GCSE

SP2.2 - Artery and Vein

Flashcards

State an observable difference between arteries and veins.

State an observable difference between arteries and veins.

Artery walls are thicker than vein walls.

How is magnification calculated?

How is magnification calculated?

Magnification = size of image / size of object.

How would you measure the length of an object viewed under the microscope?

How would you measure the length of an object viewed under the microscope?

Use a calibrated eyepiece graticule to measure the length of the cell or tissue.
