## MARK SCHEME for the October/November 2008 question paper

## 9701 CHEMISTRY

9701/32
Paper 32 (Practical 2), maximum raw mark 40

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began.

All Examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

- CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the October/November 2008 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

| Page 2 | Mark Scheme | Syllabus | Paper |

| Skill |  | Breakdown of marks |  |
| :---: | :---: | :---: | :---: |
| Manipulation, measurement and observation | 16 marks | Successful collection of data and observations | 8 marks |
|  |  | Quality of measurements and observations | 4 marks |
|  |  | Decisions relating to measurements or observations | 4 marks |
| Presentation of data and observations | 12 marks | Recording data and observations | 5 marks |
|  |  | Display of calculation and reasoning | 3 marks |
|  |  | Data layout | 4 marks |
| Analysis, conclusions and evaluation | 12 marks | Interpretation of data or observations and identifying sources of error | 6 marks |
|  |  | Drawing conclusions | 5 marks |
|  |  | Suggesting improvements | 1 mark |

## Statement Bank

## MANIPULATION, MEASUREMENT AND OBSERVATION (MMO)

Successful collection of data and observations (Collection)

| C1 | Set up apparatus correctly |
| :--- | :--- |
| C2 | Follow instructions given in the form of written instructions or diagrams |
| C3 | Use apparatus to collect an appropriate quantity of data or observations, <br> including subtle differences in colour, solubility or quantity of materials |
| C4 | Make measurements using pipettes, burettes, measuring cylinders, <br> thermometers, and other common laboratory apparatus |

Quality of measurements or observations (Quality)
Q1 Make accurate and consistent measurements and observations

Decisions relating to measurements or observations (Decisions)

| De1 | Decide how many tests or observations to perform |
| :--- | :--- |
| De2 | Make measurements that span a range and have a distribution appropriate to <br> the experiment |
| De3 | Decide how long to leave experiments running before making readings |
| De4 | Identify where repeated readings or observations are appropriate |
| De5 | Replicate readings or observations as necessary |
| De6 | Identify where confirmatory tests are appropriate and the nature of such tests |

| Page 3 | Mark Scheme | Syllabus | Paper |
| :---: | :---: | :---: | :---: |
|  | GCE A/AS LEVEL - October/November 2008 | 9701 | 32 |

## PRESENTATION OF DATA AND OBSERVATIONS (PDO)

Recording of data and observations (Recording)

| R1 | Present numerical data, values or observations in a single table of results |
| :--- | :--- |
| R2 | Draw up the table in advance of taking readings/making observations so that they <br> do not have to copy up their results |
| R3 | Include in the table of results, if necessary, columns for raw data, for <br> calculated values and for analyses or conclusions |
| R4 | Use column headings that include both the quantity and the unit and that conform <br> to accepted scientific conventions |
| R5 | Record raw readings of a quantity to the same degree of precision and <br> observations to the same level of data |

Display of calculation and reasoning (Display)

| Di1 | Show their working in calculations, and the key steps in their reasoning |
| :--- | :--- |
| Di2 | Use the correct number of significant figures for calculated quantities |

Data layout (Layout)

| L1 | Choose a suitable and clear method of presenting the data, e.g. tabulations, <br> graph or mixture of methods of presentation |
| :--- | :--- |
| L2 | Use the appropriate presentation medium to produce a clear presentation of the <br> data |
| L3 | Select which variables to plot against which and decide whether the graph should <br> be drawn as a straight line or a curve |
| L4 | Plot appropriate variables on clearly labelled $x$ - and $y$ - axes |
| L5 | Choose suitable scales for graph axes |
| L6 | Plot all points or bars to an appropriate accuracy |
| L7 | Follow the ASE recommendations for putting lines on graphs |

| Page 4 | Mark Scheme | Syllabus | Paper |
| :---: | :---: | :---: | :---: |
|  | GCE A/AS LEVEL - October/November 2008 | 9701 | 32 |

