# P Pearson Edexcel 

Mark Scheme (Results)

November 2020

Pearson Edexcel GCSE In Physics (1PH0) Paper 2F

## Edexcel and BTEC Qualifications

Edexcel and BTEC qualifications are awarded by Pearson, the UK's largest awarding body. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications websites at www.edexcel.com or www.btec.co.uk. Alternatively, you can get in touch with us using the details on our contact us page at www.edexcel.com/contactus.

## Pearson: helping people progress, everywhere

Pearson aspires to be the world's leading learning company. Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at:www.pearson.com/uk

## General Marking Guidance

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.

Mark schemes have been developed so that the rubrics of each mark scheme reflects the characteristics of the skills within the AO being targeted and the requirements of the command word. So for example the command word 'Explain' requires an identification of a point and then reasoning/justification of the point.
Explain questions can be asked across all AOs. The distinction comes whether the identification is via a judgment made to reach a conclusion, or, making a point through application of knowledge to reason/justify the point made through application of understanding. It is the combination and linkage of the marking points that is needed to gain full marks.
When marking questions with a 'describe' or 'explain' command word, the detailed marking guidance below should be consulted to ensure consistency of marking.

| Assessment <br> Objective |  | Command Word |  |
| :--- | :--- | :--- | :--- |
| Strand | Element | Describe | Explain |
| AO1* | An answer that combines the <br> marking points to provide a logical <br> description | An explanation that links <br> identification of a point with <br> reasoning/justification(s) as <br> required |  |
| AO2 | An answer that combines the <br> marking points to provide a logical <br> description, showing application of <br> knowledge and understanding | An explanation that links <br> identification of a point (by <br> applying knowledge) with <br> reasoning/justification (application <br> of understanding) |  |
| AO3 | 1a and <br> $1 b$ | An answer that combines points of <br> interpretation/evaluation to <br> provide a logical description |  |
| AO3 | 2a and <br> 2b |  | An explanation that combines <br> identification via a judgment to <br> reach a conclusion via <br> justification/reasoning |
| AO3 | 3a | An answer that combines the <br> marking points to provide a logical <br> description of the <br> plan/method/experiment |  |
| AO3 | 3b |  | An explanation that combines <br> identifying an improvement of the <br> experimental procedure with a <br> linked justification/reasoning |

*there will be situations where an AO1 question will include elements of recall of knowledge directly from the specification (up to a maximum of $15 \%$ ). These will be identified by an asterisk in the mark scheme.

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1}$ ai |  |  | (1) |
|  | A, B and D are incorrect <br> because they are all closer to <br> the surface |  |  |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1}$ aii | B. the same as the pressure on <br> X <br> A,C and D are incorrect <br> because the pressure does not <br> depend on surface area |  | (1) |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1}$ bi | $6.5(1)$ | metres / meters <br> allow M <br> independent marks | (2) |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1}$ bii | the pressure increases |  | (1) |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1}$ biii | there is additional pressure due <br> to the atmosphere |  | (1) |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1}$ c | Any two from: <br> height of atmosphere (above <br> aeroplane) (1) | less air above the <br> aeroplane <br> accept oxygen for air <br> in this context | (2) |
|  | density of atmosphere (1) <br> the temperature (of the <br> atmosphere) (1) | the air gets thinner <br> the air gets colder |  |

Total for question 1 = 7 marks

| Question number | Answer |  | Additional guidance | Mark |
| :---: | :---: | :---: | :---: | :---: |
| 2 a | ${ }^{+}$ |  |  |  |
|  | part of plug | safety feature | Note that the tick next to cable grip is already in the grid <br> more than two additional ticks deduct one mark for each incorrect tick. | (2) |
|  | cable grip | (v) |  |  |
|  | earth wire | $\checkmark$ |  |  |
|  | fuse | $\checkmark$ |  |  |
|  | live wire |  |  |  |
|  | neutral wire |  |  |  |
|  |  |  |  |  |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{2}$ bi | A an ammeter <br> B, C and D are incorrect <br> because they do not show <br> current | (1) |  |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| 2bii | substitution (1) <br> $(Q)=2.5 \times 8(x 60)$ <br> evaluation (1) <br> 1200 (C) | (2) <br> allow 20 (C) for 1 <br> mark <br> award full marks for <br> the correct answer <br> without working |  |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| 2c | substitution (1) | $\frac{15 \times 3.1}{230}$ | evaluation (1) |
|  | 0.20 (A) | allow any value that round to <br> $0.20 ;$ e.g. 0.2022 <br> award full marks for the <br> correct answer without <br> working | (2) |

