Advanced GCE

**Mark Scheme for June 2019**

OCR (Oxford Cambridge and RSA) is a leading UK awarding body, providing a wide range of qualifications to meet the needs of candidates of all ages and abilities. OCR qualifications include AS/A Levels, Diplomas, GCSEs, Cambridge Nationals, Cambridge Technicals, Functional Skills, Key Skills, Entry Level qualifications, NVQs and vocational qualifications in areas such as IT, business, languages, teaching/training, administration and secretarial skills.

It is also responsible for developing new specifications to meet national requirements and the needs of students and teachers. OCR is a not-for-profit organisation; any surplus made is invested back into the establishment to help towards the development of qualifications and support, which keep pace with the changing needs of today's society.

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which marks were awarded by examiners. It does not indicate the details of the discussions which took place at an examiners' meeting before marking commenced.

All examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes should be read in conjunction with the published question papers and the report on the examination.

© OCR 2019

**Annotations**

<b>Annotation</b>	<b>Meaning</b>
<b>DO NOT ALLOW</b>	Answers which are not worthy of credit
<b>IGNORE</b>	Statements which are irrelevant
<b>ALLOW</b>	Answers that can be accepted
( )	Words which are not essential to gain credit
—	Underlined words must be present in answer to score a mark
<b>ECF</b>	Error carried forward
<b>AW</b>	Alternative wording
<b>ORA</b>	Or reverse argument

## Marking Annotations

Annotation	Use
	Benefit of Doubt
	Contradiction
	Cross
	Error Carried Forward
	Given Mark
	Extendable horizontal wavy line (to indicate errors / incorrect science terminology)
	Ignore
	Large dot (various uses as defined in mark scheme)
	Highlight (various uses as defined in mark scheme)
	Benefit of the doubt not given
	Tick
	Omission Mark
	Blank Page
	Level 1 answer in Level of Response question
	Level 2 answer in Level of Response question
	Level 3 answer in Level of Response question

## Subject-specific Marking Instructions

### INTRODUCTION

Your first task as an Examiner is to become thoroughly familiar with the material on which the examination depends. This material includes:

- the specification, especially the assessment objectives
- the question paper
- the mark scheme.

You should ensure that you have copies of these materials.

You should ensure also that you are familiar with the administrative procedures related to the marking process. These are set out in the OCR booklet **Instructions for Examiners**. If you are examining for the first time, please read carefully **Appendix 5 Introduction to Script Marking: Notes for New Examiners**.

Please ask for help or guidance whenever you need it. Your first point of contact is your Team Leader.

Question			Answer	Marks	Guidance
1	a	i	A = (permanent / temporary) vacuole ✓ B = <u>nucleolus</u> ✓	2	<b>ALLOW</b> vacuole <b>DO NOT ALLOW</b> nucleus
		ii	(x)14000 / 1.4 x 10 <sup>4</sup> ✓✓	2	If the answer is incorrect, award one mark for a correct calculation not rounded to 2 s.f. (e.g. 0.02 / 0.0000014 = 14285.71429 20000 / 1.4 = 14285.71429) <b>ALLOW</b> 0.019/0.0000014 = 13571.428 or 0.021/0.0000014 = 15000 for 1 mark
		iii	no, shading / cross hatches / AW ✓  add, a scale / magnification ✓  add a title ✓	2 max	<b>Mark first two improvements described</b>  e.g. only use outlines  <b>IGNORE</b> references to labels or annotations and the use of a pencil (because this is mentioned in the question stem)  <b>IGNORE</b> drawing should take up half a page / no overlapping lines / use continuous lines
		iv	place stain at edge of sample (not the centre) ✓  lower cover slip at an angle / use mounted needle ✓  use blotting paper to, remove excess stain / pull stain through ✓  use more than one stain (to improve contrast) ✓	2 max	<b>Mark as prose</b> <b>IGNORE</b> use forceps / lay sample flat  <b>ALLOW</b> place stain at side of sample  <b>ALLOW</b> stated angles given e.g. 45°  <b>ALLOW</b> 'tissue/paper towel' instead of 'blotting paper' <b>ALLOW</b> ensure stain covers whole sample
	b		<i>No waxy cuticle</i>	3	

