H422/02: Scientific literacy in biology

A Level

Mark Scheme for June 2025

OCR (Oxford Cambridge and RSA) is a leading UK awarding body, providing a wide range of qualifications to meet the needs of candidates of all ages and abilities. OCR qualifications include AS/A Levels, Diplomas, GCSEs, Cambridge Nationals, Cambridge Technicals, Functional Skills, Key Skills, Entry Level qualifications, NVQs and vocational qualifications in areas such as IT, business, languages, teaching/training, administration and secretarial skills.

It is also responsible for developing new specifications to meet national requirements and the needs of students and teachers. OCR is a not-for-profit organisation; any surplus made is invested back into the establishment to help towards the development of qualifications and support, which keep pace with the changing needs of today's society.

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which marks were awarded by examiners. It does not indicate the details of the discussions which took place at an examiners' meeting before marking commenced.

All examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes should be read in conjunction with the published question papers and the report on the examination.

© OCR 2025

**PREPARATION FOR MARKING
RM ASSESSOR**

1. Make sure that you have accessed and completed the relevant training packages for on-screen marking: *RM Assessor Online Training: OCR Essential Guide to Marking*.
2. Make sure that you have read and understood the mark scheme and the question paper for this unit. These are available in RM Assessor
3. Log-in to RM Assessor and mark the **required number** of practice responses (“scripts”) and the **required number** of standardisation responses.

MARKING

1. Mark strictly to the mark scheme.
2. Marks awarded must relate directly to the marking criteria.
3. The schedule of dates is very important. It is essential that you meet the RM Assessor 50% and 100% (traditional 40% Batch 1 and 100% Batch 2) deadlines. If you experience problems, you must contact your Team Leader (Supervisor) without delay.
4. If you are in any doubt about applying the mark scheme, consult your Team Leader by telephone or the RM Assessor messaging system, or by email.
5. **Crossed Out Responses**
Where a candidate has crossed out a response and provided a clear alternative then the crossed out response is not marked. Where no alternative response has been provided, examiners may give candidates the benefit of the doubt and mark the crossed out response where legible.

Rubric Error Responses – Optional Questions

Where candidates have a choice of question across a whole paper or a whole section and have provided more answers than required, then all responses are marked and the highest mark allowable within the rubric is given. Enter a mark for each question answered into RM assessor, which will select the highest mark from those awarded. *(The underlying assumption is that the candidate has penalised themselves by attempting more questions than necessary in the time allowed.)*

Multiple Choice Question Responses

When a multiple choice question has only a single, correct response and a candidate provides two responses (even if one of these responses is correct), then no mark should be awarded (as it is not possible to determine which was the first response selected by the candidate).

When a question requires candidates to select more than one option/multiple options, then local marking arrangements need to ensure consistency of approach.

Contradictory Responses

When a candidate provides contradictory responses, then no mark should be awarded, even if one of the answers is correct.

Short Answer Questions (requiring only a list by way of a response, usually worth only **one mark per response**)

Where candidates are required to provide a set number of short answer responses then only the set number of responses should be marked. The response space should be marked from left to right on each line and then line by line until the required number of responses have been considered. The remaining responses should not then be marked. Examiners will have to apply judgement as to whether a 'second response' on a line is a development of the 'first response', rather than a separate, discrete response. *(The underlying assumption is that the candidate is attempting to hedge their bets and therefore getting undue benefit rather than engaging with the question and giving the most relevant/correct responses.)*

Short Answer Questions (requiring a more developed response, worth **two or more marks**)

If the candidates are required to provide a description of, say, three items or factors and four items or factors are provided, then mark on a similar basis – that is downwards (as it is unlikely in this situation that a candidate will provide more than one response in each section of the response space.)

Longer Answer Questions (requiring a developed response)

Where candidates have provided two (or more) responses to a medium or high tariff question which only required a single (developed) response and not crossed out the first response, then only the first response should be marked. Examiners will need to apply professional judgement as to whether the second (or a subsequent) response is a 'new start' or simply a poorly expressed continuation of the first response.

