H420/02: Biological diversity

A Level

Mark Scheme for June 2024

OCR (Oxford Cambridge and RSA) is a leading UK awarding body, providing a wide range of qualifications to meet the needs of candidates of all ages and abilities. OCR qualifications include AS/A Levels, Diplomas, GCSEs, Cambridge Nationals, Cambridge Technicals, Functional Skills, Key Skills, Entry Level qualifications, NVQs and vocational qualifications in areas such as IT, business, languages, teaching/training, administration and secretarial skills.

It is also responsible for developing new specifications to meet national requirements and the needs of students and teachers. OCR is a not-for-profit organisation; any surplus made is invested back into the establishment to help towards the development of qualifications and support, which keep pace with the changing needs of today's society.

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which marks were awarded by examiners. It does not indicate the details of the discussions which took place at an examiners' meeting before marking commenced.

All examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes should be read in conjunction with the published question papers and the report on the examination.

© OCR 2024

MARKING INSTRUCTIONS

PREPARATION FOR MARKING

RM ASSESSOR

1. Make sure that you have accessed and completed the relevant training packages for on-screen marking: *RM Assessor Assessor Online Training*; *OCR Essential Guide to Marking*.
2. Make sure that you have read and understood the mark scheme and the question paper for this unit. These are posted on the RM Cambridge Assessment Support Portal <http://www.rm.com/support/ca>
3. Log-in to RM Assessor and mark the **required number** of practice responses (“scripts”) and the **number of required** standardisation responses.

YOU MUST MARK 10 PRACTICE AND 10 STANDARDISATION RESPONSES BEFORE YOU CAN BE APPROVED TO MARK LIVE SCRIPTS.

MARKING

1. Mark strictly to the mark scheme.
2. Marks awarded must relate directly to the marking criteria.
3. The schedule of dates is very important. It is essential that you meet the RM Assessor 50% and 100% (traditional 40% Batch 1 and 100% Batch 2) deadlines. If you experience problems, you must contact your Team Leader (Supervisor) without delay.
4. If you are in any doubt about applying the mark scheme, consult your Team Leader by telephone or the RM Assessor messaging system, or by email.
5. **Crossed Out Responses**
Where a candidate has crossed out a response and provided a clear alternative then the crossed out response is not marked. Where no alternative response has been provided, examiners may give candidates the benefit of the doubt and mark the crossed out response where legible.

Rubric Error Responses – Optional Questions

Where candidates have a choice of question across a whole paper or a whole section and have provided more answers than required, then all responses are marked and the highest mark allowable within the rubric is given. Enter a mark for each question answered into RM assessor, which will select the highest mark from those awarded. (*The underlying assumption is that the candidate has penalised themselves by attempting more questions than necessary in the time allowed.*)

Multiple Choice Question Responses

When a multiple choice question has only a single, correct response and a candidate provides two responses (even if one of these responses is correct), then no mark should be awarded (as it is not possible to determine which was the first response selected by the candidate).

When a question requires candidates to select more than one option/multiple options, then local marking arrangements need to ensure consistency of approach.

Contradictory Responses

When a candidate provides contradictory responses, then no mark should be awarded, even if one of the answers is correct.

Short Answer Questions (requiring only a list by way of a response, usually worth only **one mark per response**)

Where candidates are required to provide a set number of short answer responses then only the set number of responses should be marked. The response space should be marked from left to right on each line and then line by line until the required number of responses have been considered. The remaining responses should not then be marked. Examiners will have to apply judgement as to whether a 'second response' on a line is a development of the 'first response', rather than a separate, discrete response. *(The underlying assumption is that the candidate is attempting to hedge their bets and therefore getting undue benefit rather than engaging with the question and giving the most relevant/correct responses.)*

Short Answer Questions (requiring a more developed response, worth **two or more marks**)

If the candidates are required to provide a description of, say, three items or factors and four items or factors are provided, then mark on a similar basis – that is downwards (as it is unlikely in this situation that a candidate will provide more than one response in each section of the response space.)