H420/03

Mark Scheme

June 2019

Question			Answer	Marks	Guidance
			<p><i>idea that water loss is not a problem / wax production wastes energy / AW ✓</i></p> <p><i>Stem tissue contains air spaces</i> buoyancy / (allows it to) float / increases gas exchange / more light near surface of water / AW ✓</p> <p><i>Thin, flexible stem</i> less support needed / plant is supported by water / can move more (in water) without breaking / AW ✓</p>		<p><b>ALLOW</b> does not impede flow of materials through cell wall / shorter diffusion distance / easier gas exchange / faster gas exchange / gas exchange more efficient</p> <p>e.g. less likely to be damaged / not damaged by, water currents / aquatic animals</p>
<b>2</b>	<b>a</b>	<b>i</b>	<p>naked mole rats, have a <u>lower</u> body temperature / AW ✓</p> <p>naked mole rats use, <b>more</b> behavioural responses / use <b>fewer</b> physiological responses (to thermoregulate) / described ✓</p> <p>(core) body temperature of naked mole rats, is not maintained within a narrow(er) range / changes (with environmental temperature) ✓</p> <p>no fur / hair , to trap layer of (insulating) air / for insulation ✓</p>	<b>2 max</b>	<p>Assume 'they' or 'it' refers to naked mole rats <b>ORA</b> for other mammals</p> <p><b>IGNORE</b> 'mammals are endotherms and mole rats are ectotherms'</p> <p><b>ALLOW</b> 'most mammals are 37°C and naked mole rats are 30-32°C'</p> <p>e.g. 'they huddle together when temperature falls whilst mammals shiver' or ' they move to cooler parts when temperature rises whilst mammals sweat'</p> <p><b>IGNORE</b> 'naked mole rats body temperature matches environmental temperature'</p> <p><b>IGNORE</b> ref to no subcutaneous fat layer / no sweat glands <b>ALLOW</b> 'no hair so cannot trap heat'</p>

H420/03

Mark Scheme

June 2019

Question		Answer	Marks	Guidance
a	ii	<p>positive feedback, is when an initial (biological) change is, increased further / exaggerated / AW ✓</p> <p>lower temperature reduces kinetic energy (of molecules) ✓</p> <p>enzyme activity, slowed / reduced ✓</p> <p>respiration rate / metabolism, slowed / reduced ✓</p> <p>less (metabolic / internal) heat generated ✓</p> <p>(so that body) temperature drops further ✓</p>	4 max	<p>e.g. 'it is when a change causes system to go further from, norm / optimum'</p> <p>'it is when a decrease leads to a further decrease'</p> <p><b>ALLOW</b> fewer successful collisions / fewer ESCs formed</p> <p><b>IGNORE</b> enzymes stop working / no enzyme activity</p> <p><b>ALLOW</b> the rate of reactions (in the body) is, reduced / slowed down</p> <p><b>IGNORE</b> respiration stops</p> <p><b>ALLOW</b> less heat, produced / created</p> <p><i>'change causes system to go further from, norm / optimum and so a decrease in temperature leads to further decrease' = mp1 and 6</i></p>
a	iii	<p>False</p> <p>True</p> <p>True</p> <p>False</p> <p>✓✓</p>	2	<p><b>ALLOW</b> T and F for True and False</p> <p><b>ALLOW</b> ticks and crosses for True and False (when unambiguous)</p> <p>All correct ✓✓</p> <p>2 or 3 correct ✓</p>
b	i	<p>no, action potentials / (electrical) impulses (in response to acid stimulus) ✓</p> <p>(along) sensory neurones / neurones to CNS ✓</p> <p>(because) no / few, <u>voltage gated</u> (sodium) channels open ✓</p> <p>less depolarisation (of receptor membrane) / fewer Na<sup>+</sup> ions move in ✓</p>	2 max	<p><b>ALLOW</b> fewer, action potentials / (electrical) impulses, generated</p> <p><b>ALLOW</b> neurones to brain</p> <p><b>IGNORE</b> fewer sodium ion channels opened</p> <p><b>DO NOT ALLOW</b> no depolarisation / no Na<sup>+</sup> ions move in</p>

