## 

Mark Scheme (Results)
June 2011

GCE Chemistry (6CH02) Paper 01 Application of Core Principles of Chemistry

Edexcel is one of the leading examining and awarding bodies in the UK and throughout the world. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers.

Through a network of UK and overseas offices, Edexcel's centres receive the support they need to help them deliver their education and training programmes to learners.

For further information, please call our GCE line on 08445760025 , our GCSE team on 0844576 0027, or visit our website at www.edexcel.com.

If you have any subject specific questions about the content of this Mark Scheme that require the help of a subject specialist, you may find our Ask The Expert email service helpful.

Ask The Expert can be accessed online at the following link: http://www.edexcel.com/Aboutus/contact-us/

Alternatively, you can contact our GCE Science Advisor directly by sending an email to ScienceSubjectAdvisor@EdexcelExperts.co.uk.
You can also telephone 08445760037 to speak to a member of our subject advisor team.

## General Marking Guidance

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.
- Mark schemes will indicate within the table where, and which strands of QWC, are being assessed. Questions labelled with an asterix (*) are ones where the quality of your written communication will be assessed.

## Using the Mark Scheme

Examiners should look for qualities to reward rather than faults to penalise. This does NOT mean giving credit for incorrect or inadequate answers, but it does mean allowing candidates to be rewarded for answers showing correct application of principles and knowledge. Examiners should therefore read carefully and consider every response: even if it is not what is expected it may be worthy of credit.

The mark scheme gives examiners:

- an idea of the types of response expected
- how individual marks are to be awarded
- the total mark for each question
- examples of responses that should NOT receive credit.
/ means that the responses are alternatives and either answer should receive full credit.
( ) means that a phrase/ word is not essential for the award of the mark, but helps the examiner to get the sense of the expected answer.
Phrases/words in bold indicate that the meaning of the phrase or the actual word is essential to the answer.
ecf/TE/cq (error carried forward) means that a wrong answer given in an earlier part of a question is used correctly in answer to a later part of the same question.

Candidates must make their meaning clear to the examiner to gain the mark. Make sure that the answer makes sense. Do not give credit for correct words/phrases which are put together in a meaningless manner. Answers must be in the correct context.

## Quality of Written Communication

Questions which involve the writing of continuous prose will expect candidates to:

- write legibly, with accurate use of spelling, grammar and punctuation in order to make the meaning clear
- select and use a form and style of writing appropriate to purpose and to complex subject matter
- organise information clearly and coherently, using specialist vocabulary when appropriate.
Full marks will be awarded if the candidate has demonstrated the above abilities.
Questions where QWC is likely to be particularly important are indicated (QWC) in the mark scheme, but this does not preclude others.

## Section A (multiple choice)

| Question Number | Correct Answer | Mark |
| :---: | :---: | :---: |
| 1 | C | 1 |
| Question Number | Correct Answer | Mark |
| 2 (a) | B | 1 |
| Question Number | Correct Answer | Mark |
| 2 (b) | C | 1 |
| Question Number | Correct Answer | Mark |
| 2 (c) | D | 1 |
| Question Number | Correct Answer | Mark |
| 3 | C | 1 |
| Question Number | Correct Answer | Mark |
| 4 | B | 1 |
| Question Number | Correct Answer | Mark |
| 5 | B | 1 |
| Question Number | Correct Answer | Mark |
| 6 | A | 1 |
| Question Number | Correct Answer | Mark |
| 7 | D | 1 |
| Question Number | Correct Answer | Mark |
| 8 | A | 1 |
| Question Number | Correct Answer | Mark |
| 9 | A | 1 |
| Question Number | Correct Answer | Mark |
| 10 | D | 1 |
| Question Number | Correct Answer | Mark |
| 11 | C | 1 |

| Question Number | Correct Answer | Mark |
| :---: | :---: | :---: |
| 12 (a) | B | 1 |
| Question Number | Correct Answer | Mark |
| 12 (b) | C | 1 |
| Question Number | Correct Answer | Mark |
| 12 (c) | D | 1 |
| Question Number | Correct Answer | Mark |
| 13 | A | 1 |
| Question Number | Correct Answer | Mark |
| 14 | D | 1 |
| Question Number | Correct Answer | Mark |
| 15 | B | 1 |
| Question Number | Correct Answer | Mark |
| 16 | C | 1 |