Longer Answer Questions (requiring a developed response)

Where candidates have provided two (or more) responses to a medium or high tariff question which only required a single (developed) response and not crossed out the first response, then only the first response should be marked. Examiners will need to apply professional judgement as to whether the second (or a subsequent) response is a 'new start' or simply a poorly expressed continuation of the first response.

6. Always check the pages (and additional objects if present) at the end of the response in case any answers have been continued there. If the candidate has continued an answer there, then add a tick to confirm that the work has been seen.
7. Award No Response (NR) if:
 - there is nothing written in the answer space

Award Zero '0' if:

- anything is written in the answer space and is not worthy of credit (this includes text and symbols).

H420/02

Mark Scheme

June 2024

Team Leaders must confirm the correct use of the NR button with their markers before live marking commences and should check this when reviewing scripts.

8. The RM Assessor **comments box** is used by your team leader to explain the marking of the practice responses. Please refer to these comments when checking your practice responses. **Do not use the comments box for any other reason.**
If you have any questions or comments for your team leader, use the phone, the RM Assessor messaging system, or e-mail.
9. Assistant Examiners will send a brief report on the performance of candidates to their Team Leader (Supervisor) via email by the end of the marking period. The report should contain notes on particular strengths displayed as well as common errors or weaknesses. Constructive criticism of the question paper/mark scheme is also appreciated.
10. For answers marked by levels of response:
Read through the whole answer from start to finish, using the Level descriptors to help you decide whether it is a strong or weak answer. The indicative scientific content in the Guidance column indicates the expected parameters for candidates' answers, but be prepared to recognise and credit unexpected approaches where they show relevance. Using a 'best-fit' approach based on the skills and science content evidenced within the answer, first decide which set of level descriptors, Level 1, Level 2 or Level 3, best describes the overall quality of the answer.

Once the level is located, award the higher or lower mark:

The higher mark should be awarded where the level descriptor has been evidenced and all aspects of the communication statement (in italics) have been met.

The lower mark should be awarded where the level descriptor has been evidenced but aspects of the communication statement (in italics) are missing.

In summary:

The skills and science content determines the level.

The communication statement determines the mark within a level.

Level of response questions on this paper are **18(b)(i)** and **20(b)(i)**.

11. Annotations

H420/02

Mark Scheme

June 2024

Marking Annotations

Annotation	Use
	Benefit of Doubt
	Contradiction
	Cross
	Error Carried Forward
	Given Mark
	Extendable horizontal wavy line (to indicate errors / incorrect science terminology)
	Ignore
	Large dot (various uses as defined in mark scheme)
	Highlight (various uses as defined in mark scheme)
	Benefit of the doubt not given
	Tick
	Omission Mark
	Blank Page
	Level 1 answer in Level of Response question
	Level 2 answer in Level of Response question
	Level 3 answer in Level of Response question

12. Subject Specific Marking Instructions

Abbreviations, annotations and conventions used in the detailed Mark Scheme (to include abbreviations and subject-specific conventions).

Annotation	Meaning
/	alternative and acceptable answers for the same marking point
✓	Separates marking points
DO NOT ALLOW	Answers which are not worthy of credit
IGNORE	Statements which are irrelevant
ALLOW	Answers that can be accepted
()	Words which are not essential to gain credit
—	Underlined words must be present in answer to score a mark
ECF	Error carried forward
AW	Alternative wording
ORA	Or reverse argument

13. Subject-specific Marking Instructions

INTRODUCTION

Your first task as an Examiner is to become thoroughly familiar with the material on which the examination depends. This material includes:

- the specification, especially the assessment objectives
- the question paper
- the mark scheme.

You should ensure that you have copies of these materials.

You should ensure also that you are familiar with the administrative procedures related to the marking process. These are set out in the OCR booklet **Instructions for Examiners**. If you are examining for the first time, please read carefully **Appendix 5 Introduction to Script Marking: Notes for New Examiners**.