H420/03

Mark Scheme

June 2019

Question		Answer	Marks	Guidance
	<b>b</b> <b>ii</b>	converts, chemical / stimulus, to action potential / electrical energy / electrical impulse ✓	<b>1</b>	<b>ALLOW</b> kinetic energy / pressure / temperature / mechanical energy / H <sup>+</sup> ions as examples of stimuli (as question states a pain receptor)  <b>IGNORE</b> 'sensory information' / 'pain'
	<b>c</b> <b>i</b>	positive correlation <b>or</b> the higher the body mass the, longer / higher, the lifespan ✓	<b>1</b>	<b>ALLOW</b> ' as body mass increases lifespan increases'  <b>DO NOT ALLOW</b> 'increase in body mass causes them to live longer'  <b>IGNORE</b> weight / size for mass
	<b>c</b> <b>ii</b>	lifespan is greater than expected for its mass / AW ✓	<b>1</b>	<b>IGNORE</b> weight / size for mass <b>ALLOW</b> 'longer / higher / bigger, than expected'
	<b>d</b> <b>i</b>	glycolysis / anaerobic respiration, can continue / AW ✓  because, conversion of glucose to TP is not needed / lactate inhibition is irrelevant / AW ✓  ATP is produced when TP is converted to pyruvate ✓	<b>2 max</b>	<b>IGNORE</b> lactate pathway <b>ALLOW</b> description of glycolysis  e.g. 'enzymes needed to convert fructose to triose phosphate are not inhibited by lactate'
	<b>d</b> <b>ii</b>	low body temperature / slow metabolic rate ✓  less energy is spent on thermoregulation ✓	<b>1 max</b>	<b>ALLOW</b> low metabolic rate / fewer metabolic reactions  <b>ALLOW</b> other plausible physiological adaptations e.g. <b>more creatine</b> phosphate stores / <b>more</b> able to buffer H <sup>+</sup> ions / <b>more</b> myoglobin / Hb has <b>higher</b> affinity for oxygen / dissociation curve shifted to left / bradycardia / <b>more</b> erythrocytes

3	a	physiological ✓	1	<p><b>ALLOW</b> biochemical / physiology / biochemistry</p> <p><b>IGNORE</b> biological / genetic /chemical</p>
	b	<p>enterokinase, is an enzyme / converts trypsinogen to trypsin / described ✓</p> <p>calcium ion / Ca<sup>2+</sup>, is a cofactor (to trypsin)✓</p>	2	<p><b>mark as prose</b></p> <p><b>ALLOW</b> enterokinase, modifies / activates / changes tertiary structure, of trypsinogen</p> <p><b>ALLOW</b> calcium ion binding site formed by enterokinase</p> <p><b>ALLOW</b> enterokinase is a catalyst</p> <p><b>ALLOW</b> a description of a cofactor</p> <p><b>ALLOW</b> calcium ion / Ca<sup>2+</sup>, is a <u>non-competitive</u> inhibitor</p> <p><b>DO NOT ALLOW</b> Ca<sup>2+</sup> is a, prosthetic group / coenzyme</p>

H420/03

Mark Scheme

June 2019

	<b>c</b>	<b>i</b>	<p><i>I</i>: another named control variable (not mentioned in text) ✓</p> <p><i>E</i>: <i>idea of</i> prevent other factors (other than temperature) affecting results ✓</p> <p><i>I</i>: <i>idea of</i> standardised method ✓</p> <p><i>E</i>: minimises experimental error ✓</p> <p><i>I</i>: temperature intervals closer together ✓</p> <p><i>E</i>: (gives a more) accurate estimate of optimum temperature ✓</p> <p><i>I</i>: control group / tube with no trypsin / tube with boiled trypsin ✓</p> <p><i>E</i>: to see if gelatine breaks down without trypsin (at different temperatures) / to allow comparison (with experimental data) ✓</p>	<b>4 max</b>	<p><i>Read as prose as improvement mark could be found in explanation e.g. 'I; substrate concentration E; should be kept constant' gets 1 mp</i></p> <p><i>Marks for explanation can be awarded if the linked improvement mark is attempted but not given</i></p> <p>e.g. area of film / volume of pH buffer / source of trypsin thickness / volume / concentration, of, gelatine / substrate <b>IGNORE</b> amount e.g. thickness may affect rate of breakdown of gelatine</p> <p>e.g. film is placed in the solution in the same way each time / measure time for set volume of gelatine to be broken down / use a thermostatically controlled water bath</p> <p><b>ALLOW</b> improves, accuracy / reproducibility/ repeatability / precision <b>IGNORE</b> improves reliability</p> <p><b>ALLOW</b> extend temperature range below 10°C</p> <p><b>ALLOW</b> shows the optimum / best temperature (for trypsin) <b>ALLOW</b> improves precision</p> <p><b>DO NOT ALLOW</b> improves, reproducibility /reliability</p> <p><b>ALLOW</b> to show trypsin is needed to break down gelatine <b>ALLOW</b> to see if heat breaks down gelatine</p>
--	----------	----------	--	--------------	--

