(b) Feasible when $\Delta \mathrm{G} \leq 0$ or $\Delta \mathrm{G}$ is negative (1)

Process 1 is more feasible as temperature is increased (1)
Because $\Delta \mathrm{S}$ is positive or $-\mathrm{T} \Delta \mathrm{S}$ is negative or $\mathrm{T} \Delta \mathrm{S}$ is positive (1)
Process 2 is less feasible as temperature is increased (1)
Because $\Delta \mathrm{S}$ is negative or $-\mathrm{T} \Delta \mathrm{S}$ is positive or $\mathrm{T} \Delta \mathrm{S}$ is negative (1) 5