6. Always check the pages (and additional objects if present) at the end of the response in case any answers have been continued there. If the candidate has continued an answer there, then add a tick to confirm that the work has been seen.

7. There is a NR (**No Response**) option. Award NR (No Response):

- if there is nothing written at all in the answer space
- OR if there is a comment which does not in any way relate to the question (e.g., 'can't do', 'don't know')
- OR if there is a mark (e.g., a dash, a question mark) which is not an attempt at the question.

Note: Award 0 marks – for an attempt that earns no credit (including copying out the question).

8. The RM Assessor **comments box** is used by your team leader to explain the marking of the practice responses. Please refer to these comments when checking your practice responses. **Do not use the comments box for any other reason.**

If you have any questions or comments for your team leader, use the phone, the RM Assessor messaging system, or e-mail.

9. Assistant Examiners will send a brief report on the performance of candidates to their Team Leader (Supervisor) via email by the end of the marking period. The report should contain notes on particular strengths displayed as well as common errors or weaknesses. Constructive criticism of the question paper/mark scheme is also appreciated.

10. For answers marked by levels of response:

Read through the whole answer from start to finish, using the Level descriptors to help you decide whether it is a strong or weak answer. The indicative scientific content in the Guidance column indicates the expected parameters for candidates' answers, but be prepared to recognise and credit unexpected approaches where they show relevance. Using a 'best-fit' approach based on the skills and science content evidenced within the answer, first decide which set of level descriptors, Level 1, Level 2 or Level 3, best describes the overall quality of the answer.

Once the level is located, award the higher or lower mark:

The higher mark should be awarded where the level descriptor has been evidenced and all aspects of the communication statement (in italics) have been met.

The lower mark should be awarded where the level descriptor has been evidenced but aspects of the communication statement (in italics) are missing.

In summary:

The skills and science content determines the level.

The communication statement determines the mark within a level.

Level of response questions on this paper are 2(a)(i) and 3(c).

11. Annotations

Annotation	Meaning
	Correct response
	Incorrect response
	Omission mark
	Benefit of doubt given
	Contradiction
	Rounding error
	Error in number of significant figures
	Error carried forward
	Level 1
	Level 2
	Level 3
	Benefit of doubt not given
	Noted but no credit given

H422/02

Mark Scheme

June 2025

Annotation	Meaning
	Ignore
	Blank page

12. Subject Specific Marking Instructions

Abbreviations, annotations and conventions used in the detailed Mark Scheme (to include abbreviations and subject-specific conventions).

Annotation	Meaning
/	alternative and acceptable answers for the same marking point
✓	Separates marking points
DO NOT ALLOW	Answers which are not worthy of credit
IGNORE	Statements which are irrelevant
ALLOW	Answers that can be accepted
()	Words which are not essential to gain credit
—	Underlined words must be present in answer to score a mark
ECF	Error carried forward
AW	Alternative wording
ORA	Or reverse argument

13. Subject-specific Marking Instructions

INTRODUCTION

Your first task as an Examiner is to become thoroughly familiar with the material on which the examination depends. This material includes:

- the specification, especially the assessment objectives
- the question paper
- the mark scheme.

You should ensure that you have copies of these materials.

You should ensure also that you are familiar with the administrative procedures related to the marking process. These are set out in the OCR booklet **Instructions for Examiners**. If you are examining for the first time, please read carefully **Appendix 5 Introduction to Script Marking: Notes for New Examiners**.

Please ask for help or guidance whenever you need it. Your first point of contact is your Team Leader.

