UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS

GCE Advanced Subsidiary Level and GCE Advanced Level

MARK SCHEME for the October/November 2010 question paper

for the guidance of teachers

9700 BIOLOGY

9700/42 Paper 4 (A2 Structured Questions), maximum raw mark 100

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

• CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the October/November 2010 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

UNIVERSITY of CAMBRIDGE International Examinations

Page 2	Mark Scheme: Teachers' version	Syllabus	Paper
	GCE AS/A LEVEL – October/November 2010	9700	42

Mark scheme abbreviations:

• •	separates marking points
/	alternative answers for the same point
R	reject
Α	accept (for answers correctly cued by the question or guidance on the mark scheme)
AW	alternative wording (where responses may vary more than usual)
underline	actual word given must be used by the candidate (grammatical variants excepted)
max	indicates the maximum number of marks that can be given

ora or reverse argument

Pa	ge 3	3 Mark Scheme: Teachers' version Syllabus			
		GCE AS/A LEVEL – October/November 2010	9700	42	
(a)	1	mallard numbers have increased and the others have dec	reased :		
()		decrease due to	,		
	2	pesticides / pollution / fertilisers ;			
	3	change in temperature or pH of water ;			
	4	lack of <u>named</u> food source ;			
	5	increased competition / AW ;			
	6	direct human interference on lake ; e.g. fishing / sailing etc not related to marking point 2	C		
	7	<i>mallard increase due to</i> doesn't eat, insects / molluscs / fish ;			
	8	less other birds so less competition ;		[4 max	
(b)	1	cultural / aesthetic / leisure, reasons ;			
	2	moral / ethical, reasons ; e.g. right to exist / prevent extinc	tion		
	3	resource material ; e.g. wood for building / fibres for clothe humans	es / food for		
	4	ecotourism ;			
	5	economic benefits;			
	6	ref. resource / species, may have use in future / AW; e.g.	medical use		
	7	maintains, food webs / food chains ; A descri	ption		

- 8 nutrient cycling / protection against erosion ;
- 9 climate stability ;
- 10 maintains, large gene pool / genetic variation ;

[4 max]

[Total: 8]

	Page 4		Page 4 Mark Scheme: Teachers' version Syllabus		Paper	
		3.		GCE AS/A LEVEL – October/November 2010	9700	42
2	(a)	(i)	1	penicillin inhibits, enzyme / peptidase ;		
			2	blocks / alters shape of, active site ;		
			3	peptidoglycan chains cannot link up / stops cross-lin	nks forming ;	
			4	cell wall weaker / AW;		
			5	turgor of cell not resisted (by cell wall) / AW $;$		
			6	cell / wall / bacterium, bursts ;		[3 max]
		(ii)	an	y two from		
			1	viruses do not have cell wall;		
			2	viruses do not have cytoplasm ;		
			3	viruses do not have peptidoglycan ;		
			4	viruses do not have peptidase ;		[2 max]
	(b)	1		no <i>ut antibiotic</i> Thers of both wild-type and mutant strains, increase /	hardly changes ;	
		2		<i>antibiotic</i> nbers of both wild-type and mutant strains decrease ;		
		3	mut	ant strains decrease more than wild-type ; A faste this subsur	er mes marking point 2	
		4	afte	r 24h, wild-type plateaus and mutant strain continues	to decrease ;	
		5	blue red	comparative figures at any <u>one</u> time ; <i>ignore unit</i> e with blue with red with blue – with antibiotic	ts for bacteria	[4 max]

Pag	e 5		Mark Scheme: Teachers' version	Syllabus	Paper
			GCE AS/A LEVEL – October/November 2010	9700	42
(c)	(i)	1	changes in, <u>base / nucleotide</u> , sequence ; A named e.g. substitution	l change	
		2	alters, triplet code / codon ;		
		3	enzyme has different, primary structure / amino acid	sequence;	
		4	enzyme has different, 3D structure / tertiary structure	/ active site ;	[2 max
	(ii)	re	d and blue with antibiotic		
		1	wild-type bacteria can produce glucans or mutant bacteria produce less glucans ;		
		2	glucans bind with antibiotic;		
		3	wild-type more resistant to antibiotic or mutant bacte antibiotic ;	ria less resistant to	[2 max
(d)	1	ant	ibiotic, is selective agent / provides selective pressure	;	
	2	res	istant bacteria, survive / reproduce ;		
	3	pas	ss <u>allele</u> for resistance to offspring ;		
	4	free	quency of <u>allele</u> in population increases ;		[3 max
					[Total: 16

