# P Pearson Edexcel 

Mark Scheme (Results)

November 2020

Pearson Edexcel GCSE In Physics (1PH0) Paper 2H

## Edexcel and BTEC Qualifications

Edexcel and BTEC qualifications are awarded by Pearson, the UK's largest awarding body. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications websites at www.edexcel.com or www.btec.co.uk. Alternatively, you can get in touch with us using the details on our contact us page at www.edexcel.com/contactus.

## Pearson: helping people progress, everywhere

Pearson aspires to be the world's leading learning company. Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at:www.pearson.com/uk

## General Marking Guidance

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.

Mark schemes have been developed so that the rubrics of each mark scheme reflects the characteristics of the skills within the AO being targeted and the requirements of the command word. So for example the command word 'Explain' requires an identification of a point and then reasoning/justification of the point.
Explain questions can be asked across all AOs. The distinction comes whether the identification is via a judgment made to reach a conclusion, or, making a point through application of knowledge to reason/justify the point made through application of understanding. It is the combination and linkage of the marking points that is needed to gain full marks.
When marking questions with a 'describe' or 'explain' command word, the detailed marking guidance below should be consulted to ensure consistency of marking.

| Assessment <br> Objective |  | Command Word |  |
| :--- | :--- | :--- | :--- |
| Strand | Element | Describe | Explain |
| AO1* | An answer that combines the <br> marking points to provide a logical <br> description | An explanation that links <br> identification of a point with <br> reasoning/justification(s) as <br> required |  |
| AO2 | An answer that combines the <br> marking points to provide a logical <br> description, showing application of <br> knowledge and understanding | An explanation that links <br> identification of a point (by <br> applying knowledge) with <br> reasoning/justification (application <br> of understanding) |  |
| AO3 | 1 a and <br> $1 b$ | An answer that combines points of <br> interpretation/evaluation to <br> provide a logical description | An explanation that combines <br> identification via a judgment to <br> reach a conclusion via <br> justification/reasoning |
| AO3 | 2a and <br> 2b |  | An answer that combines the <br> marking points to provide a logical <br> description of the <br> plan/method/experiment |
| AO3 | 3a |  | An explanation that combines <br> identifying an improvement of the <br> experimental procedure with a <br> linked justification/reasoning |
| AO3 | $3 b$ |  |  |

*there will be situations where an AO1 question will include elements of recall of knowledge directly from the specification (up to a maximum of $15 \%$ ). These will be identified by an asterisk in the mark scheme.

| Question <br> number | Answer | Mark |
| :--- | :--- | :--- |
| $\mathbf{1 ( a )}$ | B | (1) |
|  | A,C and D are incorrect as the forces would cause the seesaw to turn |  |

| Question <br> number | Answer | Additional <br> guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 ( b )}$ | an explanation linking <br> distance from hinge/pivot <br> increased (1) <br> (therefore) <br> smaller force needed (to close <br> door) | P further from hinge <br> than Q | (2) |
| accept |  |  |  |
| the greater distance |  |  |  |
| gives greater |  |  |  |
| moment for 2 marks |  |  |  |$~\left(\begin{array}{l}\text { (b) }\end{array}\right.$

| Question number | Answer | Additional guidance | Mark |
| :---: | :---: | :---: | :---: |
| 1(c) | any correct moment (1) <br> $450 \times 0.50$ or 225 <br> or $0.80 \times \mathrm{F}_{2}$ <br> substitution into prin. of moment equation (1) <br> $450 \times 0.50=0.80 \times F_{2}$ <br> evaluation (1) <br> 280 (N) (for question at end) | allow $450 \times 0.3$ moment taken about B <br> allow statement of prin. of moments <br> accept numbers which round to 280 such as 281.25 award full marks for correct answer without working. | (3) |

| Question <br> number | Answer | Additional <br> guidance | Mark |
| :--- | :--- | :--- | :--- |
| 2(a)(i) | an explanation linking any three of <br> the following : <br> use a measuring cylinder/beaker <br> or <br> use a eureka can /displacement <br> can/container with spout <br> (1) <br> (partly)fill measuring <br> cylinder/beaker (with water) note <br> the reading <br> or <br> fill (eureka) can to spout (1) <br> immerse piece of copper <br> acceptable methods | (3) |  |
| (in water) (1) | note difference in readings of <br> water level (in measuring cylinder <br> /beaker) <br> or <br> collect water from spout in a <br> measuring cylinder /beaker <br> (1) | If no other marks <br> scored then allow 1 <br> mark for attempt to <br> measure volume <br> directly: <br> e.g. fill copper tube <br> with water, tip out <br> and measure <br> volume <br> or measure <br> dimension(s) of <br> copper tube |  |