Please ask for help or guidance whenever you need it. Your first point of contact is your Team Leader.

Other subject-specific instructions

- Use **CON** when a correct response is associated with a piece of clearly incorrect science within the same statement and award no mark.
- For questions in which the command word is 'suggest', ignore incorrect responses and credit a correct response wherever it occurs
- Accept mis-spellings that are phonetically identical unless otherwise indicated
- All marks are stand-alone unless otherwise stated in Guidance
- Bracketed words. The words in brackets are there to 'set the scene' and indicate the context in which the answer is expected. They do not need to appear. Award the mark as long as the statement in the brackets is not contradicted.
- Solidus (/): A solidus indicates alternative ways that a mark might be gained for a given Mark Point.

- In questions involving calculations, where a candidate's answer is not covered by the mark scheme, assume one mark less than the maximum available for a single error.
- Use of the comma in a mark point: This indicates that some information from either side of the comma or commas is needed. It is used in conjunction with the solidus.
- In some cases the Guidance column may indicate examples of wording or terms that are acceptable (ALLOW) or that should be ignored (IGNORE). In the case of IGNORE read on (or previously) to see if something creditworthy appears later in the response.
- Underlining
 - o solid underline. The word or part of word underlined is required but minor mis-spellings are acceptable as long as the word is clearly the same
 - o wavy underline. This indicates that, while the word underlined is not precisely needed, alternative responses need to be closely related in meaning or be a clear description.
- *idea of*. This is used as a prefix to marking points where there may be a fairly wide range of responses which cover the essence of the required response. This often requires examiner judgement. For '*idea of*' marking points, a wide range of wording is acceptable. The mark is to be awarded for the *idea*.

H420/02

Mark Scheme

June 2024

Question			Answer	Marks	AO element	Guidance
1			B ✓	1	1.1	
2			D ✓	1	1.1	
3			B ✓	1	2.2	
4			B ✓	1	1.1	
5			C ✓	1	1.1	
6			B ✓	1	1.1	
7			C ✓	1	1.2	
8			A ✓	1	2.8	
9			D ✓	1	2.8	
10			D ✓	1	1.2	
11			C ✓	1	1.1	
12			A ✓	1	1.2	
13			D ✓	1	1.2	
14			C ✓	1	1.1	
15			C ✓	1	1.1	

Question			Answer	Marks	AO Element	Guidance
16	(a)		identifying / AW , genetic diseases / disease risk / evolutionary relationships / disaster victims ✓ classifying organisms / evidence for evolution ✓ (as part of) breeding programmes ✓	1 max	1.1	<i>Mark the first answer</i> ALLOW identifying , siblings / ancestry IGNORE to see if people are related (as could be paternity) IGNORE medical , diagnosis / screening (for non-genetic diseases) IGNORE investigating , genetics / research / mutations IGNORE organ transplants / personalised medicine
	(b)	(i)	<u>polymerase chain reaction</u> ✓	1	1.1	
	(b)	(ii)	X (represents) denaturation / strand separation / breaking of H-bonds ✓ Y (represents) annealing / primers added (to DNA) ✓ Z (represents) synthesis of a new strand / <u>addition</u> of nucleotides (to new DNA strand) ✓	3	1.2 x 2 2.6 x 1	X IGNORE H ⁺ -bonds Z ALLOW synthesis / extension / elongation (of DNA strand) Z ALLOW description of forming a complementary strand Z IGNORE bases / replication