H422/02

Mark Scheme

June 2025

Question			Answer	Marks	Guidance
1	(a)	(i)	aleurone (layer) ✓ produces / synthesises / secretes , enzymes or AVP ✓	2	ALLOW named enzymes e.g. amylase e.g. where hydrolysis of starch occurs e.g. storage of lipid / protein / vitamins / minerals
1	(a)	(ii)	<i>formation</i> fusion of , pollen / sperm , <u>nucleus</u> with (two) polar , nuclei / bodies ✓ <i>function</i> storage of (named) , carbohydrate / lipid / protein (for developing embryo) ✓	2	IGNORE gametes unqualified e.g. fusion of gametes ALLOW food source / starch store / food reserve
1	(a)	(iii)	<u>more</u> water can enter (embryo) ✓ <i>idea of</i> removing , ABA / (GA) inhibitor ✓ <u>more</u> oxygen can enter (embryo) ✓ (more) oxygen increases GA production ✓ (so) <u>greater</u> inhibition of ABA (by GA) ✓	max 2	ALLOW faster uptake of oxygen IGNORE e.g. oxygen <i>causes</i> GA production without the idea of 'more oxygen' or 'increased GA'

H422/02

Mark Scheme

June 2025

Question			Answer		Marks	Guidance
1	(b)	(i)	1	<i>appropriate DV</i> standardised method for determining germination ✓	max 4	e.g. number of days / time taken until emergence of , radicle / root e.g. number of days / time taken until roots reach 5mm IGNORE ref to shoot
			2	<i>appropriate IV</i> suitable range of temperatures ✓		ALLOW e.g. five temperatures ranging from 10 to 30° C should include at least four different temps below 45 °C
			3	<i>any two from</i> use of , large / appropriate , (stated) number of (barley) seeds ✓		e.g. minimum 20 seeds (per temperature)
			4	method for controlling temperature ✓		e.g. incubator / <u>incubate</u> seeds ALLOW thermostatically controlled room IGNORE thermostatically controlled water bath
			5	other (named) variable(s) kept constant ✓		e.g. 15cm ³ of water / nutrient solution provided each day e.g. same age of seeds / seeds from same plant e.g. light intensity IGNORE same species IGNORE pH / buffer / carbon dioxide concentration
			6	<i>idea of repetition of <u>whole</u> investigation</i> twice more ✓		

H422/02

Mark Scheme

June 2025

1	(b)	(ii)	availability of water ✓ soil pH ✓ AVP ✓	max 2	ALLOW drought / flooding IGNORE rain unqualified / humidity e.g. salinity / osmotic stress / light frequency / depth of burial / light levels / light intensity IGNORE carbon dioxide concentration
1	(b)	(iii)	vernalisation ✓	1	ALLOW flowering
1	(c)	(i)	<i>idea that</i> germination is delayed ✓ (so) seeds can be , stored / transported ✓ OR <i>idea of</i> allowing crop management ✓ (so) avoids germination in unfavourable conditions / AW ✓ OR avoids germination in unfavourable conditions / AW ✓ (so) seed waste reduced / increases crop yield ✓ OR AVP advantage ✓ AVP linked explanation ✓	max 2	ALLOW (so) seeds do not need to be sown immediately ALLOW idea of optimising planting schedules ALLOW seasonal aspect e.g. avoids germinating in winter

H422/02

Mark Scheme

June 2025

1	(c)	(ii)	1 flooding causes , hypoxia / anoxia / lack of oxygen , (in soil) ✓ 2 rice has subfamily 3 (enzymes) that will be activated in low oxygen conditions ✓ 3 (therefore more) starch-digesting enzyme / amylase , activated / AW , in rice ✓ 4 in rice , starch / amylose , will be , hydrolysed / broken down , to maltose / glucose ✓ 5 AVP ✓	max 4	ORA for barley ORA for barley ORA for barley e.g. (this variety of) rice may not germinate at higher oxygen levels e.g. glucose / maltose (becomes) available for respiration e.g. glucose / maltose are respiratory substrates IGNORE ref to <u>anaerobic</u>
1	(d)	(i)	FIRST CHECK ANSWER ON ANSWER LINE If answer = 0.8(69565217) (%) award 2 marks total uncertainty = $2 \times 0.5(\text{mm}) = \pm 1(\text{mm})$ ✓ percentage error = $(1 \div 115) \times 100 = 0.87(\%)$ ✓	2	ALLOW 1.7(39130434) (%) for 2 marks (based on 1× smallest division)
1	(d)	(ii)	FIRST CHECK ANSWER ON ANSWER LINE If answer = 6 (mm min⁻¹) award 1 mark rate = $180 \div 30 = 6 \text{ (mm min}^{-1}\text{)}$ ✓	1	

