## edexcel 츷

Mark Scheme (Results)
June 2014
GCE Chemistry (6CH04/01)
General Principles of Chemistry I

## Edexcel and BTEC Qualifications

Edexcel and BTEC qualifications come from Pearson, the world's leading learning company. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information, please visit our website at www.edexcel.com.

Our website subject pages hold useful resources, support material and live feeds from our subject advisors giving you access to a portal of information. If you have any subject specific questions about this specification that require the help of a subject specialist, you may find our Ask The Expert email service helpful.
www.edexcel.com/contactus

Pearson: helping people progress, everywhere
Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at: www.pearson.com/uk

## General Marking Guidance

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.
- Mark schemes will indicate within the table where, and which strands of QWC, are being assessed. The strands are as follows:
i) ensure that text is legible and that spelling, punctuation and grammar are accurate so that meaning is clear
ii) select and use a form and style of writing appropriate to purpose and to complex subject matter
iii) organise information clearly and coherently, using specialist vocabulary when appropriate

## Using the Mark Scheme

Examiners should look for qualities to reward rather than faults to penalise. This does NOT mean giving credit for incorrect or inadequate answers, but it does mean allowing candidates to be rewarded for answers showing correct application of principles and knowledge. Examiners should therefore read carefully and consider every response: even if it is not what is expected it may be worthy of credit.

The mark scheme gives examiners:

- an idea of the types of response expected
- how individual marks are to be awarded
- the total mark for each question
- examples of responses that should NOT receive credit.
/ means that the responses are alternatives and either answer should receive full credit.
( ) means that a phrase/word is not essential for the award of the mark, but helps the examiner to get the sense of the expected answer.
Phrases/words in bold indicate that the meaning of the phrase or the actual word is essential to the answer.
ecf/TE/cq (error carried forward) means that a wrong answer given in an earlier part of a question is used correctly in answer to a later part of the same question.

Candidates must make their meaning clear to the examiner to gain the mark. Make sure that the answer makes sense. Do not give credit for correct words/phrases which are put together in a meaningless manner. Answers must be in the correct context.

## Quality of Written Communication

Questions which involve the writing of continuous prose will expect candidates to:

- write legibly, with accurate use of spelling, grammar and punctuation in order to make the meaning clear
- select and use a form and style of writing appropriate to purpose and to complex subject matter
- organise information clearly and coherently, using specialist vocabulary when appropriate.
Full marks will be awarded if the candidate has demonstrated the above abilities.
Questions where QWC is likely to be particularly important are indicated (QWC) in the mark scheme, but this does not preclude others.

## Section A (multiple choice)

| Question <br> Number | Correct Answer | Reject | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 ~ ( a ) ~}$ | B |  | $\mathbf{1}$ |

| Question <br> Number | Correct Answer | Reject | Mark |
| :--- | :--- | :--- | :--- |

|  |  |  |  |
|  |  |  |  |
|  |  |  |  |
|  |  |  |  |
|  |  |  |  |
|  |  |  |  |
|  |  |  |  |
|  |  |  |  |
|  |  |  |  |
|  |  |  |  |
|  |  |  |  |
|  |  | '(Positive) Answer is as expected...' <br> (0) |  |

| Question Number | Correct Answer1 | Reject | Mark |
| :---: | :---: | :---: | :---: |
| 9 (c) | $\begin{aligned} & \Delta \mathrm{S}_{\text {surroundings }}=-\frac{\Delta \mathrm{H}^{\ominus}}{298} \\ & \Delta \mathrm{H}^{\ominus}=-\Delta \mathrm{S}_{\text {surroundings }}^{\ominus} \times 298 \end{aligned}$ <br> OR $\begin{align*} \Delta H^{\theta-} & =-2152 \times 298  \tag{1}\\ & =-641.296 \\ & =-641.3\left(\mathrm{~kJ} \mathrm{~mol}^{-1}\right) \tag{1} \end{align*}$ <br> ALLOW $=-641.3 \times 10^{3} \mathbf{J ~ m o l}^{-\mathbf{1}}$ <br> Note <br> 1. $-640.1338=-640.1$ (if 2040/answer to part (b) used to recalculate entropy change of surroundings first.) <br> 2. $\Delta \mathrm{H}^{\theta}=+641.3\left(\mathrm{~kJ} \mathrm{~mol}^{-1}\right)$ <br> 3. $\Delta \mathrm{H}^{\theta}=-\frac{\Delta \mathrm{S}_{\text {surroundings }}}{298}$ <br> Ignore SF except one |  | 2 |

