Question Set 1

1. A circle with centre C has equation $x^2 + y^2 + 8x - 2y - 7 = 0$.

Find

(a) the coordinates of C , [2]

(b) the radius of the circle. [1]

2 Solve the equation $|2x - 1| = |x + 3|$. [3]

3 **In this question you must show detailed reasoning.**

A gardener is planning the design for a rectangular flower bed. The requirements are:

- the length of the flower bed is to be 3 m longer than the width,
- the length of the flower bed must be at least 14.5 m,
- the area of the flower bed must be less than 180 m^2 .

The width of the flower bed is x m.

By writing down and solving appropriate inequalities in x , determine the set of possible values for the width of the flower bed. [6]

4

In this question you must show detailed reasoning.

The functions f and g are defined for all real values of x by

$$f(x) = x^3 \quad \text{and} \quad g(x) = x^2 + 2.$$

(a) Write down expressions for

(i) $fg(x)$, [1]

(ii) $gf(x)$. [1]

(b) Hence find the values of x for which $fg(x) - gf(x) = 24$. [6]

- 5 (a) Use the trapezium rule, with two strips of equal width, to show that

$$\int_0^4 \frac{1}{2+\sqrt{x}} dx \approx \frac{11}{4} - \sqrt{2}. \quad [5]$$

- (b) Use the substitution $x = u^2$ to find the exact value of

$$\int_0^4 \frac{1}{2+\sqrt{x}} dx. \quad [6]$$

- (c) Using your answers to parts (a) and (b), show that

$$\ln 2 \approx k + \frac{\sqrt{2}}{4},$$

where k is a rational number to be determined. [2]

- 6 It is given that the angle θ satisfies the equation $\sin\left(2\theta + \frac{1}{4}\pi\right) = 3 \cos\left(2\theta + \frac{1}{4}\pi\right)$.

- (a) Show that $\tan 2\theta = \frac{1}{2}$. [3]

- (b) Hence find, in surd form, the exact value of $\tan \theta$, given that θ is an obtuse angle. [5]

- 7 The gradient of the curve $y = f(x)$ is given by the differential equation

$$(2x-1)^3 \frac{dy}{dx} + 4y^2 = 0$$

and the curve passes through the point $(1, 1)$. By solving this differential equation show that

$$f(x) = \frac{ax^2 - ax + 1}{bx^2 - bx + 1},$$

where a and b are integers to be determined. [9]
