Mark Scheme (Results)
November 2012

## GCSE Chemistry $5 \mathrm{CH} 2 \mathrm{H} / 01$

## Edexcel and BTEC Qualifications

Edexcel and BTEC qualifications come from Pearson, the world's leading learning company. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications websites at www.edexcel.com or www.btec.co.uk for our BTEC qualifications.
Alternatively, you can get in touch with us using the details on our contact us page at www.edexcel.com/contactus.

If you have any subject specific questions about this specification that require the help of a subject specialist, you can speak directly to the subject team at Pearson.
Their contact details can be found on this link: www.edexcel.com/teachingservices.

You can also use our online Ask the Expert service at www.edexcel.com/ask. You will need an Edexcel username and password to access this service.

## Pearson: helping people progress, everywhere

Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at: www.pearson.com/uk

GCSE Chemistry 5CH2H/ 01 Mark Scheme - November 2012

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 ( a )}$ | C : copper sulfate and sodium <br> chloride |  | (1) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 ( b )}$ | copper sulfate (1) blue-green (1) | allow blue or green or green-blue | (2) |
|  | or <br> sodium chloride (1) yellow (1) <br> colour mark consequential on <br> correct metal (compound) | reject orange and yellow-orange |  |

| Question Number | Answer | Acceptable answers | Mark |
| :---: | :---: | :---: | :---: |
| 1(c)(i) | ```An explanation linking weak intermolecular forces /weak forces between molecules (1) little {heat / energy} needed to separate (molecules) (1)``` | bonds / attractions in place of forces <br> intermolecular forces between \{atoms / bonds\} loses $1^{\text {st }}$ marking point <br> any answer in terms of covalent or ionic bonding scores zero | (2) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 ( c ) ( \text { ii) }}$ | A description linking | use separating funnel (1) | alternative description of <br> separating funnel eg funnel with <br> a tap at the bottom <br> suitable labelled diagram <br> burette |
|  | run off lower \{layer / liquid\} / <br> OWTTE (1) | allow layers / liquids to separate <br> ignore fractional distillation |  |

$\left.\begin{array}{|l|l|l|l|}\hline \begin{array}{l}\text { Question } \\ \text { Number }\end{array} & \text { Answer } & \text { Acceptable answers } & \text { Mark } \\ \hline \mathbf{1 ( d )} & & \begin{array}{l}\text { Allow a diagram without labels } \\ \text { for 2 marks }\end{array} & \text { (2) } \\ & \begin{array}{l}\text { shared pair in molecule (1) } \\ \text { rest of molecule consequent on } \\ \text { first mark (1) }\end{array} & \begin{array}{l}\text { any symbols shown must be } \\ \text { correct for the 2 }\end{array} \\ \text { allow mark } \\ \text { and crosses for electrons } \\ \text { wrong compound = zero marks }\end{array}\right]$

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{2 ( a ) ( i )}$ | soft / low melting point / low <br> boiling point | easily cut with a knife $=$ soft <br> low density <br> malleable <br> solid at room temp. <br> ignore float on water <br> reject chemical properties | (1) |

| Question Number | Answer | Acceptable answers | Mark |
| :---: | :---: | :---: | :---: |
| 2(a)(ii) | An explanation linking <br> (all have) one electron in outer shell (2) | one outer electron = 2 marks <br> group number shows number of electrons in outer shell $=2$ marks <br> same number of electrons in outer shell = 1 mark <br> incorrect number of electrons in the outer shell = 1 mark <br> accept outer orbit / highest energy level in place of outer shell | (2) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{2 ( b ) ( i )}$ | A description including any two of |  |  |
| effervescence / fizzing / bubbles |  |  |  |
| (1) |  |  |  |
| potassium floats (1) |  |  |  |
| moves (on surface) (1) |  |  |  |
| potassium forms ball / melts (1) |  |  |  |
| potassium decreases in size / |  |  |  |
| disappears / dissolves (1) |  |  |  |
| (lilac) flame / catches fire (1) |  |  |  |
| spits / explodes / sparks (1) |  |  |  |$\quad$ ignore ignites | ignore smoke |
| :--- |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{2 ( b ) ( i i )}$ | D: $2 \mathrm{~K}+2 \mathrm{H}_{2} \mathrm{O} \rightarrow 2 \mathrm{KOH}+\mathrm{H}_{2}$ |  | (1) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| 2(c) | An explanation linking any two of <br> increasing \{size /radius (of atom) <br> l number of shells\} (1) <br> increased shielding (of outer <br> electron) (1) <br> less attraction for (outer) <br> electron <br> (1) | easier to remove (outer) electron | (2) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{3 ( a ) ( i )}$ | A, B and C | Mg Ca Au (any order) <br> magnesium calcium gold (any <br> order) | (1) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{3 ( a ) ( i i )}$ | A and B | Mg Ca (any order) <br> magnesium calcium (any order) | (1) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{3 ( b )}$ | 8 (protons) |  | (1) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{3 ( c ) ( i )}$ | A: 10 |  | (1) |

