# MARK SCHEME for the May/June 2011 question paper for the guidance of teachers 

## 9701 CHEMISTRY

9701/33 Paper 31 (Advanced Practical Skills 1), maximum raw mark 40

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

- Cambridge will not enter into discussions or correspondence in connection with these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2011 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

Selects correctly subtracted accurate titre values within \(0.20 \mathrm{~cm}^{3}\). Must use more than one value. If no calculation shown then titres must be indicated (e.g. with a tick) in the table \\
Correct mean from any values selected (may include rough) by candidate given to same decimal places as most precise burette reading recorded in the table. \\
The third decimal place may be rounded to the nearest \(0.05 \mathrm{~cm}^{3}\). \\
A mean of exactly .x25 or .x75 is allowed but the candidate may round up or down to the nearest \(0.05 \mathrm{~cm}^{3}\). \\
If \(\operatorname{ALL}\) burette readings are given to 1 decimal place then the mean may be given to 1 decimal place if numerically correct without rounding. \\
Mean of 24.3 and \(24.4=24.35(V)\) \\
Mean of 24.3 and \(24.4=24.4 \quad(x)\) \\
If no working shown allow mean if value identical to that used by Examiner.
\end{tabular} \& 1
