

GCSE

Biology B

General Certificate of Secondary Education

Unit **B732/01**: Modules B4, B5, B6 (Foundation Tier)

Mark Scheme for June 2013

B732/01**Mark Scheme**

OCR (Oxford Cambridge and RSA) is a leading UK awarding body, providing a wide range of qualifications to meet the needs of candidates of all ages and abilities. OCR qualifications include AS/A Levels, Diplomas, GCSEs, Cambridge Nationals, Cambridge Technicals, Functional Skills, Key Skills, Entry Level qualifications, NVQs and vocational qualifications in areas such as IT, business, languages, teaching/training, administration and secretarial skills.

It is also responsible for developing new specifications to meet national requirements and the needs of students and teachers. OCR is a not-for-profit organisation; any surplus made is invested back into the establishment to help towards the development of qualifications and support, which keep pace with the changing needs of today's society.

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which marks were awarded by examiners. It does not indicate the details of the discussions which took place at an examiners' meeting before marking commenced.

All examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes should be read in conjunction with the published question papers and the report on the examination.

OCR will not enter into any discussion or correspondence in connection with this mark scheme.

© OCR 2013

Annotations

Annotation	Meaning
	correct response
	incorrect response
	benefit of the doubt
	benefit of the doubt not given
	error carried forward
	information omitted
	ignore
	reject
	contradiction
	Level 1
	Level 2
	Level 3

Subject-specific Marking Instructions

Abbreviations, annotations and conventions used in the detailed Mark Scheme.

/	= alternative and acceptable answers for the same marking point
(1)	= separates marking points
allow	= answers that can be accepted
not	= answers which are not worthy of credit
reject	= answers which are not worthy of credit
ignore	= statements which are irrelevant
()	= words which are not essential to gain credit
—	= underlined words must be present in answer to score a mark (although not correctly spelt unless otherwise stated)
ecf	= error carried forward
AW	= alternative wording
ora	= or reverse argument

B732/01

Mark Scheme

June 2013

Question			Answer	Marks	Guidance
1	(a)	(i)	vinegar (1)	1	not garlic / bay leaves
		(ii)	bummalo (1)	1	
	(b)		bacteria / fungi (1)	1	allow mould
	(c)		used to breakdown / decompose / digest (sewage) (1)	1	allow decay / rot ignore feeds on
			Total	4	

Question			Answer	Marks	Guidance
2	(a)		by osmosis (1) through cell membrane (1)	2	ignore diffusion allow through semi permeable membrane (1) allow ideas about concentration differences (1) e.g. moves from high water concentration to low water concentration (1)
	(b)		any two from: cells are full of water / cells are rigid / cells swollen / AW (1) cells are turgid / turgor pressure (1) clear description of turgor: contents of cells pushing against cell wall (1)	2	ignore cells take in water (in question) ignore chip is rigid ignore cells are stronger / hard allow chip is turgid (1) ignore not flaccid
			Total	4	

B732/01

Mark Scheme

June 2013

Question			Answer	Marks	Guidance
3	(a)	(i)	biological (control) (1)	1	not biological pesticides
		(ii)	he is an organic farmer (1)	1	allow not allowed to use chemicals allow pesticides harm / damage the environment not damages crops / swedes
	(b)		<p>(Level 3) Answer includes details of collecting method that include ideas about random sampling or repeats. The calculation is correct and there is sensible interpretation of the result. Quality of written communication does not impede communication of the science at this level. (5-6 marks)</p> <p>(Level 2) Answer includes a description of the correct collecting method OR Names a correct collecting method AND makes a simple interpretation of the data OR Names a correct collecting method or makes a simple interpretation of the data AND correctly calculates the estimate of the population.</p> <p>Quality of written communication partly impedes communication of the science at this level. (3-4 marks)</p> <p>(Level 1) Answer includes some reference to a collecting method OR makes a simple interpretation of the data OR shows the correct method of calculation but answer may be incorrect. Quality of written communication impedes communication of the science at this level. (1-2 marks)</p> <p>(Level 0) Insufficient or irrelevant science. Answer not worthy of credit. (0 marks)</p>	6	<p>This question is targeted at grades up to C</p> <p>Indicative scientific points may include at level 3: points from level 2 and</p> <ul style="list-style-type: none"> • some reference is given to sampling being at random • idea that repeats are needed • idea that a number of traps are set or quadrats used • an appreciation that 450 is only estimates. <p>Indicative scientific points may include at level 2:</p> <ul style="list-style-type: none"> • description of how to place pitfall traps in the ground • describes how to use quadrat without reference to random sampling • estimate of population is 450 • quite successful as the population has halved / numbers have decreased / gone down <p>Indicative scientific points may include at level 1:</p> <ul style="list-style-type: none"> • use pitfall traps or counting using quadrats • calculation is $\frac{50 \times 45}{5}$ • method is working as population has gone down <p>Use L1, L2, L3 annotations in scoris. Do not use ticks.</p>

June 2013

Question		Answer	Marks	Guidance
4	(a)	glucose and oxygen (1)	1	any order allow sugar
	(b)	(i) idea that not enough mass/materials/substances/nutrients lost from soil to supply the mass/material/substances/nutrients gained by the tree (1) correct calculation : soil lost 1kg but tree gained 78kg (1)	2	allow the tree gained (much) more mass than the soil lost allow total mass changed from 102kg → 179kg (1) allow soil would have been 22kg (if scientists were correct) (1) allow the tree gained 77kg from somewhere else (not soil) = 2 marks allow tree gained 78kg but soil only lost 1kg = (2) (BOD)
		(ii) any three from: enters through root (hairs) (1) by osmosis (1) transported up the stem (1) passes through xylem (1) lost from the leaves by evaporation (1) by the process of transpiration (1)	3	allow correct description of osmosis (1) ignore diffusion / active transport for extra marking point allow allow a (small amount) used in photosynthesis (1)
	(c)	(i) hydroponics (1)	1	allow soil-less culture
		(ii) soil contains minerals (1) minerals needed for plant growth / without minerals plants do not grow so well (1)	2	allow nutrients (1) allow reference to a specific mineral in soil (1) ignore natural fertilisers allow function of a specific mineral (1)
Total			9

June 2013

Question		Answer	Marks	Guidance
10	(a)	no maggots when covered because flies could not get in / lay eggs (1) this shows the flies are needed or maggots develop from eggs not meat (1)	2	allow reverse argument: only get maggots when uncovered as flies can get in / lay eggs (1) ignore just 'maggots don't come from meat'
	(b)	idea of not enough evidence (1)	1	allow only explain why maggots form does not disprove other examples of (spontaneous generation') allow fungal spores too small to see / few microscopes available allow lack of scientific method to test ideas / other scientist have not tested it allow poor communication meant work not published World wide allow ideas about religious beliefs / superstition hindering acceptance of new ideas ignore idea that he only did it once
	(c)	(bacterial) DNA (1) flagellum (1)	2	allow genetic material / genes / chromosomes but not nucleus
	(d)	no bacteria in B because they were killed / bacteria killed in both flasks in stage 2 (1) bacteria cannot get into B / can get into A (1) BUT shape of the neck in B stops the bacteria getting in / the shape of the neck allows bacteria into flask A (2) bacteria multiply in A / in B gravy stays sterile (1)	3	ignore B has no bacteria / A has bacteria ignore bacteria grow/develop in A (in question) ignore bacteria do not grow/develop in B (in question) allow ideas about how they reproduce as extra marking points e.g. bacteria in A feed and multiply by asexual reproduction or binary fission (1) ignore references to oxygen / lack of oxygen
