## MARK SCHEME for the October/November 2013 series

## 0620 CHEMISTRY

0620/21

Paper 2 (Core Theory), maximum raw mark 80

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the October/November 2013 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

Pa	age 2	2	Mark Scheme	Syllabus	Paper
	J		IGCSE – October/November 2013	0620	21
1 (a)	(i)	nitro	gen		[1]
	(ii)	sulfu	ır		[1]
	(iii)	iodir	ne		[1]
	(iv)	heliu	ım		[1]
	(v)	nick	el		[1]
	(vi)	iodir	ne		[1]
(b)			ce containing only 1 type of atom / substance which ical means	cannot be broken	down further [1]
(c)	Any	y 3 of:			[3]
	shii duc ma <b>AL</b>	ny / lu ctile / d lleable <b>LOW</b> :	s electricity / conducts heat / conducts istrous can be drawn into wires e / can be shaped : high boiling point / high melting point / solid at rooi : rings when hit / sonorous	m temperature	[Total: 10]
2 (a)	(i)		of bonding electrons ectrons around chlorine and no additional electrons	around hydrogen	[1] [1]
	(ii)	ALL	alent because has shared (pair of) electrons . <b>OW</b> : low melting point / low boiling point / it is a gas non-metals	s / doesn't conduct	[1] electricity /
(b)	) pH	2			[1]
(c)	(i)	carb wate	ium chloride on dioxide er FE: do not allow formulae		[1] [1] [1]
	(ii)	2 calci	ium chloride		[1] [1]

PMT

		IGCSE – October/November 2013	0620	21
(d) (	i) value	es from 215 to 245 (s)		[
(i	i <b>)</b> 22 (d	cm <sup>3</sup> )		[
(ii	i) Any	2 of:		[
		perature / mass of magnesium / particle size nesium	of magnesium / s	surface area
				[Total: 1
• •		ach correct answer hydrogen		[
h p s		i (if carbon given for first marking point) / carbon	i (if hydrogen given	for first markir
(b) (	(i)			
F	H    -C-	Н   С – О – Н 		[
	н н 			
F	1 – Ċ –   Η ∣	Ċ – OH (for 1 mark)   H		
(i	i) carb wate	on dioxide r		[ [

## (c) (i) COOH ringed [1] (ii) 7 [1] (iii) foodstuffs / drinks / cosmetics / water [1] IGNORE: generalised answers e.g. kitchen / cleaning [1] [Total: 11] [Total: 11]

Pa	age 5	5	Mark Scheme	Syllabus	Paper
			IGCSE – October/November 2013	0620	21
(e)	(e) protection from corrosion / make it less reactive / make it unreactive better appearance / more shiny				
(f)	(i) 6H <sub>2</sub> O				[1]
	(ii)	reac	rsible reaction / equilibrium reaction / reaction goes tion goes backwards as well (as forwards) <b>ORE</b> : reaction goes backwards / it is the reverse rea	-	[1]
	(iii)	add	water (to white nickel(II) chloride) / hydrate (white n	ickel(II) chloride)	[1]
					[Total: 12]
6 (a)	Any	y 4 of:			[4]
	in steam, molecules are far apart in water, molecules are close together in steam, molecules are moving very fast in water, molecules are moving slowly / sliding over each other in steam more randomness in arrangement of molecules <b>NOTE</b> : molecules are further apart in steam (than in water) = 2 marks <b>NOTE</b> : molecules move faster in steam (than in water) = 2 marks <b>NOTE</b> : molecules move faster in steam (than in water) = 2 marks <b>NOTE</b> : for molecules the word particles can be used <b>NOT</b> : implication of particles 'apart' in liquids				
(b)	(i)		stance which dissolves another / it dissolves a solu te / it dissolves something;	ite / substance wh	ich dissolves a [1]
	(ii)	etha IGN	nol ORE: alcohol		[1]
(c)	enc	dother	mic		[1]
(d)	1 <sup>st</sup>	box tio	cked /aqueous ammonium chloride		[1]
(e)	(i)		l on right left (mark dependent on LiOH being correct)		[1] [1]
	(ii)	20 g			[1]
	. /	5			[Total: 11]
7 (a)	(i)	copp	ber		[1]
	(ii)	••••	per is) better electrical conductor / iron is worse cor <b>ORE</b> : copper is a good conductor	nductor	[1]

Page 6	Mark Scheme	Syllabus	Paper
	IGCSE – October/November 2013	0620	21
(iii) does	s not conduct (electricity)		[
(iv) lead			[
	nger / has more strength DRE: tougher / harder / less malleable		[
(vi) lead			[
(b) (i) zinc			[
	:) hydroxide <b>OW</b> : error carried forward from wrong metal in pa	art (b)(i)	[
(c) C,B,D,A			I
(d) CuCl <sub>2</sub> ALLOW	Cl <sub>2</sub> Cu		[
negative	electrode: chlorine electrode: copper 1 mark for chlorine and copper reversed		[
(f) chlorine	/ Cl <sub>2</sub>		[
			[Total: 1
