

Mark Scheme (Results)

Summer 2023

Pearson Edexcel International GCSE
In Biology (4BI1) Paper 1B

Edexcel and BTEC Qualifications

Edexcel and BTEC qualifications are awarded by Pearson, the UK's largest awarding body. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications websites at www.edexcel.com or www.btec.co.uk. Alternatively, you can get in touch with us using the details on our contact us page at www.edexcel.com/contactus.

Pearson: helping people progress, everywhere

Pearson aspires to be the world's leading learning company. Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at: www.pearson.com/uk

General Marking Guidance

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.

Question Number	Answer	Mark
1 (a) (i)	<p>An answer that makes reference to two of the following:</p> <ul style="list-style-type: none"> • (require) nutrition / food / eq (1) • respire /eq (1) • excrete (waste) /eq (1) • respond to surroundings / sensitivity / eq (1) • move /eq (1) • control their internal conditions / homeostasis /eq (1) • reproduce /eq (1) • grow / develop /eq (1) 	2

Question Number	Answer	Mark
1 (a) (ii)	<p>The only correct answer is</p> <p>D <i>Pneumococcus</i></p> <p>A is not the answer as <i>Chlorella</i> does not cause bacterial disease in humans</p> <p>B is not the answer as <i>Lactobacillus bulgaricus</i> does not cause bacterial disease in humans</p> <p>C is not the answer as <i>Mucor</i> does not cause bacterial disease in humans</p>	1

Question Number	Answer	Additional guidance	Mark
1 (b) (i)	<ul style="list-style-type: none"> • Tobacco mosaic virus/ TMV (1) • discoloured leaves / yellow leaves / yellow spots / white leaves / white spots / no chlorophyll/ no chloroplasts / less chlorophyll / no photosynthesis / less photosynthesis /eq (1) 	<p>Allow other correctly named plant virus and effect</p> <p>not just less growth</p> <p>effect without correct virus scores zero</p>	2

Question Number	Answer	Additional guidance	Mark
1 (b) (ii)	<p>An answer that makes reference to three of the following:</p> <p>Virus</p> <ul style="list-style-type: none"> • smaller / eq (1) • protein coat (1) • no cell wall (1) • no cell membrane / eq (1) • no cytoplasm / organelles / ribosomes / no vacuole / eq (1) • no plasmids (1) • no flagella (1) 	<p>Mark first 3 answers allow converse</p> <p>ignore nucleus mitochondria Golgi</p> <p>ignore chloroplasts loop or circles of DNA</p>	3

Total 8 marks

Question Number	Answer	Additional guidance	Mark
2(a) (i)	<p>plants → worms (that eat roots) → small arthropods → large arthropods → birds</p> <p>(dead) plants → fungi → small arthropods → large arthropods → birds</p> <p>(dead) plants → bacteria → small arthropods → large arthropods → birds</p>	<p>1 mark for 5 including birds correct order and 1 for arrow direction</p> <p>correct food chains with 5 and birds but lines or incorrect arrow scores 1</p> <p>No credit for pyramid</p>	2

Question Number	Answer	Additional guidance	Mark
2(a)(ii)	<p>A description that makes reference to three of the following</p> <ul style="list-style-type: none"> • digest / decompose / decays / break down / eq (1) • enzymes (1) • saprophytic / saprotrophic / dead / eq (1) • respiration / produce ATP / (1) 	<p>ignore rot</p> <p>digestive enzymes = mp 1 and mp 2</p>	3

Question Number	Answer	Mark
2(b)	<p>An explanation that makes reference to three of the following</p> <ul style="list-style-type: none"> • fewer birds / eq (1) • as fewer (large arthropods) to eat / less food / eq (1) • more worms / eq (1) • as fewer eaten (by small arthropods) / fewer predators of worms /eq (1) 	3

Question Number	Answer	Additional guidance	Mark
2(c)	<p>An answer that makes reference to five of the following</p> <ol style="list-style-type: none"> 1. more mites collected (in all types/ each type of trap)/eq (1) 2. fewest arthropods collected (in all types/ each type of trap) / eq (1) 3. as more mites (in soil) / eq (1) 4. most mites collected by cul de sac traps / eq (1) 5. little difference in mite number between cul de sac and basket / eq (1) 6. fewest mites collected by pitfall traps /eq (1) 7. most springtails collected by basket / eq (1) 8. little difference in springtail numbers between cul de sac and basket / eq (1) 9. fewer springtails collected by pitfall / eq (1) 10. number of arthropods almost equal in all three traps / most arthropods collected in cul de sac/ eq (1) 11. Cul de sac collects most animals (in total) / Pitfall collects least (1) 	<p>no credit for quoting figs without comparator</p> <p>allow cul de sac most effective / best at collecting mites</p> <p>pitfall least effective at mites</p> <p>basket most effective with springtails</p> <p>pitfall least effective at springtails</p> <p>C most effective overall / P least effective</p>	5