## Section B

| Question <br> Number | Acceptable Answers | Reject | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 7}$ (a) | Pale/ light and green/ yellow | clear <br> yellow <br> green <br> any other colour | $\mathbf{1}$ |

| Question <br> Number | Acceptable Answers | Reject | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 7}$ <br> (b)(i) | Red/brown (solution) | Purple (or in combination <br> with red or brown) <br> Pale yellow <br> Orange (or in <br> combination with red or <br> brown) <br> Reject any other colours <br> alone or in combination <br> Grey/black (or any other <br> colour alone or in <br> combination) solid | $\mathbf{1}$ |

| Question <br> Number | Acceptable Answers | Reject | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 7}$ |  |  |  |
| (b) (ii) | $\mathrm{Cl}_{2}(\mathrm{aq})+2 \mathrm{I}^{-}(\mathrm{aq}) \rightarrow 2 \mathrm{Cl}^{-}(\mathrm{aq})+\mathrm{I}_{2}(\mathrm{aq}) /(\mathrm{s})$ <br> Entities (1) <br> Balancing and all four state symbols <br> Dependent on correct entities (1) |  | $\mathbf{2}$ |
| $\mathrm{Cl}_{2}(\mathrm{aq})+2 \mathrm{KI}(\mathrm{aq}) \rightarrow 2 \mathrm{KCl}(\mathrm{aq})+\mathrm{I}_{2}(\mathrm{aq}) /(\mathrm{s})$ <br> 1 max <br> $\mathrm{K}^{+}(\mathrm{aq})$ on both sides of otherwise correct <br> equation 1 max |  |  |  |

| Question <br> Number | Acceptable Answers | Reject | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 7}$ <br> $\mathbf{( c ) ( i )}$ | Starch (1) | Any other indicator e.g. <br> methyl orange/ <br> phenolphthalein $=0 / 2$ <br> Blue/black to colourless <br> Dependent on starch indicator (1) | $\mathbf{2}$ |
| Accept: no indicator needed (1) <br> Yellow to colourless (1) <br> Blank for indicator and yellow to colourless to blue/black <br> lmax | Blue/black to clear <br> Any mention of purple |  |  |

| Question Number | Acceptable Answers | Reject | Mark |
| :---: | :---: | :---: | :---: |
| $\begin{aligned} & 17 \\ & (c)(i i) \end{aligned}$ | (ii) - (vi) General comments: <br> Allow correct answers with no working in all parts <br> N.B. Mark each part to mark scheme answer first then allow TE from earlier parts. <br> Minimum correct to 2SF. Penalise SF for 1SF once only. <br> But incorrect rounding e.g. 4.525 to 4.52 is penalised once separately as well. <br> Penalise wrong units once only as well. <br> ( Mean titre $=9.05$ ) $\begin{aligned} & \frac{9.05 \times 0.01}{1000} \\ & =9.05 \times 10^{-5} / 0.0000905(\mathrm{~mol}) \end{aligned}$ <br> Allow $9.1 \times 10^{-5} / 0.000091(\mathrm{~mol})$ | $9 .(0) \times 10^{-5} / 0.00009(0)$ | 1 |

| Question Number | Acceptable Answers | Reject | Mark |
| :---: | :---: | :---: | :---: |
| $\begin{aligned} & 17 \\ & \text { (c) (iii) } \end{aligned}$ | $\begin{gather*} \left(\mathrm{I}_{2}(\mathrm{aq})+2 \mathrm{~S}_{2} \mathrm{O}_{3}{ }^{2-}(\mathrm{aq}) \rightarrow\right) \\ 2 \mathrm{I}^{-}((\mathrm{aq}))+\underset{\mathbf{( 1 )}}{\mathbf{S}_{\mathbf{4}} \mathbf{O}_{6}{ }^{\mathbf{2 -}}((\mathrm{aq}))} \end{gather*}$ <br> Marks stand alone for entities with balancing <br> Either of these on their own scores 1 mark regardless of anything else that is written <br> Multiples/fractions of equation allowed <br> Ignore state symbols even if incorrect |  | 2 |