H420/03

Mark Scheme

June 2019

		ii	mm <sup>2</sup> / cm <sup>2</sup> and s <sup>-1</sup> / min <sup>-1</sup> ✓	1	<b>ALLOW</b> /s /min <b>DO NOT ALLOW</b> 'per' or 'sec' or 'minute'
		iii	<i>I agree / yes, because...</i> two mode values exist (for icefish trypsin) ✓  <i>I disagree / no, because...</i> outlier / anomaly, included in the mean (for human trypsin) ✓ median / mode, not / less, affected by outliers ✓	2 max	<b>IGNORE</b> references to decimal places
		iv	(Student's)(unpaired) t-test ✓  (they are) comparing <b>means</b> (of two data sets) / AW ✓	2	<b>IGNORE</b> standard deviation <b>DO NOT ALLOW</b> paired / dependent / related, t- test  e.g. 'finding the difference between 2 means' <b>ALLOW</b> 'compare averages of 2 data sets'
4	a		(two years later T and B) memory cells produce a, stronger / larger / AW, response to antigens B and D ✓  (two years later, mutated virus) has less of / no longer has, antigens A and C ✓	2	<b>ALLOW</b> 'produce a secondary response to antigens B and D but not to A and C due to presence of memory cells' <b>IGNORE</b> 'faster response to antigens B and D'  <b>ALLOW</b> antigens A and C, are mutated / have changed (shape) <b>IGNORE</b> 'virus has more antigens B and D than antigens A and C'

b	<p><b>Please refer to the marking instructions on page 4 of this mark scheme for guidance on how to mark this question.</b></p> <p><b>In summary:</b>  <i>Read through the whole answer. (Be prepared to recognise and credit unexpected approaches where they show relevance.)  Using a 'best-fit' approach based on the science content of the answer, first decide which of the level descriptors, <b>Level 1, Level 2 or Level 3</b>, best describes the overall quality of the answer.  Then, award the higher or lower mark within the level, according to the <b>Communication Statement</b> (shown in italics):</i></p> <ul style="list-style-type: none"> <li>○ <i>award the higher mark where the Communication Statement has been met.</i></li> <li>○ <i>award the lower mark where aspects of the Communication Statement have been missed.</i></li> </ul> <p>• <b>The science content determines the level.</b>  • <b>The communication statement determines the mark within a level.</b></p>		
	<p><b>Level 3 (5-6 marks)</b>  Detailed explanation of variation from genes and environment, using examples.</p> <p><i>There is a well-developed line of reasoning which is clear and logically structured. The information presented is relevant and substantiated</i></p> <p><b>Level 2 (3-4 marks)</b>  Explanation of variation from genes and environment, with few examples.</p> <p><i>There is a line of reasoning with some structure. The information presented is relevant and supported by some evidence</i></p> <p><b>Level 1 (1-2 marks)</b>  Limited explanation of variation from genes or environment.</p> <p><i>There is an attempt at a logical structure with a line of reasoning. The information is, in the most part, relevant.</i></p>	6	<p><b>Indicative scientific points may include (but are not limited to):</b></p> <p><i>Genes</i></p> <ul style="list-style-type: none"> <li>• inherit genes that code for immune cells / antibodies (from parents) <i>examples: (B/T) lymphocytes, macrophages, etc</i></li> <li>• different alleles code for different versions of immune cells/antibodies</li> <li>• ref. to gene segments recombining</li> <li>• alleles code for many different variable regions</li> <li>• reference to MHC alleles</li> <li>• mutation produces new alleles (for antigens / immune cells )</li> <li>• ref to autoimmune diseases <i>examples: lupus, arthritis, allergies, SCID</i></li> </ul> <p><i>Environment</i></p> <ul style="list-style-type: none"> <li>• exposure to different pathogens determines immune response</li> </ul>