H422/02

Mark Scheme

June 2025

1	(d)	(iii)	FIRST CHECK ANSWER ON ANSWER LINE If answer = 16 (mm³ min⁻¹) award 2 marks $\text{rate} = \pi \times 0.75^2 \times 9.33 \checkmark$ $\text{rate} = 16 \text{ (mm}^3 \text{ min}^{-1}) \checkmark$	2	ALLOW 2 marks for calculator value of 16.48747 or any correctly rounded value ALLOW 1 mark for $\pi \times 0.75^2 \times 9.33$
---	-----	-------	--	---	---

2	(a)	(i)* Please refer to the marking instructions on page 4 of this mark scheme for guidance on how to mark this question. Level 3 (5–6 marks) A comprehensive description of the steps in the process AND an attempt at suggesting an explanation for the change in response. <i>There is a well-developed line of reasoning which is clear and logically structured. The information presented is relevant and substantiated.</i> Level 2 (3–4 marks) A comprehensive description of the steps in the process but does not include an explanation for the change in response OR A description of some of the steps in the process AND an attempt at suggesting an explanation for the change in response. <i>There is a line of reasoning presented with some structure. The information presented is relevant and supported by some evidence.</i> Level 1 (1–2 marks) A basic description of some steps in the process OR an attempt at suggesting an explanation for the change in response. <i>There is an attempt at a logical structure with a line of reasoning. The information is in the most part relevant.</i> 0 marks <i>No response or no response worthy of credit.</i>	6 Loss of communication mark- consider incorrect science and terminology e.g. incorrect substrate and product such as fibrin to fibrinogen Indicative scientific points may include: steps in the clotting process • damage to blood vessels exposes collagen • leads to activation of platelets • clumping of platelets and release of thromboplastin • involvement of calcium ions • involvement of clotting factors / enzymes • release of thromboplastin by leucocytes • conversion of prothrombin → thrombin • conversion of fibrinogen → fibrin • soluble to insoluble (linked to fibrinogen and fibrin) • formation of mesh • role of fibrin fibres / mesh in trapping erythrocytes explanation for change in response • cascade amplifies the response • activation of enzymes amplifies the response • activation of enzymes increases the rate of response • ref to positive feedback / positive cascade • platelets attract more platelets • <i>idea that</i> an enzyme further down in process accelerates earlier step
---	-----	--	--

H422/02

Mark Scheme

June 2025

2	(a)	(ii)	narrowing of blood vessel (lumen) reduces blood flow (to site of cut) ✓ <i>idea that</i> (clumping of proteins will) mimic , action of fibrin / mesh formation ✓	2	ALLOW arterioles for blood vessel IGNORE capillaries for blood vessel IGNORE ref to stops bleeding (as in stem of question) IGNORE constriction
2	(b)	(i)	LDH is released by damaged , cells / tissue ✓ concentration of LDH in the blood will depend on severity of the injury / AW ✓ can identify location of damaged , cells / tissues ✓	max 2	IGNORE level / amount / conc. for concentration ALLOW e.g. the higher the LDH concentration the more severe the damage / LDH concentration proportional to severity of tissue damage
2	(b)	(ii)	(in this male patient) <u>LDH-4</u> is associated with kidney and pancreas ✓ cannot distinguish between , these organs / kidney and pancreas ✓	2	DO NOT ALLOW placenta (patient is male) ALLOW ECF if placenta mentioned ALLOW further tests would be needed to distinguish between these organs