## ANALYSIS, CONCLUSIONS AND EVALUATION (ACE)

Interpretation of data or observations and identify sources of error (Interpretation)

| $\mathbf{I 1}$ | Describe the patterns and trends shown by tables and graphs |
| :--- | :--- |
| $\mathbf{I 2}$ | Describe and summarise the key points of a set of observations |
| $\mathbf{I 3}$ | Find an unknown value by using co-ordinates or intercepts on a graph |
| $\mathbf{1 4}$ | Calculate other quantities from data, or calculate the mean from replicate values, <br> or make other appropriate calculations |
| $\mathbf{1 5}$ | Determine the gradient of a straight line |
| $\mathbf{1 6}$ | Evaluate the effectiveness of control variables |
| $\mathbf{1 7}$ | Identify the most significant sources of error in an experiment |
| $\mathbf{1 8}$ | Estimate, quantitatively, the uncertainty in quantitative measurements |
| $\mathbf{1 9}$ | Express such uncertainty in a measurement as an actual or percentage error |
| $\mathbf{I 1 0}$ | Show an understanding of the distinction between systematic errors and random <br> errors |

Drawing conclusions (Conclusions)

| Con1 | Draw conclusions from an experiment, giving an outline description of the <br> main features of the data, considering whether experimental data supports a <br> given hypothesis, and making further predictions |
| :--- | :--- |
| Con2 | Draw conclusions from interpretations of observations, data and calculated <br> values |
| Con3 | Make scientific explanations of the data, observations and conclusions that <br> they have described |

Suggesting Improvements (Improvements)

| Imp1 | Suggest modifications to an experimental arrangement that will improve the <br> accuracy of the experiment or the accuracy of the observations that can be <br> made |
| :--- | :--- |
| Imp2 | Suggest ways in which to extend the investigation to answer a new question |
| Imp3 | Describe such modifications clearly in words or diagrams |

| Page 5 | Mark Scheme | Syllabus | Paper |

## Question 1

## Supervisor's Report

Check all subtractions in (a). Use the titres, corrected where necessary, to select the "best average" titre to be used as an accuracy standard using the following hierarchy.

- value of 2 identical titres
- average of titres within $0.05 \mathrm{~cm}^{3}$
- average of titres within $0.10 \mathrm{~cm}^{3}$, etc.

Calculate, correct to $\mathbf{2} \mathbf{~ d p}$, the titre if the Supervisor had diluted $41.50 \mathrm{~cm}^{3}$ of FB 2.
Do not round calculated averages to nearest $0.05 \mathrm{~cm}^{3}$.
This is given by the expression $\frac{41.50}{\text { vol diluted }} \times$ titre
Record this value on the Supervisor's script and on all candidate scripts against the titration table.

## Candidate scripts

Check and correct all subtractions as above.
Examiner is to select best titre as above, (do not include values labelled rough unless crossed out or ticked/used by candidate) and calculate the scaled titre for $41.50 \mathrm{~cm}^{3}$ of FB 2.
If no volume of FB 2 diluted has been given, assume candidate has used $41.50 \mathrm{~cm}^{3}$.
Record the value against the titration table and calculate the difference to Supervisor.

| Question | Sections | Statement | Indicative material | Mark |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 1 (a) | PDO <br> Layout | L1 | (i) Records initial and final burette readings in each of the tables <br> (If $50.00 \mathrm{~cm}^{3}$ is used as initial burette reading, treat as $0.00 \mathrm{~cm}^{3}$. Do not award (i) in this case or if $50.00 \mathrm{~cm}^{3}$ is given as a repeated final burette reading in the $2^{\text {nd }}$ table) | 1 |  |
|  | PDO <br> Recording | R5 | (ii) All accurate burette readings in the titration table recorded to nearest $0.05 \mathrm{~cm}^{3}$ <br> Treat $1^{\text {st }}$ titration as rough unless the candidate has crossed out a "rough" label or used the value in calculating the average | 1 |  |
|  | MMO Collection | C2 | (iii) Follows instructions - Dilutes $41.00 \mathrm{~cm}^{3}$ to $42.00 \mathrm{~cm}^{3}$ (uncorrected) of FB 2 | 1 |  |
|  | MMO <br> Decisions | De5 | (iv) Has two or more uncorrected titres within $0.1 \mathrm{~cm}^{3}$ <br> Titres labelled "rough" may be included | 1 |  |
|  | MMO Quality | Q1 | Accuracy <br> Award (v) and (vi) if difference from Supervisor's value is $0.3 \mathrm{~cm}^{3}$ or less | 2 |  |
|  |  | Q1 | Award ( $\mathbf{v}$ ) only for a difference of $0.3+\mathrm{cm}^{3}$ to $0.6 \mathrm{~cm}^{3}$ |  | [6] |