| Question Number | Answer | Acceptable answers | Mark |
| :---: | :---: | :---: | :---: |
| 3(c)(ii) | $\begin{aligned} & \text { (in } 100 \text { atoms) } \\ & \quad \text { mass of mass number } 20 \\ & \text { atoms }=20 \times 90(1) \\ & \text { mass of mass number } 22 \\ & \text { atoms }=22 \times 10(1) \\ & \text { relative atomic mass } \\ & =\{(22 \times 10)+(20 \times 90)\} / 100 \\ & (=20.2)(1) \\ & \text { OR } \\ & \quad 20 \text { contributes }=90 / 100 \\ & \times 20(1) \quad 22 \text { contributes }=10 / 100 \\ & \times 22(1) \quad \text { relative atomic mass } \\ & 90 / 100 \times 20+10 / 100 \times 22(= \\ & 20.2)(1) \end{aligned}$ | $20.2=3$ marks <br> $21.8=2$ marks (only 1 error made) | (3) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{3 ( d )}$ | An explanation linking any two of <br> (the element is) group 0 / noble <br> gas /unreactive / inert / does not <br> react (1) <br> \{(has) 8 electrons / full\} <br> outer shell (1) <br> prevents filament from reacting <br> $(1)$ | ignore 'not very reactive' <br> does not \{gain / lose / share\} <br> electrons | (2) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| 4(a) | to allow air/oxygen in | to ensure magnesium <br> reacts/burns/ combusts | (1) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{4 ( b ) ( i )}$ | all points correctly plotted to half <br> a small square (2) <br> line of best fit (1) | Allow one mark for four or five <br> correctly plotted points <br> ecf their points | (3) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| 4(b)(ii) | Any one from | (1) |  |
|  | not all magnesium \{burned / <br> reacted\} / some left / incomplete <br> reaction <br> not enough air/oxygen <br> some magnesium oxide / smoke <br> lost | lid not lifted / not enough times <br> lid left off too long (so loses <br> MgO) |  |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{4 ( c )}$ | $2 \mathrm{Mg}+\mathrm{O}_{2} \rightarrow 2 \mathrm{MgO}$ <br> left hand formulae (1) <br> right hand formula (1) <br> balancing correct formulae (1) | correct multiples | (3) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| 4(d) | $0.414 / 207$ or $0.064 / 16(1)$ <br> $0.002: 0.004$ or $1: 2(1)$ <br> empirical formula $\mathrm{PbO}_{2}(1)$ | if $207 / 0.414$ and $16 / 0.064$ <br> ratio $500: 250$ or $2: 1(1)$ <br> empirical formula $\mathrm{Pb}_{2} \mathrm{O}(1)$ | (3) |
|  |  | allow 3 marks for <br> $0.414 / 207$ or $0.064 / 32$ <br> ratio $1: 1$ <br> empirical formula $\mathrm{PbO}_{2}$ |  |
|  |  | allow 2 marks for <br> if $0.414 / 207$ and $0.064 / 32$ <br> ratio $1: 1$ <br> empirical formula PbO |  |
|  |  |  |  |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :---: | :---: | :---: | :---: |
| 5(a) | An explanation linking two of the following <br> temperature decreases (1) \{heat / energy\} taken in <br> (1) (so process) endothermic | ignore references to bond breaking / making <br> heat given out $/$ exothermic $=1$ max. | (2) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{5 ( b )}$ | Shown correctly on diagram: | (2) |  |
|  | horizontal line to right of reactant <br> (1) <br> product line below reactant line <br> $(1)$ | ignore any connecting lines <br> product label not needed |  |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{5 ( c )}$ | D: heat energy is required heat <br> energy is released | (1) |  |