H422/02

Mark Scheme

June 2025

3	(a)		F = islet of Langerhans ✓ G = exocrine / non-endocrine , cells / tissue ✓	2	ALLOW alpha / α and beta / β , cells ALLOW acinar cells / acinus
3	(b)	(i)	FIRST CHECK ANSWER ON ANSWER LINE If answer = 6.0 (mmol mol⁻¹) award 2 marks rearrangement of equation: $\text{HbA1c (\%)} = \frac{\text{HbA1c (mmol mol}^{-1}\text{)}}{10.929} + 2.14 \quad \checkmark$ Substitution and evaluation: $\frac{42}{10.929} + 2.14 = 5.98 = 6.0 \text{ (2 sig figs)} \quad \checkmark$	2	ALLOW 5.98 for 1 mark
3	(b)	(ii)	prediabetes / high probability of developing type 2 diabetes ✓	1	ALLOW ECF from candidate's own value for part (i)

3	(c)*	Please refer to the marking instructions on page 4 of this mark scheme for guidance on how to mark this question. Level 3 (5–6 marks) A comprehensive balanced evaluation with advantages AND disadvantages of semaglutide. <i>There is a well-developed line of reasoning which is clear and logically structured. The information presented is relevant and substantiated.</i> Level 2 (3–4 marks) An evaluation that includes an advantage AND disadvantages of semaglutide. OR An evaluation that includes advantages AND a disadvantage of semaglutide. <i>There is a line of reasoning presented with some structure. The information presented is relevant and supported by some evidence.</i> Level 1 (1–2 marks) An outline of advantages OR disadvantages of semaglutide. OR An outline of an advantage AND a disadvantage <i>There is an attempt at a logical structure with a line of reasoning. The information is in the most part relevant.</i> 0 marks <i>No response or no response worthy of credit.</i>	6 Loss of communication mark- consider irrelevant detail e.g. more than 50% irrelevant information about clinical trials / type 1 diabetes / other drugs OR consider lack of clarity e.g. not being clear about which are advantages / disadvantages Indicative scientific points may include: Potential advantages of semaglutide • shows that controls diabetes better than some existing treatments • reduces risks associated with (Type 2) diabetes e.g. reduces likelihood of foot infection • enables patient to be more active • reduces impacts of obesity • weekly injection may be more convenient for patients than (daily) insulin injections • may reduce costs for the NHS • reduces burden on NHS resources • reduces risk of kidney failure • positive impact on lifestyle e.g. fewer injections is less time-consuming for patients Potential disadvantages of semaglutide • (usually more) expensive • (increases risk of retina damage so) loss of vision • tablets easier to manage / administer than injections • pain / discomfort of regular injections • long-term side-effects are unclear • possible nutrient deficiency • uncontrolled / too much weight loss
---	------	---	--

H422/02

Mark Scheme

June 2025

					negative impact on lifestyle e.g. loss of earnings due to loss of vision
--	--	--	--	--	--

H422/02

Mark Scheme

June 2025

4	(a)	(i)	FIRST CHECK ANSWER ON ANSWER LINE If answer (<i>D</i>) = 0.83 award 3 marks <table><thead><tr><th>Plant species</th><th>(<i>n</i> / <i>N</i>)²</th></tr></thead><tbody><tr><td>Black-eyed Susan</td><td>0.0390</td></tr><tr><td>Clover</td><td>0.0481</td></tr><tr><td>Blue vervain</td><td>0.0308</td></tr><tr><td>Common yarrow</td><td>0.0151</td></tr><tr><td>Ironweed</td><td>0.0236</td></tr><tr><td>Canadian milkvetch</td><td>0.0173</td></tr><tr><td>Totals</td><td>0.1739</td></tr><tr><td><i>D</i> =</td><td>0.83 (2 sig. figs)</td></tr></tbody></table> ✓✓✓	Plant species	(<i>n</i> / <i>N</i>) ²	Black-eyed Susan	0.0390	Clover	0.0481	Blue vervain	0.0308	Common yarrow	0.0151	Ironweed	0.0236	Canadian milkvetch	0.0173	Totals	0.1739	<i>D</i> =	0.83 (2 sig. figs)	3	Check table for candidate's answer for <i>D</i> if it is not on the answer line. ALLOW for 1 mark 6 correct values for (<i>n</i>/<i>N</i>)² OR correct total ALLOW for 2 marks correct value for <i>D</i> not to 2 sig. figs e.g. 0.8261
Plant species	(<i>n</i> / <i>N</i>) ²																						
Black-eyed Susan	0.0390																						
Clover	0.0481																						
Blue vervain	0.0308																						
Common yarrow	0.0151																						
Ironweed	0.0236																						
Canadian milkvetch	0.0173																						
Totals	0.1739																						
<i>D</i> =	0.83 (2 sig. figs)																						
4	(a)	(ii)	supported because <i>D</i> , has increased / is greater than 0.61 ✓	1	ALLOW <i>D</i> value in 2022 is closer to 1 ALLOW ECF for answer to part (a)(i) e.g. decrease in biodiversity if their value for <i>D</i> is <0.61																		

