## H032/02: Depth in chemistry

Advanced Subsidiary GCE

Mark Scheme for Autumn 2021

OCR (Oxford Cambridge and RSA) is a leading UK awarding body, providing a wide range of qualifications to meet the needs of candidates of all ages and abilities. OCR qualifications include AS/A Levels, Diplomas, GCSEs, Cambridge Nationals, Cambridge Technicals, Functional Skills, Key Skills, Entry Level qualifications, NVQs and vocational qualifications in areas such as IT, business, languages, teaching/training, administration and secretarial skills.

It is also responsible for developing new specifications to meet national requirements and the needs of students and teachers. OCR is a not-for-profit organisation; any surplus made is invested back into the establishment to help towards the development of qualifications and support, which keep pace with the changing needs of today's society.

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which marks were awarded by examiners. It does not indicate the details of the discussions which took place at an examiners' meeting before marking commenced.

All examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes should be read in conjunction with the published question papers and the report on the examination.
© OCR 2021

1. Annotations

| Annotation | Meaning |
| :--- | :--- |
| C | Correct response |
| A | Incorrect response |
| BOD | Omission mark |
| CON | Benefit of doubt given |
| RE | Contradiction |
| SF | Rounding error |
| ECF | Error in number of significant figures |
| L1 | Error carried forward |
| L2 | Level 1 |
| L3 | Level 2 |
| NBOD | Level 3 |
| SEEN | Benefit of doubt not given |
| I | Noted but no credit given |

2. Abbreviations, annotations and conventions used in the detailed Mark Scheme (to include abbreviations and subject-specific conventions).

| Annotation | Meaning |
| :---: | :--- |
|  | alternative and acceptable answers for the same marking point |
| $\checkmark$ | Separates marking points |
| DO NOT ALLOW | Answers which are not worthy of credit |
| IGNORE | Statements which are irrelevant |
| ALLOW | Words which are not essential to gain credit |
| ( ) | Underlined words must be present in answer to score a mark |
| ECF | Alternative wording carried forward |
| AW | Or reverse argument |
| ORA |  |

| Question |  |  | Answer | Marks | AO <br> element | Guidance |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | (a) | (i) | (Electrostatic) attraction between oppositely charged ions $\checkmark$ | 1 | A01.1 | IGNORE force <br> IGNORE references to transfer of electrons |
|  |  | (ii) | Dot and cross <br> $2 \times \mathrm{K}$ shown with either 8 or 0 electrons <br> AND <br> S shown with 8 electrons with 2 crosses and 6 dots (or vice versa) <br> Charges <br> Correct charges on $\mathrm{K}^{+}$AND $\mathrm{S}^{2-}$ ions $\checkmark$ | 2 | $\begin{gathered} \mathrm{AO} 2.5 \\ \times 2 \end{gathered}$ | ALLOW separate $\mathrm{K}^{+}$ions, i.e. <br> If 8 electrons are shown around K, 'extra electrons' around S must match symbol chosen for electrons around K, e.g. <br> Shell circles NOT needed IGNORE inner shell electrons |

| Question |  | Answer | Marks | AO element | Guidance |
| :---: | :---: | :---: | :---: | :---: | :---: |
| (b) |  | Bonded pairs <br> Electron pairs in covalent bonds shown correctly using dots and crosses in $\mathrm{SF}_{2}$ molecule <br> Lone pairs <br> Lone pairs correct on S and 2 F atoms $\checkmark$ | 2 | $\begin{gathered} \mathrm{AO} 2.5 \\ \times 2 \end{gathered}$ | Shell circles NOT needed IGNORE inner shells <br> ALLOW Non-bonding electrons shown as unpaired |
| (c) |  | $\mathrm{K}_{2} \mathrm{~S}$ : ionic bonds are strong <br> OR has a giant ionic lattice <br> $\mathrm{SF}_{2}$ : London forces/ dipole-dipole forces are weak $\checkmark$ between molecules $\checkmark$ | 3 | $\begin{gathered} \mathrm{AO} 1.1 \\ \times 2 \end{gathered}$ | ALLOW induced OR permanent dipole interactions <br> ALLOW intermolecular forces are weak for 2 marks for $\mathrm{SF}_{2}$ <br> IGNORE van der Waals forces, vdW |
| (d) | (i) | $\begin{aligned} & \text { Octahedral } \checkmark \\ & 90^{\circ} \checkmark \end{aligned}$ | 2 | $\begin{gathered} \mathrm{AO} 1.1 \\ \times 2 \end{gathered}$ |  |
|  | (ii) | $\mathrm{SF}_{6}$ has no overall dipole OR is non polar OR S-F bonds are strong OR $\mathrm{SF}_{6}$ has no lone pairs $\checkmark$ | 1 | AO2.1 |  |
|  |  | Total | 11 |  |  |