	Page 6		Mark Scheme: Teachers' version Syllabus	Paper		
	,		GCE AS/A LEVEL – October/November 2010 9700			
3	(a)	1	to give <u>superovulation</u> ;			
		2	follicle <u>s</u> or oocyte <u>s</u> , mature or develop, at the <u>same time</u> ; <i>ignore grow</i>			
		3	to prepare uterus for implantation ;	[2 max]		
	(b)	1	germinal epithelial cell divides by mitosis;			
		2	giving oogonia ;			
		3	primary oocyte divides by meiosis I (to give a secondary oocyte) ;			
		4	idea of diploid to haploid	[3 max]		
	(c)		<i>vantage</i> sure sperm enters oocyte / select (visibly) healthy sperm ;			
			advantage needed parts of sperm enter producing unwanted effects			
		car	nnot tell whether a chosen sperm is genetically suitable ;	[2]		
				[Total: 7]		
4	(a)	1	binds to receptors (on liver cell membranes);			
		2 conversion of glucose to glycogen / glycogenesis;				
		3 (because) insulin activates enzyme ; e.g. glucokinase / phosphofructokinase / glycogen synthase				
		4	increased use of glucose in respiration;			
		5	increased uptake of glucose / increased permeability to glucose (of liver cells);	[3 max]		
	(b)	(i)	1 mRNA (found in β cells) is only from gene coding for insulin / AW ;			
			2 large numbers (of mRNA coding for insulin);			
			3 (whereas) DNA has all genes;			
			4 (so) restriction enzymes needed ;	[2 max]		

GCE AS/A LEVEL - October/November 2010 9700 42 (ii) 1 cut plasmid (DNA) ; 2 at specific, base sequence / site ; 3 2 at specific, base sequence / site ; 3 leaving sticky ends (that will join with insulin gene) ; [2 m. (c) (i) all statements must be comparative inhaled (accept ora for injected) 1 insulin concentration rises more rapidly when inhaled ; 2 1 insulin concentration rises more rapidly when inhaled ; 2 higher peak ; 3 falls, more rapidly / earlier ; 4 (after 150 mins) lower (than injected) ; 5 use of comparative figures ; figures for both at one time [3 m. (ii) 1 glucose conc. is linked to insulin conc. ; inhaled (accept ora for injected) 2 (initially) glucose falls because insulin conc. rises ; <i>this subsumes marking point 1</i>	-
 2 at specific, base sequence / site; 3 leaving sticky ends (that will join with insulin gene); [2 m (c) (i) all statements must be comparative inhaled (accept ora for injected) 1 insulin concentration rises more rapidly when inhaled; 2 higher peak; 3 falls, more rapidly / earlier; 4 (after 150 mins) lower (than injected); 5 use of comparative figures; figures for both at one time [3 m. (ii) 1 glucose conc. is linked to insulin conc. ; inhaled (accept ora for injected) 2 (initially) glucose falls because insulin conc. rises; 	-
 3 leaving sticky ends (that will join with insulin gene); [2 m. (c) (i) all statements must be comparative inhaled (accept ora for injected) insulin concentration rises more rapidly when inhaled; higher peak; falls, more rapidly / earlier; (after 150 mins) lower (than injected); use of comparative figures; figures for both at one time [3 m. (ii) 1 glucose conc. is linked to insulin conc.; inhaled (accept ora for injected) (initially) glucose falls because insulin conc. rises; 	-
 (c) (i) all statements must be comparative inhaled (accept ora for injected) 1 insulin concentration rises more rapidly when inhaled; 2 higher peak; 3 falls, more rapidly / earlier; 4 (after 150 mins) lower (than injected); 5 use of comparative figures; figures for both at one time [3 million] (ii) 1 glucose conc. is linked to insulin conc. ; inhaled (accept ora for injected) 2 (initially) glucose falls because insulin conc. rises; 	-
 inhaled (accept ora for injected) 1 insulin concentration rises more rapidly when inhaled; 2 higher peak; 3 falls, more rapidly <i>l</i> earlier; 4 (after 150 mins) lower (than injected); 5 use of comparative figures; <i>figures for both at one time</i> [3 million] 1 glucose conc. is linked to insulin conc.; <i>inhaled (accept ora for injected)</i> 2 (initially) glucose falls because insulin conc. rises; 	nax]
 3 falls, more rapidly / earlier; 4 (after 150 mins) lower (than injected); 5 use of comparative figures; figures for both at one time [3 million] 1 glucose conc. is linked to insulin conc.; inhaled (accept ora for injected) 2 (initially) glucose falls because insulin conc. rises; 	าax]
 4 (after 150 mins) lower (than injected); 5 use of comparative figures; <i>figures for both at one time</i> [3 million] 1 glucose conc. is linked to insulin conc.; <i>inhaled (accept ora for injected)</i> 2 (initially) glucose falls because insulin conc. rises; 	າax]
 5 use of comparative figures; figures for both at one time [3 m. (ii) 1 glucose conc. is linked to insulin conc.; inhaled (accept ora for injected) 2 (initially) glucose falls because insulin conc. rises ; 	าax]
 (ii) 1 glucose conc. is linked to insulin conc. ; <i>inhaled (accept ora for injected)</i> 2 (initially) glucose falls <u>because</u> insulin conc. rises ; 	nax]
<i>inhaled (accept ora for injected)</i> 2 (initially) glucose falls <u>because</u> insulin conc. rises ;	
2 (initially) glucose falls because insulin conc. rises;	
3 glucose conc. falls lower <u>because</u> insulin conc. is higher ; this subsumes marking point 1	
4 (later) glucose rises higher <u>because</u> insulin conc. is lower ; this subsumes marking point 1	
5 use of figures ; e.g. one glucose conc. for inhaled and one for injected at <u>one</u> time or	
one glucose conc. linked to an insulin conc. at one time (either inhaled or injected) [3 m	nax]
(iii) advantages:	
1 faster response time ;	
2 less chance of, infection / contamination ;	
3 good for people with needle phobia ; max 1	
disadvantages :	
4 could cause larger swings in blood glucose concentration;	
5 may need to taken more often / not long lasting ;	
6 possible variability of dose / AW ; max 1 [2 m	nax]
[Total:	:15]

