Advanced Subsidiary GCE

Mark Scheme for June 2019

OCR (Oxford Cambridge and RSA) is a leading UK awarding body, providing a wide range of qualifications to meet the needs of candidates of all ages and abilities. OCR qualifications include AS/A Levels, Diplomas, GCSEs, Cambridge Nationals, Cambridge Technicals, Functional Skills, Key Skills, Entry Level qualifications, NVQs and vocational qualifications in areas such as IT, business, languages, teaching/training, administration and secretarial skills.

It is also responsible for developing new specifications to meet national requirements and the needs of students and teachers. OCR is a not-for-profit organisation; any surplus made is invested back into the establishment to help towards the development of qualifications and support, which keep pace with the changing needs of today's society.

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which marks were awarded by examiners. It does not indicate the details of the discussions which took place at an examiners' meeting before marking commenced.

All examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes should be read in conjunction with the published question papers and the report on the examination.

Annotations

Marking Annotations

| Annotation | Use |
|------------|--|
| BOD | Benefit of Doubt |
| CON | Contradiction |
| × | Cross |
| RCF | Error Carried Forward |
| GM | Given Mark |
| ~~~ | Extendable horizontal wavy line (to indicate errors / incorrect science terminology) |
| I | Ignore |
| 0 | Large dot (various uses as defined in mark scheme) |
| | Highlight (various uses as defined in mark scheme) |
| NBOD | Benefit of the doubt not given |
| ~ | Tick |
| ~ | Omission Mark |
| BP | Blank Page |
| Ц | Level 1 answer in Level of Response question |
| 12 | Level 2 answer in Level of Response question |
| 13 | Level 3 answer in Level of Response question |

June 2019

Subject-specific Marking Instructions

INTRODUCTION

Your first task as an Examiner is to become thoroughly familiar with the material on which the examination depends. This material includes:

- the specification, especially the assessment objectives
- the question paper
- the mark scheme.

You should ensure that you have copies of these materials.

You should ensure also that you are familiar with the administrative procedures related to the marking process. These are set out in the OCR booklet **Instructions for Examiners**. If you are examining for the first time, please read carefully **Appendix 5 Introduction to Script Marking: Notes for New Examiners**.

Please ask for help or guidance whenever you need it. Your first point of contact is your Team Leader.

| Qu | esti | on | Answer | Marks | Guidance |
|----|------|------|---|----------|--|
| 1 | (a) | (i) | sieve tube (cell / element / member) ✓ | 1 | Mark the first answer. If an additional answer is given that is incorrect, then = 0 marks IGNORE vessel |
| | | (ii) | Benedict's / Fehling's (solution / reagent) ✓ blue / turquoise ✓ orange / yellow / brown ✓ acid ✓ | 4 | IGNORE vessel Mark the first answer in each space. If an additional answer is given that is incorrect, then = 0 marks IGNORE dark / light / cloudy / opaque IGNORE dark / light / cloudy / opaque ALLOW named e.g. HCl, H ₂ SO ₄ , HNO ₃ IGNORE spelling error e.g. hydrocholic |
| | (b) | (i) | <pre>starch: is not soluble / does not dissolve (in water) or does not affect osmosis / is osmotically inactive or cannot, enter / leave, cells ✓ makes, it / sap, thick / viscous / sticky / glue-like ✓</pre> | max 1 | ALLOW could block, tubes / flow / phloem ALLOW H ₂ O would not follow to, increase hydrostatic pressure / set up pressure gradient ALLOW no co-transporter proteins for starch OR starch is too big to, enter cells / cross cell (surface) membranes / pass through cell wall IGNORE big / too big, unqualified |
| | | (ii) | sucrose: entry / exit / loading / unloading, controlled / uses transport proteins or (is) less likely to, leave / exit / diffuse out of (sieve tubes) or (is) less, reactive / likely to be used (in respiration / by mitochondria / for energy) ✓ | 1 | ALLOW ora throughout for glucose ALLOW co-transporters for 'transport protein' DO NOT ALLOW channels / pores IGNORE ref. osmosis / size / solubility / metabolically inactive |
| | | | Total | 7 | |

| Q | Question | | Answer | Marks | Guidance |
|--------|--------------|-----|------------------|------------|---|
| Q 2 | uesti (a) | on | Answer 12 ✓ ✓ | Marks 2 | Correct answer = 2 marks even if no working shown. ALLOW 11 / 13 for 2 marks If answer is incorrect then award 1 mark: if answer is incorrect then award 1 mark: if answer to >2 s.f.: ALLOW range from 11.2 to 12.8 if answer in mm: $0.011 / 0.012 / 0.013$ if answer in cm: $0.0011 / 0.0012 / 0.0013$ if answer in m: $1.1 \times 10^{-5} / 1.2 \times 10^{-5} / 1.3 \times 10^{-5}$ for working: 14 or 15 or 16 ÷ 1250 x 1000 for converting scale bar to μm : 15 000 or in range from 14 000 to 16 000 ECF from mis-measured figure: answer to (x ÷ 1250 x |
| | (b) | (i) | erythrocyte 🗸 | 1 | 1000) e.g. 1cm gives an answer of 8 (μm) e.g. 1.5 mm gives an answer of 1.2 (μm) ALLOW red blood cell |