| Question <br> Number | Acceptable Answers | Reject | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 7}$(c)(iv) $\frac{9.05 \times 10^{-5}}{2}$  $\mathbf{1}$ <br>  Allow $4.525 \times 10^{-5} / 0.00004525(\mathrm{~mol})$   <br>  Allow TE $\frac{\text { ans (ii) }}{2}$   <br> Accept TE from (iii) if you see it    |  |  |  |

| Question <br> Number | Acceptable Answers | Reject | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 7}$ | $4.525 \times 10^{-5} / 0.00004525(\mathrm{~mol})$ <br> (c)(v) <br> Allow TE $=$ ans (iv) <br> [Allow 'ans (iv)' with no numbers for this <br> part only] |  | $\mathbf{1}$ |

| Question <br> Number | Acceptable Answers | Reject | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 7}$ | $4.525 \times 10^{-5} \times \frac{1000}{10}=$ |  |  |
| $\mathbf{( c ) ( v i )}$ | $4.525 / 4.53 \times 10^{-3} / 0.004525 / 0.00453$ <br> $\left(\mathrm{~mol} \mathrm{dm}^{-3}\right)$ | $\mathbf{1}$ |  |
| Accept TE ans (v) $\times 100$ [a calculated <br> number must be given] |  |  |  |

| Question <br> Number | Acceptable Answers | Reject | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 7}$ |  |  |  |
| (d)(i) | Lilac <br> Allow (light) purple or mauve | Violet <br> Reject any other colours <br> alone or in combination | $\mathbf{1}$ |

| Question <br> Number | Acceptable Answers | Reject | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 7}$ | $2 \mathrm{~K}+\mathrm{Cl}_{2} \rightarrow 2 \mathrm{KCl}$ | $\mathrm{K}_{2}$ and/or $\mathrm{KCl}_{2}$ | $\mathbf{1}$ |
| (d)(ii) | Accept multiples/fractions <br> lgnore state symbols even if incorrect <br> Ignore correct charges on ions in KCl | Charges on reactants <br> K and/or $\mathrm{Cl}_{2}$ |  |

| Question <br> Number | Acceptable Answers | Reject | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 7}$ | Hydrogen chloride | Hydrochloric acid | $\mathbf{1}$ |
| $\mathbf{( e ) ( i )}$ | This may be accompanied by HCl | $\mathrm{HCl} / \mathrm{HCl}(\mathrm{g}) / \mathrm{HCl}($ gas $)$ <br> alone <br> $\mathrm{SO}_{2}$ |  |
| $\mathrm{H}_{2} \mathrm{~S}$ |  |  |  |
| Anything else |  |  |  |

| Question <br> Number | Acceptable Answers | Reject | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 7}$ |  |  |  |
| $\mathbf{( e ) ( i i )}$ | Dissolves in moisture/water/water vapour <br> (in the air) <br> Or reacts with moisture/water/water vapour <br> (in the air) | HCl condenses | $\mathbf{1}$ |

| Question <br> Number | Acceptable Answers | Reject | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 7}$ | $\mathrm{NH}_{4} \mathrm{Cl} /$ Ammonium chloride/ $\mathrm{ClNH}_{4}$ | Ammonia chloride / NH 33 Cl | $\mathbf{1}$ |
| (e)(iii) | $\mathrm{NH}_{4}{ }^{+} \mathrm{Cl}^{-} / \mathrm{H}_{4} \mathrm{~N}^{+} \mathrm{Cl}^{-} / \mathrm{Cl}^{-} \mathrm{NH}_{4}{ }^{+}$ |  |  |
|  | Ignore any states even if incorrect |  |  |

| Question <br> Number | Acceptable Answers | Reject | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 7}\left(\begin{array}{ll}\text { Any one of: } \\ \text { (i) } & \begin{array}{l}\text { Phosphorus(V) chloride/pentachloride } \\ \text { Phosphorus(III) chloride/trichloride } \\ \text { Allow (III/V) anywhere }\end{array} \\ \begin{array}{l}\text { Concentrated hydrochloric acid } \\ \text { Hydrogen chloride (gas) } \\ \text { Sodium/potassium chloride and } \\ \text { concentrated sulfuric acid } \\ \text { Thionyl chloride }\end{array} & \text { Phosphorus chloride } \\ \text { Allow correct formula(e) for all above } \\ \text { But note: } \\ \text { conc } \mathrm{HCl} / \text { conc } \mathrm{H}_{2} \mathrm{SO}_{4}\end{array}\right.$ | Hydrochloric acid/HCI/ <br> HCl(aq) <br> Chlorine | 1 |  |

