

Basic building blocks of living organisms

Each have a specific function

Cells

Cells make up tissues

Cells have a similar structure and function

2.1 PRINCIPLES OF ORGANISATION

Circulatory system

Respiratory system

Examples

Organ systems

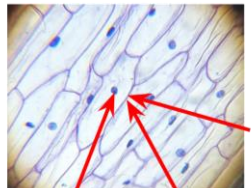

Digestive system

Tissues

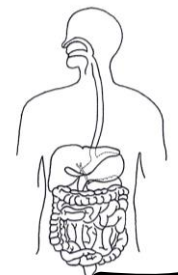

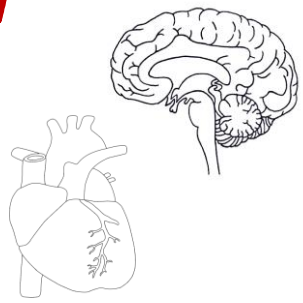

Organs

A group of tissues which perform a specific function make up an organ

A group of organs which work together make up organ systems

Nucleus
Cell wall (On the outside)
Cell membrane (On the inside)

AQA