	Page 8		Mark Scheme: Teachers' version Syllabus	Paper
		GCE AS/A LEVEL – October/November 2010 9700		42
5	(a)	1	oxygen availability low (when soil is flooded);	
		2	plants carry out anaerobic respiration ;	
		3	ethanol produced;	
		4	roots can continue to respire;	[2 max]
	(b)	(i)	(store of) nutrients; A named nutrient <i>ignore food / water / fibre</i>	
			for, germination / growth of embryo;	[2]
		(ii)	protein in aleurone layer ;	
			which is removed in white rice ; ora	[2]
		(iii)	endosperm makes up a greater proportion of the total mass in white rice ;	
			or brown rice has more, lipid / fibre / protein, than white rice so less carbohydrates per gram ;	[1 max]
		(iv)	1 cheap source of food ;	
			2 high, energy value / fibre content ;	
			3 high in carbohydrate;	
			4 contain wide range of nutrients or three named nutrients;	
			5 cereal grains store well ;	
			6 because they contain very little water;	[2 max]
				[Total: 9]
6	(a)	var	iation / different form, of a gene ;	[1]
	(b)	Ηb	rks for reasons only ^A Hb ^A y – susceptible to / die from, malaria ;	
			 ^A Hb^S h – no (full blown) SCA / have SC trait ; not, susceptible to / likely to die from, malaria ; 	
			^s Hb ^s – susceptible to / die from, SCA ;	[4]

	Page 9			Mark Scheme: Teachers' version	Syllabus	Paper
		GCE AS/A LEVEL – October/November 2010 9700			42	
	(c)	1	US,	A malaria not selection pressure ;		
		2	Hb	^s no advantage ;		
		3	due	e to outbreeding;		
		4		netic testing can lead to termination of pregnancy or tes ds to not having children ;	sting / counselling	, [2 max]
						[Total: 7]
7	(a)	1	apio	cal bud is source of auxin ;		
		2	aux	kin inhibits growth of side shoot ;		
		3	rem	nove bud and auxin conc falls ;		
		4	this	allows <u>cell</u> , division / elongation, to take place (in side	shoots) ;	[3 max]
	(b)	267	7;;			
		acc	ept s	suitable working for one mark e.g. $\frac{110 - 30}{30}$ (× 100)		
		or acc	ept 2	266.7 for one mark		[2]
	(c)	D1		ays 2 to 8 o increase in length with paste plus auxin (compared to	o control);	
		E2	aı	uxin moves from paste into plants ;		
		E3	in	hibits growth ;		
		D4		ays 8 to 13 crease in length occurs (with paste and auxin) ;		
		E5	le	ss auxin left ;		
		D6		upportive figs ; e.g. two blue points on two days plus ur ne blue point on same day plus units	nits or one red and	I
				nust have at least one D (description) and one E (explan parks	nation) to score 3	[3 max]
						[Total: 8]