| Question Number | Acceptable Answers | Reject | Mark |
| :---: | :---: | :---: | :---: |
| $\begin{aligned} & 17 \\ & \text { (f) (ii) } \end{aligned}$ | Be generous here <br> Horizontal test tube with ceramic fibre/ any sort of wool except iron (1) <br> soaked in 2-chlorobutane and (alcoholic) potassium hydroxide/reactants/ reagents/ chemicals/reaction mixture... <br> ...with heat (or any diagram of a heat source or the word heat) (1) <br> OR <br> Round bottom/pear shaped flask/sloping test/boiling tube and heat (or any diagram of a heat source or the word heat) (1) <br> containing 2-chlorobutane and (alcoholic) potassium hydroxide/reactants/ reagents/ chemicals/reaction mixture (1) <br> Ignore: <br> any use of aluminium oxide/pumice reflux/distillation set up <br> Gas collection over water (1) <br> Ignore Bunsen valves <br> Allow: <br> Collection in a gas syringe <br> Note: This does not constitute a sealed apparatus | Sealed apparatus but ignore inadvertent closures owing to poor cross-sectional drawings (-1) <br> Poor diagram e.g. clear air gaps at intermediate joints in the apparatus(-1) <br> Solution/substances alone <br> An arrow on its own <br> Conical/flat bottomed flask <br> N.B. contradiction between drawing and any label <br> Solution/substances alone <br> A poor diagram mark ( which can be the second) should be deducted for the delivery tube through the side of trough and/or the delivery tube missing the collection tube. | 3 |

| Question Number | Acceptable Answers | Reject | Mark |
| :---: | :---: | :---: | :---: |
| $\begin{aligned} & 18 \\ & \text { (a)(i) } \end{aligned}$ | ```H H .x .x xx H.xC.xC.xSx.H .x .x xx H H``` All Bonding electrons (1) Ignore any circles/bonds with electrons <br> Two lone pairs on sulfur Dependent on eight electrons around sulfur (1) Accept all dots/crosses <br> Fully correct methanethiol 1max | missing Hs/Cs (-1) | 2 |

| Question <br> Number | Acceptable Answers | Reject | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 8}$ <br> (a)(ii) | $104.5\left(^{\circ}\right.$ ) ( accept 91 to 105)(1) <br> (Four pairs/two bonding pairs and two non- <br> bonding pairs of electrons in) minimum <br> repulsion/ maximum separation/ as far <br> apart as possible (tetrahedral <br> arrangement) <br> Ignore the number of pairs of electrons (1) <br> And lone/ non bonding pair(s) of <br> electrons repel more (than bond pairs/CH <br> bonds) (1) <br> Mark independently | Linear shape (-1) | atoms... |

| Question <br> Number | Acceptable Answers | Reject | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 8}$ <br> (b)(i) | Two pairs of electrons/two bonds (around <br> the H atom) <br> OR <br> Can be shown on a diagram either with <br> electrons or bonds (in approximate straight <br> line) around the hydrogen (1) | Linear shape on its own | $\mathbf{2}$ |
| (Repel to) maximum separation/minimum <br> repulsion/as far apart as possible (1) <br> Dependent on first mark except: <br> Allow: It has a linear shape due to <br> maximum separation/minimum repulsion 1 <br> max |  |  |  |

| Question <br> Number | Acceptable Answers | Reject | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 8}$ <br> (b) (ii) | Sulfur is less electronegative (than <br> oxygen)/not electronegative enough <br> OR oxygen is more electronegative (than <br> sulfur) / electronegative enough | Bigger/higher rmm/ <br> atom/molecule alone | $\mathbf{1}$ |
| OR Hydrogen bonds can only occur between <br> Hand either N, O, or F due to the large <br> difference in electronegativity | Hydrogen not bonded to <br> N, O, or F alone |  |  |