| | (ii) | immunity / immune system / immune response ✓ | 1 | Mark the first answer. If an additional answer is given that is incorrect, then = 0 marks ALLOW immune protection OR defence against / protection from / destroy / fight, pathogens / bacteria / protoctists / parasites / foreign antigens / non-self antigens / infection / infectious disease / malignant cells / cancer cells IGNORE details e.g. engulf pathogens / make antibodies / specific / non-specific / phagocytosis |
|-----|------|---|----------|---|
| (c) | (i) | to, see / identify, (differences between) cells ✓ to, see / identify, (differences between) organelles ✓ red blood cells visible, anyway / without stain (due to haemoglobin) ✓ ref. contrast ✓ allows, white cells / leucocytes, to be counted ✓ | max 3 | ALLOW so white blood cells / A / C / D can be seen or told apart from RBCs ALLOW named organelles e.g nucleus / cytoplasm ALLOW without stain white cells are, transparent / colourless |
| | (ii) | S allows, white cells / leucocytes, to be coulded ✓ 1 C (is, blue / purple, so) has (more) nucleic acid ✓ 2 (C has) (m / t / r) RNA ✓ 3 D (is red so) has (more) protein ✓ 4 (D has) enzyme / antibody / immunoglobulin ✓ 5 <i>idea that</i> different cells have different, roles / (concentrations of) biochemicals / levels of activity ✓ | max 4 | IGNORE suggested names for cells IGNORE some / no, protein present 2 DO NOT ALLOW DNA 3 IGNORE some / no, nucleic acid present 4 ALLOW (named) hydrolases / (named) cytokines / perforins / granzymes |
| | | Total | 11 | |

| (| Quest | ion | Answer | Marks | Guidance |
|---|-------|-------|--|----------|---|
| 3 | (a) | (i) | <u>Felis</u> ✓ | 1 | Mark the first answer . If any additional answer is given then = 0 marks |
| | | | | | Need first letter upper case, rest lower case. |
| | | (ii) | | 2 | If additional terms are given then = max 1 for complete correct answer. |
| | | | <u>intra</u> specific ✓ | | ALLOW intra-species |
| | | | variation 🖌 | | IGNORE phenotypic / genetic / species DO NOT ALLOW variance / variety |
| | | (iii) | 1 can produce fertile offspring ✓ | max 2 | |
| | | | 2 (still) similar in appearance / not enough phenotypic difference(s) ✓ | 2 | 2 ALLOW physically alike / similar characteristics 2 ALLOW similar cytochrome c (protein) sequence |
| | | | 3 have only been, separated / isolated, for a short time \checkmark | | 3 ALLOW ora would need to be, separated / isolated, for a long(er) time |
| | | | 4 genetically similar ✓ | | 4 ALLOW genotypically similar |
| | (b) | (i) | for, fur / pelts / sport / trophies or to stop them, killing / eating, (named) birds / poultry / eggs / lambs / young goats ✔ | 1 | Mark the first answer. If an additional incorrect answer is given then = 0 marks IGNORE for food / meat / commerce / commercial / cosmetic / aesthetic / dangerous ALLOW 'to protect' for 'stop them, killing / eating' named e.g: pheasant / grouse / partridge / chicken / duck DO NOT ALLOW large livestock e.g. cattle / horses / deer / pigs |

Mark Scheme

| Question | Answer | Marks | | Guidance |
|-----------|---|--|-----------------------|---|
| (ii) * | Please refer to the marking instructions on page 4 of this mar In summary: Read through the whole answer. (Be prepared to recognise and clusing a 'best-fit' approach based on the science content of the and Level 3, best describes the overall quality of the answer. Then, award the higher or lower mark within the level, according to o award the higher mark where the Communication Statement o award the lower mark where aspects of the Communication The science content determines the level. The Communication Statement determines the mark within the | redit un swer, fi o the C t has be Statem | ex rst on er | xpected approaches where they show relevance.) t decide which of the level descriptors, Level 1 , Level 2 or mmunication Statement (shown in italics): n met. |