PMT

	Pag	je 10	0 Mark Scheme: Teachers' version Syllabu	ıs Paper
			GCE AS/A LEVEL – October/November 2010 9700	42
8	(a)	1 2	absorb light; A harvest light / trap light R collect light pass <u>energy</u> to, primary pigment / chlorophyll / reaction centre ;	[2 max]
	(b)	1	<i>cyclic photophosphorylation</i> electron emitted returns to, PSI / same photosystem or same chloro molecule ;	phyll
		2	non-cyclic photophosphorylation electron emitted from PSII absorbed by PSI ;	
		3	reduced NADP produced;	
		4	photolysis occurs; A splitting of water	
		5	(photolysis) only involves PSII ;	
		6	oxygen produced 3 max	
			accept ora for cyclic for marking points 3, 4 and 6	
			mark to max 3 if cyclic and non-cyclic are described the wrong way r	round [4 max]
	(c)	(i)	some other factor becomes limiting / temperature no longer limiting;	
			CO ₂ / light intensity ;	[2]
		(ii)	line falls towards 70°C;	[1]
		(iii)	<i>rate of photosynthesis falls</i> enzyme / rubisco, denatured / AW ;	
			substrates not able to fit active site / AW;	[2]

(d)	adaptation	how the adaptation helps photosynthesis
	thin cell wall	greater light penetration / short diffusion distance (for gases) ;
	cylindrical shape	air spaces ;
	large vacuole	chloroplasts near outside of cell for better light absorption / maintains turgor ;
	chloroplasts can be absorb maximum light / avoid excessive intensities ;

Page 11	Mark Scheme: Teachers' version	Syllabus	Paper
	GCE AS/A LEVEL – October/November 2010	9700	42

- 9 (a) do not credit marking points out of sequence prophase 1
 - 1 idea of condensation of chromosomes;
 - 2 homologous chromosomes pair up / bivalent formed ;

metaphase 1

- 3 homologous chromosomes / bivalents, line up on equator;
- 4 of spindle ;
- 5 by centromeres ;
- 6 independent assortment / described;
- 7 chiasmata / described ;
- 8 crossing over / described ;

anaphase 1

- 9 chromosomes move to poles ;
- 10 homologous chromosomes / bivalents, separate ;
- 11 pulled by microtubules ;
- 12 reduction division ;

metaphase 2

- 13 chromosomes line up on equator;
- 14 of spindle;

anaphase 2

- 15 centromeres divide ;
- 16 <u>chromatids</u> move to poles;
- 17 pulled by microtubules ;
- 18 ref. haploid number ;

allow 4 **or** 14 allow 11 **or** 17

Page 12		Mark Scheme: Teachers' version Syllabus	Paper
		GCE AS/A LEVEL – October/November 2010 9700	42
(b)) 19	change in, base / nucleotide, sequence (in DNA) ;	
	20	during DNA replication ;	
	21	detail of change ; e.g. base, substitution / addition / deletion	
	22	frame shifts / AW ;	
	23	different / new, <u>allele</u> ;	
	24	random / spontaneous ;	
	25	mutagens;	
	26	ionising radiation;	
	27	UV radiation / mustard gas ;	[6 max]
			[Total: 15]
0 (a) 1	ATP as universal energy currency;	
	2	light energy needed for photosynthesis;	
	3	ATP used conversion of GP to TP ;	
	4	ATP used to regenerate RuBP;	
	5	(energy needed for) <u>anabol</u> ic reactions ;	
	6	protein synthesis / starch formation / triglyceride formation ;	
	7	activation energy;	
	8	(activate) glucose in glycolysis ;	
	9	active transport ;	
	10	example ; e.g. sodium / potassium pump	
	11	movement / locomotion ;	
	12	example ; e.g. muscle contraction / cilia beating	
	13	endocytosis / exocytosis / pinocytosis / bulk transport ;	
	14	temperature regulation ;	[9 max

PMT
