# Mark Scheme (Results) 

January 2013

GCE Chemistry (6CH04) Paper 01
General Principles of Chemistry I Rates, Equilibria and Further Organic Chemistry

## Edexcel and BTEC Qualifications

Edexcel and BTEC qualifications come from Pearson, the world's leading learning company. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications websites at www.edexcel.com or www.btec.co.uk for our BTEC qualifications.
Alternatively, you can get in touch with us using the details on our contact us page at www.edexcel.com/contactus.

If you have any subject specific questions about this specification that require the help of a subject specialist, you can speak directly to the subject team at Pearson.
Their contact details can be found on this link: www.edexcel.com/teachingservices.

You can also use our online Ask the Expert service at www.edexcel.com/ask. You will need an Edexcel username and password to access this service.

## Pearson: helping people progress, everywhere

Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at: www.pearson.com/uk

## General Marking Guidance

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.
- Mark schemes will indicate within the table where, and which strands of QWC, are being assessed. The strands are as follows:
i) ensure that text is legible and that spelling, punctuation and grammar are accurate so that meaning is clear
ii) select and use a form and style of writing appropriate to purpose and to complex subject matter
iii) organise information clearly and coherently, using specialist vocabulary when appropriate

## Using the Mark Scheme

Examiners should look for qualities to reward rather than faults to penalise. This does NOT mean giving credit for incorrect or inadequate answers, but it does mean allowing candidates to be rewarded for answers showing correct application of principles and knowledge. Examiners should therefore read carefully and consider every response: even if it is not what is expected it may be worthy of credit.

The mark scheme gives examiners:

- an idea of the types of response expected
- how individual marks are to be awarded
- the total mark for each question
- examples of responses that should NOT receive credit.
/ means that the responses are alternatives and either answer should receive full credit.
( ) means that a phrase/word is not essential for the award of the mark, but helps the examiner to get the sense of the expected answer.
Phrases/words in bold indicate that the meaning of the phrase or the actual word is essential to the answer.
ecf/TE/cq (error carried forward) means that a wrong answer given in an earlier part of a question is used correctly in answer to a later part of the same question.

Candidates must make their meaning clear to the examiner to gain the mark. Make sure that the answer makes sense. Do not give credit for correct words/phrases which are put together in a meaningless manner. Answers must be in the correct context.

## Quality of Written Communication

Questions which involve the writing of continuous prose will expect candidates to: - write legibly, with accurate use of spelling, grammar and punctuation in order to make the meaning clear

- select and use a form and style of writing appropriate to purpose and to complex subject matter
- organise information clearly and coherently, using specialist vocabulary when appropriate.
Full marks will be awarded if the candidate has demonstrated the above abilities.
Questions where QWC is likely to be particularly important are indicated (QWC) in the mark scheme, but this does not preclude others.

## Section A

| Question Number | Correct Answer | Mark |
| :---: | :---: | :---: |
| 1(a) | A | 1 |
| Question Number | Correct Answer | Mark |
| 1(b) | C | 1 |
| Question Number | Correct Answer | Mark |
| 2 | B | 1 |
| Question Number | Correct Answer | Mark |
| 3 | D | 1 |
| Question Number | Correct Answer | Mark |
| 4 | D | 1 |
| Question Number | Correct Answer | Mark |
| 5 | B | 1 |
| Question Number | Correct Answer | Mark |
| 6(a) | C | 1 |
| Question Number | Correct Answer | Mark |
| 6(b) | B | 1 |
| Question Number | Correct Answer | Mark |
| 6(c) | D | 1 |
| Question Number | Correct Answer | Mark |
| 7 | A | 1 |
| Question Number | Correct Answer | Mark |
| 8 | C | 1 |
| Question Number | Correct Answer | Mark |
| 9 | B | 1 |

| Question <br> Number | Correct Answer | Mark |
| :--- | :--- | :--- |
| $\mathbf{1 0}$ | C | $\mathbf{1}$ |
| Question <br> Number Correct Answer Mark <br> $\mathbf{1 1}$ D $\mathbf{1}$ |  |  |

| Question <br> Number | Correct Answer | Mark |
| :--- | :--- | :--- |
| $\mathbf{1 2 ( a )}$ | B | $\mathbf{1}$ |

| Question <br> Number | Correct Answer | Mark |
| :--- | :--- | :--- |
| $\mathbf{1 2 ( b )}$ | A | $\mathbf{1}$ |

| Question <br> Number | Correct Answer | Mark |
| :--- | :--- | :--- |
| $\mathbf{1 2 ( c )}$ | C | $\mathbf{1}$ |

| Question <br> Number | Correct Answer | Mark |
| :--- | :--- | :--- |
| $\mathbf{1 2 ( d )}$ | A | $\mathbf{1}$ |

| Question <br> Number | Correct Answer | Mark |
| :--- | :--- | :--- |
| $\mathbf{1 3}$ | A | $\mathbf{1}$ |

| Question <br> Number | Correct Answer | Mark |
| :--- | :--- | :--- |
| $\mathbf{1 4}$ | A | $\mathbf{1}$ |

