

## Mark Scheme (Results)

Summer 2018

Pearson Edexcel GCSE In Biology (1BI0) Paper 1F Paper 1

## **Edexcel and BTEC Qualifications**

Edexcel and BTEC qualifications are awarded by Pearson, the UK's largest awarding body. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications websites at <a href="https://www.edexcel.com">www.edexcel.com</a> or <a href="https://www.edexcel.com">www.btec.co.uk</a>. Alternatively, you can get in touch with us using the details on our contact us page at <a href="https://www.edexcel.com/contactus">www.edexcel.com/contactus</a>.

## Pearson: helping people progress, everywhere

Pearson aspires to be the world's leading learning company. Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at: <a href="https://www.pearson.com/uk">www.pearson.com/uk</a>

## **General Marking Guidance**

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded.
   Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.

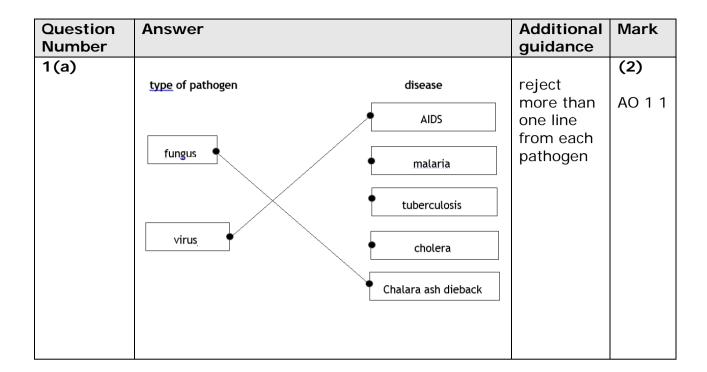

Mark schemes have been developed so that the rubrics of each mark scheme reflects the characteristics of the skills within the AO being targeted and the requirements of the command word. So for example the command word 'Explain' requires an identification of a point and then reasoning/justification of the point.

Explain questions can be asked across all AOs. The distinction comes whether the identification is via a judgment made to reach a conclusion, or, making a point through application of knowledge to reason/justify the point made through application of understanding. It is the combination and linkage of the marking points that is needed to gain full marks.

When marking questions with a 'describe' or 'explain' command word, the detailed marking guidance below should be consulted to ensure consistency of marking.

| Assessment<br>Objective |              | Command Word                                                                                                                    |                                                                                                                                         |  |
|-------------------------|--------------|---------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|--|
| Strand                  | Element      | Describe                                                                                                                        | Explain                                                                                                                                 |  |
| A01*                    |              | An answer that combines the marking points to provide a logical description                                                     | An explanation that links identification of a point with reasoning/justification(s) as required                                         |  |
| AO2                     |              | An answer that combines the marking points to provide a logical description, showing application of knowledge and understanding | An explanation that links identification of a point (by applying knowledge) with reasoning/justification (application of understanding) |  |
| AO3                     | 1a and<br>1b | An answer that combines points of interpretation/evaluation to provide a logical description                                    |                                                                                                                                         |  |
| AO3                     | 2a and<br>2b |                                                                                                                                 | An explanation that combines identification via a judgment to reach a conclusion via justification/reasoning                            |  |
| AO3                     | 3a           | An answer that combines the marking points to provide a logical description of the plan/method/experiment                       |                                                                                                                                         |  |
| AO3                     | 3b           |                                                                                                                                 | An explanation that combines identifying an improvement of the experimental procedure with a linked justification/reasoning             |  |

<sup>\*</sup>there will be situations where an AO1 question will include elements of recall of knowledge directly from the specification (up to a maximum of 15%). These will be identified by an asterisk in the mark scheme.

| Question<br>Number | Answer                                                           | Mark   |
|--------------------|------------------------------------------------------------------|--------|
| 1(b)               | C bacteria                                                       | (1)    |
|                    | 1. The only correct answer is C                                  | AO 1 1 |
|                    | A is not correct because antibiotics do not kill antibodies      |        |
|                    | <b>B</b> is not correct because antibiotics do not kill antigens |        |
|                    | <b>D</b> is not correct because antibiotics do not kill viruses  |        |

| Question<br>Number | Answer                                                                                                                             | Additional guidance                                  | Mark                 |
|--------------------|------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------|----------------------|
| 1(c)               | <ul> <li>(patient Z) has a high(er) white<br/>blood cell count (1)</li> </ul>                                                      | accept more<br>wbc/most wbc                          | <b>(2)</b><br>AO 2 1 |
|                    | <ul> <li>white blood cells kill bacteria /<br/>pathogens/microorganisms/produce<br/>antibodies / produce antitoxins (1)</li> </ul> | accept fight infection / destroy bacterial infection |                      |

| Question<br>Number | Answer                                                                         | Additional guidance                        | Mark   |
|--------------------|--------------------------------------------------------------------------------|--------------------------------------------|--------|
| 1(d)               | Any two from:  • wear gloves/ goggles/cover                                    |                                            | (2)    |
|                    | wounds/cover cuts (1)                                                          |                                            | AO 2 1 |
|                    | <ul> <li>clean up spills/use tongs to handle<br/>sample (tubes) (1)</li> </ul> |                                            |        |
|                    | store samples in sealed containers (1)                                         | accept store in fridge/cooler              |        |
|                    | dispose of samples safely (1)                                                  | accept<br>burn/incinerate/<br>sterilise(1) |        |

Total for Question 1 = 7 marks

| Question<br>Number | Answer                                                                                   | Mark   |
|--------------------|------------------------------------------------------------------------------------------|--------|
| 2(a) (i)           | B double helix                                                                           | (1)    |
|                    | 1. The only correct answer is B                                                          | AO 1 1 |
|                    | <b>A</b> is not correct because the shape of a DNA molecule is not a single helix        |        |
|                    | <b>C</b> is not correct because the shape of a DNA molecule is not a complementary helix |        |
|                    | <b>D</b> is not correct because the shape of a DNA molecule is not a triple helix        |        |

| Question<br>Number | Answer                                                                                    | Mark   |
|--------------------|-------------------------------------------------------------------------------------------|--------|
| 2(a) (ii)          | A sugars and phosphates                                                                   | (1)    |
|                    | 1. The only correct answer is A                                                           | AO 1 1 |
|                    | <b>B</b> is not correct because amino acids and bases are not present in the DNA backbone |        |
|                    | <b>C</b> is not correct because bases are not present in the DNA backbone                 |        |
|                    | <b>D</b> is not correct because amino acids are not present in the DNA backbone           |        |

| Question<br>Number | Answer                  | Mark                 |
