| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- |
| 1(a) | 1. idea of reflection ; <br> 2. reference. to \{incorrect / eq \} \{wavelength / <br> colour / frequency\}; | 3. idea of \{not hitting the \{chloroplast / <br> chlorophyll\}\} / it is transmitted ; |
| 4. idea of light being in excess e.g. at max. <br> photosynthesis so more light can be used ; | max <br> (2) |  |

| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- |
| 1(b)(i) | \{joules / energy\} per \{square metre / metre squared <br> /(unit) area\} per \{year / unit time\}; | (1) |

| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- |
| 1(b)(ii) | Award 2 marks for correct answer (84.8/84.84) |  |
|  | 1. correct subtraction (24.4-3.7 / 20.7) ; <br> 2. correct multiplication by $100 \div 24.4 ;$ | (2) |

| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- |
| $\mathbf{1 ( b ) ( \text { iii) }}$ | B; | (1) |

| Question Number | Answer | Mark |
| :---: | :---: | :---: |
| 1(c) [QWC] | (QWC - Spelling of technical terms (shown in italics) must be correct and the answer must be organised in a logical sequence) <br> 1. reference to \{thylakoids / thylakoid (membranes) ; <br> 2. in \{granum / grana\}; <br> 3. (light energy) raises energy level of electrons / \{chlorophyll / electrons\}excited / eq ; <br> 4. electrons released from \{chlorophyll / photosystem / eq\}/ eq ; <br> 5. reference to electron \{carrier / eq\}; <br> 6. reference to series of \{redox / oxidation \& reduction / eq\} reactions; <br> 7. reference to energy level of electrons \{falls / eq\}; <br> 8. reference to \{synthesise ATP from ADP +P / phosphorylate ADP\} ; <br> 9. reference to photophosphorylation ; <br> 10. reference to ATP \{synthetase / synthase / ase\} ; <br> 11. reference to \{chemiosmosis / eq\}; <br> 12. idea of electrons from \{photolysis / eq\} used to replace those lost ; <br> 13. reference to involvement of \{accessory pigments/ named example\}; | max <br> (6) |

| Number |  |  |
| :--- | :--- | :--- |
| 2(a)(i) | A; | (1) |

| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- |
| 2(a)(ii) | D; | $\mathbf{( 1 )}$ |

| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- |
| 2(a)(iii) | A; | $\mathbf{( 1 )}$ |

| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- |
| 2(b) | 1. ref to thylakoids ; <br> 2. (made of) membranes ; <br> 3. (arranged as) \{stacks / grana / eq\} ; <br> 4. contain \{pigment / chlorophyll\} / eq ; <br> 5. (arranged as) quantasomes / photosystems ; | maximum <br> (3) |

| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- |
| 2(c)(i) | 1.$(62.4 / 162) \times 100$; <br> [accept alternative correct working] <br> 2. $38.5(\%) ;$ [must be to 1 dp$]$ |  |

| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- |
| 2(c)(ii) | 1. ref to different lighting has little effect / little <br> variation in percentage grain yields ; |  |
| 2. variation in percentage is less than 3/eq; <br> 3. which is (probably) \{not significant/ insignificant\} <br> 4. yield is \{less / eq\} for low pressure sodium lamps ; | maximum <br> (3) |  |

| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- |
| 2(c)(iii) | Any two from <br> 1. crops can be grown \{out of season / all year <br> round\} / eq ; |  |
| 2. plants photosynthesise 24 hours a day / eq ; <br> 3. idea of less physical damage from \{weather / <br> animals / eq\}; | 4. pest control easier / eq ; <br> 5. ref to control of other named factor, eg CO2, <br> temperature, humidity, water supply ; | maximum <br> (2) |

| Question Number | Answer | Additional Guidance | Mark |
| :---: | :---: | :---: | :---: |
| 3(a) | 1. idea that enzyme activity decreases ; <br> 2. credit calculated reduction e.g. $0.6,2.7,3.3$; <br> 3. idea that an increase in temperature results in increase in kinetic energy ; <br> 4. causing changes in bonds (in the enzyme) / eq ; <br> 5. idea that enzyme is denaturing (above $40{ }^{\circ} \mathrm{C}$ ) ; <br> 6. idea that carbon fixation is reduced ; | 5 ACCEPT fewer enzymesubstrate complexes NOT starts to denature | (5) |

| Question <br> Number | Answer | Additional Guidance | Mark |
| :--- | :--- | :--- | :---: |
| 3(b) | $\{\mathrm{RuBP} /$ ribulose bisphosphate\} AND \{carbon dioxide / <br> $\left.\mathrm{CO}_{2}\right\} ;$ | ACCEPT Rubp / ribulose <br> biphosphate <br> $\mathrm{NOT} \mathrm{CO} / \mathrm{CO}^{2}$ |  |

| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- |
| 3(c)(i) | D valid; | (1) |

| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- |
| 3(c)(ii) | $\mathbf{C}$ measuring the activity at $1^{\circ} \mathrm{C}$ intervals between $35^{\circ} \mathrm{C}$ and $45^{\circ} \mathrm{C} ;$ | (1) |