| Question <br> Number | Correct Answer | Reject | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{9 ( d ) ( i )}$ | $50 \times 4.2 \times 22.5$ |  | $\mathbf{1}$ |
|  | $=4725(\mathrm{~J})$ Ignore sign |  |  |
|  | ALLOW |  |  |
|  | 4.725 kJ |  |  |

| Question Number | Correct Answer | Reject | Mark |
| :---: | :---: | :---: | :---: |
| 9 (d)(ii) | There are two legitimate answers to this part. If both methods have been used, you must send the item to review under mark scheme $\begin{aligned} & (-) 4725 \div 0.0300 \\ & =-157.5\left(\mathrm{~kJ} \mathrm{~mol}^{-1}\right) /-157500 \mathrm{~J} \mathrm{~mol}^{-\mathbf{1}} \end{aligned}$ <br> OR $(-) 4725 \div 0.0500$ $=/-94.5\left(\mathrm{~kJ} \mathrm{~mol}^{-1}\right) /-94500 \mathbf{J ~ m o l}^{-1}$ <br> ALLOW <br> TE answer (d)(i) $\div 0.0300 / 0.0500$ <br> Ignore SF except one <br> Value <br> Sign <br> The mark for the negative sign is awarded for their calculation even if value is wrong, providing any energy divided by moles or energy multiplied by 1 / number of moles |  | 2 |

| Question Number | Correct Answer | Reject | Mark |
| :---: | :---: | :---: | :---: |
| 9 (d)(iii) | There are two correct answers: |  | 3 |
|  | Using 0.03 gives the answer of -381.75 kJ $\mathrm{mol}^{-1}$ |  |  |
|  | Using 0.05 gives the answer of -350.25 kJ $\mathrm{mol}^{-1}$ |  |  |
|  | Both these answers score full marks with or without correct working. |  |  |
|  | First mark |  |  |
|  | Appreciation of Hess's Law either in words, numbers, symbols or on the diagram |  |  |
|  | For example, |  |  |
|  | $\Delta \mathrm{H}_{\text {solution }}+$ Lattice energy |  |  |
|  | $\begin{equation*} =\Delta \mathrm{H}_{\text {hydration }} \mathrm{Mg}^{2+}+(2) \Delta \mathrm{H}_{\text {hydration }} \mathrm{Cl}^{-} \tag{1} \end{equation*}$ |  |  |
|  | Second mark |  |  |
|  | $2 \Delta \mathrm{H}_{\text {hydration }} \mathrm{Cl}^{-}=-2526-157.5-$ |  |  |
|  | $(-1920)=-763.5$ |  |  |
|  | OR |  |  |
|  | $2 \Delta \mathrm{H}_{\text {hydration }} \mathrm{Cl}^{-}=-2526-94.5-$ |  |  |
|  | $(-1920)=-700.5$ |  |  |
|  | ALLOW |  |  |
|  | Any number or group of numbers minus (-1920) |  |  |
|  | Third mark |  |  |
|  | $\Delta \mathrm{H}_{\text {hydration }} \mathrm{Cl}^{-}=-381.75\left(\mathrm{~kJ} \mathrm{~mol}^{-1}\right)$ |  |  |
|  | OR |  |  |
|  | $\Delta \mathrm{H}_{\text {hydration }} \mathrm{Cl}^{-}=-350.25\left(\mathrm{~kJ} \mathrm{~mol}^{-1}\right)$ |  |  |
|  | Any number, wherever it has come from, |  |  |

|  | divided by two can score this mark, <br> provided that the sign is consistent. |  |  |
| :--- | :--- | :--- | :--- |
| Ignore SF except one | (1) |  |  |
| Use of lattice energy - 2326 gives  <br> $-281.75 /-250.25$ scores (2) |  |  |  |
| ALLOW |  |  |  |
| TE from (d)(ii) |  |  |  |

| Question Number | Correct Answer | Reject | Mark |
| :---: | :---: | :---: | :---: |
| 10(a)(i) | Sodium/potassium dichromate ((VI)) and (Dilute/concentrated) sulfuric acid <br> OR <br> correct formulae / $\mathrm{H}^{+}$and $\mathrm{Cr}_{2} \mathrm{O}_{7}{ }^{2-}$ <br> ALLOW <br> $\mathrm{H}^{+}$and $\mathrm{Cr}_{2} \mathrm{O}_{7}^{2-} /$ acidified dichromate((VI)) <br> Reflux/distil <br> Ignore 'heat', 'warm', and 'boil’ alone. <br> ALLOW <br> Just 'under reflux' <br> Just 'under distillation' <br> Second mark depends on mention of dichromate/ $\mathrm{Cr}_{2} \mathrm{O}_{7}{ }^{2-}$ in first part OR <br> $\mathrm{KMnO}_{4}$ and acid with heat | Hydrochloric acid | 2 |