| Page 7 | Mark Scheme | Syllabus | Paper |
| :---: | :---: | :---: | :---: |
|  | GCE A/AS LEVEL - October/November 2008 | 9701 | 32 |

| (b) | ACE Interpretation | 14 | Candidate selects/calculates correct "average" from titre values within $0.2 \mathrm{~cm}^{3}$. Average must be calculated correct to 2dp or nearest $0.05 \mathrm{~cm}^{3}$ if burette read to $2 d p / 0.05 \mathrm{~cm}^{3}$. For burette readings, consistent to 1dp the average may be correct to 1 or 2 dp ) | 1 | [1] |
| :---: | :---: | :---: | :---: | :---: | :---: |
| (c) | ACE Interpretation <br> PDO Display | 14 <br> 14 <br> Di1 <br> Di2 <br> Di2 | Award (i) for $\frac{\text { vol diluted }}{1000} \times \frac{28.44}{158}$ in $1^{\text {st }}$ step <br> Award (ii) for ( $\times 2.5$ ) in $1^{\text {st }}$ equation step and <br> for ( $\mathbf{x} \mathbf{2}$ ) in $2^{\text {nd }}$ equation step <br> (iii) Working shown in at least three of the first four steps Correct or incorrect combination of halfequations into an equation for the reaction counts as working <br> (iv) 3 or 4 significant figures given in each answer attempted for sections 1-4. A Minimum of two sections attempted is required before this mark can be awarded. <br> (v) Award one mark for $\text { Answer to step } 4 \times \frac{1000}{\text { titre }}$ <br> correctly evaluated to 3 sig fig. <br> (Examiner to check) <br> Allow $\pm 1$ in $3^{\text {rd }}$ sig fig. <br> It may be necessary to check any calculation in which numbers have been "carried" in a calculator | 1 | [5] |

C3 \\
Con3
\end{tabular} \& \begin{tabular}{l}
The candidate should observe: \\
- \(\mathrm{BaCO}_{3}\) insoluble in water (powder remains) \\
- \(X_{2} \mathrm{CO}_{3}\) soluble in water (colourless/clear solution) \\
- effervescence/fizzing/bubbling with \(X_{2} \mathrm{CO}_{3}\) and acid \\
- more rapid reaction in acid for \(X_{2} \mathrm{CO}_{3}\) than \(\mathrm{BaCO}_{3}\) accept comparison of effervescence including no apparent bubbling with \(\mathrm{BaCO}_{3}\) and bubbling with \(\mathrm{X}_{2} \mathrm{CO}_{3}\) \\
Give the mark for three out of the four correct boxes providing at least one has a reference to evolution of gas with acid. \\
Give one mark for formation of insoluble barium sulphate. \\
or \\
barium sulphate is a white precipitate

FB 9 is aqueous ammonium bromide $\left(\mathrm{NH}_{4} \mathrm{C} / \mathrm{NaBr}\right)$, FB 10 is aqueous aluminium sulphate, FB 11 is aqueous lead(II) nitrate.

Selection of reagents - Accept any of the following:

- a named compound or a recognisable (but not necessarily correct) formula for the compound
- aqueous ions, e.g. $\mathrm{Ba}^{2+}(a q)$
- a solution containing a named ion

Identification of unknowns - Accept either of the following:

- a named compound (or ion)
- a fully correct formula for the compound or ion

| Question | Sections | Statement | Indicative material | Mark |  |
| :--- | :--- | :---: | :---: | :---: | :---: |
| $\mathbf{3}$ (a) | PDO <br> Layout | L1 | (i)Give one mark for presenting <br> observations for all 6 tests in a clear <br> fashion. | 1 | 1 |
| Recording | R1 | (ii)Give one mark for a single table showing <br> observation on adding of NaOH and $\mathrm{NH}_{3}$ <br> and when the reagent is in excess where <br> an initial precipitate has been formed. | 1 |  |  |