H422/02

Mark Scheme

June 2025

4	(a)	(iii)	1 include , data / <i>D</i> value , for , 2019 / 2020 / 2021 ✓ 2 (named) statistical test to compare significance ✓ 3 obtain data for <u>other</u> species ✓ 4 ensure data collected at same , times of the year / month / season ✓ 5 use identification key to ensure species are correctly recognised ✓	max 2	ALLOW whether , data / <i>D</i> value , changed / fluctuated , in intervening years IGNORE ref to longer time period as time stated in question ALLOW <i>t</i>-test (unpaired) DO NOT ALLOW chi-squared / Spearman's rank correlation coefficient ALLOW e.g. data for more plant species or other plant species ALLOW photographic images / dichotomous for identification ALLOW identification guide
---	-----	-------	--	-------	---

H422/02

Mark Scheme

June 2025

4	(b)		<u>plant</u> biodiversity in soybean field is low(er than solar farm) ✓ (so) few(er) , habitats / food sources / niches , for insects (in soybean field) ✓ AVP ✓	max 2	ALLOW ORA throughout ALLOW either part of soybean field for soybean field throughout e.g. impact of harvesting (soybean) e.g. impact of insecticides / pesticides (on soybean field) e.g. impact of human activity on maintenance of crops
4	(c)		<i>correct because</i> 1 weed species (may) have greater genetic diversity ✓ 2 weed species more likely to adapt to climate change ✓ 3 drought / flooding , may have less effect on weed species ✓ <i>incorrect because</i> 4 crop plants might grow more with higher , temperatures / concentrations of CO₂ ✓ 5 crop plants more likely to be , genetically modified / genetically engineered / selectively bred ✓	max 3	ALLOW ORA for MPs 1 to 3 based on crop plants ALLOW more likely to survive wide range of environmental conditions

H422/02

Mark Scheme

June 2025

5	(a)	(i)	<i>males</i> (binds to cells in testes and) triggers release of testosterone ✓ <i>females</i> (surge in LH) causes release of secondary oocyte (from mature follicle) ✓	2	ALLOW other correct roles e.g. stimulates Leydig cells ALLOW other correct roles e.g. stimulates formation of corpus luteum e.g. release of oestrogen IGNORE ovulation unqualified
5	(a)	(ii)	stimulates oestrogen production ✓ stimulates maturation of follicles ✓	2	ALLOW other correct uses e.g. causes induction of ovulation
5	(b)	(i)	H = zona pellucida ✓ J = (haploid) nucleus (of oocyte) ✓ K = corona radiata ✓	3	ALLOW glycoprotein layer ALLOW cell surface / plasma membrane ALLOW (layer of) follicle cells
5	(b)	(ii)	1 <i>idea that</i> the process , starts before birth / continues after puberty ✓ 2 oogonia grow to produce primary oocytes / AW ✓ 3 (meiosis starts and) pauses in prophase I ✓ 4 meiosis I , restarts / continues , to form secondary oocytes ✓ 5 diploid (oogonia) to haploid (secondary oocyte) ✓	max 2	DO NOT ALLOW formed during two meiotic divisions

