Question Set 38

1

Amir investigates how insulation affects the rate of cooling. He writes down his method.

1. Fill a metal tin with water at 80 °C.
2. Wait for 10 minutes.
3. Measure the new temperature and write it down.
4. Repeat the experiment for each of these types of insulation:

Experiment	Insulation
A	None
B	1 layer of aluminium foil
C	1 layer of bubble wrap
D	3 layers of bubble wrap
E	1 layer of bubble wrap and 1 layer of aluminium foil

- (a) Predict which experiment will cool down the slowest. Explain your answer. [2]
- (b) Amir's teacher reads his method. The teacher says that the method is not detailed enough to make the experiment **reproducible**. [2]
- (i) Explain the meaning of the word **reproducible**. [2]
- (ii) Give **one** piece of additional information that you would need to **reproduce** Amir's experiment. [1]
