## MARK SCHEME for the October/November 2013 series

## 9701 CHEMISTRY

9701/35 Paper 3 (Advanced Practical Skills 1), maximum raw mark 40

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the October/November 2013 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

| :---: | :---: | :---: | :---: |
|  | GCE A LEVEL - October/November 2013 | 9701 | 35 |

| Question | Sections | Indicative material | Mark |  |
| :---: | :---: | :---: | :---: | :---: |
| 1 (a) | PDO Layout | I Volume given for rough titre and accurate burette readings tabulated. (min of $2 \times 2$ box) | 1 |  |
|  | MMO Collection | II Initial and final burette readings recorded for rough titre <br> and <br> volume of FA 2 added recorded for each <br> accurate titre <br> and <br> acceptable headings and units in the accurate section. <br> Acceptable headings are initial (burette) reading/ initial volume/first reading/start reading Final (burette) reading/final volume $/ 2^{\text {nd }}$ reading/end reading <br> Titre/volume used/volume added/FA 2 added.(not difference or change in) Acceptable units are $/ \mathrm{cm}^{3} / \mathrm{in} \mathrm{cm}^{3} /\left(\mathrm{cm}^{3}\right) / \mathrm{cm}^{3}$ by each reading. | 1 |  |
|  | PDO Recording | III All accurate burette readings recorded to nearest $0.05 \mathrm{~cm}^{3}$. <br> Do not award this mark if: <br> - $50(.00)$ is used as an initial burette reading <br> - More than one final burette reading is 50 (.00) <br> - Any burette reading is greater than 50. (00) | 1 |  |
|  | MMO <br> Decisions | IV Has two uncorrected, accurate titres within $0.1 \mathrm{~cm}^{3}$. <br> Do not include a reading labelled 'rough'. Do not award this mark if, having performed 2 titres within $0.1 \mathrm{~cm}^{3}$, a further titration is carried out which is $>0.1 \mathrm{~cm}^{3}$ from the closer of the 2 initial titres unless further titrations, within 0.1 of any others, have also been carried out. <br> Do not award the mark if any accurate burette readings (apart from initial zero) are given as integer. | 1 |  |

| Page 3 | Mark Scheme | Syllabus | Paper |
| :---: | :---: | :---: | :---: |
|  | GCE A LEVEL - October/November 2013 | 9701 | 35 |

|  | MMO Quality | V, VI and VII <br> All burette readings should be rounded to the nearest $0.05 \mathrm{~cm}^{3}$. Subtractions should be checked. Examiner then selects the 'best' titre using the hierarchy: two identical, titres within $0.05 \mathrm{~cm}^{3}$ etc. <br> These best titres should be used to calculate the mean titre to the nearest $0.01 \mathrm{~cm}^{3}$. <br> Award V, VI and VII for a difference from Supervisor $\leq 0.2 \mathrm{~cm}^{3}$. <br> Award $\mathbf{V}$ and $\mathbf{V I}$ for a difference from Supervisor $0.2<\delta \leq 0.3 \mathrm{~cm}^{3}$ <br> Award $\mathbf{V}$ for a difference from Supervisor $0.3<\delta \leq \text { to } 0.5 \mathrm{~cm}^{3}$ <br> Spread penalty: if the two 'best' titres used by the <br> Examiner are $\geq 0.50 \mathrm{~cm}^{3}$ apart, cancel $1 Q$ mark. | 3 | [7] |
| :---: | :---: | :---: | :---: | :---: |
| (b) | ACE Interpretation | Candidate calculates the mean correctly. <br> Candidate must take the average of two (or more) titres where the total spread is $\leq 0.2 \mathrm{~cm}^{3}$. <br> Working must be shown or ticks must be placed next to the accurate titres selected. <br> The mean should normally be shown to $2 \mathbf{d p}$, rounded to the nearest $0.01 \mathrm{~cm}^{3}$. Example 26.667 must be rounded to 26.67 and not 26.65 and 26.675 must be rounded to 26.68 and not 26.70. <br> Two special cases where the mean may not be to 2 dp : Allow mean to 3 dp only for 0.025 or 0.075 (e.g. 26.325) Allow mean to 1 dp if all accurate burette readings were given to 1 dp and the mean is exactly correct (e.g. 26.0 and $26.2=26.1$ is correct but 26.0 and $26.1=26.1$ is incorrect - should be 26.05) <br> Do not award this mark if: <br> The rough titre was used to calculate the mean. The candidate performed only one accurate titration. Burette readings were incorrectly subtracted to obtain any of the accurate titre values. <br> All burette readings (resulting in titre values used in calculation of mean) are integers. <br> Note: the candidate's mean will sometimes be marked correct even if it is different from the mean calculated by the Examiner for the purpose of assessing accuracy. | 1 | [1] |
