Question Set 7

- 1 (a) Fig. 20.1 shows a positively charged metal sphere and a negatively charged metal plate.

Fig. 20.1

On Fig. 20.1, draw a minimum of **five** electric field lines to show the field pattern between the sphere and the plate. [2]

- (b) Define *electric potential* at a point in space.

[1]

- (c) A metal sphere is given a positive charge by connecting its surface briefly to the positive terminal of a power supply. The electric potential at the surface of the sphere is + 5.0 kV. The sphere has radius 1.5 cm.

- (i) Show that the charge Q on the surface of the sphere is $8.3 \times 10^{-9} \text{ C}$.

[2]

- (ii) Fig. 20.2 shows the charged sphere from (i) suspended from a nylon thread and placed between two oppositely charged vertical plates.

Fig. 20.2 (not to scale)

The weight of the sphere is 1.7×10^{-2} N. The string makes an angle of 4.0° with the vertical.

1. Show that the electric force on the charged sphere is 1.2×10^{-3} N. [1]
2. Calculate the uniform electric field strength E between the parallel plates.

$E = \dots\dots\dots \text{NC}^{-1}$ [2]