	(b)	(iii)	<u>optimum</u> (temperature for enzyme) ✓ Taq polymerase allows high(er) <u>rate</u> , of DNA replication / AW ✓ (enzyme) obtained from , thermophilic / AW , organisms ✓ enzyme is able to withstand high(er) temperatures (than normal DNA polymerase) ✓	3 max	2.5 x 2 2.6 x 2	ALLOW Taq polymerase allows fast(er) <u>rate</u> of reaction ALLOW e.g., from bacteria that live in hot springs ALLOW doesn't denature at such high temperatures / thermostable ALLOW optimum is higher than other forms of DNA polymerase
		(iv)	(initial) sample is small / AW ✓	1	2.6	ALLOW not much DNA to begin with IGNORE to amplify the sample / to get a big enough sample
	(c)	(i)	double peaks / they , are heterozygous / have different alleles ✓ single peaks , are homozygous / have the same allele ✓	2	2.2	IGNORE genes / coding ALLOW VNTR length as AW for allele <i>If no other mark awarded</i> ALLOW 1 mark for using the terms 'homozygous' and 'heterozygous' (not linked to peaks)

		(ii)	<i>claim is supported because...</i> 1 (DNA profiles) are identical / match / AW ✓ 2 probability / chance , of 2 people having identical profiles is <u>very</u> low / AW ✓ <i>however...</i> 3 (6 is) a low number of , loci / peaks ✓ 4 ... so they could have been , <u>closely</u> related / AW ✓ 5 could be identical twins ✓	3 max		<i>Assume correct context unless answer contradicts it</i> 1 ALLOW are the same 1 IGNORE similar / same number of base pairs 2 ALLOW <u>very</u> low <u>likelihood</u> / near impossibility , that 2 people would have matching profiles 2 IGNORE so they probably come from the same person 3 ALLOW only 6 genes were tested 3 ALLOW 17 loci are needed in court 3 IGNORE small sample 4 ALLOW only if mp 3 has been AWARDED
--	--	------	--	--------------	--	---

Question			Answer	Mark	AO Element	Guidance
17	(a)		1 use <u>pipette</u> to place blood on <u>slide</u> ✓ 2 (place blood) near one end (of slide) ✓ 3 use (2nd) slide / cover slip , to spread / AW , blood across slide ✓ 4 slide / cover slip , at an angle ✓ 5 AVP ✓	3 max	1.2 x 1 3.3 x 2	CREDIT answers from an annotated diagram IGNORE staining 3 ALLOW smear as AW for spread 5 CREDIT allow to (air) dry
17	(b)	(i)	<u>erythrocyte</u> ✓	1	1.1	ALLOW spelling that is phonetically loosely equivalent

Question			Answer	Mark	AO Element	Guidance
17	(b)	(ii)	1 single cell and two parts to nucleus and broadly circular ✓ 2 clear continuous (single) lines (on nuclear and cell surface membranes) and ≥ 45 mm horizontal diameter ✓ 3 ruled label lines (touching feature) ✓ 4 nucleus and cytoplasm / cytosol and cell (surface) / plasma , membrane labelled ✓ 5 colour of any of above mentioned (as annotation) ✓	4 max	3.3	1 DO NOT CREDIT if anything obviously incorrect has been drawn 2 IGNORE minor errors if it is clear candidate has attempted to draw continuous lines 3 DO NOT CREDIT arrows / label lines that cross 4 DO NOT CREDIT nuclei 4 IGNORE nuclear , membrane / envelope 4 IGNORE lysosomes 4 DO NOT CREDIT any other labelled structures 5 ALLOW e.g., nucleus is darker 5 DO NOT CREDIT if shading has been used

Question			Answer	Mark	AO Element	Guidance
17	(b)	(iii)	FIRST CHECK ON ANSWER LINE If answer = $8.0 (\pm 0.3) \mu\text{m}$ award 3 marks 1 <i>correctly reading the diameter with the graticule and mapping this measurement onto the stage micrometer</i> diameter = $8.0 (\pm 0.3 \text{ divisions}) / 0.008 \text{ (mm)}$ ✓ 2 <i>converting units</i> $0.008 \text{ mm} = 8.0 (\mu\text{m})$ ✓ 3 <i>using correct number of significant figures.</i> answer in μm to 2 significant figures ✓	3	2.8	Where an answer is not obviously covered by the mark scheme, a single error should mean that only one of the marking points is not credited, e.g., '82' or '0.79' = 2 marks (mp 1 and mp 3). AWARD this mark for any answer where the first 2 significant figures are in the range 77 to 83 AWARD this mark if the final answer is between 5 and 10 (μm) AWARD this mark if the final answer given to 2 significant figures