| Question <br> Number | Acceptable Answers | Reject | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 8}$ <br> $\mathbf{( c ) ( i )}$ | Temporary asymmetrical distribution/ <br> random arrangement of electrons/ charge <br> (density) <br> Ignore references to atoms/molecules <br> OR instantaneous/temporary dipole (1) <br> (these produce) induced dipoles <br> OR description of induction (1) <br> Mark independently <br> Ignore references to atoms/molecules | Any mention of <br> permanent dipoles $=0 / 2$ | $\mathbf{2}$ |
| d+ and d-/unless clearly temporary $\partial-$ |  |  |  |

| Question <br> Number | Acceptable Answers | Reject | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 8}$ <br> (c)(ii) | Ethanethiol/sulfur has more electrons (so <br> forces are stronger) | Larger charge cloud/ <br> larger electron cloud/ <br> more outer electrons on <br> their own <br> Any reference to <br> size/radius/rmm unless <br> with correct answer | $\mathbf{1}$ |
| Allow sulfur has an extra shell of electrons <br> (so forces are weaker) <br> Allow oxygen has one fewer shell of <br> electrons |  |  |  |

| Question <br> Number | Acceptable Answers | Reject | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 8}$ | Any one from: <br> (d)(i) <br> Bubbles (of gas)/fizzing /effervescence <br> Sodium disappears/dissolves/gets smaller <br> White solid forms | Sodium rushes about (i.e. <br> any confusion with <br> reaction of sodium with <br> water) | $\mathbf{1}$ |
| Multiple answers: number correct minus <br> number wrong to give a maximum of 1 and <br> a minimum of 0 <br> Steam | Ignore: sodium floats or sinks and/or heat <br> given out and/or hydrogen produced |  |  |

| Question <br> Number | Acceptable Answers | Reject | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 8}$ <br> (d)(ii) | $\mathrm{Na}+\mathrm{CH}_{3} \mathrm{CH}_{2} \mathrm{SH} \rightarrow \quad \mathrm{CH}_{3} \mathrm{CH}_{2} \mathrm{SNa}+1 / 2 \mathrm{H}_{2}$ |  |  |
| Accept multiples |  |  |  |
| Ignore charges on sodium salt/state <br> symbols even if incorrect | H for hydrogen <br> $\mathrm{CH}_{3} \mathrm{CH}_{2} \mathrm{NaS}$ | $\mathbf{1}$ |  |

| Question <br> Number | Acceptable Answers | Reject | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 8}$ | $\mathrm{C}_{2} \mathrm{H}_{5} \mathrm{Br}+\mathrm{KOH} \rightarrow \mathrm{C}_{2} \mathrm{H}_{5} \mathrm{OH}+\mathrm{KBr} / \mathrm{K}^{+}+\mathrm{Br}^{-}$ |  | $\mathbf{1}$ |
| $\mathbf{( e ) ( i )}$ | Accept ionic equation <br> $\mathrm{C}_{2} \mathrm{H}_{5} \mathrm{Br}+\mathrm{OH}^{-} \rightarrow \mathrm{C}_{2} \mathrm{H}_{5} \mathrm{OH}+\mathrm{Br}^{-}$ <br> Allow molecular formula of alcohol, $\mathrm{C}_{2} \mathrm{H}_{6} \mathrm{O}$ |  |  |

| Question <br> Number | Acceptable Answers | Reject | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 8}$ | Type - substitution (1) <br> (e)(ii) <br> Mechanism - <br> Nucleophilic (1) <br> Accept words in either order. Both words <br> may be given on either line. <br> N.B. This is the only way to score 2 marks! |  | $\mathbf{2}$ |

| Question <br> Number | Acceptable Answers | Reject | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 8}$ | KSH $/ \mathrm{NaSH}$ |  | $\mathbf{1}$ |
| $\mathbf{( e ) ( i i i )}$ | Allow KHS/NaHS or $\mathrm{H}_{2} \mathrm{~S}$ |  |  |
| Ignore state symbols |  |  |  |