H422/02

Mark Scheme

June 2025

5	(c)	(i)	non-disjunction ✓ non-separation of , homologous chromosomes in meiosis I / sister chromatids in meiosis II ✓ (after meiosis) daughter cell / gamete , has two copies of chromosome 21 ✓	max 2	ALLOW bivalents for homologous chromosomes ALLOW anaphase I / anaphase II for meiosis I and meiosis II
5	(c)	(ii)	translocation ✓	1	ALLOW a description of translocation e.g. part of one chromosome breaks off and attaches to a different chromosome ALLOW mosaic Down's / description IGNORE mutation / inherited
5	(d)	(i)	increased risk of chromosomal abnormality ✓ mutations accumulate with age (of oocytes) ✓ <i>idea that</i> long time spent in prophase I results in more errors ✓	max 2	MP1 linked to abnormal chromosomes not mutations e.g. increased risk of non-disjunction / translocation ALLOW rate of mutation increases

H422/02

Mark Scheme

June 2025

5	(d)	(ii)	genetic counselling to indicate risk factors due to family history / AW ✓ prenatal screening to , diagnose Down's syndrome / AW , in , embryo / fetus ✓ pre-implantation screening during IVF to identify healthy embryos / AW ✓	max 2	ALLOW named e.g. 'karyotyping' e.g. AW identify fetal abnormalities IGNORE IVF unqualified
5	(d)	(iii)	genetic counselling can cause , anxiety / mental health issues ✓ (prenatal / pre-implantation / IVF) screening can lead to , abortion / discarding of embryos ✓	max 1	IGNORE ref to religious beliefs

H422/02

Mark Scheme

June 2025

6	(a)	(i)	(% of) G = C and (% of) A = T ✓ (this is) same / universal , in , all species / both eukaryotes and prokaryotes ✓ because of <u>complementary</u> base pairing ✓ correct use of data ✓	max 3	ALLOW $G+C=1$ and $A+T=1$ ALLOW (%) purines = (%) pyrimidines ALLOW ratio of purines to pyrimidines is 1:1 ALLOW 'similar' for = ALLOW e.g. A bonds / binds / pairs with T as they are <u>complementary</u> Data quotes to support MP1 e.g. in human A= 29.3% and T = 30.0% e.g. in human $A÷T = 0.977$ e.g. in <i>E.coli</i> G = 26.0% and C = 25.7%
6	(a)	(ii)	no complementary base pairing / AW ✓	1	ALLOW less complementary base pairing IGNORE only one strand of DNA
6	(b)		work at low temperatures / use ice-cold ethanol / use enzyme inhibitor(s) ✓ use (named) detergent ✓ add a protease ✓	3	ALLOW add protease (to break down enzymes)

H422/02

Mark Scheme

June 2025

6	(c)		DNA is more soluble at 50° C (at low ethanol concentrations) ✓ they were using (very) low concentrations of ethanol ✓ they should have used (at least) 20% ethanol ✓	max 2	ALLOW at 50°C more DNA remains in solution / less DNA precipitates out e.g. 0-10 % for low concentrations IGNORE amount / conc. for concentration ALLOW DNA will not precipitate at % of ethanol used
----------	------------	--	---	--------------	--

