

Additional Assessment Materials

Summer 2021

Pearson Edexcel GCE A Level Physics

Topic 8: Electric Fields

Test 1

(Public release version)

## Pearson: helping people progress, everywhere

Pearson aspires to be the world's leading learning company. Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at: [www.pearson.com/uk](http://www.pearson.com/uk)

Additional Assessment Materials, Summer 2021

## General guidance to Additional Assessment Materials for use in 2021

### Context

- Additional Assessment Materials are being produced for GCSE, AS and A levels (with the exception of Art and Design).
- The Additional Assessment Materials presented in this booklet are an **optional** part of the range of evidence teachers may use when deciding on a candidate's grade.
- 2021 Additional Assessment Materials have been drawn from previous examination materials, namely past papers.
- Additional Assessment Materials have come from past papers both published (those materials available publicly) and unpublished (those currently under padlock to our centres) presented in a different format to allow teachers to adapt them for use with candidate.

### Purpose

- The purpose of this resource is to provide qualification-specific sets/groups of questions covering the knowledge, skills and understanding relevant to this Pearson qualification.
- This document should be used in conjunction with the mapping guidance which will map content and/or skills covered within each set of questions.
- These materials are only intended to support the summer 2021 series.

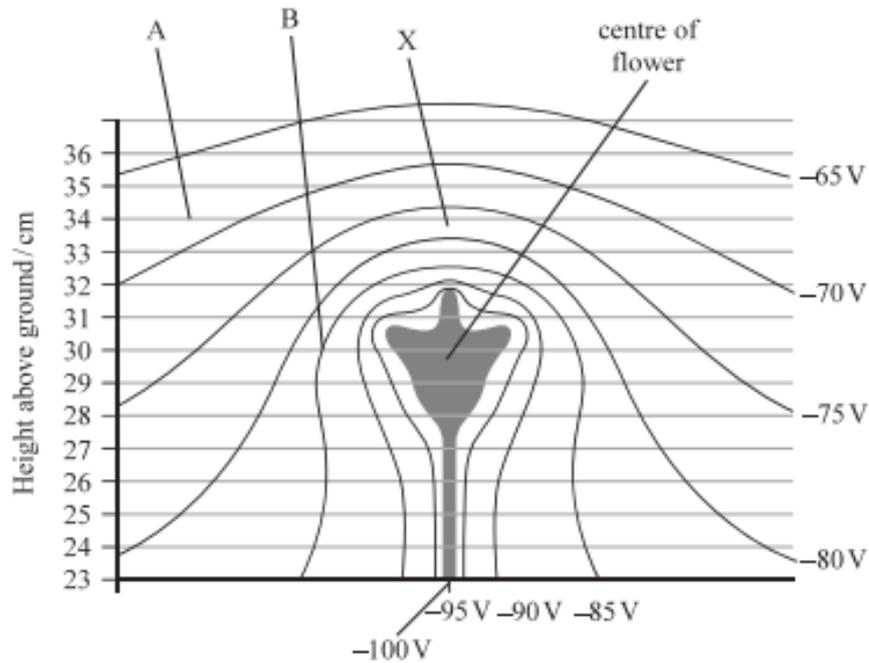

1

13 Some flowers are negatively charged and surrounded by an electric field. This helps to attract bees.

(a) State what is meant by an electric field.

(1)

(b) The diagram shows lines of equipotential surrounding a flower.

(i) Determine the electric field strength at X.

(3)

Electric field strength at X = .....

(ii) Draw the electric field line between point A and point B on the diagram. (2)

(iii) An equation for electric potential  $V$  is

$$V = \frac{Q}{4\pi\epsilon_0 r}$$

This applies to a radial field.

Deduce whether the electric field in the region directly above the flower is radial. You should take values from the diagram. A graphical method is not required. (3)

.....

.....

.....

(c) A bee has short hairs which are thought to carry charge. State how the bee might use this to detect the electric field of a flower. (1)

.....

.....

(d) When the bee is collecting nectar from the plant, the electric field strength decreases. It is thought that this warns other bees that the nectar supply is low. State the effect of a decreased electric field strength on the equipotential lines. (1)

.....

.....

---

(Total for Question 13 = 11 marks)

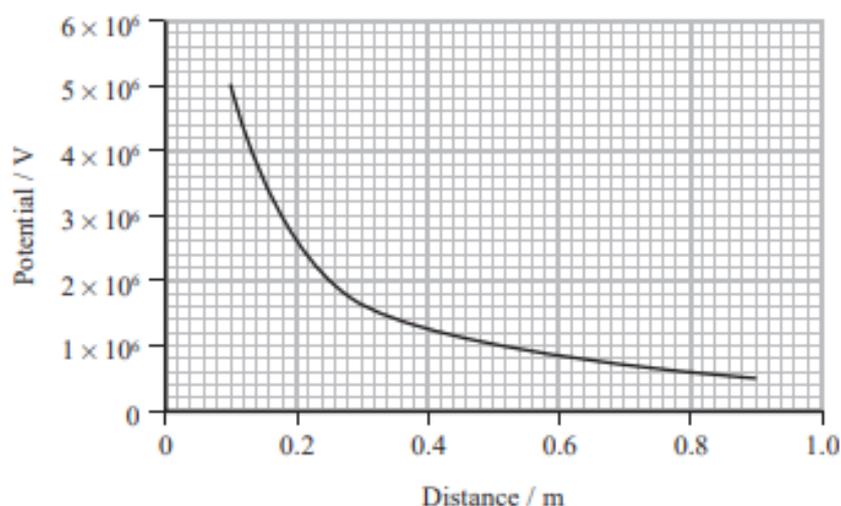

2

16 (a) Sketch the electric field around a positive point charge.

(3)

(b) The graph shows how potential varies with distance from the centre of a charged sphere.

Air molecules will be ionised if the electric field strength exceeds  $3 \times 10^6 \text{ V m}^{-1}$ .

Deduce whether air molecules will be ionised at a distance of 30 cm from the centre of this sphere.

(4)

- (c) A magician did a trick which he claimed was the most dangerous ever. He positioned himself midway between two charged spheres which were separated by a distance of about two metres. Each sphere was charged to a potential that would cause ionisation at a distance of one metre. He wore a protective suit of chain mail and a helmet consisting of a metal cage. The protective suit and helmet were earthed to a potential of 0 V.

A scientist said “there is no danger in this and I would happily do it tomorrow”.

Explain whether this statement is justified.