PMT

| Level 3 (5–6 marks) A detailed description and explanation of the potential effects of small population size on genetic and species biodiversity. There is a well-developed line of reasoning which is clear and logically structured. All the information presented is relevant and substantiated. Level 2 (3–4 marks) A basic description and explanation of potential effects of small population size on genetic and species biodiversity. OR A detailed description and explanation of the potential effects of small population size on genetic or species biodiversity. There is a line of reasoning presented with some structure. The information presented is relevant and supported by some evidence. | Indicative scientific points may include genetic biodiversity: genetic, diversity / variation, low / will decrease small gene pool / few alleles (at each locus) proportion of polymorphic loci is small homozygosity increases / heterozygosity decreases inbreeding (depression will occur) (as closely-) related cats, mate / breed loss of alleles / genetic erosion by chance / genetic drift correct ref. to disease susceptibility low potential for adaptation (to future change) new alleles may arise (slowly) by mutation |
|---|--|
| Level 1 (1–2 marks) A description of some potential effects for genetic and species biodiversity of small population size. There is an attempt at a logical structure with a line of reasoning. The information is in the most part relevant. 0 marks No response or no response worthy of credit. | (slow as) one / few, generation(s) per year species biodiversity wildcats may go extinct (in Scotland) one less species correct ref. to species richness correct ref. to species evenness former prey species may, return / increase / extend range (increasing biodiversity) affect food chain / example of food chain effect conservation, efforts / effects only one cat species (in Scotland) |

6

June 2019

A detailed description **and** explanation of the precautions needed when setting up **and** using the apparatus. There is a well-developed line of reasoning which is clear and logically structured. All the information presented is relevant and substantiated.

Level 2 (3-4 marks)

A basic description **and** explanation of the precautions needed when setting up **and** using the apparatus. **OR**

A detailed description and explanation of the precautions needed when setting up **or** using the apparatus. *There is a line of reasoning presented with some structure. The information presented is relevant and supported by some evidence.*

Level 1 (1–2 marks)

A description of some of the precautions needed when setting up **and** using the apparatus.

There is an attempt at a logical structure with a line of reasoning. The information is in the most part relevant.

0 marks

No response or no response worthy of credit.

Indicative scientific points may include

setting up:

- D cut stem under water
- D have apparatus under water
- D insert stem under water
- D joint(s) must be, sealed / tight
- E so no air can enter, stem / shoot / xylem / apparatus
- E air / bubble, could block xylem
- E obtain a continuous column of water

using:

- **D** do not allow the bubble to move too far
- D use syringe to move bubble
- E so air bubble does not enter, xylem / stem
- E so same air bubble can be re-used
- D place open end in water
- E so no, air / (new) bubble, introduced
- D keep shoot, still / supported
- E to avoid breaking, seal / water column
- E to measure transpiration accurately
- E ensure validity

Allow gas for 'air' throughout. Ignore oxygen. Ignore air / bubbles being present or leaving.

| Question | Answer | Marks | Guidance |
|----------|---|----------|--|
| (b) (i) | 1 57 / trial 4 of condition 3 ✓ | max 3 | 1 ALLOW lower leaf covered / with jelly for 'condition 3' 1 ALLOW 57, marked / circled, in table ECF for mps 2, 3 and 4 if figure other than 57 selected |
| | 2 has made mean higher ✓ 3 (ignoring / excluding 57) mean = 29.4 ✓ | | 2 ALLOW if 57 not included mean would be less |
| | 4 (using 57) increases mean by, 4.6 (mm) / 15.6% ✓ | | 4 ALLOW ora ignoring 57 decreases mean by, 4.6 mm / 13.5% ECF from wrong mean calculated for mp 3 |
| (ii | bubble was not (fully) returned to starting position or misread, scale / ruler / distance or timed for longer than five minutes or air movement / temperature / light increased ✓ | 1 | ALLOW leaf not fully covered with petroleum jelly |

| Question | Answer | | Guidance | |
|----------|---|------------|---|--|
| | | Marks 3 | Correct answer = 3 marks even if no working shown. ALLOW answer in table 4.2 ALLOW close figure showing, rounding error / error due to rounding during calculation, but deduct 1 mark If final answer incorrect award 2 marks for: answer not to 2 d.p: 7 / 6.6 / 6.631 / 6.632 or more d.p. answer for 5 mins: 33.16 diameter used: 26.53 radius not squared: 18.95 Award 1 mark if two errors occur: wrong answer not to 2 d.p: 33 / 33.2 / 27 / 26.5 / or more d.p. diameter used & 5 mins: 132.63 If no calculated answer then award 1 mark for working: (3.14 x 0.35 ²) x (86.2 ÷ 5) or (3.14 x 0.35 ²) x 17.24 ALLOW π for 3.14 | |
| (iv) | to, see / compare, effect of, other (named) treatment(s) / changed conditions ✓ | 1 | | |