| Question <br> number | Answer | Additional <br> guidance | Mark |
| :--- | :--- | :--- | :--- |
| 2(a)(ii) | recall and substitution (1) <br> density $=\frac{\mathrm{m}}{\mathrm{V}}$ |  | (2) |
|  | (density=) $\frac{0.058}{6.5\left(\times 10^{-6}\right)}$ | evaluation $(1)$ | $8.9 \times 10^{3}\left(\mathrm{~kg} / \mathrm{m}^{3}\right)$ |
|  |  | accept values that <br> round to 8900 e.g. <br> or $9002\left(\mathrm{~kg} / \mathrm{m}^{3}\right)$ | 8.9 to any other <br> power of ten gains 1 <br> mark |
|  |  | award full marks for <br> correct answer <br> without working. |  |

| Question number | Answer | Additional guidance | Mark |
| :---: | :---: | :---: | :---: |
| 2(b)(i) | Rearrangement (and substitution) <br> (1) $\text { (c) }=\frac{1050}{0.058 \times 78}$ <br> evaluation (1) <br> $230\left(\mathrm{~J} / \mathrm{kg}{ }^{\circ} \mathrm{C}\right)$ | $\begin{gathered} \mathrm{c}=\frac{\Delta \mathrm{Q}}{\mathrm{~m} \times \Delta \theta} \end{gathered}$ <br> award 1 mark if 78 seen <br> accept $232\left(\mathrm{~J} / \mathrm{kg}{ }^{\circ} \mathrm{C}\right)$ <br> award full marks for correct answer without working. | (2) |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| 2(b)(ii) | any two of the following | ignore more accurate <br> measurements e.g. <br> thermometer, balance <br> etc. <br> ignore taking repeats | (2) |
|  | reduce heat loss from <br> water/insulate beaker/add cover <br> (1) <br> make the temperature rise <br> larger/use a larger piece of <br> copper/ use a smaller amount of <br> water (1) <br> (use)a stirrer (1) <br> account for heat gained by glass <br> beaker (1) <br> transfer the hot copper faster <br> (1) | start with colder water |  |
| use a different heating method <br> (1) <br> measure the temperature of the <br> boiling water (1) |  |  |  |

Total marks for question 2=9 Physics

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| 3(a) | (upward) force increases <br> with speed (1) <br> relationship is non-linear (1) | allow reverse argument <br> changing rate / <br> increases exponentially/ (2) <br> initially no upward force <br> (until 1000 turns per <br> minute) | ( |

| Question <br> number | Answer | Additional <br> guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{3 ( b i )}$ | recall and substitution into (1) <br> gpe $=\mathrm{m} \times \mathrm{g} \times \mathrm{h}$ |  | (2) |
| (gpe) $=4.5 \times 10 \times 20$ |  |  |  |
| evaluation (1) |  |  |  |
| $900(\mathrm{~J})$ | allow 90(J) for 1 <br> mark | award full marks for <br> the correct answer <br> without working |  |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| 3bii | $900(\mathrm{~J})$ | allow ecf from bi | (1) |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| 3biii | recall and substitution (1) | allow ecf from bi or bii | (2) |
|  | power = work done / time taken <br> (power $=$ ) $900 / 4$ <br> evaluation (1) <br> $200($ W) | accept 230(W), <br> 225(W) <br> award full marks for <br> the correct answer <br> without working |  |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{4 ( a ) ( i )}$ | rub (the balloon) (1) | use friction | (2) |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| 4 (a)(ii) | B Negative charge has been <br> added to the balloon |  | (1) |
| A is incorrect removing negative <br> charge would make the balloon <br> positively charged. <br> C and D are incorrect because <br> positive charge cannot be <br> moved |  |  |  |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| 4(a)(iii) | an explanation linking: <br> method of handling balloons <br> without discharging them <br> (1) | hang balloons up by <br> their strings | (3) |
|  | bring balloons near to each <br> other (1) | observation of repulsion (1) <br> they/balloons will <br> push away (from each <br> other) |  |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| 4 (b)(i) | B | (1) |  |
|  |  | A and D are incorrect because <br> a negative charge cannot <br> induce a negative charge <br> C is incorrect because the disc <br> is insulated so negative charge <br> cannot be removed |  |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| 4 (b)(ii) | an explanation linking: | reject positive charge <br> moving for first mark | (2) |
| electrons / negative charges <br> move/ flow/transfer (1) | accept lose electrons | from the metal disc / to the <br> student / to earth/ground (1) |  |

