J259/02 Depth in physics (Foundation Tier)

Question Set 10

1 This question is about static electricity.

Jack rubs a rubber balloon with a dry cloth. The balloon becomes negatively charged and the cloth becomes positively charged.

He hangs the negatively charged balloon from a long piece of string. The balloon hangs vertically.

He now brings the positively charged cloth close to the balloon. The balloon now hangs at an angle to the vertical.

(a) What is the name of the **field** that surrounds the charged balloon and cloth?

Put a **ring** around the correct answer.

electric electromagnetic gravitational magnetic

[1]

(b) Explain why the balloon no longer hangs vertically.

The balloon is attracted to the cloth due to opposite charges.

[2]

(c) Jack makes the following comment to explain the charges on the balloon and the cloth.

Jack

The balloon has picked up **atoms** from the cloth.
The cloth has picked up **protons** from the balloon.

Is Jack correct?

Yes

No

Explain your choice.

Only the electrons move.

[2]

Total Marks for Question Set 10: 5