H422/02

Mark Scheme

June 2025

7	(a)		<table><tr><th>Structural feature</th><th>DNA</th><th>RNA</th><td></td></tr><tr><td>Pentose sugar</td><td><i>Deoxyribose</i></td><td><i>Ribose</i></td><td>✓</td></tr><tr><td>Purine bases</td><td><i>Guanine</i> <i>Adenine</i></td><td><i>Guanine</i> <i>Adenine</i></td><td>✓</td></tr><tr><td>Pyrimidine bases</td><td><i>Cytosine</i> <i>Thymine</i></td><td><i>Cytosine</i> <i>Uracil</i></td><td>✓</td></tr></table>	Structural feature	DNA	RNA		Pentose sugar	<i>Deoxyribose</i>	<i>Ribose</i>	✓	Purine bases	<i>Guanine</i> <i>Adenine</i>	<i>Guanine</i> <i>Adenine</i>	✓	Pyrimidine bases	<i>Cytosine</i> <i>Thymine</i>	<i>Cytosine</i> <i>Uracil</i>	✓	3	One mark per correct row IGNORE A / T / C / G
Structural feature	DNA	RNA																			
Pentose sugar	<i>Deoxyribose</i>	<i>Ribose</i>	✓																		
Purine bases	<i>Guanine</i> <i>Adenine</i>	<i>Guanine</i> <i>Adenine</i>	✓																		
Pyrimidine bases	<i>Cytosine</i> <i>Thymine</i>	<i>Cytosine</i> <i>Uracil</i>	✓																		
7	(b)		 square / circle drawn / shaded around any phosphodiester bond ✓	1																	
7	(c)		(DNA) helicase ✓ hydrogen ✓ DNA polymerase ✓ condensation ✓	4																	

H422/02

Mark Scheme

June 2025

7	(d)	(i)	named check point e.g. S / G2 ✓ checks for , damaged / mutated , DNA ✓ triggers repair mechanism / DNA repair ✓ halts cell cycle ✓ AVP ✓	max 2	ALLOW DNA synthesis checkpoint for S IGNORE other checkpoints e.g. metaphase / G1 e.g. role of cyclin-dependent kinases / CDKs
7	(d)	(ii)	damaged DNA will bypass checkpoints ✓ dysregulation of the cell cycle ✓ increase in cell division ✓	max 2	ALLOW damaged DNA is replicated ALLOW uncontrolled cell cycle ALLOW cell proliferation
7	(e)		description of radiotherapy ✓ (cells with damaged DNA undergo) apoptosis ✓ (so) less cancer cells (so the tumour shrinks) ✓	max 2	e.g. ionising radiation damages / destroys (cancer) cells
7	(f)	(i)	multipotent ✓	1	

H422/02

Mark Scheme

June 2025

7	(f)	(ii)	easier / safer , to obtain ✓ less likelihood of transmitting infection ✓ cord blood can be , frozen / banked ✓ less likely to be rejected (because baby's immune system is less developed) ✓	max 1	ALLOW less invasive / doesn't require surgery IGNORE no rejection
----------	------------	-------------	--	--------------	---

UNIVERSITY PRESS & ASSESSMENT

OCR is part of Cambridge University Press & Assessment, a department of the University of Cambridge.

For staff training purposes and as part of our quality assurance programme your call may be recorded or monitored. © OCR 2025 Oxford Cambridge and RSA Examinations is a Company Limited by Guarantee. Registered in England. Registered office The Triangle Building, Shaftesbury Road, Cambridge, CB2 8EA.

Registered company number 3484466. OCR is an exempt charity.

OCR operates academic and vocational qualifications regulated by Ofqual, Qualifications Wales and CCEA as listed in their qualifications registers including A Levels, GCSEs, Cambridge Technicals and Cambridge Nationals.

OCR provides resources to help you deliver our qualifications. These resources do not represent any particular teaching method we expect you to use. We update our resources regularly and aim to make sure content is accurate but please check the OCR website so that you have the most up-to-date version. OCR cannot be held responsible for any errors or omissions in these resources.

Though we make every effort to check our resources, there may be contradictions between published support and the specification, so it is important that you always use information in the latest specification. We indicate any specification changes within the document itself, change the version number and provide a summary of the changes. If you do notice a discrepancy between the specification and a resource, please [contact us](#).

Whether you already offer OCR qualifications, are new to OCR or are thinking about switching, you can request more information using our [Expression of Interest form](#).

Please [get in touch](#) if you want to discuss the accessibility of resources we offer to support you in delivering our qualifications.