| Question Number | Answer | Additional Guidance | Mark |
| :---: | :---: | :---: | :---: |
| 4(a)(i) | 1. solution should contain (all) the \{mineral / ions\} that duckweed needs ; <br> 2. at the minimum concentration / eq ; <br> Any two correctly named ion and its corresponding function : <br> e.g. $\left\{\right.$ nitrate (ions) / $\mathrm{NO}_{3}{ }^{2-}$ \} for $\{$ amino acids / protein / nucleic acid/ <br> ATP / chlorophyll / eq\} <br> \{magnesium ions / $\mathrm{Mg}^{++}$\} for chlorophyll <br> \{calcium ions / $\mathrm{Ca}^{++}$\} for \{cell wall / pectate / middle lamella / eq \} <br> \{phosphate (ions) / $\mathrm{PO}_{4}{ }^{3-}$ \} for $\{$ nucleic acid /ADP / ATP / <br> /phospholipid / eq\} ; ; | 1 IGNORE nutrients <br> 2 ACCEPT in excess <br> I GNORE carbon dioxide and wrong formulae NOT nitrogen <br> NOT magnesium <br> NOT calcium ACCEPT membrane NOT phosphorous | (3) |

| Question <br> Number | Answer | Additional Guidance | Mark |
| :--- | :--- | :--- | :--- |
| 4(a)(ii) | 1. idea of \{extrapolation / drawing a line of best fit / eq\} (to <br> estimate number of fronds after 10 days); | NB Apply this mark scheme <br> even if they describe <br> weighing the fronds and <br> calculating the mass increase <br> $\mathbf{2 ~ I G N O R E}$ time refs. |  |
| 2. read value from graph / eq ; <br> 3. idea of subtracting $\{50 / 10\}$ from the number of fronds <br> after 10 days ; |  | (2) |  |

| Question Number | Answer | Additional Guidance | Mark |
| :---: | :---: | :---: | :---: |
| *4(b) | (QWC - Spelling of technical terms must be correct and the answer must be organised in a logical sequence) <br> 1. idea of using \{solution of ions / complete medium \} ; <br> 2. idea of using a \{range of / minimum of 5 \} temperatures ; <br> 3. idea that different temperatures will be achieved using \{waterbaths / incubators / eq\} ; <br> 4. idea of determining growth over a period of time ; <br> 5. credit appropriate named example of how growth is to be assessed eg \{number / size / mass \} of \{fronds / plants\}, length of roots ; <br> 6. credit named control variable e.g. same concentration of (each) inorganic ions ; <br> 7. idea of repeats to calculate a \{mean / average \} ; | QWC with an emphasis on logical sequence <br> 2. ACCEPT 5 quoted temperatures in between $1^{\circ} \mathrm{C}$ and $70^{\circ} \mathrm{C}$ <br> I GNORE room temp if 6 or more values given <br> 5. I GNORE height / refs to germination <br> 7 ACCEPT for reliability | (5) |

| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- |
| $\mathbf{5 ( a ) ( i )}$ | C; | $(1)$ |

| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- |
| 5(a)(ii) | C; | (1) |

| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- |
| $\mathbf{5 ( b ) ( i )}$ | temperature; | (1) |

| Question Number | Answer | Mark |
| :---: | :---: | :---: |
| 5(b)(ii) | 1. rate of growth increases as temperature increases \{between $13^{\circ} \mathrm{C}$ and $22^{\circ} \mathrm{C}$ / up to $\left.22^{\circ} \mathrm{C}\right\}$; <br> 2. rate of growth decreases \{between $22^{\circ} \mathrm{C}$ and $25^{\circ} \mathrm{C} /$ above $22^{\circ} \mathrm{C}$; <br> 3. use of manipulated data to support above e.g. increases by $\{0.7$ (a.u.) / 4.5 times \}, decreases by 0.1 (a.u.) ; <br> 4. reference to enzymes involved (in growth) ; <br> 5. molecules \{move about more / have more kinetic energy\}, as temperature increases ; <br> 6. (therefore) \{enzyme and substrate (molecules) collide more / rate of enzymesubstrate complexes formation increases\} as temperature increases ; <br> 7. correct reference to denaturation of some \{enzyme / protein / eq\}(molecules) ; <br> 8. (therefore) rate of \{growth / reactions \} decreases as fewer enzyme molecules available ; | max <br> (4) |

| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- |
| 5(b)(iii) | 1.idea that (each temperature) has same light <br> intensity ; <br> 2.correct reference to must be above <br> \{threshold / compensation point \}; <br> 3.(below which) no net photosynthesis takes <br> place / eq ; <br> 4. reference to \{so light is not limiting factor / <br> so temperature is the limiting factor\}; <br> 5. photosynthesis produces \{material / eq\} <br> needed for growth / eq ;$\quad$(3) |  |

| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- |
| 5(b)(iv) | 1. $\{$ wavelength / colour / frequency\} of light ; <br> 2. $\mathrm{CO}_{2}$ concentration / eq ; <br> 3. $\mathrm{pH} /$ eq (of solution) ; <br> 4. reference to \{mineral / eq\}; | max <br> (2) |
