## GCSE Chemistry $5 \mathrm{CH} 2 \mathrm{H} / 01$

## Edexcel and BTEC Qualifications

Edexcel and BTEC qualifications come from Pearson, the world's leading learning company. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications websites at www.edexcel.com or www.btec.co.uk for our BTEC qualifications.
Alternatively, you can get in touch with us using the details on our contact us page at www.edexcel.com/contactus.

If you have any subject specific questions about this specification that require the help of a subject specialist, you can speak directly to the subject team at Pearson. Their contact details can be found on this link: www.edexcel.com/teachingservices.

You can also use our online Ask the Expert service at www.edexcel.com/ask. You will need an Edexcel username and password to access this service.

## Pearson: helping people progress, everywhere

Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at: www.pearson.com/uk

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 ( a )}$ | C |  | (1) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 ( b )}$ | $\mathrm{CuCl}_{2}$ | ensure that 2 is subscript at most <br> half the size of Cl and cases are <br> correct <br> ignore correct charges <br> reject an overall charge | (1) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 ( c )}$ | D |  | $\mathbf{( 1 )}$ |

| Question Number | Answer | Acceptable answers | Mark |
| :---: | :---: | :---: | :---: |
| 1(d) | A description including the following <br> - put/mix/react (sodium) carbonate and acid in (conical) flask (1) <br> - put limewater in test tube(1) <br> - (carbon dioxide produced) turns lime water \{milky/cloudy/white precipitate (1) | 2 max if reactants and limewater are in the wrong vessels with the correct test <br> marks can be awarded for the first two marking points by labelling the diagram <br> "reactants" for sodium carbonate and acid | (3) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 ( e )}$ | A description including three of <br> the following | max 2 marks if clear error in <br> process, e.g. heat/add <br> acid/evaporate | (3) |
|  | - make \{solutions/dissolve\}/ <br> \{mix/react\} solutions (1) | carbonate) (1) | - filter (1) <br> - wash (with water) (1) |
| - leave to dry/dry in <br> oven/dry between filter <br> paper (1) | precipitate forms a solid for |  |  |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| 2(a)(i) | Independent marking points <br> a curve/line starting at the <br> origin showing a lower <br> gradient than the $50^{\circ}$ curve <br> (1) <br> levels out at the same <br> volume as the $50^{\circ}$ curve (1) |  | (2) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{2 ( a ) ( i i )}$ | An explanation linking the following | reject particle size is smaller | (2) |
|  | (zinc powder) has a larger <br> surface area (1) | more particles in contact |  |
| (frequent) collisions(between the particles) (1) | more successful collisions <br> reject increase in energy for <br> $2^{\text {nd }}$ marking point |  |  |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{2 ( a ) ( i i i )}$ | 2 |  | (1) |

| Question Number | Answer | Acceptable answers | Mark |
| :---: | :---: | :---: | :---: |
| 2(a)(iv) | An explanation linking the following <br> - breaking bonds requires/needs \{heat/energy\} / breaking bonds is an endothermic process (1) <br> - forming bonds produces/releases \{heat/energy $/$ forming bonds is an exothermic process (1) <br> - more $\{$ heat/energy $\}$ is given out than is taken in (1) |  | (3) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| 2(b) | makes the reaction go <br> faster/increases speed/increase <br> rate | lower activation energy | (1) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{3 ( a ) ( i )}$ | B |  | (1) |

| Question Number | Answer | Acceptable answers | Mark |
| :---: | :---: | :---: | :---: |
| 3(b)(i) | - electrons \{shared / between\} atoms (1) <br> - \{2 pairs of/four\} electrons \{shared / between\} two atoms (1) <br> - 4 additional electrons on both oxygen atoms (1) | ignore any inner electrons shown <br> $3^{\text {rd }}$ Mark is dependent on $2^{\text {nd }}$ | (3) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{3 ( b ) ( i i )}$ | An explanation linking the <br> following <br> second marking point is <br> dependent on the first <br> - forces (between the <br> molecules) are weak (1) | (2) <br> intermolecular forces/bonds <br> between molecules <br> reject intramolecular <br> force/covalent bond/ionic bond | therefore little \{heat/energy \} <br> needed to separate <br> molecules/break these forces <br> (1) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| 3(c) | A description including three <br> from | ignore references to cooling air <br> etc. | (3) |
|  | - (liquid air enters) |  |  |
| (fractionating) column (1) |  |  |  |
| (1)(gaid air) warms/heats/boils <br> boiling point\} from top of <br> column (1) | (liquid) \{oxygen/higher <br> boiling point\} from bottom of <br> column (1) | can be separated because they <br> have different boiling points (1) <br> alternative to last two marking <br> points |  |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{4 ( a ) ( i )}$ | $12+16+16(=44)$ | 44 with no working | (1) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{4 ( a ) ( i i )}$ | $40+12+(3 \times 16) /\left(\mathrm{CaCO}_{3}\right) 100(1)$ <br> gives $40+16 /(\mathrm{CaO}) 56(1)$ | (3) |  |
|  | 25 (tonnes) gives $56 \times \underline{25}$ (tonnes) <br> $(1)$ <br> 100 | allow ecf <br> 14 (tonnes) <br> correct answer no working (3) |  |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{4 ( b ( i )}$ | theoretical yield is calculated <br> yield/ value calculated from <br> balanced equation/maximum <br> yield possible/maximum amount <br> of product when reactants have <br> fully reacted. |  | (1) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| 4(b)(ii) | An explanation linking two of the <br> following <br> - reaction may be <br> incomplete | (2) |  |
| • product/reactant lost |  |  |  |
| - other (side-)reactions may |  |  |  |
| occur |  |  |  |$\quad$ unwanted reactions | impure reactants |
| :--- |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| 4(c) | A suggestion including two of the <br> following <br> - save money/improve <br> profit/disposal of waste <br> costs money (1) | any specific examples | (2) |
| -waste product may be <br> harmful to the <br> environment/cause <br> pollution/damage the <br> environment (1) | ignore references to landfill |  |  |