| Question Number | Correct Answer | Reject | Mark |
| :---: | :---: | :---: | :---: |
| $\begin{align*} & 10 \\ & \text { (a) (ii) } \tag{1} \end{align*}$ | Carbonyl group - addition of 2,4-dinitrophenylhydrazine / 2,4-DNP(H) <br> / Brady's reagent <br> to give yellow/orange/red precipitate/ppt/ppte/solid/crystals <br> ALLOW <br> recognisable spelling e.g., percepitate <br> $\mathrm{CH}_{3} \mathrm{C}=\mathrm{O}$ reaction with iodine in alkali/ $\mathrm{NaOH} / \mathrm{KOH} / \mathrm{OH}^{-}$ <br> ALLOW Iodoform/tri-iodomethane/haloform <br> AND <br> reaction/test <br> to form (pale) yellow / cloudy precipitate/solid/crystals <br> Ignore references to smell <br> Ignore heat in either part <br> Note <br> - In both cases result mark depends on test being recognisably correct even if it did not score a mark <br> Examples: <br> DNP gives yellow ppt <br> Iodine test gives yellow ppt <br> - Tests for aldehydes with correct results, no marks | 2-DNP/4DNP <br> Just DNP <br> Brick red ppt | 4 |

| Question <br> Number | Correct Answer | Reject | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 0}$ <br> (b)(ii) | Forms a racemic mixture <br> Because bonds around C=O are <br> planar <br> OR | (1) <br> Butanone/molecule/it <br> is planar <br> C=O is planar <br> Carbonyl group/reaction site is <br> (trigonal) planar | Carbonyl bond is <br> planar <br> OR |
| Bonds around carbonyl carbon are <br> planar | Intermediate is <br> planar |  |  |
| Cyanide can attack from either side / <br> above or below | (1) |  |  |

| Question <br> Number | Correct Answer | Reject | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 0 ( \mathbf { c } ) ( \mathbf { i } )}$ | (Acid) hydrolysis <br> OR <br> Alkaline hydrolysis followed by <br> acidification | Hydration | $\mathbf{1}$ |

| Question <br> Number | Correct Answer | Reject | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 0}$ <br> (c)(ii) | The O-H absorptions for alcohol and carboxylic <br> acid overlap. | Just 'both <br> have OH <br> groups' | $\mathbf{1}$ |
|  | OR | OH absorption for an acid is very broad | Just 'two <br> OH <br> Oroups <br> OResent' |
|  | Quote data booklet values which must show some <br> overlap, to include 3300 to 3200. |  |  |
|  | ALLOW <br> OH absorptions similar/the same. |  |  |

| Question <br> Number | Correct Answer | Reject | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 0}$ <br> $\mathbf{( c ) ( i i i )}$ | (Chemical shift $\delta$ ) 2.0 $-4.0(\mathrm{ppm}) /$ any <br> value within this range <br> ALLOW <br> Correct number followed by $\delta$, <br> eg $3 \delta$ | $\mathbf{1}$ |  |

| Question <br> Number | Correct Answer | Reject | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 0}$ <br> $\mathbf{( c ) ( i v ) ~}$ | There is no hydrogen atom/proton on the <br> adjacent/neighbouring carbon atom |  | $\mathbf{1}$ |
|  | ALLOW <br> No adjacent/neighbouring <br> hydrogens/protons |  |  |

| Question Number | Correct Answer | Reject | Mark |
| :---: | :---: | :---: | :---: |
| 10 (d) |  |  | 2 |
|  | Ester linkage <br> Rest of molecule <br> ALLOW <br> Attached chains as structural formulae <br> I gnore n or other numbers outside bracket |  |  |

Total for Question 10 = 18 marks
$\left.\begin{array}{|l|l|l|l|}\hline \begin{array}{l}\text { Question } \\ \text { Number }\end{array} & \text { Correct Answer } & \text { Reject } & \text { Mark } \\ \hline \mathbf{1 1 ( a )} & \mathrm{S}_{2} \mathrm{O}_{8}{ }^{2-}+2 \mathrm{I}^{-} \rightarrow 2 \mathrm{SO}_{4}{ }^{2-}+\mathrm{I}_{2} & & \mathbf{1} \\ & \text { ALLOW multiples } \\ \text { Ignore state symbols even if incorrect }\end{array}\right)$