H420/03

Mark Scheme

June 2019

		<p><b>0 marks</b> No response or no response worthy of credit.</p>		<p><i>examples: measles, mumps, (produce) memory cells etc.</i></p> <ul style="list-style-type: none"> <li>• vaccinations produce primary immune responses <i>examples: MMR, BCG, HPV, (produce) memory cells etc.</i></li> <li>• reference to environmental influence on allergies <i>examples: pollen, hayfever, asthma, etc.</i></li> <li>• poor diet can weaken immune system <i>examples: low levels of protein / vitamins, (reducing) antibodies</i></li> <li>• reference to epigenetic changes <i>examples: as a result of diet, stress, chemical exposure</i></li> <li>• (auto)immune diseases with an environmental component / trigger <i>example: AIDS</i></li> </ul>
	<b>c</b>	<p>(DNL-Fab3 ) binds to, more than one type of antigen / different antigens (because it has different variable regions) ✓</p> <p>(DNL-Fab3 is) unable to bind to immune cells (due to its lack of a constant region) ✓</p> <p>(DNL-Fab3 can) bind to more antigens (due to having more than 2 binding sites) ✓</p> <p>(DNL-Fab3 is) more flexible(due to having more hinge regions)✓</p>	<b>2 max</b>	<p><b>IGNORE</b> refs to structural differences alone (e.g. heavy and light chains, number of binding sites, number of hinge regions, etc.)</p> <p><b>IGNORE</b> pathogens</p> <p><b>ALLOW</b> refs to more agglutination</p> <p><b>IGNORE</b> pathogens</p>
<b>5</b>	<b>a</b>	<p>radius (of larva) = 0.8 mm</p> <p><b>AND</b></p> <p>(larvae) could (rely on simple diffusion) ✓✓</p>	<b>2</b>	<p><b>ALLOW</b> calculator value (i.e. 0.79788456) or any correctly rounded value.</p> <p><b>ALLOW</b> correct calculation with incorrect or no conclusion for 1 mark</p>

H420/03

Mark Scheme

June 2019

					<p><b>ALLOW</b> ecf for correct conclusion drawn from incorrect calculation</p> <p>Award 0 marks for conclusion alone</p>
	<b>b</b>	<b>i</b>	<p><i>the scientists need to know whether...</i></p> <p>tomato plants produce methyl jasmonate ✓</p> <p>natural concentrations are as high as experimental ones / AW ✓</p> <p>methyl jasmonate increases, growth (rate) / cell division (rather than reducing herbivory) ✓</p> <p>other plants respond in the same way (as tomatoes) ✓</p> <p>the effect on the armyworm <b>population</b> / AW ✓</p> <p>other insects respond in the same way ✓</p>	<b>2 max</b>	<p><b>IGNORE</b> descriptions of improvements to method e.g. same growing conditions / effects of other herbivores / constant number of larvae</p> <p><b>ALLOW</b> 'whether more methyl jasmonate produced after herbivory than before'</p> <p><b>ALLOW</b> 'need to carry out the investigation on other plant species'</p> <p><b>ALLOW</b> how many herbivores died</p>
		<b>ii</b>	methyl jasmonate increases the (final) mass (of tomato plants) ✓	<b>1</b>	<p><b>ALLOW</b> description of relationship e.g. 'as more methyl jasmonate applied mass of tomato plant increases'</p> <p>'there is a positive correlation between methyl jasmonate and final mass'</p>
		<b>iii</b>	methyl jasmonate (causes) increased cannibalism (among larvae above $0.1 \text{ mmol dm}^{-3}$ ) / AW ✓	<b>1</b>	<p><b>ALLOW</b> description of relationship e.g. 'as more methyl jasmonate larvae eat each other more' / 'there is a positive correlation between methyl jasmonate and cannibalism'</p> <p><b>ALLOW</b> methyl jasmonate does not increase cannibalism below <math>0.1 \text{ mmol dm}^{-3}</math></p>

H420/03

Mark Scheme

June 2019

						<b>ALLOW</b> larvae have a tendency towards cannibalism even when no methyl jasmonate applied
--	--	--	--	--	--	---

6	a	i	<p><b><i>Please refer to the marking instructions on page 4 of this mark scheme for guidance on how to mark this question.</i></b></p> <p><b><i>In summary:</i></b>  <i>Read through the whole answer. (Be prepared to recognise and credit unexpected approaches where they show relevance.)</i></p>