| Question |  | Answer | Marks | AO <br> element | Guidance |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 2 | (a) | A species with an unpaired electron $\checkmark$ | 1 | A01.1 | DO NOT ALLOW: <br> species with one electron |
|  | (b) | Homolytic (fission) $\checkmark$ | 1 | A01.1 |  |
|  | (c) |   | 2 | $\begin{gathered} \mathrm{AO} 2.5 \\ \times 2 \end{gathered}$ | ALLOW any combination of skeletal OR structural OR displayed formula as long as unambiguous |
|  | (d) | Structure of organic product <br> Complete balanced equation $\checkmark$ | 2 | $\begin{aligned} & \mathrm{AO} 2.5 \\ & \mathrm{AO} 2.6 \end{aligned}$ | ALLOW any combination of skeletal OR structural OR displayed formula as long as unambiguous, e.g. |
|  |  | Total | 6 |  |  |

| Question |  |  | Answer | Marks | AO element | Guidance |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 3 | (a) |  | From colourless to pink $\checkmark$ | 1 | AO2.3 |  |
|  | (b) | (i) | Titre: 18.50, 18.05, 18.20, $18.30 \checkmark$ All titres with 2 DP and ending with ' 0 ' OR ' 5 ' | 1 | AO2.4 | DO NOT ALLOW responses given to only 1 decimal place |
|  |  | (ii) | To estimate the titre $\checkmark$ | 1 | AO2.3 | ALLOW 'getting a rough idea of the titre' (or similar wording) |
|  |  | (iii) | $18.25 \mathrm{~cm}^{3} \checkmark$ | 1 | AO2.4 |  |
|  |  | (iv) | $\% \text { uncertainty }=\frac{0.1}{18.05} \times 100=0.55 \% \checkmark$ | 1 | AO2.4 | ALLOW ECF from incorrect subtraction in (b)(i) or incorrect mean <br> ALLOW calculation from other titre values |
|  | (c) |  | FIRST CHECK THE ANSWER ON ANSWER LINE If answer $=3$ AND $M=132(, 0) \ldots$ award 5 marks $\begin{aligned} & n(\mathrm{NaOH})=\frac{18.25 \times 0.240}{1000}=4.38 \times 10^{-3} \checkmark \\ & n\left(\text { acid } \text { in } 25 \mathrm{~cm}^{3}=\frac{4.38 \times 10^{-3}}{2}=2.19 \times 10^{-3}(\mathrm{~mol}) \checkmark\right. \\ & n(\text { (acid }) \text { in } 250 \mathrm{~cm}^{3}=2.19 \times 10^{-2}(\mathrm{~mol}) \checkmark \\ & M(\text { acid }) \\ & \quad=\frac{2.891}{2.19 \times 10^{-2}}=132(.0) \ldots \ldots\left(\mathrm{g} \mathrm{~mol}^{-1}\right)^{\checkmark} \\ & M\left(\mathrm{CH}_{2}\right)_{n} \\ & =132-90 \text { OR }(132.0 \ldots-90) \text { OR } 42 \\ & \begin{array}{l} (\text { seen anywhere }) \\ \text { AND } n=\frac{42}{14}=3 \checkmark \end{array} \quad \text { whole number required } \end{aligned}$ | 5 | AO2.8 $\times 4$ <br> AO3.2 | ALLOW ECF throughout <br> ALLOW ECF from (b)(iii) <br> Answers should be to at least 3 significant figures for first 4 marks. |

| (d) | The titre would be less $\checkmark$ <br> Glutaric acid would be less concentrated/more dilute $\checkmark$ | $\mathbf{2}$ | AO3.3 <br> $\times 2$ |  |  |
| :--- | :--- | :--- | :--- | :---: | :---: | :--- |
|  |  | Total | $\mathbf{1 2}$ |  |  |

