UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS

International General Certificate of Secondary Education

MARK SCHEME for the October/November 2010 question paper for the guidance of teachers

0620 CHEMISTRY

0620/22

Paper 2 (Core Theory), maximum raw mark 80

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

• CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the October/November 2010 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

Page 2	Mark Scheme: Teachers' version	Syllabus	Paper
	IGCSE – October/November 2010	0620	22

1	(a)	ma	gnesium oxide / MgO	[1]
	(b)	ALI sulf	ogen dioxide / NO ₂ ; LOW nitrogen oxide fur dioxide / SO ₂ LOW sulfur oxide	[1] [1]
	(c)		bon dioxide / CO ₂ ; ter / H ₂ O	[1] [1]
	(d)	wat	ter / H ₂ O	[1]
	(e)	car	bon dioxide / CO ₂	[1]
				[Total: 7]
2	(a)	(i)	substance containing two (or more) different atoms / elements joined / obonded	combined /
			BOTH idea of different atoms / elements and bonded needed for 1 mark	[1]
		(ii)	(compound) B; it is an ionic giant structure / it is ionic ALLOW it contains ions	[1] [1]
	1	(iii)	C	[1]
	(b)	(i)	1st box ticked (conducts when molten)	[1]
		(ii)	add (aqueous) silver nitrate; (light) yellow precipitate (BOTH yellow and precipitate required) 2nd mark dependent on correct reagent NOT cream precipitate ALLOW lead nitrate (1) yellow precipitate (1)	[1] [1]
	(c)	it is	an oxide of a non-metal / iodine is a non-metal	[1]
				[Total: 8]

Page 3	Mark Scheme: Teachers' version	Syllabus	Paper
	IGCSE – October/November 2010	0620	22

(a) (i)	allow between 720 and 820°C (actual = 760°C)	[1]
(ii)	caesium; rubidium apply listing rules for more than 2 elements	[1] [1]
(iii)	increases (down the group)	[1]
	it; elting; reases	[1] [1] [1]
–1 ALI IGN NC	dium + water → sodium hydroxide + hydrogen per omission or error LOW = instead of → NORE: reference to states OT: plus instead of + OT: + energy	[2]
(d) (i)	2 on left; 2 on right –1 per omission / error	[2]
(ii)	has two atoms (in its molecule) NOT reference to elements / two atoms the same / a compound of two atoms	[1]
(iii)	arrangement: random / not ordered / disordered ALLOW: far apart together; motion: random / (moving) fast / rapid / everywhere / move with ease / freely IGNORE: loosely packed	[1] [1]
(iv)	pair of bonding electrons; 8 electrons in outer shell of each chlorine separate atoms = 0 IGNORE: inner electrons	[1] [1]

[Total: 16]

Page 4	Mark Scheme: Teachers' version	Syllabus	Paper
	IGCSE – October/November 2010	0620	22

(a) (i)	covalent	[1]
	(ii)	C	[1]
	(iii)	В	[1]
	(iv)	ethanol	[1]
	(v)	bromine water ALLOW: bromine / potassium permanganate; turns colourless IGNORE: colour of bromine	[1] [1]
(b) (i)	any two of: same functional group / same general formula / similar chemical properties / gradual change in physical properties ALLOW: (successive members) differ by a CH ₂ group	[2]
	(ii)	correct formula (molecular or displayed) for any alkane apart from ethane correct name corresponding to the formula	[1] [1]
(c) (i)	X placed inside the column at the top	[1]
	(ii)	B placed by bottom arrow	[1]
			[Total: 12]

Page 5	Mark Scheme: Teachers' version	Syllabus	Paper
	IGCSE – October/November 2010	0620	22

(a) (i)	decreases / gets smaller NOT disappears / increases in surface area	[1]
(ii)	increases	[1]
(b) (i)	points plotted correctly including 0,0 (–1 per incorrect or no point plotted) curve of best fit drawn (max 1 mark if graph plotted wrong way round)	[2] [1]
(ii)	44 cm ³ ALLOW: 44 / correct reading from incorrect curve in part (i) NOT: incorrect units	[1]
(iii)	all the zinc had been used up / one of the reagents used up ALLOW: the reaction has finished NOT: sulfuric acid used up	[1]
(iv)	lighted splint; (gas) pops / explodes / blows out flame IGNORE: pop test	[1] [1]
(c) (i)	goes fast <u>er</u> / more hydrogen given off <u>per minute</u> / more gas given off per unit time time for same amount of gas	e / less [1]
(ii)	goes slow <u>er</u> / less hydrogen given off <u>per minute</u> / less gas given off per unit time time for same amount of gas	/ more [1]
` '	ostance which speeds up a reaction LOW: changes the rate of reaction	[1]

[Total: 12]

Page 6	Mark Scheme: Teachers' version	Syllabus	Paper
	IGCSE – October/November 2010	0620	22

6 (a) Any three of:

high boiling point or high melting point /

high density /

form coloured compounds or have coloured ions

form ions of more than one charge or variable valency /

form complex ions /

ALLOW: (very) hard / hardness / (good) catalysts

[3]

(b) (i) different number of neutrons / different nucleon number

[1]

[1]

(iii) 26

(ii) 57

[1]

(c) (i) water / damp / humidity;

[1]

IGNORE: a little or similar when referring to damp / water air / oxygen

[1]

(ii) suitable method e.g. coating with zinc / coating with unreactive metal / plastic /

oil (or grease) / galvanising / sacrificial protection

[1]

NOT: removing air / water suitable reason e.g. stops air / water reaching surface (reason must be consequential to the method chosen)

[1]

(d) iron oxide; [1]

it loses oxygen / gains electrons / <u>iron</u> decreases oxidation number

IGNORE: wrong oxidation numbers NOT addition of hydrogen

[1]

(e) (i) by (incomplete) combustion of hydrocarbons / carbon compounds [1] ALLOW: (incomplete) combustion of fossil fuels / named carbon containing fuel / carbon (or hydrocarbons etc) react with air (or oxygen)

NOT: reacts with air unqualified (must refer to a carbon compound / fossil fuel)

(ii) poisonous / toxic / kills you / suffocates you / stops red blood cells carrying oxygen [1] ALLOW: binds with haemoglobin in place of oxygen

NOT: harmful

[Total: 14]

Page 7	Mark Scheme: Teachers' version	Syllabus	Paper
	IGCSE – October/November 2010	0620	22

(a) (i) (boric acid) had dissolved [1] ALLOW acid had diffused / an acid is formed here IGNORE: boric acid is acidic / neutralisation / it is an acid (ii) pH 8 [1] (iii) random movement of particles / mixing up of particles [1] ALLOW: bulk / overall movement of particles from high to low concentration IGNORE: particles move from high to low concentration (iv) idea of neutralisation (of acid by alkali) [1] IGNORE: returned to neutral (b) (i) CON_2H_4 [1] ALLOW: any order of atoms / (NH₂)₂CO (ii) 60 [1] (c) (i) nitrogen [1] **IGNORE**: nitrates (ii) to increase crop / plant growth / speeds up plant growth; [1] to put back nitrogen (or nutrients) into the soil / to provide plants with (more) nutrients ALLOW: to supply plants with nitrogen / essential elements [1] IGNORE: makes the soil more fertile / to supply nitrogen gas / N₂ (d) Any two of: evaporate some of the water / heat to crystallisation point / heat a little / partially evaporate; NOT heat or evaporate without qualification allow to crystallise / leave in a warm place / leave on the window sill; IGNORE: cool it dry with filter paper [2]

[Total: 11]

NOT: dry in oven unless it implies that the temperature is below 100 °C / very low