$\left.\begin{array}{|l|l|l|l|}\hline \begin{array}{l}\text { Question } \\ \text { number }\end{array} & \text { Answer } & \text { Additional guidance } & \text { Mark } \\ \hline \text { 4(b)(iii) } & \begin{array}{l}\text { at least three straight lines } \\ \text { joining disc and plastic (1) } \\ \text { arrow(s) from disc towards } \\ \text { plastic (1) }\end{array} & \begin{array}{l}\text { judge by eye } \\ \text { ignore curved lines at } \\ \text { edge }\end{array} & \begin{array}{l}\text { (2) } \\ \text { do not award mark if } \\ \text { there are arrows in } \\ \text { both directions }\end{array}\end{array}\right\}$

Total marks for Question $4=11$

| Question <br> number | Answer | Mark |
| :--- | :--- | :--- |
| $\mathbf{5 ( a ) ( i )}$ | B | (1) |
|  | A,C and D are in the areas where the field lines are <br> further apart and the field is weaker |  |

| Question number | Answer | Additional guidance | Mark |
| :---: | :---: | :---: | :---: |
| 5 (b) | at least two concentric circles <br> (1) <br> arrows correct <br> (1) | separation of the circles is increasing | (2) |

| Question <br> number | Answer | Additional <br> guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{5 ~ c i}$ | substitution (1) <br> ( $\mathrm{F}=$ ) $1.2 \times 2.5 \times 0.06$ <br> evaluation (1) <br> $0.18(\mathrm{~N})$ | (2) |  |
|  |  | award full marks for <br> the correct answer <br> without working |  |

| Question <br> number | Answer | Additional guidance | Mark |
| :---: | :--- | :--- | :--- |
| 5(c)(ii) | a description to include <br> first finger, second finger and <br> thumb (of left-hand) held <br> mutually perpendicular (1) | award 1 mark for <br> attempt at mutually <br> perpendicular shown in a <br> diagram | (3) |
|  | first finger (is in the direction <br> of) magnetic field <br> OR <br> second finger (is in the) <br> direction of) current (1) <br> thumb (is in the) direction of <br> force / motion (1) | diagram relating thumb <br> and fingers to correct <br> quantities at right angle <br> gains 3 marks |  |

| Question <br> number | Answer | Additional <br> guidance | Mark |
| :---: | :--- | :--- | :--- |
| $\mathbf{5 ( c ) ( i i i ) ~}$ | (1) |  |  |
| arrow from roller towards contacts (1) |  |  |  |

Total marks for question5 =9

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| 6(a)(i) | 50.0 to $55.0(\mathrm{~mm})$ inclusive |  | (1) |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{6 ( a ) ( i i )}$ | a description including |  | (2) |
|  | note the original length (1) <br> note the final length and <br> subtract (1) |  |  |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{6 ( a ) ( i i i )}$ | any two from: <br> use a ruler with a <br> smaller/millimetre divisions (1) <br> use interim values of weight (1) <br> add more weights ( to increase <br> the range) (1) <br> move the ruler closer to the <br> spring (1) <br> use of pointer (1) <br> repeat and average (1) <br> add fixed values of <br> weights | (2) |  |
| eye level / no parallax |  |  |  |$\quad$|  |
| :--- |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{6 ( a ) ( i v )}$ | the coils are \{pushed together <br> /touching\} (1) |  | (1) |
| or | spring is fully compressed <br> /cannot be made shorter (1) |  |  |