## Section B

| Question <br> Number | Acceptable Answers | Reject | Mark |
| :--- | :--- | :--- | :---: |
| $\mathbf{1 5 ( a )}$ | (It has) three (moles of) COOH groups <br> / three (moles of) carboxylic acid <br> groups / three (moles of) protons <br> /three (moles of) $\mathrm{H}^{+}$/it is tribasic / <br> three acid groups/ three (moles of) <br> replaceable hydrogens/triprotic <br> ALLOW <br> Three acid groups | 'carbonyl'/'carboxylate' | $\mathbf{1}$ |

| Question Number | Acceptable Answers | Reject | Mark |
| :---: | :---: | :---: | :---: |
| 15(b)(i) | FI RST, CHECK THE FI NAL ANSWER <br> I $\mathbf{F}$ answer $=+546\left(\mathrm{~J} \mathrm{~mol}^{-1} \mathrm{~K}^{-1}\right)$ award 2 marks <br> " 546 " ( $\mathrm{J} \mathrm{mol}^{-1} \mathrm{~K}^{-1}$ ) scores (1) as sign omitted) $\begin{align*} &\left(\Delta \mathrm{S}_{\text {system }}^{\ominus}=\right.)[200.5+(3 \times 213.6)+(3 \\ &\times 69.9)] \\ &-[199.9+(3 \times 101.7)]  \tag{1}\\ &= {[+1051]-[+505] } \\ &=+546\left(\mathrm{~J} \mathrm{~mol}^{-1} \mathrm{~K}^{-1}\right) \tag{1} \end{align*}$ <br> Allow $\mathbf{+} 0.546 \mathbf{k J ~ m o l}^{\mathbf{- 1}} \mathbf{K}^{\mathbf{- 1}}$ <br> 2nd mark is CQ on entropy values used for example <br> EITHER <br> Omission of factor of $x 3$ for some or all substances in the equation <br> OR <br> The use of one incorrect entropy value(s) from the data book <br> OR <br> One missing value <br> Note <br> If two or more of the above three errors are made together, (0) awarded. <br> I GNORE sf except 1 sf | I ncorrect units (no 2nd mark) | 2 |

| Question Number | Acceptable Answers | Reject | Mark |
| :---: | :---: | :---: | :---: |
| 15(b)(ii) | First mark <br> Gas formed (from solid) <br> OR <br> Liquid formed (from solid) <br> OR <br> Gas and liquid formed (from solid) <br> Second mark <br> EITHER <br> More moles of product than reactants <br> / more moles formed <br> OR <br> 4 mol (of reactants) to 7 mol (of products) <br> OR <br> 4 'molecules' to 7 'molecules' <br> NOTE: <br> If specific numbers are stated, these must be correct (ie $4 \rightarrow 7$ ) <br> OR <br> Increase in disorder / increase in ways of arranging particles <br> IGNORE ‘entropy increases’ <br> NOTE: <br> Both points may be made in the same sentence | J ust 'more product' / 'more particles formed' <br> 2 substances going to 3 substances | 2 |

| Question Number | Acceptable Answers | Reject | Mark |
| :---: | :---: | :---: | :---: |
| 15(b) (iii) | $\begin{align*} \left(\Delta S_{\text {surroundings }}^{\theta}\right. & =) \frac{-\Delta H}{T} O R \frac{-70000}{298} \\ & =-234.8993289  \tag{1}\\ & =-235 \mathbf{J ~ m o l}^{-\mathbf{1}} \mathbf{K}^{-1} \tag{1} \end{align*}$ <br> OR $\left(\Delta S_{\text {surroundings }}^{\ominus}=\right) \frac{-\Delta H}{T} \text { OR } \frac{-70}{298}$ $\begin{equation*} =-0.235 \mathrm{~kJ} \mathrm{~mol}^{-1} \mathrm{~K}^{-1} \tag{1} \end{equation*}$ <br> I GNORE sf except 1 sf NOTE: Correct units are required for the award of the second mark +235 with units scores | Incorrect rounding (e.g. -234 / -234.89) no 2nd mark <br> +235 with no units ( $\mathbf{0}$ ) overall | 2 |

