| Question |  | Marks | Additional Guidance |
| :---: | :---: | :---: | :---: |
| 1 (a (i) | 1 concentration of PCBs increases up the food chain/ora; <br> 2 concentration is much higher in larger organisms/ora; <br> 3 big(gest) increase between herring and porpoise; <br> 4 (only) herring / porpoise / animals at top of food chain, have a range of concentrations; <br> 5 use of figures (arbitrary units) to make a comparison between two, trophic levels/organisms; | max 3 | MP4 must be a qualitative statement, not just statement of figures <br> MP5 - must be a comparison not just figures unqualified, e.g. use of 'but', 'and', 'only', etc. and accept $\times 1.8 / 2, \times 4, \times 30, \times 384, \times 1900$ |
| (ii) | animals at higher trophic levels live longer; eat many of the animals below them in the food chain; PCBs cannot be, excreted/eliminated/removed/broken down; so build up in the body (tissues); bioaccumulation/biomagnification; | max 3 |  |
| (b) (i) | mutation/change in DNA; <br> any mutagen; <br> gene(s) code for, AHR/protein; <br> any sensible suggestions about change to protein molecule; <br> fish susceptible to PCB poisoning died; <br> fish with changed protein survived and reproduced; <br> passing on mutant allele; <br> reference to (natural) selection; | max 5 | A ref to genetic variation R AHR/protein, mutates e.g. radiati <br> e.g. different amino acid sequen |
| (ii) | fish with mutant allele not at an advantage/no selection for PCB resistance; <br> PCB resistant fish may not compete well with others/ora; <br> so less successful at breeding/ora; <br> leave fewer offspring/ ora; <br> idea that mutant allele is diluted as fish interbreed; | max 2 | A 'the altered AHR protein is of less/no use' |

| Question |  | Marks | Additional Guidance |
| :---: | :---: | :---: | :---: |
| 1 (c) | 1 persistent/does not breakdown/accumulates; <br> 2 fill up/takes up space in, landfill sites/rubbish dumps; <br> 3 suffocate/choke, animals; <br> 4 kills animals that get trapped in it; <br> 5 release, toxins/poisons; <br> 6 AVP; | max 3 | MP1 A 'can't get rid of them'/takes a long time to breakdown <br> MP3 and MP4 do not allow kill unqualified <br> MP5 maybe in context of leaching out, burning or eating <br> I references to recycling I pollution unqualified <br> - (fill with water to become) breeding grounds for mosquitoes <br> - blocks light for, photosynthesis <br> - negative effect on tourism/visual pollutant <br> - blocks drains <br> - blocks flow of water in, rivers/streams <br> - reduces soil, drainage/aeration <br> - interferes with water treatment <br> allows spread of alien species in the oceans |

|  | Answer | Marks | Guidance for Examiners |
| :---: | :---: | :---: | :---: |
| 3 (a) | segments ; <br> antennae / 'feelers' ; <br> projections over whole of the body / AW ; <br> idea of heads / tails ; <br> A not parasitic / free living / AW ; | max [3] | ```A 'sections' / 'divisions' / 'rings' / 'parts' / 'sub-parts' A bristles / chaetae / hairs R feet / legs / AW``` |
| (b) | genus / generic (name) ; | [1] | A 'genus part of species name' |
| (c) (i) | (all the) organisms / community ; <br> in a given area / AW ; <br> and non-living factors / abiotic factors AW ; <br> idea of interacting together ; | max [3] | A place / location / region / habitat R ecosystem i.e. physical factors / nam e.g. feeding (ignore feeding on each other) |
| (ii) | arrows point from food $\rightarrow$ feeder ; <br> organisms in correct sequence ; <br> plankton $\rightarrow$ annelid / named $\rightarrow$ wading bird(s) $\rightarrow$ bird of prey $=2$ marks | [2] |  |
| (iii) | shows complex feeding relationships / AW ; <br> all organisms in the ecosystem ; A (many) more / part of / wide <br> range of <br> each species has more than one food source / AW ; <br> each species has more than one predator / AW ; <br> AVP ; e.g. shows possible chain reaction to an animal's population change | max [2] | A all possible connections |

| 3 (d) | many, sperm and eggs / gametes, released at the same time ; increases chances of gametes fusing ; (many individuals so more genetic) variation ; may occur at a time when food is available ; for development of, young / offspring; or when there are currents to disperse young ; smaller proportion of, eggs / zygotes / embryos, eaten by predators ; AVP ; | max [3] | $\mathbf{R}$ fewer predators |
| :---: | :---: | :---: | :---: |
| (e) | assume answer is about meiosis unless told otherwise mark differences between meiosis and mitosis to max 3 <br> 1 two divisions ; <br> 2 four, cells / nuclei / gametes, produced ; <br> 3 halves chromosome number ; <br> 4 (diploid to) haploid ; <br> 5 variation (between cells / nuclei / gametes) ; <br> 6 gametes have different alleles ; <br> 7 gives (more) variation in offspring ; <br> 8 so chromosome number remains the same in next generation; | max [4] | ignore quoted numbers of chromosomes <br> $\mathbf{R}$ genes <br> A number does not double with each generation / full pairs of chromosomes when fertilized / AW <br> A ora for mitosis |
| [Total:18] |  |  |  |

| 4 (a) | group of organisms of the same species ; in the same area / at the same time ; | [2] | A 'of a kind' / a species <br> A same habitat / ecosystem / community |
| :---: | :---: | :---: | :---: |
| (b) (i) | greater predation by owls / more predators / more owls; lack of food / starvation / more competition for food; adverse (named) weather condition (s) ; <br> disease / sickness / illness; emigration; <br> AVP; habitat destruction | max [3] | $\mathbf{R}$ climate change |
| (ii) | 1 owl population increases, after / AW, vole population increases ; <br> 2 owl population crashes (in year 7) ; <br> 3 immediately after crash in vole population ; <br> 4 vole population crashes / decreases (in year 6) ; <br> 5 when there are most owls ; <br> 6 if owls ate (much) other prey there would not be a close relationship / AW ; <br> 7 ref to numbers of owls from the graph ; | max [2] | if MP1 and MP2 not given accept the idea that 'owl population follows changes in vole population' if answer does not refer to the increase or decrease |
| [Total:7] |  |  |  |