Total 13 marks

Question Number	Answer	Mark
3(a)(i)	<p>The only correct answer is</p> <p>D T is the vacuole</p> <p>A is not the answer as P is not the vacuole</p> <p>B is not the answer as R is not the vacuole</p> <p>C is not the answer as S is not the vacuole</p>	1

Question Number	Answer	Mark
3(a)(ii)	<p>The only correct answer is</p> <p>A P is the site of photosynthesis</p> <p>B is not the answer as Q is not the site of photosynthesis</p> <p>C is not the answer as R is not the site of photosynthesis</p> <p>D is not the answer as T is not the site of photosynthesis</p>	1

Question Number	Answer	Mark
3(a)(iii)	<p>The only correct answer is</p> <p>C S is the cell wall</p> <p>A is not the answer as P is not the cell wall</p> <p>B is not the answer as Q is not the cell wall</p> <p>D is not the answer as T is not the cell wall</p>	1

Question Number	Answer	Mark
3(a)(iv)	<p>The only correct answer is</p> <p>C U is the ribosome is the site of protein synthesis</p> <p>A chloroplast is not the site of protein synthesis</p> <p>B mitochondrion not the site of protein synthesis</p> <p>D starch granule is not the site of protein synthesis</p>	1

Question Number	Answer	Additional guidance	Mark
3(b)	<p>Volume = $0.053 \times 0.053 \times 0.053 = 0.000\ 148\ 877$ or 0.00015</p> <p>SA = $6 \times 0.053 \times 0.053 = 0.016\ 854$ or 0.017</p> <p>SA to volume = $0.016\ 854 / 0.000\ 148\ 877$</p> <p>113.21 or 113.2 or 113.33 or 113.3 (to 1)</p>	<p>allow full marks for correct answer no working</p> <p>allow 1 mark for SA $0.016\ 854$ or 0.017 or other dec places in std form such as 1.7×10^{-2}</p> <p>allow 1 mark for Vol $0.000\ 148\ 877$ or 0.00015 or other dec places or in std form such as 1.5×10^{-4}</p> <p>Accept 113 (to 1) 110 (to 1) as 110 is 2 sig figs same as data</p>	3

Question Number	Answer	Additional guidance	Mark
3(c)(i)	<p>An explanation that makes reference to three of the following</p> <ul style="list-style-type: none"> • water enters cell due to <u>osmosis</u> / eq (1) • correct ref to water potential (high to low water potential (gradient) /low (solute) concentration to higher (solute) concentration / low water potential in cell / high water potential outside / eq (1) • as cannot prevent expansion / (keeps) expanding / expands / swells /eq (1) • animal cells / blood cells burst / eq (1) 	allow from high concentration of water to lower concentration	3

Question Number	Answer	Additional guidance	Mark
3(c)(ii)	<p>An explanation that makes reference to two of the following</p> <ul style="list-style-type: none"> • water leaves cell due to <u>osmosis</u> / eq (1) • correct ref to water potential (high to low water potential (gradient) /low (solute) concentration to higher (solute) concentration / low water potential outside cell / high water potential inside / eq(1) 	<p>allow from high concentration of water to lower concentration</p> <p>ignore flaccid</p>	2

	<ul style="list-style-type: none"> animal cells / blood cells crenate / collapse / shrivel / eq (1) 	reject plasmolysed	
--	--	--------------------	--

Total 12 marks

Question Number	Answer	Mark
4(a)(i)	<ul style="list-style-type: none"> withdrawal / somatic / simple / involuntary / automatic / unconscious (1) 	1

Question Number	Answer	Additional guidance	Mark
4(a)(ii)		arrow at X away from spinal cord/ towards muscle	1

Question Number	Answer	Mark
4(a)(iii)	<p>The only correct answer is</p> <p>A E is where the stimulus is detected</p> <p>B is not the answer as F is not where stimulus is detected</p> <p>C is not the answer as H is not where stimulus is detected</p> <p>D is not the answer as K is not where stimulus is detected</p>	1

Question Number	Answer	Mark
4(a)(iv)	<p>The only correct answer is</p> <p>C I is the motor neurone</p> <p>A is not the answer as F is not the motor neurone</p> <p>B is not the answer as G is not the motor neurone</p> <p>D is not the answer as K is not the motor neurone</p>	1

Question Number	Answer	Additional guidance	Mark
4(b) (i)	$1.10 \div 120$ 0.0092 9.2×10^{-3} (2)	allow 1 mark for correct answer but not in correct standard form 0.0092 or 0.00917 or 0.009167 etc or 92×10^{-4} allow full marks for correct answer alone allow 9.17×10^{-3} allow 9.167 etc $\times 10^{-3}$ 9.16 recurring $\times 10^{-3}$ full marks	2

