How is magnification calculated?

How is magnification calculated?

Magnification =

Size of image / Size of object

What is the function of a stage micrometer?

What is the function of a stage micrometer?

It can be used to calibrate an eyepiece graticule to make measurements.

Why are lines on either side of the specimen on the slide drawn using a wax pencil?

Why are lines on either side of the specimen on the slide drawn using a wax pencil?

To prevent the dye from spreading.