| Question Number | Acceptable Answers | Reject | Mark |
| :---: | :---: | :---: | :---: |
| 15(b)(iv) | $\begin{aligned} \left(\Delta \mathrm{S}_{\text {total }}^{\theta}\right. & \left.=\Delta \mathrm{S}_{\text {system }}^{\theta}+\Delta \mathrm{S}_{\text {surroundings }}^{\theta}\right) \\ & =(+546)+(-235) \\ & =(+) 311\left(\mathrm{~m} \mathrm{~mol}^{-1} \mathrm{~K}^{-1}\right) \\ \mathrm{OR} & =(+) 0.311 \mathbf{~ k J} \mathbf{m o l}^{-1} \mathbf{K}^{-\mathbf{1}} \\ \mathrm{CQ} \text { on (i) } & \text { and (iii) } \end{aligned}$ <br> I GNORE sf except 1 sf | Incorrect units | 1 |

| Question <br> Number | Acceptable Answers | Reject | Mark |
| :--- | :--- | :--- | :---: |
| $\mathbf{1 5 ( b ) ( v )}$ | Positive so feasible / spontaneous / <br> will occur / reaction goes / reacts (at <br> 298 K) |  | $\mathbf{1}$ |
|  | NOTE: <br> LOOK BACK at answer to (b)(iv) <br> IF answer to (b)(iv) has a positive <br> sign (the + sign can be stated or <br> implied) <br> THEN ALLOW J UST <br> feasible / spontaneous / will occur / <br> reaction goes / reacts (at 298 K) |  |  |
| Mark CQ on sign of answer to (iv) |  |  |  |

| Question <br> Number | Acceptable Answers | Reject | Mark |
| :--- | :--- | :--- | :---: |

| 19(d) | MARKI NG ADVI CE <br> Check answer for the suggested structure of X . If the correct structure is shown <br> Mark answer according to the following. However if no structure for $\mathbf{X}$ is shown or an incorrect structure for $\mathbf{X}$ is proposed, mark answer according to "COMMENTS" scheme below <br> MARKS CAN BE AWARDED FROM SUITABLY ANNOTATED FORMULAE FOR X. <br> First mark: <br> Four different H / hydrogen / proton environments <br> Any five from following seven points: <br> Either <br> Application of the $(n+1)$ rule to peak $J$ (which is a quartet / splits into four) <br> or <br> application of the $(n+1)$ rule peak $\mathbf{M}$ (which is <br> a doublet / splits into two) <br> Any mention to explain no splitting for peak $\mathbf{L}$ as there is no H is attached to the adjacent carbon <br> Peak L <br> $\left(\mathrm{CH}_{3}\right)$ next to $\mathrm{C}=\mathrm{O}$ <br> Peak M <br> $\left(\mathrm{CH}_{3}\right)$ next to CH <br> Peak K <br> OH <br> Peak J <br> (CH) next to $\mathrm{CH}_{3}$ <br> Any one correct $\delta$ value quoted within $\pm 0.2$ of the following chemical shifts: $1.4(\mathbf{M})$ or 2.2 <br> (L) or $3.7(\mathbf{K})$ or 4.2 (J) (ppm) | J ust 'four different chemical environments' <br> If any incorrect chemical shift OR A RANGE of chemical shifts is quoted, this scoring point is not available | 7 |

## COMMENT

Strategy for marking answers with an incorrect structure for $\mathbf{X}$ or where no structure is suggested for $X$.
The maximum mark in such cases is FOUR OUT OF SEVEN or TWO OUT OF SEVEN IF NO STRUCTURE DRAWN (as second and fourth marks are not available)

Scoring points:
First mark:
States four different H / hydrogen / proton environments

## Second mark:

Structure drawn for $\mathbf{X}$ has exactly 4 hydrogen environments
Third mark:
Peak $\mathbf{K}$ is due to OH

## Fourth Mark:

Providing the structure drawn for $X$ would produce ONE of these splits.
Any ONE of
Application of the $(\mathrm{n}+1)$ rule to peak to explain a peak which is a quartet splits into four or
Application of the $(\mathrm{n}+1)$ rule to peak to explain a peak which is a doublet / splits into two or
Application of the $(n+1)$ rule to peak to explain a peak which is a singlet due to a $\mathrm{CH}_{3}$ next to $\mathrm{C}=0$
