Answer only scores all marks in each section BUT check (b) and (c) are in correct order

(a)

M1 for standardising with σ, $z = \pm\frac{39-30}{5}$ is OK

A1 for 0.9641 or awrt 0.964 but if they go on to calculate 1 – 0.9641 they get M1A0

(b)

1st M1 for attempting 1- 0.1151. Must be seen in (b) in connection with finding *d*

B1 for $z = \pm 1.2$. They must state $z = \pm 1.2$ or imply it is a *z* value by its use. This mark is only available in part (b).

2nd M1 for $\left(\frac{d-30}{5}\right) =$ their negative *z* value (or equivalent)

(c) M1 for a full method to find *e*. If they used $z = 1.2$ in (b) they can get M1 for $z = \pm 1.2$ here
If they use symmetry about the mean $\mu + (\mu$ - their $d)$ then ft their *d* for M1
Must explicitly see the method used unless the answer is correct.

(d) M1 for a complete method or use of a correct expression e.g. "their 0.8849" - 0.1151
or **If their *d* < their *e*** using their values with $P(X < e) - P(X < d)$
If their $d \geq$ their *e* then they can only score from an argument like 1 – 2x0.1151
A negative probability or probability > 1 for part (d) scores M0A0