| Question Number |  | Indicative Content | Mark |
| :---: | :---: | :---: | :---: |
| QWC | *5(d) | An explanation including some of the following points <br> smaller pieces of solid <br> of same mass <br> larger surface area <br> more frequent collisions <br> higher rate of reaction <br> higher temperature <br> particles move faster <br> more frequent collisions <br> particles have more energy <br> more collisions have required energy to react / activation <br> energy <br> more collisions successful <br> higher rate of reaction <br> ORA | (6) |
| Leve I | 0 | No rewardable content |  |
| 1 | 1-2 | a limited explanation of one factors e.g. at higher temper higher rate <br> e.g. when particles smaller size higher rate <br> the answer communicates ideas using simple language a limited scientific terminology <br> spelling, punctuation and grammar are used with limited | ture <br> ses <br> uracy |
| 2 | 3-4 | a simple explanation e.g. at higher temperature particles faster, more collisions so higher rate <br> e.g. smaller sized particles (of same mass) have greater surface higher rate <br> the answer communicates ideas showing some evidence of and organisation and uses scientific terminology appropriately <br> spelling, punctuation and grammar are used with some accur | ve <br> a so <br> arity <br> acy |
| 3 | 5-6 | a detailed explanation e.g. (when particles collide they) o when they have sufficient energy/activation energy and at a hig temperature more of the particles have sufficient energy/ activation energy so more collisions will be successful and when particles s size higher rate <br> the answer communicates ideas clearly and coherently us range of scientific terminology accurately spelling, punctuation and grammar are used with few errors | react <br> ler |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{6 ( a )}$ | $\mathrm{D}: \mathrm{Ca}\left(\mathrm{NO}_{3}\right)_{2}$ |  | (1) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{6 ( b )}$ | C:8 |  | (1) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{6 ( c )}$ | Description including four of the <br> following <br> sodium - 2.8.1 / 1 electron in <br> outer shell (1) <br> sodium (atoms) lose electrons <br> (1) <br> one per atom (1) <br> (forms) Na ${ }^{+}$(1) <br> sulphur - 2.8.6 / 6 electrons in <br> outer shell (1) <br> sulfur (atoms) gain electrons (1) <br> two per atom (1) <br> (forms) S2- (1) <br> two sodium atoms / ions combine <br> with one sulfur atom / ion (1) <br> formula is Na2S (1) | Marks can be gained using <br> diagrams | mention of shared electrons / <br> covalent bonding in words or <br> diagram = max 2 marks |

| Question Number |  | Indicative Content | Mark |
| :---: | :---: | :---: | :---: |
| QWC | *6(d) | A description including some of the following points <br> solid <br> \{regular arrangement/ lattice\} (of ions) <br> sodium $/ \mathrm{Na}^{+}$ions <br> chloride $/ \mathrm{Cl}^{-}$ions <br> (held together by) <br> strong (ionic) bonds <br> strong (electrostatic) forces of attraction <br> between oppositely charged ions / positive and negatively <br> charged ions <br> closely packed together <br> (when solid) does not conduct <br> because ions cannot move <br> molten <br> heat energy \{overcomes/breaks\} (strong ionic) bonds strong (electrostatic) forces of attraction between oppositely charged ions / positive and negatively charged ions ions can move <br> (therefore) conducts when molten | (6) |
| Leve I | 0 | No rewardable content |  |
| 1 | 1-2 | a limited explanation e.g. does not conduct when solid <br> e.g. does conduct when molten <br> the answer communicates ideas using simple langua limited scientific terminology <br> spelling, punctuation and grammar are used with lim accuracy | uses |
| 2 | 3-4 | a simple explanation e.g. does not conduct when so conduct when molten because \{ions / particles / atoms the answer communicates ideas showing some evid and organisation and uses scientific terminology appropria spelling, punctuation and grammar are used with s | S e clarity uracy |
| 3 | 5-6 | a detailed explanation e.g. solid has strong ionic bon oppositely charged ions), does not conduct when solid becaus cannot move, does conduct when molten because ions can the answer communicates ideas clearly and coheren range of scientific terminology accurately spelling, punctuation and grammar are used with few | tween ns <br> a <br> S |
