Formula list

Area and volume formulae

Where r is the radius of the sphere or cone, l is the slant height of a cone and h is the perpendicular height of a cone:

Curved surface area of a cone = πrl Surface area of a sphere = $4\pi r^2$ Volume of a sphere = $\frac{4}{3}\pi r^3$ Volume of a cone = $\frac{1}{3}\pi r^2h$

Kinematics formulae

Where *a* is constant acceleration, *u* is initial velocity, *v* is final velocity, *s* is displacement from the position when t = 0 and *t* is time taken:

v = u + at $s = ut + \frac{1}{2}at^{2}$ $v^{2} = u^{2} + 2as$

1. A sign in a shop shows the cost of sending letters and parcels.

What are you sending?	Class	Cost
Small lattar	1st	67p
	2nd	58p
Large letter	1st	£1.01
	2nd	79p
Small parcel	1st	£3.45
	2nd	£2.95
Madium paraal	1st	£5.75
	2nd	£5.05

Customers can choose 1st or 2nd class post for different sizes of letter or parcel.

(a)	What is the cost of sending 5 small letters, using 1st class post?	[1]
(b)	Helen always uses first class post. She makes a large letter into a small letter by folding it in half.	
	How much money does this save?	[2]
(0)	Drad condex	
(C)	 3 small parcels using 2nd class post, 2 medium parcels using 1st class post. 	
	How much does Brad pay to send all 5 parcels?	[2]
	Brad pays £	

 (a) Emile is given £8.12 pocket money every week. How much pocket money is Emile given in a whole year? [1] (b) For this year, Catrin is given £7.35 pocket money every week. (i) How much pocket money is Catrin given in February? [2] (ii) Catrin multiplies the total for February by 12. This method will not give the correct amount for the whole year. Why not? [1] (c) Each morning, Aled is given 95p pocket money. He saves all his pocket money from 1st February until the 15th March. Will Aled have saved enough money to pay £40 for a concert ticket on the evening of the 15th March? You must show all your working. [3] 		e are: •	28 days in February, 52 weeks in a year.	
How much pocket money is Emile given in a whole year? [1] (b) For this year, Catrin is given £7.35 pocket money every week. (i) How much pocket money is Catrin given in February? [2] (ii) How much pocket money is Catrin given in February? [2] (ii) Catrin multiplies the total for February by 12. [1] This method will not give the correct amount for the whole year. [1] (vhy not? [1] (c) Each morning, Aled is given 95p pocket money. [1] He saves all his pocket money from 1st February until the 15th March. [1] Will Aled have saved enough money to pay £40 for a concert ticket on the evening of the 15th March? [3] You must show all your working. [3]	(a)	Emil	e is given £8.12 pocket money every week.

3.	(a)	(i)	Simplify $9a - 1 - 6a + 8$.	[2]
		(ii)	Expand $3(x + 2)$.	[2]
	(b)	Solv (i)	we each of the following. x + 6 = 15	[1]
		 (ii)	$\frac{y}{7} = 6$	[1]
	(C)	v = v	u + at	
		Find	v when $u = -2$, $a = 6$ and $t = 3$.	[2]

4. (a) Estate agents help people sell their houses. They charge people for the help that they provide.

> Bilal plans to sell his house for £146000. He has a choice of these two estate agents:

Blue Blocks Estate Agent

Fixed Charge £1420 + 20% VAT

Sell 'em Fast Estate Agent

Charge 1.25% of the selling price

[4]

Bilal wants to pay as little as possible to the estate agent.

Which estate agent should Bilal choose? You must show all your working.

Bilal should choose

(b) Stamp duty is a tax that is paid when houses are purchased (bought).

For houses purchased up to £925000, the stamp duty is calculated as follows:

- 0% on the first £125000 of the purchase price, •
- •
- 2% on the next £125000 of the purchase price, 5% on the next £675000 of the purchase price. •

An example to calculate the stamp duty on a house with a purchase price £275000.

Example House purchase	ed for £275000, the s	stamp duty is ca	alculated as follows:
0% 2% 5%	6 on the first 6 on the next 6 on the next	£125000 £125000 £ 25000	£ 0 £2500 £1250
То	tal stamp duty on	£275000	£3750

Mr Evans is asked to pay stamp duty of £12000 when he buys a new house. He pays £380 000 for his new house.

_

[3]

Is the stamp duty he is asked to pay correct? You must show all your working.

5. The table below gives information from the Highway Code on stopping distances for cars.

Remember 50 mph is 80 km/h.

The stopping distances given in the Highway Code assume good driving conditions and alert drivers.

When a driver is tired and the road is wet, the thinking distance increases by 30% and the braking distance increases by 20%.

A tired driver travels at 64 km/h in wet driving conditions.

 Calculate their stopping distance in metres.
 [4]

6. (a) In Queenbridge, the mean daily snowfall for a week was 1.6 cm.
 If there had been 1 cm more snowfall on each day, what would the mean daily snowfall have been?

(b) In Sansburg, the snowfall for each of the first 10 days in January was measured. The results are summarised in the table below. Number of days Daily snowfall, s in cm 4 $1.5 \leq s < 2.5$ 2 $2.5 \leq s < 3.5$ $3.5 \leq s < 4.5$ 1 $4.5 \leq s < 5.5$ 0 $5.5 \leq s < 6.5$ 3 Calculate an estimate for the mean daily snowfall for these 10 days. [4] During the first 5 days of February, the mean snowfall in Awezell was 4.7 cm. On 6th February the snowfall was 23.9 cm. (C) Calculate the mean snowfall for the first 6 days of February. [3]