| Question number | Answer | Additional guidance | Mark |
| :---: | :---: | :---: | :---: |
| 6 (b) | ```recall and substitution (1) 0.5 =k x 13(x 10-3) rearrangement (1) 0.5 evaluation (1) 38 (N/m)``` | $\mathrm{k}=\frac{\mathrm{F}}{\mathrm{x}}$ <br> allow 38.5 ( $\mathrm{N} / \mathrm{m}$ ) or 38.46 (N/m) or 39 ( $\mathrm{N} / \mathrm{m}$ ) <br> 0.04/0.038 ( $\mathrm{N} / \mathrm{m}$ ) gains 2 marks <br> 2958 (N/m) gains 1 mark ( $\mathrm{X}^{2}$ used in equation) <br> award full marks for the correct answer without working | (3) |

| Question number | Answer | Additional guidance | Mark |
| :---: | :---: | :---: | :---: |
| 6 (c) | $\begin{aligned} & \text { substitution (1) } \\ & 0.14=1 / 2 \times 175 \times x^{2} \\ & \text { rearrangement for } x^{2}(1) \\ & \left(x^{2}=\right) \frac{0.14 \times 2}{175} \text { or } \frac{0.14}{} \\ & \\ & \\ & \text { evaluation (1) } \\ & 0.04(\mathrm{~m}) \end{aligned}$ | substitution and rearrangement in either order $x^{2}=\frac{E}{\frac{1}{2} x k}$ <br> $1.6 \times 10^{-3}$ seen gains 2 marks 0.02(m) gains 2 marks 0.028 gains 1 mark <br> award full marks for the correct answer without working | (3) |

Total marks for question $6=12$

| Question <br> number | Answer |  | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{7 ( a ) ( i )}$ | C |  | (1) |
|  | A and B are incorrect because there is no current <br> when the magnet is station in the coil. <br> D is incorrect because there is always a current <br> when the magnet is moving in th coil |  |  |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{7 ~ ( a ) ( i i ) ~}$ | any two from <br> moving the magnet faster (1) <br> using a stronger magnet (1) <br> more turns/rotations on the <br> coil (1) | do not allow increase <br> size of coil | (2) |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{7 ~ ( b )}$ | an explanation linking in a <br> logical order any four of the <br> following:- <br> (alternating) current produces <br> (changing) magnetic field <br> (around coil)(1) | (4) |  |
|  | the coil is in a magnetic field <br> (of fixed magnets)(1) <br> (varying current in magnetic <br> field) produces a force (1) | magnetic fields <br> interact | the force on the coil /cone <br> (continuously) changes <br> direction (1) <br> the paper cone /coil vibrates/ <br> moves to and fro (1) |
| making the air <br> molecules (in the <br> cone) vibrate |  |  |  |

| Question <br> number | Answer | Additional <br> guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{7 ( c ) ( i )}$ | \{step up/increase\}(output) <br> voltage <br> (stepdown/ decrease\}(output) <br> current | (1) |  |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{7 ( c ) ( i i )}$ | substitution (1) | substitution and re- <br> arrangement in either <br> order | (3) |
|  | rearrangement (1) |  |  |
|  | (V $\mathrm{V}_{\mathrm{s}}=\frac{18}{26} \frac{230 \times 26}{18}$ | evaluation (1) <br> allow 332 (.2) (V) <br> allow answers <br> between322 (V) and <br> 333 (V) where <br> candidates have <br> truncated an <br> intermediate <br> calculation |  |

| Question <br> number | Answer | Additional <br> guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{8 ( a ) ( \mathbf { i } )}$ |  |  | (2) |
|  | (1) <br> voltmeter in parallel across resistor <br> second resistor in parallel (1) |  |  |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{8 ~ ( a ) ( i i ) ~}$ | potential difference/ voltage <br> (drop across resistors in <br> parallel) (1) <br> current (in the circuit )(1) | voltmeter reading | (2) |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{8 ( a ) ( \text { iii) }}$ | $1(\Omega)$ | one (ohm) | (1) |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| 8(a) (iv) | Comments to include: <br> the (overall) resistance <br> decreases as the number of <br> resistors (in parallel) increases <br> (1) <br> the relationship is non-linear <br> (1) | decreases at a <br> decreasing rate <br> the relationship is <br> inversely proportional <br> scores first 2 marks | (3) |
| any two relevant values from <br> the graph (1) |  |  |  |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{8 ( b ) ~ ( i ) ~}$ | recall and substitution (1) |  | (2) |
|  | $\mathrm{V}=0.20 \times 15$ <br> evaluation (1) <br> $3(\mathrm{~V})$ | $7(\mathrm{~V})$ gains 1 mark <br> (use of 15 + 20) | award full marks for <br> the correct answer <br> without working |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| 8(b) (ii) | addition and substitution (1) <br> $(\mathrm{P}=) 0.20^{2} \times 35$ <br> evaluation (1) <br> $1.4(\mathrm{~W})$ | (2) |  |

