>the table i.e</u> I= 2.32 – 2.3	
	If say Hypothesis is partly true or false CROSS HA = 0 and do not		IR + 1 = 2]
(iii)	Examples Streams/rivers/tributaries join (1) Tributaries bring water from other areas of drainage basin (1) Larger catchment area downstream (1)		[1 + 1 = 2]

Page 4	Mark Scheme	Syllabus	Paper
	Cambridge IGCSE – October/November 2016	0460	42
(d) (i)	Score at site 3 = 10		[1]
(ii)	Hypothesis is <u>generally / to some extent / partly / mostly / somewhat true</u> – 1 mark reserve <u>.</u>		
	Credit <u>figures</u> to show overall increase from site 1 to site 4. (1 Reserve/max) Credit <u>figures</u> to show anomaly at site 2 (1 Reserve/max) <u>Example</u> : At sites 1 to 4 the pollution increases downstream from 5 to 17 (1) However at Site 2 it falls to 3 from 5 at Site 1 (1) [1R + 1 + (iii) <u>Examples</u> Do survey at more sites along river (1) Take more surveys from different students/pairs/groups/someone else at each site Work out average for different surveys/multiple times and take average (1) Same student does all the surveys at all sites – consistency (1) All surveys to take place at the same time (1)		
(iii)			
			[1 + 1 = 2]
		[Total:	30 marks]
2 (a) (i)	Examples Many shops/services to plot (1) Sections of pie chart would be very small/ many less than 1%/ unplottable/ many segments/some are zero (1) Problem of shading / colouring different segments /key too long (1) Pie charts would be too complicated to compare/hard to read/ confusing (1) Difficult to create any sensible groups /not in categories or groups (1) Take a long time to calculate size of slices / plot (1) [1 + 1 =		ny [1 + 1 = 2]
(ii)	Hair & beauty salon = E Jewellers = A		[1 + 1 = 2]
(iii)	Comparison		[1]
(iv)	Pie chart completion must be clockwise in order of completed pies/key.		
	Group D = 28% (plot must be at 68% clockwise by eye OR within 113-118 range of degrees from vertical using protractor tool – ideal is 115 degrees) (1)		ge of
	Shading (including the correct diagonal) must match key. (1)		
	Credit 1 for shading if the plot is wrong but the larger slice is correct smaller slice has small crosses		<u>nd the</u> [1 + 1 = 2]

Page 5	Mark Scheme	Syllabus	Paper
	Cambridge IGCSE – October/November 2016	0460	42
(v)	Note: the candidates are told the hypothesis is true; no need for a Comparative statements to maximum of 2 marks and use of com maximum of 2 marks. Comparison can be given from perspective example from suburban centre below. Statements must be linked	parative data of any centre	to e –
	$\frac{\text{Group A/ (One type/more expensive})}{\text{Group B/ (Variety/cheaper)}} - \text{Larger percentage/more in suburban centre (1) with 25 compared to 14 and 11 (1)} \\ \frac{\text{Group B/ (Variety/cheaper)}}{\text{Group C/ (Food)}} - \text{Larger percentage/more in suburban centre (1) with 25 compared to 14 and 11 (1)} \\ \frac{\text{Group C/ (Food)}}{\text{Group D/ (Clothes)}} - \text{Larger percentage/more in suburban centre (1) with 16 compared to 4 and 5 (1)} \\ \frac{\text{Group D/ (Clothes)}}{\text{Group E/ (Services)}} - \text{Smaller percentage/less in suburban centre (1) with 16 compared to 28 and 33 (1)} \\ \frac{\text{Group E/ (Services)}}{\text{Group E/ (Services)}} - \text{All three are similar/suburban larger or more (1) with 35 compared to others at 32 (1)} \\ \end{array}$		
(vi)	 i) Examples Different types of transport available (1) Distances prepared to travel (1) Demand/ need for different types of goods / services OR food or convenience shops close to residents (1) Amount of population/likely customer base/threshold population (1) Wealth/income/salaries/spending patterns of customer base (1) Cost of running shop or service in each centre (1) Amount of lond available/enace for building (4) 		

Amount of land available/space for building (1)

[1 + 1 = 2]

PMT

(b) (i) Mark 2 sections as whole i.e. credit Plan answers in Carry out or reverse

Plan:

When to do count / do at same time (1) Where to do count / location of counting points (1) How long to do each count for (1) How many different counting points to have (1) Individuals or pairs/groups (1) How many times to do count per day (1) Whether to do count on same day/more than one day / weekday/ weekend (1) Carry out Tally method / 'clicker' (1) Timing of count / use a watch (1) Jobs of student in each group e.g. two students do each count / count people going in different directions (1) Record the data in a table/use recording sheet (1)

[1 + 1 + 1 + 1 = 4]

[1]

(ii) 109 – 111 (110 is best answer)

Page 6	Mark Scheme	Syllabus	Paper	
	Cambridge IGCSE – October/November 2016	0460	42	
(iii)	 (iii) <u>Candidates are told the hypothesis is partly true so no need for their own decisio</u> one statement supporting decrease and 1 supporting increase plus 1 set of data. within tolerance/range given below allowed as statistic mark as reading from gra <u>Evidence examples</u> <u>Supports decrease</u>: Decrease from CBD to suburban centre/3km (1reserve and 1 from 76 to 13-15 / down 61-63 (1) <u>Supports increase</u>: Increase from suburban centre/3km to mall/10km (1 reserve and 1 max) from 13-15 to 109-111 / up 94-98 (1) OR Increase from CBD to mall/10km (1 reserve and max) from 76 to 109-111 / u (1) 			
	<u>1 mark max/reserve for use of 1 pair of data; 2 reserve marks for two state</u> [1R]			
(iv)	Examples Count done at different times of day (1) Differences in weather encourage / discourage people to go shopp	ing (1)	[1 + 1 = 2]	
(v)	Collected by other people / not collected by students themselves/ a collected/collected before/ second hand.	already	[1]	
(vi)	Examples Same pattern of results as those of students' fieldwork (1) Number in suburban centre lower and number at mall higher than (CBD (1)	[1]	
(c) (i)	Area served by a settlement or service		[1]	
(ii)	Examples Questionnaire/survey/interview/ask questions (1) Sampling methodology to select people to complete questionnaire/ carry out survey (1)	choosing a	areas to	
	Questions such as: In which area do you live? / Which area have you come from? (1) How far have you travelled? (1) What method of transport have you used today? (1) How frequently do you come here? (1) Why do you come here? (1)			
	<u>Credit other methods</u> such as questionnaire in surrounding villages bus routes, mapping store delivery area, mapping desire/flow lines of influence.	, mapping t	he sphere + 1 + 1 = 4]	

[Total: 30 marks]
