What is the widest structure observed in the heart?

What is the widest structure observed in the heart?

The aorta.

What is an observable feature that differentiates arteries and veins?

What is an observable feature that differentiates arteries and veins?

Arteries have thicker walls than veins.  
Veins have a larger lumen and valves.

What is an observable difference between the left and right ventricles?

What is an observable difference between the left and right ventricles?

The left ventricle has a thicker wall than the right.

Which structures can be observed  
between the atria and ventricles?

Which structures can be observed between the atria and ventricles?

Valves.
