# MARK SCHEME for the May/June 2011 question paper for the guidance of teachers 

## 9701 CHEMISTRY

9701/32 Paper 32 (Advanced Practical Skills 2), maximum raw mark 40

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

- Cambridge will not enter into discussions or correspondence in connection with these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2011 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

MMO \\
Decisions
\end{tabular} \& \begin{tabular}{l}
I Volume given for Rough titre and \\
accurate titre details tabulated. \\
Minimum of \(2 \times 2\) boxes. \\
II Initial and final (burette) (readings) and volume of FB 2 added/reading at start and finish recorded for each accurate titre (not 'difference'). \\
and \\
mass tube + FB 1, mass tube + residue/empty, mass FB 1. \\
Ignore units. \\
Headings should match readings. \\
Do not award this mark if: \\
\(50(.00)\) is used as an initial burette reading; More than one final burette reading is \(50(.00)\); Any burette reading is greater than 50(.00). \\
III All accurate burette readings (initial and final) recorded to nearest \(0.05\left(\mathrm{~cm}^{3}\right)\). \\
Assessed on burette readings only (minimum of 2 readings). \\
IV Has two uncorrected accurate titres within \(0.1 \mathrm{~cm}^{3}\). Do not award this mark if, having performed two titres within \(0.1 \mathrm{~cm}^{3}\), a further titration is performed that is more than \(0.10 \mathrm{~cm}^{3}\) from the closer of the initial two titres, unless a fourth titre, within \(0.1 \mathrm{~cm}^{3}\) of any of the previous titres, has also been carried out.

ACE \\
Interpretation
\end{tabular} \& \begin{tabular}{l}
Calculates the mean, correct to 2 decimal places from any accurate titres within \(0.2 \mathrm{~cm}^{3}\). \\
The third decimal place may be rounded to the nearest \(0.05 \mathrm{~cm}^{3}\). \\
A mean of exactly \(\times 25\) or.\(\times 75\) is allowed but the candidate may round up to \(\times 3\) or.\(\times 8\) or to the nearest \(0.05 \mathrm{~cm}^{3}\). \\
If ALL burette readings are given to 1 decimal place then the mean can be given to 1 decimal place if numerically correct without rounding, \\
Mean of 24.3 and \(24.4=24.35(\vee)\) \\
Mean of 24.3 and \(24.4=24.4(x)\) \\
Titres to be used in calculating the mean must be clearly shown - in an expression or ticked in the titration table. \\
Allow ecf from subtraction error for titre.
\end{tabular} \& 1 \& [1] \\

Interpretation \\
PDO Display
\end{tabular} \& \begin{tabular}{l}
I Correctly evaluates step (i) (= mean titre \(\times 0.2 / 1000\) ) \\
II, III and IV are awarded for the correct expression or for the correct answer if no working shown. \\
For all 'method' marks, no additional steps can be included. \\
II Step (ii) (answer to (i) / 2) \\
and \\
step (iii) (answer to (ii) \(\times 10\) ) \\
III In (iv) relative formula mass (= mass of washing soda / answer to (iii)) (ignore g) \\
IV In (v) answer to (iv) - 106 / 18 \\
or \\
\(106+18 x=\) answer to (iv) \\
(mark method even if \(M_{r}\) is < 106 or very large). \\
V Some relevant working shown in a minimum of four parts in the calculation (in (ii) could be \(\times 2\) or \(\div 2\), in (iii) could be \(\times 10\) or \(\div 10\), in ( \(\mathbf{v}\) ) could be use of 106). \\
VI In steps (i) to (iv) all answers to 3 or 4 sig figs (minimum of 3 steps).