Question			Answer	Mark	AO Element	Guidance
18	(a)	(i)	family ✓	1	2.1	
18	(a)	(ii)	1 all / they , are different genera ✓ 2 Tasmanian devil and quoll and dunnart are in same , family / (taxon) A ✓ 3 (Dasyuridae species) share <u>more recent</u> common ancestor (with one another than with thylacine or numbat) ✓ ora 4 <u>all</u> in the same order so likely to have (phylogenetic) relationship ✓	3 max	2 x 2.1 1 x 3.1	CREDIT scientific names 1 ALLOW all / they , are different species 2 ALLOW thylacine and numbat do not share a family with the others 3 ALLOW share , closer / next , common ancestor 3 ALLOW more / most , closely related 3 ALLOW more genetically similar (or higher level descriptions thereof) 3 IGNORE DNA 4 IGNORE DNA
18	(a)	(iii)	none are in , Thylacinidae / the thylacine's family ✓ <i>idea that</i> further information is required ✓	2	3.1	ALLOW e.g., DNA sequences not available / classification based on observable features (rather than molecular evidence)
18	(a)	(iv)	no / absence of , cell wall AND no / absence of , chloroplasts ✓	1	2.1	DO NOT CREDIT wrong answers Answers can be in any order but both required for 1 mark. IGNORE heterotrophic / lysosomes / glycogen granules / centrioles / centrosomes

Question			Answer	Mark	AO Element	Guidance
18	(b)	(i)*	Please refer to the marking instructions on page 4 of this mark scheme for guidance on how to mark this question. Level 3 (5–6 marks) Explains in detail how gene sequencing AND bioinformatics AND computational biology are used in the production of synthetic proteins. <i>There is a well-developed line of reasoning which is clear and logically structured. The information presented is relevant and substantiated.</i> Level 2 (3–4 marks) Explains how gene sequencing AND bioinformatics are used in the production of synthetic proteins. OR Explains how gene sequencing AND computational biology are used in the production of synthetic proteins. OR Explains how bioinformatics AND computational biology are used in the production of synthetic proteins. <i>There is a line of reasoning presented with some structure. The information presented is relevant and supported by some evidence.</i> Level 1 (1–2 marks) Mentions how gene sequencing OR bioinformatics OR computational biology are used in the production of synthetic proteins. <i>There is an attempt at a logical structure with a line of reasoning. The information is in the most part relevant.</i> 0 marks <i>No response or no response worthy of credit.</i>	6	2.5	Indicative points may include <i>Principle</i> - computational biology can use bioinformatics to make predictions about the structure and function of a synthetic protein using DNA sequences - involves genetic modification of organisms <i>Gene sequencing</i> - determines order of bases - order of bases linked to order of amino acids - order of amino acids is protein primary structure - DNA sequence can be inferred from, and implies, protein primary structure <i>Bioinformatics</i> - stores and organises large amounts of data - databases of - DNA and amino acid sequences - protein structures - metabolic pathways - facilitates fast retrieval and sharing of information - algorithms and statistical tests <i>Computational biology</i> - needed for analysis of large amounts of data - rapid processing of data - prediction of amino acid sequences - modelling of protein structure or function - algorithms and statistical tests <u>QWC</u> <i>Award the communication mark if the candidate is able to communicate relevant ideas clearly without confusing terms such as bases and amino acids.</i>