| Question <br> number | Answer | Mark |
| :--- | :--- | :--- |
| $\mathbf{9 ( a )}$ | B | (1) |
|  | A, C and D are incorrect because they all show a <br> resultant force which would cause the trolley to <br> accelerate |  |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| 9(b) | Scale drawing |  |  |
| two lines at right angles (1) | (4) |  |  |
|  | a correct scaling (for example <br> 10kN equivalent to 1 cm)/a <br> completed square or triangle(1) <br> diagonal in correct direction (1) <br> $28 \mathrm{kN} \mathrm{(1)}$ | judge by eye |  |

| Question number | I ndicative content | Mark |
| :---: | :---: | :---: |
| 9c* | Answers will be credited according to candidate's deployment of knowledge and understanding of the material in relation to the qualities and skills outlined in the generic mark scheme. <br> The indicative content below is not prescriptive, and candidates are not required to include all the material which is indicated as relevant. Additional content included in the response must be scientific and relevant. <br> A01 <br> Horizontal forces <br> - tension in the string/pull of the string <br> - tension is one of the horizontal forces acting on the wooden block <br> - friction between the table and the wooden block <br> - friction acts in the opposite direction to the tension <br> - friction opposes motion <br> - the force due to friction is equal to the force provided by the tension <br> - the forces are balanced /equal and opposite <br> - no resultant force, so the block moves at a constant (horizontal) velocity <br> Vertical forces <br> - (normal) reaction (force) upwards between the table and the wooden block <br> - contact force <br> - weight of block downwards <br> - the weight (force of gravity) and the (normal) reaction are equal and opposite / balanced <br> - the block does not move up or down <br> - tension caused by the force due to gravity on the weight <br> - vertical forces on the block do not affect horizontal velocity. <br> labels on the diagram should be considered when marking candidates do not have to indicate the forces as horizontal and vertical | (6) |

| Level | Mark | Descriptor |
| :---: | :---: | :---: |
|  | 0 | No rewardable material. |
| Level 1 | 1-2 | - Demonstrates elements of physics understanding, some of which is inaccurate. Understanding of scientific ideas lacks detail. (AO1) <br> - Presents an explanation with some structure and coherence. (AO1) |
| Level 2 | 3-4 | - Demonstrates physics understanding, which is mostly relevant but may include some inaccuracies. Understanding of scientific ideas is not fully detailed and/or developed. (AO1) <br> - Presents an explanation that has a structure which is mostly clear, coherent and logical. (AO1) |
| Level 3 | 5-6 | - Demonstrates accurate and relevant physics understanding throughout. Understanding of the scientific ideas is detailed and fully developed. (AO1) <br> - Presents an explanation that has a well-developed structure which is clear, coherent and logical. (AO1) |

| Level | Mark | Additional Guidance | General additional guidance - the decision within levels <br> e.g. - At each level, as well as content, the scientific coherency of what is stated will help place the answer at the top, or the bottom, of that level. |
| :---: | :---: | :---: | :---: |
|  | 0 | No rewardable material. |  |
| Level 1 | 1-2 | Additional guidance <br> Elements of physics present i.e. isolated knowledge of principles two unconnected statements from any section | Possible candidate responses <br> contact force <br> weight pulls block <br> friction <br> tension in string <br> weight acts downward <br> reaction |
| Level 2 | 3-4 | Additional guidance <br> Some knowledge of principles with a logical connection made in one section and statement from the other section <br> OR <br> Detailed knowledge of principles with logical connections made in one section | Possible candidate responses <br> There is friction between the table and the block and this opposes motion <br> weight of block acts downwards |
| Level 3 | 5-6 | Additional guidance <br> Detailed knowledge of principles with logical connections made in one section and statement from the other section | Possible candidate responses <br> Friction and tension are equal and opposite there is no resultant /no acceleration <br> The weight (of the block) and the(normal) reaction are equal and opposite |