| Question |  | Answer | Marks | AO element | Guidance |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 4 | $\underset{*}{\text { (a) }}$ | Please refer to the marking instructions on page 4 of this mark scheme for guidance on how to mark this question. <br> Level 3 (5-6 marks) <br> Calculates CORRECT enthalpy change with correct signs for $\Delta H_{2}$ for reaction 2 <br> AND <br> $\Delta H_{1}$ for reaction 1. <br> There is a well-developed line of reasoning which is clear and logically structured. The information presented is relevant and substantiated. <br> Level 2 (3-4 marks) <br> Calculates a value of $\Delta H_{2}$ for reaction 2 from the: <br> Energy change <br> AND <br> Amount in mol of $\mathrm{MgCO}_{3}$. <br> There is a line of reasoning presented with some structure. <br> The information presented is relevant and supported by some evidence. <br> Level 1 (1-2 marks) <br> Processes experimental data to obtain the <br> Energy change from $m c \Delta T$ <br> OR <br> Amount in moles of $\mathrm{MgCO}_{3}$ <br> There is an attempt at a logical structure with a line of reasoning. The information is in the most part relevant. <br> 0 marks <br> No response or no response worthy of credit. | 6 | $\begin{gathered} \hline \mathrm{AO} 3.1 \\ \times 4 \\ \\ \mathrm{AO} 3.2 \\ \times 2 \end{gathered}$ | Indicative scientific points may include: <br> 1. Processing experimental data <br> Energy change from $m c \Delta T$ <br> - Energy in J OR kJ <br> Using 103.01 g or 100.0 g <br> $=103.01 \times 4.18 \times 5.0$ <br> $=2152.909(\mathrm{~J})$ OR $2.153(\mathrm{~kJ})$ <br> 3SF or more (2.152909 unrounded) <br> OR $100.0 \times 4.18 \times 5.0$ $=2090(\mathrm{~J}) \text { OR } 2.09(\mathrm{~kJ})$ <br> Amount in mol of $\mathrm{MgCO}_{3}$ $n\left(\mathrm{MgCO}_{3}\right)=\frac{4.215}{84.3}=0.0500(\mathrm{~mol})$ <br> 2. $\pm$ value of $\Delta H_{2}$ for reaction 2 <br> From $m=103.01 \mathrm{~g}= \pm \frac{2.153}{0.0500}= \pm 43.06\left(\mathrm{~kJ} \mathrm{~mol}^{-1}\right)$ <br> (-43.05818 unrounded) $\text { From } m=100.0 \mathrm{~g} \quad= \pm \frac{2.19}{0.0500}= \pm 41.8\left(\mathrm{~kJ} \mathrm{~mol}^{-1}\right)$ <br> 3. CORRECT enthalpy changes for Reaction 1 and Reaction 2 with signs (using 103.01 g ONLY) Reaction $2=-43.06\left(\mathrm{~kJ} \mathrm{~mol}^{-1}\right)$ <br> 3SF or more with correct - sign <br> Reaction 1 $\Delta H_{1}=\Delta H_{2}-\Delta H_{3}$ $=-43.06-(-136.1)=+93.04\left(\mathrm{~kJ} \mathrm{~mol}^{-1}\right)$ <br> 3SF or more with correct - sign <br> ALLOW omission of trailing zeroes, e.g. 93 for 93.0 NOTE: If 100 g used, $\Delta H$ is incorrect and L3 cannot be attained |
|  |  | Total | 6 |  |  |

| Question |  | Answer | Marks | AO element | Guidance |
| :---: | :---: | :---: | :---: | :---: | :---: |
| (e) |  | Element A is silicon/Si <br> AND <br> A large increase between the $4^{\text {rd }}$ and $5^{\text {th }}$ IE <br> $5^{\text {th }}$ electron is removed from shell closer to the nucleus OR there are 4 electrons in the outer shell $\checkmark$ | 2 | AO3.1 <br> AO3. 2 | ALLOW an indication of a different shell (from removal of $5^{\text {th }}$ electron) |
|  |  | Total | 10 |  |  |

| Question | Answer | Marks | $\begin{array}{\|c\|} \hline \text { AO } \\ \text { element } \end{array}$ | Guidance |
| :---: | :---: | :---: | :---: | :---: |
| (iii) | Reactivity <br> Ba is more reactive (than Sr ) <br> Atomic radius <br> Ba has a greater atomic radius (than Sr ) <br> OR Ba has more shells <br> OR Ba has more shielding $\checkmark$ <br> Attraction <br> Nuclear attraction is less in Ba <br> OR (outer) electrons in Ba are less attracted (to nucleus) <br> OR Increased distance / shielding in Ba outweighs increased nuclear charge $\checkmark$ <br> Ionisation energy Ionisation energy of Ba is less OR easier to remove (outer) electrons in $\mathrm{Ba} \checkmark$ | 4 | $\begin{gathered} \text { AO1.1 } \\ \times 4 \end{gathered}$ | Comparison required throughout ORA throughout <br> For more shells, ALLOW higher energy level IGNORE more orbitals OR more sub-shells IGNORE 'different shell' or 'new shell' <br> ALLOW Ba has less nuclear pull' OR 'Ba electrons are less tightly held' <br> IGNORE less effective nuclear charge' IGNORE 'nuclear charge' for 'nuclear attraction' <br> ALLOW easier to oxidise Ba |
|  | Total | 13 |  |  |
