#### UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS International General Certificate of Secondary Education

## MARK SCHEME for the May/June 2012 question paper

### for the guidance of teachers

# 0610 BIOLOGY

0610/33

Paper 3 (Extended Theory), maximum raw mark 80

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

• Cambridge will not enter into discussions or correspondence in connection with these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2012 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

#### **General notes**

Symbols used in mark scheme and guidance notes.

/	separates alternatives for a marking point
;	separates points for the award of a mark
А	accept – as a correct response
R	reject – this is marked with a cross and any following correct statements do not gain any marks
I	ignore / irrelevant / inadequate – this response gains no mark, but any following correct answers can gain marks.
( )	the word / phrase in brackets is not required to gain marks but sets context of response for credit. e.g. (waxy) cuticle. Waxy not needed but if it was described as a cellulose cuticle then no mark.
<u>Small</u>	underlined words – this word only / must be spelled correctly
ORA	or reverse argument / answer
ref	answer makes appropriate reference to
AVP	additional valid point (e.g. in comments)
AW	alternative words of equivalent meaning
MP	marking point (number)

Question	Expected Answers	ected Answers			Additional Guidance
1 (a)	a) jointed / articulated, legs ; exoskeleton / described ;			[max 2]	R antennae / wings R many legs R segmentation body
(b)	6/7 RIGHT = 4 5 RIGHT = 3 3/4 RIGHT = 2 1/2 RIGHT =1 0 RIGHT = 0	go to 2go to 7Schistocerca gregariago to 3go to 3go to 4Drosophila melanogastergo to 5go to 6Ephestia cautellaBatrachedra amydraulaRhynchophorus ferrugineusOryctes agamemnonMicrocerotermes diversusOligonychus afrasiaticus	A B G E F D C H	[4]

(ii) 1 2 3 4 5 6 7	<i>pesticide</i> kills nearly all grasshoppers / kills instantly ; on contact / or immediately after ingesting it ; some resistant / some tolerant / some not hit by spray / some not eaten pesticide / some survive ; pesticide decays / removed / not effective for long ; more grasshoppers migrate from neighbouring areas ; more grasshoppers, hatching / AW ; eggs not killed ;		
8 9 10 11 12 13	<i>fungal spores</i> did not kill on contact / did not kill immediately ; spores need to, germinate / grow ; takes several days (must be linked to MP9) ; fungus (produces spores) that infect other grasshoppers ; ref to transmission of fungus ; any grasshoppers that migrate into area are infected (and killed) ;	[max 4]	
		[Total: 20]	
2 (a)	<ul> <li>A <u>cell membrane</u>;</li> <li>B cytoplasm;</li> <li>C nucleus</li> </ul>	[3]	
(b) (i)	retina ;	[1]	
(ii)	fovea / yellow spot ; blind spot / optic disc / end of optic nerve ;	[2]	

			Page 6	Mark Scheme: Teachers' version IGCSE – May/June 2012	Syllabus 0610	Paper 33	
	(c)	<ul> <li>light absorbed (by a pigment);</li> <li>rods detect low light (intensity);</li> <li>give 'black and white' vision / do not detect colour;</li> <li>provide night vision / AW;</li> <li>cones detect high light (intensity);</li> <li>cones detect colour;</li> <li>any detail, e.g. three different types of cone;</li> <li>convert light into (electrical) impulses;</li> <li>impulses sent to brain;</li> <li>via, neurones / sensory nerve / optic nerve;</li> </ul>			[max 4]		
					[Total: 10]		
3	(a)	1 2 3 4 5 6	(more carbon dioxide) carbon dioxide <u>concen</u> more carbon dioxide =	red for photosynthesis ; more, glucose is produced ; <u>tration</u> is a <u>limiting</u> factor ; faster rate of photosynthesis ; falling below that of atmosphere / AW ; eld ;	[max 2]		
	(b)		carbon dioxide is waste	use out of the glasshouse ; ed ; / yield, does not cover the cost of the carbon	[max 2]		

Page 7	Page 7 Mark Scheme: Teachers' version		Paper	
	IGCSE – May/June 2012	0610	33	

	(c) (i)	plants respire at night and do not photosynthesise ;	[1]	both ideas are needed for the mark
	(ii) 1 2 3 4 5 6 7 8	decrease temperature on hot days / AW / avoid plants overheating ; denaturing of enzymes ; avoids plants wilting ; <i>idea that</i> open to allow carbon dioxide to enter <u>during the day</u> / ref to <b>F</b> ; <i>idea that</i> open to allow oxygen to enter <u>at night</u> ; to allow plants to respire ; allow water vapour to escape / avoids air becoming too humid ; reduces chances of (fungal) disease ;	[max 4]	
			[Total: 9]	
4	(a)	glucose – R ; oxygen – Q ; urea – P ;	[3]	
	(b)	amino acids used to make proteins ; deamination ; removal of, nitrogen-containing group / amino group / amine group / AW ; formation of urea ; rest of molecule / carbohydrate, is, respired / stored as glycogen / converted to fat / used for energy ;	[max 3]	<b>R</b> the liver produces amino acids
	(c) (i)	(stimulates liver cells to) absorb <u>more</u> glucose ; <b>A</b> sugar store / convert, glucose ; to glycogen (for storage) ;	[max 2]	
	(ii)	(stimulates liver cells to) breakdown glycogen ; to glucose ; release glucose ;	[max 2]	A convert to / AW