| Question <br> Number | Acceptable Answers | Reject | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 8}$ (f) | Sulfur dioxide/ $\mathrm{SO}_{2}$ (1) | $\mathrm{SO}_{3}$ <br> $\mathrm{CO}_{2}$ <br> Attacks ozone layer <br> $\mathrm{CO}_{2}$ causes acid rain | $\mathbf{2}$ |
|  | Causes acid rain (1) <br> Allow effects of acid rain e.g. acid lakes/lake <br> pollution/ crop or forest damage/limestone <br> building damage/ named metal which <br> corrodes. <br> [It is quite possible candidates will give <br> details of oxidation of sulfur dioxide to sulfur <br> trioxide and formation of sulfuric acid. <br> Ignore any of this additional information.] | Allow triggers asthma <br> Ignore any reference to greenhouse gas/ | global warming/any reference to sea <br> pollution or sea creatures <br> Second mark dependent on first mark <br> except allow: If $\mathrm{SO}_{2}$ not mentioned then, <br> $\mathrm{SO}_{3} / \mathrm{H}_{2} \mathrm{SO}_{4}$ causes acid rain for 1 mark |

## Section C

| Question <br> Number | Acceptable Answers | Reject | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 9}$ |  |  |  |
| $\mathbf{( a ) ( i )}$ | An atom/ molecule (or ion)/species/entity |  |  |
| with an unpaired electron | Lone/single/free electron <br> with unpaired electrons | $\mathbf{1}$ |  |
| Ignore any references to homolytic bond <br> fission but penalise a reference to <br> heterolytic bond fission | A free radical is an <br> unpaired electron |  |  |

| Question Number | Acceptable Answers | Reject | Mark |
| :---: | :---: | :---: | :---: |
| $\begin{aligned} & 19 \\ & \text { (a) (ii) } \end{aligned}$ | ${ }^{x}{ }^{x \times x} N_{x}^{x}: 0_{0}$ <br> Double bond (1) <br> Other electrons correct <br> Dependent on double bond (1) <br> Allow: all dots or all crosses or any combination | N single bond O <br> Reject unpaired electron on oxygen | 2 |

| Question <br> Number | Acceptable Answers | Reject | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 9}$ | $\underline{\text { Wherever it appears in the answer: }}$Ag/silver (oxidized) 0 to $+1 / 1+$ (1) <br> Wherever it appears in the answer: |  | $\mathbf{3}$ |
|  | N/Nitrogen $=+5 / 5+$ (1) <br> (Element reduced) $\mathbf{N} /$ nitrogen $\ldots$ to $+2 / 2+$ <br> (1) | N.B. Some candidates give ...+2/2+ and <br> $+5 / 5+$ which is correct for both nitrogen <br> products <br> Only penalise no positive charges once |  |

| Question Number | Acceptable Answers | Reject | Mark |
| :---: | :---: | :---: | :---: |
| $\begin{aligned} & \text { *19 } \\ & \text { (b) (ii) } \end{aligned}$ | $\begin{aligned} & 3 \mathrm{Ag}(\mathrm{~s})+4 \mathrm{HNO}_{3}(\mathrm{aq}) \rightarrow \\ & \mathrm{NO}(\mathrm{~g})+3 \mathrm{AgNO}_{3}(\mathrm{aq})+2 \mathrm{H}_{2} \mathrm{O}(\mathrm{I}) \end{aligned}$ <br> 3 Ag reacting to form NO and $3 \mathrm{AgNO}_{3}$ (1) $4 \mathrm{HNO}_{3}$ and $2 \mathrm{H}_{2} \mathrm{O}$ (1) <br> mark independently of (b)(i) <br> No TE from (b)(i) |  | 2 |

| Question <br> Number | Acceptable Answers | Reject | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 9}$ <br> $\mathbf{( c ) ( i )}$ | The reaction is endothermic (so goes to <br> remove heat/lower the temperature) | Reaction/equilibrium <br> moves to the right/to <br> oppose change without <br> any other statement | $\mathbf{1}$ |
| Allow $\mathbf{\Delta H}$ is positive (so goes to remove <br> heat/lower the temperature) | (i) |  |  |

| Question <br> Number | Acceptable Answers | Reject | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 9}$ (c)(ii) | The yield is not changed <br> OR No change <br> OR no effect on the equilibrium (1) <br> as there is no change in the number of <br> (moles of) (gaseous) molecules <br> OR as there is no change in the number of <br> (gaseous) moles/particles (1) | Reference to atoms or <br> ions instead of molecules | $\mathbf{2}$ |
| Allow: cylinder surface acts as catalyst (1) <br> And all sites are filled so pressure has no <br> affect (1) <br> Second mark dependent on first in both <br> cases <br> Ignore any comment on rate whether <br> correct or not |  |  |  |

