GCSE Chemistry A (Gateway Science)

J248/03 C1-C3 and C7 Higher (Higher Tier)

Question Set 26

1 A student is separating a mixture of three substances, **A**, **B** and **C**.

Look at the table. It gives information about these substances.

Substance	State at room temperature	Melting point (°C)	Boiling point (°C)	Solubility in water
A	liquid	0	100	soluble
B	liquid	–117	78	soluble
C	solid	1535	2750	insoluble

A and **B** mix together completely.

(a)* Suggest how the student can separate the mixture to get pure samples of substances **A**, **B** and **C**.

Explain in detail how each method works. **[6]**

(b) The student has separated a **pure** sample of substance **B** from the mixture.

Suggest how the student can check that the sample of substance **B** is pure. **[2]**

Measure its melting point and if pure, the melting point will be sharp.

Total Marks for Question Set 26: 8

1. a) - Use fractional distillation to separate substance A from substance B.
- Substance B will come off first as it has lowest boiling point because B has weaker intermolecular forces than A.
- Fractional distillation works as substances A and B have different boiling points
- Continue heating the mixture to boil off the substance B next leaving insoluble substance C.
- Filter mixture to remove substance C.
- Substance C can be washed with water and dried between filter paper.

The Periodic Table of the Elements

(1)	(2)											(3)	(4)	(5)	(6)	(7)	(0)