Question			Answer	Mark	AO Element	Guidance
18	(b)	(ii)	<i>idea of</i> unknown consequences ✓ (named) ethical issues ✓	1	2.5	IGNORE tampering with nature / not natural / designer babies / animal welfare ALLOW creating bioweapons
18	(c)	(i)	thylacine has <u>lowest</u> , genetic diversity / proportion of heterozygous gene loci ✓ antechinus and dunnart (and wombat) / three species with highest (genetic) diversity , have least concern ✓ species with more genetic variation are less vulnerable ✓ ora	2 max	3.2	CREDIT scientific names ALLOW all least concern species except wallaby have high genetic diversity ALLOW all species with genetic diversity above 0.0017 have least concern <i>Needs to be a general statement about a pattern inferred from the table</i> ALLOW there is a correlation between genetic diversity and conservation status ALLOW the higher the genetic variation the lower the concern
18	(c)	(ii)	koala is vulnerable but (tammar) wallaby is least concern / AW ora ✓ (tamar) wallaby is least concern but has (relatively) low genetic diversity / koala's genetic diversity is (relatively) high but it is vulnerable ✓	1 max	3.2	CREDIT scientific names ALLOW any working that communicates the point, e.g. species with genetic diversity 0.0013 has higher concern than 0.0007 ALLOW AW for describing conservation status

Question			Answer	Mark	AO Element	Guidance
19	(a)	(i)	a weakened / attenuated / dead , form of (polio) <u>virus</u> ✓	1	2.1	ALLOW fragments / antigens , of <u>virus</u> IGNORE DNA / RNA IGNORE small amount / dormant / antibodies IGNORE cells
19	(a)	(ii)	1 involved in clonal selection ✓ 2 (cell surface) receptors (on T-cell) bind to , antigens / (named) APCs ✓ 3 produce / release , interleukins / cytokines ✓ 4 (T-helper cells / interleukins) stimulate phagocytosis ✓ 5 (T-helper cells / interleukins) , <u>stimulate</u> clonal expansion ✓ 6 T-killer cells destroy infected cells ✓ 7 <u>differentiate</u> into T-memory cells ✓ 8 T-memory cells allow rapid , secondary / AW , response ✓	4 max	1.2	1 IGNORE activation (of T-helper cells) 5 ALLOW cause , mitosis / proliferation / division , of , T/ B , cells 5 ALLOW <u>activate</u> , B / T-killer , cells 8 ALLOW description, e.g., T-memory cells rapidly produce T-killer cells if pathogen returns 8 IGNORE produce antibodies more quickly IGNORE regulator cells

Question			Answer	Mark	AO Element	Guidance
19	(b)	(i)	FIRST CHECK ON ANSWER LINE If answer = 85 or 84.9 (%) award 2 marks <i>correct reading from graph and subtraction</i> 3440 – 520 = 2920 ✓ <i>correct calculation</i> $\frac{2880}{3400} \times 100 = 84.7$ ✓	2	2.2	ALLOW any answer in the range 82 to 86 ALLOW 1 mark for 80 or if correct answer given to more than 3 significant figures IGNORE sign If answer is incorrect, ALLOW 1 mark for either of the following: <i>correct answer to...</i> 3380–3600 – 500–600 = or <i>candidate's values substituted into the following equation</i> $\frac{\text{change}}{\text{original}} \times 100 = \text{correctly processed answer}$
19	(b)	(ii)	uptake might not have been , immediate / high in 1956 ✓ some cases in 1956 might have occurred before vaccine introduction / 1957 was first full year of vaccine ✓	2	3.2	<i>Mark as prose</i> ALLOW more people would have had the vaccine by then / time needed to get all children vaccinated / slow distribution ALLOW vaccine might have been introduced towards the end of 1956 IGNORE vaccine takes time to have affect
19	(b)	(iii)	use a <u>log</u> (arithmic) scale ✓	1	3.3	