(Total for question $=9$ marks)

| Question <br> Number | Answer |  | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{5 ( a )}$ | D | (1) |  |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{5 ( b )}$ | An explanation linking two of the <br> following <br> - reaction produces <br> heat/exothermic (1) | (2) |  |
| - (sodium) has low melting <br> point (1) | (sodium) has low <br> density/density less than <br> water (1) | ignore sodium floats on water |  |

| Question <br> Number | Answer | Mark |  |
| :--- | :--- | :--- | :--- |
| $\mathbf{5 ( c )}$ | $2 \mathrm{Na}+2 \mathrm{H}_{2} \mathrm{O} \rightarrow 2 \mathrm{NaOH}+\mathrm{H}_{2}$ | ensure that 2 is subscript at most <br> half the size of H and cases are <br> correct | (3) |
|  | LHS formulae (1) <br> RHS formulae (1) <br> balancing correct formulae (1) |  |  |

| Question |
| :--- | :--- | :--- | :--- |
| Number |$\quad$| Indicative content |
| :--- |
| QWC |
| *5(d) |
|  |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{6 ( a ) ( i )}$ | 2.3 |  | $\mathbf{( 1 )}$ |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{6 ( a ) ( i i )}$ | A |  | (1) |

| Question Number |  | Indicative content | Mark |
| :---: | :---: | :---: | :---: |
| QWC | *6(b) | An explanation linking some of the following <br> Structure of boron-11 <br> boron-11 atom has <br> - 5 /same number of protons <br> - 5 /same number of electrons <br> - 6 neutrons / one more neutron than boron 10 <br> Working out RAM <br> relative atomic mass is 10.8 because <br> - weighted mean <br> - more boron-11 than boron-10 <br> - boron-11 atoms are heavier <br> - (therefore) relative atomic mass nearer 11 than 10 <br> OR <br> - in sample given $20 / 100$ of the atoms have a mass of 10 <br> - in sample given $80 / 100$ of the atoms have a mass of 11 <br> - $20 / 100 * 10=2$ <br> - $80 / 100 * 11=8.8$ <br> - $2+8.8=10.8$ <br> NB the diagram in part (a) gives the structure for boron-10 so do not give credit for this (even if claimed to be structure of boron-11 by referring to it as 'it') | (6) |
| Level | 0 | No rewardable content |  |
| 1 | 1-2 | - a limited description e.g. boron- 11 has 5 protons and neutrons <br> - the answer communicates ideas using simple languag uses limited scientific terminology <br> - spelling, puncuation and grammar are used with limited accuracy | nd |
| 2 | 3-4 | - a simple explanation e.g. boron-11 has 5 protons, 5 electrons and 6 neutrons and is heavier than boron-1 <br> - the answer communicates ideas showing some eviden clarity and organisation and uses scientific terminolog appropriately <br> - spelling, punctuation and grammar are used with som accuracy |  |
| 3 | 5-6 | - a detailed explanation e.g. boron-11 has 5 protons, 5 electrons and 6 neutrons, is heavier than boron-10 and is more of boron-11 therefore relative atomic mass ne 11 than 10. <br> - the answer communicates ideas clearly and coherently range of scientific terminology accurately <br> - spelling, puncuation and grammar are used with few | d there arer to uses a rors |

| $\begin{aligned} & \hline \text { Questio } \\ & \mathrm{n} \\ & \text { Number } \end{aligned}$ | Answer | Acceptable answers | Mark |
| :---: | :---: | :---: | :---: |
| 6(c) | Answer should include one idea from each list <br> similarities both put <br> - elements into groups / periods (1) <br> - elements with similar properties in same group (1) <br> - metals and non-metals in separately (1) <br> differences <br> Mendeleev's table <br> - was arranged by relative atomic mass(1) <br> - had gaps (1) <br> - had fewer elements (1) <br> - did not include the noble gases (1) | reverse argument for modern periodic table <br> specific examples e.g germanium | (2) |