Question Number	Answer	Mark
4(b) (ii)	A description that makes reference to two of the following <ul style="list-style-type: none"> • in a <u>synapse</u> (1) • <u>neurotransmitter</u> / named neurotransmitter (travels / moves) (1) • by diffusion / chemical coordination / eq (1) 	2

Question Number	Answer	Additional guidance	Mark
4(c) (i)	An explanation that makes reference to two of the following <ul style="list-style-type: none"> • prevents / stops movement / walking / running / eq (1) • prevents further damage /injury /eq (1) • allows rest / recovery / healing / repair/ eq (1) • learn to avoid painful situations/ eq (1) 	not putting weight / pressure (on ankle)	2

Question Number	Answer	Additional guidance	Mark
4(c)(ii)	<p>An answer that makes reference to four of the following :</p> <ul style="list-style-type: none"> • prevent detection of pain / stimulus /eq (1) • by receptor / eq (1) • prevent transmission of <u>impulse</u> / prevent generation of <u>impulse</u> / fewer impulses passed / sent / generated/ eq (1) • in sensory neurone / eq (1) • in relay neurone / eq (1) • synapses / prevent synaptic transmission /eq (1) 	<p>allow stops feeling pain</p> <p>stop impulses being sent/ moving along</p> <p>ignore signal/ message</p> <p>ignore motor neurone allow one mark for neurones/ nerves unqualified</p>	4

Total 14 marks

Question Number	Answer	Additional guidance	Mark
5(a)	<p>An answer that makes reference to the following</p> <ul style="list-style-type: none"> • plasma (1) • platelets (1) 	Mark first two answers only	2

Question Number	Answer	Additional guidance	Mark
5(b)	<p>A description that makes reference to four of the following points</p> <p>(Stage 1 and Stage 2)</p> <ul style="list-style-type: none"> • phagocyte / phagocytosis (1) • engulf / pseudopodia / surround /eq (1) • bacterium / pathogen inside white cell / inside vesicle / inside phagosome / eq (1) <p>(Stage 3)</p> <ul style="list-style-type: none"> • vesicles fuse with bacterium / vesicle fuses with phagosome eq (1) • enzymes digest (bacterium / pathogen) / enzymes break down (bacterium / pathogen) /eq (1) <p>(Stage 4)</p> <ul style="list-style-type: none"> • products (of digestion) expelled (from white cell) / (from the phagosome/ from the vesicle) eq (1) 	<p>allow marking points (in order) even if no reference to stages</p> <p>this can be gained in any stage</p> <p>allow enclosed completely engulfed</p> <p>allow lysosome</p> <p>allow digestive enzymes</p> <p>(waste) products / remains of bacterium / (broken down) bacterium pathogen secreted / excreted / released / exocytosis</p>	4

Question Number	Answer	Additional guidance	Mark
5(c)(i)	<p>measurement of diagram 5.7 (5.5-5.9) <u>cm</u> or 55-59 <u>mm</u></p> <p>conversion of units $\text{cm} \times 10,000$ or $\text{mm} \times 1,000$</p> <p>magnification = $57000 (55000- 59000) \div 8.1$</p> <p>= 7037 (6790 – 7284) (3)</p>	<p>allow 1 mark for measurement with units</p> <p>1 mark for $5.7 \times 10,000$ or 57×1000 or allow 8.1 $\div 10,000$ or $\div 1000$</p> <p>allow full marks for correct answer alone</p> <p>allow 6800-7300 given to 2 sig figs for 3 marks</p>	3

Question Number	Answer	Additional guidance	Mark
5(c)(ii)	<p>An answer that makes reference to five of the following</p> <ol style="list-style-type: none"> 1. normal blood flow % oxygen /saturation is higher (than slow) / (in non-anaemic / anaemic patients) eq (1) 2. normal blood flow rate of deoxygenation higher (in non-anaemic / anaemic patients) / eq (1) 3. % oxygen /saturation lower in anaemic (in normal and slow blood flow) / eq (1) 4. greater difference in % oxygen/saturation between non-anaemic and anaemic in slow blood flow than normal blood flow/ eq (1) 5. fewer red blood cells / less haemoglobin in anaemic patients / eq (1) 6. (fewer red cells)to carry oxygen (1) 7. anaemic patients tissues deoxygenate faster / eq (1) 8. little difference in deoxygenation (between normal and slow blood flow patients) / eq (1) 9. reference to high numbers of non-anaemic / lower numbers especially of anaemic slow blood flow (so data less reliable) 10. factors such as smoking/ mass / sex / diet / blood pressure / activity / genetics / eq (1) 	<p>no credit for quoting figures alone unless ref to only higher etc</p> <p>lower in slow</p> <p>lower in slow flow</p> <p>higher in non-anaemic</p> <p>more in non-anaemic</p> <p>non-anaemic deoxygenate slower</p>	5