| (c) | <i>capillary tube:</i> measures smaller volumes or small diameter so distance, greater / easier to measure or has, smaller units / finer gradations / closer scale (divisions) / more calibration marks ✓ | max 1 | ALLOW ora for calibrated pipette throughout ALLOW thinner / narrower for 'small diameter' ALLOW AW to give the idea of more marks or sub- divisions on measuring scale |
|-----|---|----------|--|
| | less uncertainty ✓ | | ALLOW (gives more) precise (readings) ALLOW lower / smaller, percentage error IGNORE accuracy |
| (d) | find / control / standardise / account for, leaf <u>area</u> \checkmark calculate / compare, transpiration <u>rate per unit area</u> \checkmark | 2 | ALLOW unit for 'area' e.g. mm ² / cm ² / m ² IGNORE size / number of stomata IGNORE surface area to volume ratio ALLOW water, loss / uptake, for 'transpiration' ALLOW mm ² / cm ² / m ² for 'unit area' |
| | Total | 18 | |

Mark Scheme

H020/02

| Qu | estion | Answer | | Guidance | |
|-----|--------|---|---|---|--|
| 5 (| (a) | any two from: to maintain (normal / optimum) water potential (of cell / cytoplasm) or to stop, cell / it / Paramecium, bursting ✓ water moves into, Paramecium / it / cell / cytoplasm, by osmosis water potential / ψ, higher outside (cell) ✓ | 2 | DO NOT ALLOW linked to plasmolysis ALLOW ora ψ lower inside (cell) | |
| (| (i | 40 ✓ ✓ | 2 | IGNORE outside vacuole for external contextCorrect answer = 2 marks even if no working shown.IGNORE minus signIf answer is incorrect, then award 1 mark for: dividing by end fig: 66.6 (recurring) / 67calculating with 0.20 NaCl fig: 81.5 / 82working: $(6.5 - 3.9) \div 6.5 \times 100$ or $2.6 \div 6.5 \times 100$ | |

| | (ii) | as NaCl concentration increases: 1 (external) water potential decreases / solute potential increases ✓ | max 2 | 1 IGNORE outside vacuole for external context |
|--|------|---|----------|--|
| | | 2 water potential gradient decreases ✓ | | 2 ALLOW ψ difference decreases / ψ inside and out becomes more similar |
| | | 3 less water enters (<i>Paramecium</i> / cell / cytoplasm) ✓ | | 3 ALLOW water, enters / diffuses, more slowly ALLOW takes more time for water to enter DO NOT ALLOW solution for 'water' |
| | | 4 less water needs to be expelled ✓ | | 4 ALLOW removed / got rid of / ejected, for 'expelled' DO NOT ALLOW solution for 'water' but ECF from 3 IGNORE water expelled less, often / frequently or less contractions in a given time |
| | | | | |

| Questi | on | Answer | | Guidance | |
|--------|-------|--|----------|---|--|
| | (iii) | making crystals, increases ψ / decreases ψ_s ✓ <i>benefit:</i> decreases / less, water entry ✓ (so) less need to expel water ✓ (so) less use of energy ✓ | max 3 | 1 ALLOW ora dissolving crystals, decreases ψ / increases ψ_s IGNORE removing / releasing, for 'dissolving' ALLOW 'adding' for 'making' ECF from wrong mp1 for an ora of mp 2-4 for 1 mark only | |
| | (iv) | (less) oxygen for <u>aerobic</u> respiration ✓ (less) energy / ATP, for (vacuole) contraction ✓ | 2 | ALLOW is an active process for 'energy' IGNORE active transport DO NOT ALLOW energy created / produced | |
| | | Total | 11 | | |

| C | Question | | Answer | Marks | Guidance |
|---|----------|-------|--|-------|---|
| 6 | (a) | (i) | (cellulose) cell wall ✓ | 1 | IGNORE cell (surface) membrane DO NOT ALLOW skin |
| | | (ii) | damage / wound or carried by, insects / vectors / aphids ✓ | 1 | |
| | (b) | (i) | any two from: 1 virus / foreign, <u>RNA</u> recognised (as incorrect) ✓ 2 virus / foreign, RNA / genome, cut / destroyed ✓ 3 virus, replication / reproduction, stopped ✓ | 2 | ALLOW viral for 'virus' throughout ALLOW will not recognise, virus / foreign, RNA as correct DO NOT ALLOW DNA / viral mRNA DO NOT ALLOW DNA / viral mRNA, but ecf from 1 IGNORE viral RNA, will not survive / attacked |
| | | (ii) | phospho(di)ester ✓ | 1 | |
| | | (iii) | faulty / incorrect, (m) RNA destroyed 🖌 | 2 | |
| | | | faulty / wrong, proteins not made or prevents errors in protein synthesis ✓ | | ALLOW mutated for 'faulty' e.g. stop wrong amino acid sequence forming / stop wrong primary structure |
| | | | Total | 7 | |