Total for question $2=7$ marks

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| 3ai | evaluation of gear ratio (1) <br> $1: 3$ | allow 1 mark if <br> $60 / 20$ or 20/60 <br> or 20:60 or 60:20 <br> seen | (2) |
|  | evaluation of number of <br> revolutions (1) | award full marks for <br> the correct answer <br> without working |  |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| 3aii | D 120mm down | A and C are incorrect because <br> gear T moves down <br> B is incorrect because gear T <br> moves 2mm per tooth |  |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{3}$ bi | substitution (1) <br> (moment=) $0.40 \times 70$ <br> evaluation (1) <br> 28 <br> Nm (1) | (3) <br> independent mark <br> award full marks for <br> the correct answer <br> without working |  |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{3} \mathbf{\text { bii }}$ | an explanation linking | allow reverse <br> argument for load <br> the effort is at a bigger distance <br> (1) <br> from fulcrum (than the load) <br> $(1)$ | (2) <br> (magnitudes of) <br> moments are the <br> same |
| allow <br> wheel/axle/pivot for <br> fulcrum |  |  |  |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{3}$ biii | (there will be more) friction <br> (between the axle and wheel) | inside the bearing | (1) |

Total for question 3 = 9 marks

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| 4ai | D |  | (1) |
|  | A and B are incorrect because <br> they only show one force <br> C is incorrect because the <br> forces are in the wrong <br> direction |  |  |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| 4 aii | substitution (1) <br>  <br>  <br>  <br> evaluation (1) $20 \times(0.0) 7$ <br> $1.4(\mathrm{~N})$ | (2) <br> award full marks for the <br> correct answer without <br> working <br> allow 1 mark max for <br> POT error |  |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{4}$ bi | substitution (1) | (2) |  |
|  | $(\mathrm{E}=)^{1 / 2 \times 20 \times 0.09^{(2)}}$ | allow 1 mark for <br> $1 / 2 \times 20 \times 9^{2}$ <br> or answer of $810(\mathrm{~J})$ <br> or answer of $90(\mathrm{~J})$ | evaluation (1) <br> award full marks for the <br> correct answer without <br> working |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| 4 bii | a description including <br> mention of one relevant <br> energy store (1) <br> correct transfer in context <br> (1) | potential/ PE/ kinetic/ KE/ <br> thermal/ heat/ elastic | (2) |
|  |  | potential energy <br> stored in the spring <br> transferred to kinetic <br> energy of the ball/rod <br> scores 2 marks | kinetic energy of rod is <br> transferred to kinetic <br> energy of ball <br> scores 2 marks |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| 4 biii | an explanation linking two <br> from | ignore damaging the <br> spring (given in stem) <br> extension (1) | (2) |
|  | idea of keeping below the <br> elastic limit (1) | stretch | prevents spring being <br> over-stretched / extended <br> too far scores 2 marks |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| 5a | an explanation linking any tw o <br> of <br> steel is magnetic (material) (1) | steel attracted / <br> sticks to / carried <br> round by <br> magnet/roller) | (2) |
|  | aluminium is non-magnetic <br> (material) (1) | is not attracted / does <br> not stick (to magnet <br> roller) | steel falls into container A / <br> aluminium falls into container B <br> (1) |
| steel cans are carried <br> further round than <br> aluminium and fall <br> into A <br> steel hangs on for <br> longer / aluminium <br> falls quicker |  |  |  |