| Question Number | Acceptable Answers | Reject | Mark |
| :---: | :---: | :---: | :---: |
| $\begin{aligned} & 19 \\ & \text { (c) (iii) } \end{aligned}$ | Rate increases because (increase in pressure) means more particles per unit volume/less space for molecules/molecules closer together/greater or increased concentration (1) <br> Comment: A correct statement of why the rate increases is needed with rate increases (somewhere in the answer) for the first mark <br> which increases the frequency / increases the number of collisions/more chance of (successful) collisions (between molecules) <br> (1) <br> Ignore any references to (activation/kinetic) energy <br> Mark independently | more particles per unit area <br> Reference to atoms or ions instead of molecules | 2 |
| Question Number | Acceptable Answers | Reject | Mark |
| $\begin{aligned} & \hline \text { *19 } \\ & \text { (d)(i) } \end{aligned}$ | J et aeroplanes fly (much) close(r)/near(er) to the ozone (layer)/ stratosphere (so more NO to deplete ozone layer) (1) <br> ALLOW: <br> Jet aeroplanes fly in the ozone (layer)/ stratosphere <br> Some NO from cars reacts (e.g. with $\mathrm{O}_{2}$ to give $\mathrm{NO}_{2}$ ) <br> OR NO from planes does not react before it can react with the ozone (1) <br> Mark independently | Anything else <br> e.g. aeroplanes fly in the ionosphere <br> NO absorbed by plants NO from cars dissociates/ decomposes/break down NO from planes does not dissociate/decompose/break down NO from cars takes a long time to reach the ozone layer NO dissolves | 2 |

| Question Number | Acceptable Answers | Reject | Mark |
| :---: | :---: | :---: | :---: |
| $\begin{aligned} & 19 \\ & \text { (d) (ii) } \end{aligned}$ | Comment: <br> Please underline Key Points with highlighter, or annotate with tick at Key Point, or annotate with Key Point number from mark scheme wherever mark awarded. <br> This ensures that it is easy to count up marks for this part. <br> $\mathbf{K P 1 ~ N O}(\cdot)+\mathrm{O}_{3} \rightarrow(\cdot) \mathrm{NO}_{2}+\mathrm{O}_{2}(\mathbf{1})$ <br> Comment: Dots are not required for KP1 <br> KP2 $\cdot \mathrm{NO}_{2}+\mathrm{O}_{3} \rightarrow \mathrm{NO} \cdot+2 \mathrm{O}_{2}(\mathbf{1})$ <br> Comment: Dots can be on either side of both free radicals <br> ALLOW for KP2: $\begin{aligned} \mathrm{O}_{3} & \rightarrow \mathrm{O} \cdot+\mathrm{O}_{2} \\ \cdot \mathrm{NO}_{2}+\mathrm{O} \cdot & \rightarrow \mathrm{NO} \cdot+\mathrm{O}_{2} \end{aligned}$ <br> N.B. Both equations required here <br> The overall equation is: $\begin{equation*} \text { KP3 } 2 \mathrm{O}_{3} \rightarrow 3 \mathrm{O}_{2} \tag{1} \end{equation*}$ <br> ALLOW: equilibrium arrow <br> This mark is independent of KP1 and KP2 <br> KP4 NO/the free radical (Allow $\mathrm{Cl} \cdot$ ) is regenerated/a catalyst or wtte (1) <br> KP5 and one molecule can break down large numbers of ozone molecules <br> OR NO (Allow $\mathrm{Cl} \cdot$ ) continues to react (with ozone)/reaction is continuous <br> OR Mention of chain reaction (1) <br> Ignore any reference to global warming as an additional problem <br> KP4 and 5 marks are independent | Overall equation with nothing cancelled <br> If $\mathrm{Cl}^{-}$is referred to as the radical then neither KP4 nor KP5 can be gained <br> If the candidate makes clear that any of these processes lead to global warming loses KP4 or 5 but not both. | 5 |