Question			Answer	Marks	AO Element	Guidance																					
20	(a)	(i)	FIRST CHECK ON ANSWER LINE If answer = 16.8 award 3 marks <table><thead><tr><th></th><th>O</th><th>E</th><th>O-E</th><th>(O-E)²</th><th>(O-E)²/E</th></tr></thead><tbody><tr><td>A</td><td>44</td><td>40</td><td>4</td><td>16</td><td>0.4</td></tr><tr><td>O</td><td>56</td><td>40</td><td>16</td><td>256</td><td>6.4</td></tr><tr><td>S</td><td>20</td><td>40</td><td>20</td><td>400</td><td>10</td></tr></tbody></table> ✓ ✓ Σ(O-E)²/E = 16.8 / 16.80 ✓ 3 2.4 CREDIT working marks seen anywhere ALLOW 1 mark for correct summation of candidate's '(O-E)²/E' column ALLOW 2 marks for... • 17 / 16.800 ALLOW 2 marks for common errors with Expected numbers (IGNORE s.f.) • 165.6 (E = 120) • 16.4 (E = 44) • 25.7 (E = 56)		O	E	O-E	(O-E) ²	(O-E) ² /E	A	44	40	4	16	0.4	O	56	40	16	256	6.4	S	20	40	20	400	10
	O	E	O-E	(O-E) ²	(O-E) ² /E																						
A	44	40	4	16	0.4																						
O	56	40	16	256	6.4																						
S	20	40	20	400	10																						

Question			Answer	Marks	AO Element	Guidance
20	(a)	(ii)	<u>differences</u> (between observed and expected) are significant ✓ (less than) 5% chance that (difference is) due to chance ✓ reject , null hypothesis / H_0 ✓ there is an association between tree species and wood sorrel population / AW ✓	3 max	3.1	ALLOW ora if candidate answer in (i) is below 5.991 ALLOW (>) 95% confident that (the difference is) not due to chance ALLOW tree species affects wood sorrel ALLOW wood sorrel less likely to grow near sycamore ora
20	(a)	(iii)	age / size / height , of tree ✓ gradient (of ground) ✓ density / AW , of surrounding trees ✓ <i>idea of</i> direction of sunlight ✓	2 max	3.3	ALLOW shading from adjacent trees IGNORE light intensity unqualified ALLOW e.g., whether they are all on the same side of a hill IGNORE presence of other species IGNORE all other variables

Question			Answer	Marks	AO Element	Guidance
20	(b)	(i)*	Please refer to the marking instructions on page 4 of this mark scheme for guidance on how to mark this question. Level 3 (5–6 marks) Makes detailed comparisons between plant AND animal species in climax community AND pioneer community. <i>There is a well-developed line of reasoning which is clear and logically structured. The information presented is relevant and substantiated.</i> Level 3 responses must address some of the emboldened indicative points (or address ideas of equivalent value). Level 2 (3–4 marks) Makes comparisons between plant AND animal species in climax community AND pioneer community. <i>There is a line of reasoning presented with some structure. The information presented is relevant and supported by some evidence.</i> Level 1 (1–2 marks) Mentions some features of species in climax community and/or pioneer community. <i>There is an attempt at a logical structure with a line of reasoning. The information is in the most part relevant.</i> 0 marks <i>No response or no response worthy of credit.</i>	6	1.2 x 4 2.5 x 2	Indicative points may include <i>Pioneer community</i> <u>Plants</u> • small species with example • shorter life-cycle / fast growing • seeds or spores ○ large quantities produced ○ can be dispersed long distances ○ germinate rapidly • self-pollinating / asexual reproduction • able to tolerate extreme environments, e.g. xerophytic / able to fix nitrogen <u>Animals</u> • few species (if any) • mostly small species with example <i>Climax community</i> <u>Plants</u> • more species than pioneer community • larger species with example • unable to tolerate extreme environments • require soil with ample water and minerals • dominant species • slow growing <u>Animals</u> • larger species with example • more herbivore species • carnivore species present • longer food chains <u>QWC</u> Award the communication mark to answers that include relevant material and make clear comparisons between climax and pioneer communities.