| Question <br> number | Answer | Additional guidance | Mark |  |
| :--- | :--- | :--- | :--- | :--- |
| $\mathbf{5}$ (bi) | S | N |  | allow |
|  |  | s |  |  |
|  |  | or |  |  |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{5 ~ ( b i i ) ~}$ | an explanation linking two from <br> (strength of magnetic) field <br> /force (1) <br> (depends on) distance from the <br> magnet (1) | (magnets) attract / <br> repel <br> force / field is weaker <br> when further away <br> (from magnet) or <br> reverse argument <br> lines of force are <br> further apart | (2) |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{5}$ (biii) | a description to include four <br> from <br> move brick towards the car (1) | (4) <br> change distance <br> between car and <br> brick |  |
|  | until car (just) starts to move <br> (1) <br> car/magnet (1) <br> repeat with 2 magnets (1) <br> compare distances (for one <br> magnet and for two magnets) <br> (1) | measure how close <br> car gets to the brick |  |
|  | detail about procedure (1) | how to attach second <br> magnet(s) |  |

Total marks for Question 5 = 9 marks

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{6 ( a )}$ | voltmeter should be moved (1) | voltmeter is in wrong <br> place / (re)connect <br> the voltmeter <br> allow 'voltage' for | (2) |
| 'voltmeter' in this |  |  |  |
| context |  |  |  |
| allow across X or |  |  |  |
| equivalent statement |  |  |  |
| answers may be seen |  |  |  |
| on the diagram |  |  |  |$~$| (to be) in parallel with the |
| :--- |
| resistor X (1) |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{6 ( b i )}$ | $0.9(\mathrm{v})$ | 0.90 <br> ignore units <br> ignore calculations | (1) |

| Question number | Answer | Additional guidance | Mark |
| :---: | :---: | :---: | :---: |
| 6 (bii) | substitution (1) $R=\frac{2.1}{0.041}$ <br> evaluation (1) $\mathrm{R}=51(.2)(\Omega)$ <br> (which is approx. $50(\Omega)$ ) | allow $(V)=0.041 \times 50$ $\mathrm{V}=2.05(\mathrm{v})$ <br> (which is approx. 2.1) <br> allow $\mathrm{R}=51(.2)(\Omega)$ with no working for 2 marks | (2) |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{6}$ (biii) | recall and substitution (1) |  | (2) |
|  | $(\mathrm{P})=2.1 \times 0.041$ |  |  |
|  | evaluation (1) | allow any value that <br> rounds to 0.086; e.g. |  |
|  |  | $0.0861(\mathrm{~W})$ <br> $0.09(\mathrm{~W})$ <br> award full marks for <br> the correct answer <br> without working <br> allow POT error for 1 <br> mark |  |
|  |  |  |  |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{6}$ (biv) | recall that effective <br> resistance = sum of <br> individual resistances (1) <br> (resistance =) $50+22$ <br> evaluation (1) <br> $72(\Omega)$ | $51+22$ | (2) |
|  |  | $73(\Omega)$ <br> award full marks for the <br> correct answer without <br> working |  |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{6 ( b v )}$ | substitution (1) |  | (2) |
|  | (E =) $3.0 \times 0.041 \times 2(\times 60)$ |  | accept values that <br> round to 15; e.g. <br> 14.76 <br> award full marks for |

Total marks for Question 6 = 11 marks

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{7 ( a )}$ | ac | (1) |  |
|  | B and D are incorrect because <br> they are not normal to the <br> surface <br> A is incorrect because the force <br> should act outwards |  |  |

| Question number | Answer | Additional guidance | Mark |
| :---: | :---: | :---: | :---: |
| 7(b) | $\begin{aligned} & \text { substitution (1) } \\ & \left(\mathrm{P}_{2}=\right) \frac{120 \times 2500}{1600} \\ & \text { evaluation (1) } \\ & 190(\mathrm{kPa}) \end{aligned}$ | award full marks for the correct answer without working <br> accept values that round to 190; | (2) |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{7 ( c )}$ | recall equation (1) | accept P = $\frac{\mathrm{F}}{\mathrm{A}}$ | (3) |
|  | pressure = force |  |  |
| subsa |  |  |  |
| (pressure =) $\frac{28}{2}$ | ignore powers of ten <br> errors for attempted <br> unit conversions | award full marks for <br> the correct answer <br> without working |  |

