Mark Scheme for June 2014

OCR (Oxford Cambridge and RSA) is a leading UK awarding body, providing a wide range of qualifications to meet the needs of candidates of all ages and abilities. OCR qualifications include AS/A Levels, Diplomas, GCSEs, Cambridge Nationals, Cambridge Technicals, Functional Skills, Key Skills, Entry Level qualifications, NVQs and vocational qualifications in areas such as IT, business, languages, teaching/training, administration and secretarial skills.

It is also responsible for developing new specifications to meet national requirements and the needs of students and teachers. OCR is a not-for-profit organisation; any surplus made is invested back into the establishment to help towards the development of qualifications and support, which keep pace with the changing needs of today's society.

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which marks were awarded by examiners. It does not indicate the details of the discussions which took place at an examiners' meeting before marking commenced.

All examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes should be read in conjunction with the published question papers and the report on the examination.

OCR will not enter into any discussion or correspondence in connection with this mark scheme.

| Annotation |  |
| :---: | :--- |
| BP | Meaning |
| Blank Page - this annotation must be used on all blank pages within an answer booklet (structured or unstructured) |  |
| and on each page of an additional object where there is no candidate response. |  |

Abbreviations, annotations and conventions used in the detailed Mark Scheme (to include abbreviations and subject-specific conventions).

| Annotation | Meaning |
| :--- | :--- |
| DO NOT ALLOW | Answers which are not worthy of credit |
| IGNORE | Statements which are irrelevant |
| ALLOW | Answers that can be accepted |
| $($ ) | Uords which are not essential to gain credit |
| ECF | Error carried forward |
| AW | Alternative wording |
| ORA | Oreverse argument |

## Subject-specific Marking Instructions

The following questions should be annotated with ticks to show where marks have been awarded in the body of the text:
2(b), 3(a), 4(a), 4(b)(iii), 6(a)(i), 7(d), 8(a), 8(b)

## All questions where an ECF has been applied.

## Checking additional pages

All the Additional Pages in the examination script must be checked to see if any candidates include any answers.

- When you open question 1(a)(i) you will see a view of page 22 one of the Additional Pages.
- If the page is blank then, using the marking mode, annotate the page with an omission mark, ^
- Scroll down to page 24 and annotate with $a^{\wedge}$ if the page is blank.
- If pages 23 or 24 are not blank then use the paper clip icon to link the pages to the correct questions.
- You may need to contact your Team Leader if you do not know how to do this.

## Generic comments

## ORGANIC STRUCTURES

For a 'structure' or 'structural formula',

- ALLOW correct structural OR displayed OR skeletal formula OR mixture of the above (as long as unambiguous)

For an alkyl group shown within a structure,

- ALLOW bond drawn to C or H ,
e.g. ALLOW $\mathrm{CH}_{3}-, \mathrm{CH}_{2}-, \mathrm{C}_{3} \mathrm{H}_{7}-$, etc.
- ALLOW vertical 'bond' to any part of an alkyl group

For an OH group shown within a structure,

- DO NOT ALLOW formula with horizontal - HO OR OH -
- ALLOW vertical 'bond' to any part of the OH group

For a CHO group shown within a structure,

- DO NOT ALLOW COH

For a 3D structure,

| - For bond in the plane of paper, a solid line is expected: | $\searrow$ |
| :---: | :---: |
| - For bond out of plane of paper, a solid wedge is expected: | $\geqslant$ |
| - For bond into plane of paper, ALLOW: |  |
| - ALLOW a hollow wedge for 'in bond' OR an 'out bond', provided it is different from the other in or out wedge e.g.: |  |

## NAMES

Names including alkyl groups:

- ALLOW alkanyl, e.g. ethanyl (i.e. IGNORE 'an')
- DO NOT ALLOW alkol, e.g. ethol (ie 'an' is essential)

Names of esters:

- Two words are expected, e.g. ethyl ethanoate
- ALLOW one word, e.g. ethylethanoate

Names with multiple numbers and hyphens:
Use of ' $e$ '

- ALLOW superfluous 'e' , e.g. propane-1-ol ('e' is kept if followed by consonant)
- ALLOW absence of 'e', e.g. propan-1,2-diol ('e' is omitted if followed by vowel)

Hyphens separate name from numbers:

- ALLOW absence of hyphens, e.g. propane 1,2 diol

Multiple locant numbers must be clearly separated

- ALLOW full stops: e.g. 1.2 OR spaces: 12
- DO NOT ALLOW e.g. 12

Locant numbers in formula must be correct

- DO NOT ALLOW propan-3-ol

Order of substituents should be alphabetical:

- ALLOW any order (as long as unambiguous), e.g. 2-chloro-3-bromobutane

## ABBREVIATIONS

van der Waal's forces
ALLOW vdw forces OR VDW forces (and any combination of upper and lower cases)