H420/02

Mark Scheme

June 2024

Question			Answer	Marks	AO Element	Guidance
20	(b)	(ii)	(change in) soil / substrate ✓	1	1.2	<i>Mark first answer</i> ALLOW increased humus ALLOW any feature of soil
20	(b)	(iii)	bare ground / rock / water / mud / sand / glacier / lava ✓	1	2.5	IGNORE empty land DO NOT CREDIT incorrect answers, e.g., soil

Question			Answer	Marks	AO Element	Guidance
21	(a)	(i)	<u>telophase</u> ✓	1	2.7	
21	(a)	(ii)	single area of dark (staining material) ✓ (individual) chromosomes not visible ✓ (nuclear material) not <u>as</u> dark ✓	2 max	2.7	IGNORE nuclear envelope visible ALLOW one / a / the , nucleus visible IGNORE present ALLOW chromatids not visible IGNORE thinner / in nucleus / not in two groups
21	(a)	(iii)	many dividing <u>cells</u> / <u>cells</u> undergo frequent mitosis ✓	1	3.3	IGNORE meristem tissue
21	(b)	(i)	chromosomes / chromatin (fibres) , coil / condense ✓ spindle fibres form ✓ nucleolus disappears ✓	2 max	2.5	ALLOW chromosomes thicken IGNORE DNA condenses IGNORE ref to chromatids ALLOW centrioles move to , poles / end of cell
21	(b)	(ii)	<i>In meiosis...</i> only one chromosome from each homologous pair is present ✓ ora sister chromatids not genetically identical / recombinants present (due to crossing over) ✓ ora	1	2.5	ALLOW chromosomes already condensed in meiosis IGNORE bivalents / chromatids IGNORE refs to haploid / diploid

Question			Answer	Marks	AO Element	Guidance
21	(c)		FIRST CHECK ON ANSWER LINE If answer = 116 (min) award 2 marks <i>calculate proportion of cells undergoing mitosis</i> $(16/124 =) 0.129 \checkmark$ <i>calculate time represented by that proportion of cells,</i> <i>convert to minutes and answer to 3 significant figures</i> $(0.129 \times 900 =) 116 \text{ min } \checkmark$	2	2.5	ALLOW 1 mark for 1.93 h or 1 h 56 min ALLOW 1 mark for 0.129 or 12.9%
21	(d)		nucleus $\checkmark$ cytokinesis $\checkmark$ synthesis / S $\checkmark$ DNA , damage / breaks $\checkmark$ second growth / G ₂ $\checkmark$ resting phase / G ₀ (phase) $\checkmark$	6	1.2	ALLOW cell division IGNORE correct DNA / mutation / errors ALLOW second gap ALLOW apoptosis

OCR is part of Cambridge University Press & Assessment, a department of the University of Cambridge.

For staff training purposes and as part of our quality assurance programme your call may be recorded or monitored. © OCR 2024 Oxford Cambridge and RSA Examinations is a Company Limited by Guarantee. Registered in England. Registered office The Triangle Building, Shaftesbury Road, Cambridge, CB2 8EA.

Registered company number 3484466. OCR is an exempt charity.

OCR operates academic and vocational qualifications regulated by Ofqual, Qualifications Wales and CCEA as listed in their qualifications registers including A Levels, GCSEs, Cambridge Technicals and Cambridge Nationals.

OCR provides resources to help you deliver our qualifications. These resources do not represent any particular teaching method we expect you to use. We update our resources regularly and aim to make sure content is accurate but please check the OCR website so that you have the most up-to-date version. OCR cannot be held responsible for any errors or omissions in these resources.

Though we make every effort to check our resources, there may be contradictions between published support and the specification, so it is important that you always use information in the latest specification. We indicate any specification changes within the document itself, change the version number and provide a summary of the changes. If you do notice a discrepancy between the specification and a resource, please [contact us](#).

Whether you already offer OCR qualifications, are new to OCR or are thinking about switching, you can request more information using our [Expression of Interest form](#).

Please [get in touch](#) if you want to discuss the accessibility of resources we offer to support you in delivering our qualifications.
