

# WJEC Wales Biology GCSE

## SP 2.4: Variation

### Practical notes

## Variation

### Aim

Investigation into variation of organisms by categorising types of snails.

### Equipment.

- Images of snails (See original [WJEC documentation](#), p49)

### Method

1. Place the images of woodland snails face down.
2. Randomly select 50 and categorise into these four categories: pink, plain; yellow, plain; pink, striped; yellow, striped
3. Repeat the procedure for another habitat
4. Draw a bar chart of the results and evaluate the differences in the 2 environments.
