State the 2 sources of variation.

State the 2 sources of variation.

Genetic and environmental factors.

What type of variation is shown in the colours and patterns of snails' shells?

What type of variation is shown in the colours and patterns of snails' shells?

Discontinuous variation.

What type of variation is shown in the different lengths of organisms?

What type of variation is shown in the different lengths of organisms?

Continuous variation.

How should the number of different types of snails in 2 sites be estimated?

How should the number of different types of snails in 2 sites be estimated?

By using random sampling.

How should the number of different snails in the 2 sites should be presented?

How should the number of different snails in the 2 sites should be presented?

Present the data in a bar chart.