| Question number | I ndicative content | Mark |
| :---: | :---: | :---: |
| * 7 (d) | Answers will be credited according to candidate's deployment of knowledge and understanding of the material in relation to the qualities and skills outlined in the generic mark scheme. <br> The indicative content below is not prescriptive and candidates are not required to include all the material which is indicated as relevant. Additional content included in the response must be scientific and relevant. <br> - Gas particles are in (random) motion <br> - Particles hit sides of container / each other <br> - This produces (net) force on (sides of) container <br> - This causes a pressure (on the container) <br> - As volume increases the particles have more space to move <br> - This means that particles hit sides less frequently <br> - Smaller (net) force on sides of container <br> - Pressure decreases. <br> - Change in pressure (with increase in volume) is not linear <br> - Pressure never becomes zero | (6) |

| Level | Mark | Descriptor |
| :--- | :--- | :--- |
|  | 0 | Level 1 |
| - | No rewardable material. |  |
| Level 2 | $3-4$ | Demonstrates elements of physics understanding, some of <br> which is inaccurate. Understanding of scientific ideas lacks <br> detail. (AO1) |
| -Presents an explanation with some structure and <br> coherence. (AO1) |  |  |
| Level 3Demonstrates physics understanding, which is mostly <br> relevant but may include some inaccuracies. Understanding <br> of scientific ideas is not fully detailed and/or developed. <br> (AO1) |  |  |
| -Presents an explanation that has a structure which is <br> mostly clear, coherent and logical. (AO1) |  |  |

## Summary for guidance

| Level | Mark | Additional Guidance | General additional guidance - the decision within levels <br> e.g. - At each level, as well as content, the scientific coherency of what is stated will help place the answer at the top, or the bottom, of that level. |
| :---: | :---: | :---: | :---: |
|  | 0 | No rewardable material. |  |
| Level 1 | 1-2 | Additional guidance <br> simple description of how pressure is caused or how it changes | Possible candidate responses <br> Particles hit sides of container or <br> Pressure becomes less as volume increases |
| Level 2 | 3-4 | Additional guidance <br> description of how pressure is caused and how it changes | Possible candidate responses <br> Particles hit sides of container. This causes a (net) force on sides of container. <br> Pressure becomes less as volume increases |
| Level 3 | 5-6 | Additional guidance <br> Description of how pressure is caused, and why it changes in the way shown | Possible candidate responses <br> Particles hit sides of container. This causes a (net) force on sides of the container. <br> As volume increases the particles hit the sides less frequently so the pressure becomes less. |

Question 7 = 12 marks

| Question <br> number | Answer | Additional <br> guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{8 ( a ) ( i )}$ | an explanation linking any three <br> of the following : <br> use a measuring cylinder /beaker <br> or <br> use a eureka can /displacement <br> can/container with spout <br> (1) | give credit for <br> other acceptable <br> methods | (3) |
|  | (partly) fill measuring cylinder <br> /beaker (with water) note the <br> reading <br> or <br> fill (eureka) can to spout (1) | immerse piece of copper <br> (in water) (1) | note difference in readings of <br> water level (in measuring cylinder <br> /beaker) <br> or <br> collect water from spout in a <br> measuring cylinder /beaker <br> (1) |

| Question <br> number | Answer | Additional <br> guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{8 ( a ) ( i i )}$ | recall and substitution (1) <br> density $=\frac{\mathrm{m}}{\mathrm{V}}$ |  | (2) |
|  | (density=) $\frac{0.058}{6.5\left(\times 10^{-6}\right)}$ | evaluation (1) <br> $8.9 \times 10^{3}\left(\mathrm{~kg} / \mathrm{m}^{3}\right)$ | accept values that <br> round to 8900 e.g. <br> $8923\left(\mathrm{~kg} / \mathrm{m}^{3}\right)$ <br> or 9000 |