| Question <br> number | Answer | Mark |
| :--- | :--- | :--- |
| $\mathbf{1 0 ( a )}$ | C | (1) |
|  | increases with depth |  |
|  |  |  |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| (b) (i) | substitution (1) <br> (p) $=1000 \times 10 \times 0.200$ <br> evaluation of pressure <br> difference (1) <br> 2000 <br> final evaluation <br> 103000 (Pa) | (1) | (3) <br> accept e.c.f for <br> addition of atmospheric <br> pressure seen for <br> lmark <br> award 1 mark for <br> selecting correct <br> equation if no other <br> mark awarded |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 0 ( b ) ( i i )}$ | an explanation linking use of <br> $P=h \times \rho \times g(1)$ | P/pressure, $\rho /$ density <br> (and g/gravitational <br> field strength) are <br> constant/the same | Area does not affect <br> result <br> h/height of water is <br> independent of area |
| no area in the equation (1) |  |  |  |

| Question number | I ndicative content | Mark |
| :---: | :---: | :---: |
| 10(c)* | Answers will be credited according to candidate's deployment of knowledge and understanding of the material in relation to the qualities and skills outlined in the generic mark scheme. <br> The indicative (example) content below is not prescriptive and candidates are not required to include the material which is indicated as relevant. Additional content included in the response must be scientific and relevant. <br> AO2 <br> Pressure <br> - difference in pressure between top and bottom of boat <br> - top pressure is atmospheric <br> - pressure on bottom of boat atmospheric plus that due to depth of water. <br> Unloaded boat <br> - density of boat less than density of water <br> - floating objects are partially immersed <br> - floating objects displace fluid / water <br> - upthrust is due to the difference in pressure <br> - upthrust is equal to the weight of the boat <br> - upthrust is equal to the weight of fluid / water displaced <br> Boat with load <br> - the weight/density of the boat increases because of the load added <br> - more upthrust is needed to balance the extra weight of the boat <br> - more water has to be displaced to provide the upthrust <br> - when the boat floats lower in the water it displaces more water <br> - the weight of water displaced is the upthrust and is equal to the weight of the boat | (6) |

| Level | Mark | Descriptor |
| :--- | :--- | :--- |
|  | 0 | No rewardable material. |
| Level 1 | $1-2$ | The explanation attempts to link and apply knowledge and <br> understanding of scientific ideas, flawed or simplistic <br> connections <br> made between elements in the context of the question. <br> Lines of reasoning are unsupported or unclear. (AO2) |
| Level 2 | $3-4$ | The explanation is mostly supported through linkage and <br> application of knowledge and understanding of scientific <br> ideas, some logical connections made between elements in <br> the context of the question. <br> Lines of reasoning mostly supported through the application <br> of relevant evidence. (AO2) |
| Level 3 | $5-6$ | The explanation is supported throughout by linkage and <br> application of knowledge and understanding of scientific <br> ideas, logical connections made between elements in the <br> context of the question. <br> Lines of reasoning are supported by sustained application of <br> relevant evidence. (AO2) |

| Level | Mark | Additional Guidance | General additional guidance - the <br> decision within levels <br> e.g. - At each level, as well as content, <br> the scientific coherency of what is stated <br> will help place the answer at the top, or <br> the bottom, of that level. |
| :--- | :--- | :--- | :--- |
| Level 1 | 1 1-2 | Additional guidance | Aossible candidate responses <br> Elements of physics <br> present i.e. isolated <br> knowledge of principles <br> two unconnected <br> statements from any <br> section |
| Level 2 | $3-4$ | pressure difference <br> upthrust <br> water displaced <br> displacement |  |
| Additional guidance <br> Some knowledge of <br> principles with a logical <br> connection made in one <br> section and statement <br> from one other section | Possible candidate responses <br> upthrust and weight are balanced <br> /upthrust is equal to the weight of the <br> boat |  |  |
| when load added upthrust increases |  |  |  |