| Question <br> number | Answer | Additional <br> guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{8 ( b ) ( i )}$ | rearrangement (and substitution) <br> $(1)$ <br> $(\mathrm{c})=\underline{1050}$ <br> $0.058 \times 78$ | $\mathrm{c}=\underline{\Delta \mathrm{Q}}$ <br> $\mathrm{m} \times \Delta \theta$ <br> award 1 mark if 78 <br> seen | (2) |
|  | evaluation (1) <br> $230\left(\mathrm{~J} / \mathrm{kg}^{\circ} \mathrm{C}\right)$ | accept 232(J/kg $\left.{ }^{\circ} \mathrm{C}\right)$ | award full marks for <br> correct answer <br> without working. |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{8 ( b ) ( i i )}$ | any two of the following | ignore more accurate <br> measurements e.g. <br> thermometer, balance <br> etc. <br> ignore taking repeats | (2) |
|  | reduce heat loss from <br> water/insulate beaker/add <br> cover (1) <br> make the temperature rise <br> larger/use a larger piece of <br> copper/ use a smaller amount <br> of water (1) <br> (use)a stirrer (1) <br> account for heat gained by <br> glass beaker (1) <br> transfer the hot copper faster <br> (1) <br> use a different heating method <br> (1) <br> measure the temperature of <br> the boiling water (1) | start with colder water |  |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{8 ~ c ~}$ | a description including two <br> from: <br> put the coil in the water <br> (1) <br> (electric) current in the <br> wire/coil <br> (1) | allow electricity for electric <br> current | (2) |
|  | thermal energy <br> transferred (in the wire) <br> (1) | heat(energy) in wire / <br> temperature of wire <br> increases/ produces heat/ <br> gives energy/ to heat the <br> water |  |

Total marks for question 8 = 11 marks

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{9}$ (a) | (upward) force increases <br> with speed (1) <br> relationship is non-linear (1) | allow reverse argument <br> changing rate / <br> increases exponentially/ <br> initially no upward force <br> (until 1000 turns per <br> minute) | (2) |

| Question <br> number | Answer | Additional <br> guidance | Mark |
| :--- | :--- | :--- | :--- |
| 9(bi) | recall and substitution into (1) <br> gpe $=\mathrm{m} \times \mathrm{g} \times \mathrm{h}$ | (2) <br> evaluation (1) <br> $900(\mathrm{~J})$ | allow 90(J) for 1 <br> mark |
|  | award full marks for <br> the correct answer <br> without working |  |  |

| Question <br> number | Answer | Additional <br> guidance | Mark |
| :--- | :--- | :--- | :--- |
| 9bii | $900(\mathrm{~J})$ | allow ecf from bi | (1) |

| Question <br> number | Answer | Additional <br> guidance | Mark |
| :--- | :--- | :--- | :--- |
| 9biii | recall and substitution (1) <br> power = work done / time <br> taken | allow ecf from bi or <br> bii | (2) |
|  | power = ) 900 / 4 <br> evaluation (1) <br> $200(W)$ | 230(W) <br> 225(W) <br> award full marks for <br> the correct answer <br> without working |  |

| Question <br> number | I ndicative content | Mark |
| :--- | :--- | :--- |
| *9(c) | Answers will be credited according to <br> candidate's deployment of knowledge and <br> understanding of the material in relation to <br> the qualities and skills outlined in the <br> generic mark scheme. <br> The indicative content below is not <br> prescriptive and candidates are not required <br> to include all the material which is indicated <br> as relevant. Additional content included in <br> the response must be scientific and relevant. | $(6)$ |
|  | - Chemical energy stored in battery <br> - Transferred to KE in motors <br> - Transferred to GPE as it rises <br> - Thermal energy wasted (at each stage) <br> - Energy transferred to surroundings (at <br> each stage) |  |

| Level | Mark | Descriptor |
| :---: | :---: | :---: |
|  | 0 | - No rewardable material. |
| Level 1 | 1-2 | - Demonstrates elements of physics understanding, some of which is inaccurate. Understanding of scientific ideas lacks detail. (AO1) <br> - Presents an explanation with some structure and coherence. (AO1) |
| Level 2 | 3-4 | - Demonstrates physics understanding, which is mostly relevant but may include some inaccuracies. Understanding of scientific ideas is not fully detailed and/or developed. (AO1) <br> - Presents an explanation that has a structure which is mostly clear, coherent and logical. (AO1) |
| Level 3 | 5-6 | - Demonstrates accurate and relevant physics understanding throughout. Understanding of the scientific ideas is detailed and fully developed. (AO1) <br> - Presents an explanation that has a well-developed structure which is clear, coherent and logical. (AO1) |

Summary for guidance

| Level | Mark | Additional Guidance | General additional guidance - the <br> decision within levels <br> e.g. - At each level, as well as content, <br> the scientific coherency of what is stated <br> will help place the answer at the top, or <br> the bottom, of that level. |
| :--- | :--- | :--- | :--- |
| Level 1 | 1 1-2 | Additional guidance <br> Isolated fact e.g. a <br> description of least one <br> energy store <br> or <br> interpretation of diagram <br> without mentioning <br> energy stores or types | No rewardable material. <br> Cossible candidate responses <br> or <br> energy transferred from the battery to ene energy is lost at each stage. <br> the motors and then to the blades. |
| Level 2 | $3-4$ | Additional guidance <br> Description of at least <br> one energy transfer | $\underline{\text { Possible candidate responses }}$ <br> KE (of blades) is transferred to GPE (as <br> the drone rises) <br> or <br> (thermal) energy is transferred to the <br> surroundings |
| Level 3 | $5-6$ | Additional guidance <br> Description of two or <br> more energy transfers | Possible candidate responses <br> Chemical energy in the battery is <br> transferred to KE of the blades <br> AND <br> Thermal energy is wasted in the motors <br> when they turn. |

## Question 9 = 13 marks

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 0 ( a ) ( i )}$ | rub (the balloon) (1) <br> with a piece of cloth/hair/fur <br> (1) | use friction <br> allow on any <br> insulated object | (2) |

| Question <br> number | Answer | Additional <br> guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 0}$ <br> $\mathbf{( a ) ( i i )}$ | B Negative charge has been <br> added to the balloon | A is incorrect removing <br> negative charge would make <br> the balloon positively charged. <br> C and D are incorrect because <br> positive charge cannot be <br> moved | (1) |

| Question <br> number | Answer | Additional <br> guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 0 ( a ) ( \text { iii) }}$ | an explanation linking: <br> method of handling balloons <br> without discharging them <br> (1) | hang balloons up by <br> their strings | (3) |
|  | bring balloons near to each <br> other (1) | observation of repulsion (1) <br> they/balloons will <br> push away (from <br> each other) |  |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 0}$ (b)(i) | B |  | (1) |
|  |  |  |  |
|  | A and D are incorrect because <br> a negative charge cannot <br> induce a negative charge <br> C is incorrect because the disc <br> is insulated so negative charge <br> cannot be removed |  |  |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| 10 <br> (b)(ii) | an explanation linking: | electrons / negative charges |  |
| have flowed (1) |  |  |  |
| from the metal disc / to the |  |  |  |
| student / to earth/ground (1) |  |  |  |$\quad$| reject positive charge |
| :--- |
| moving for first mark |\(~\left(\begin{array}{l}(2) <br>

\hline\end{array}\right.\)

| Question <br> number | Answer | Additional <br> guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 0 ( b ) ( \text { iii) }}$ | at least three straight lines <br> joining disc and plastic (1) <br> audge by eye <br> ignore curved lines at <br> edge <br> plastic (1) from disc towards | (2) <br> do not award mark if <br> there are arrows in <br> both directions |  |
