<b>M1.</b> (a)	hydroc	arbons <b>or</b> hydrocarbon	1
(b)	(i)	distillation	1
	(ii)	evaporation	1
	(iii)	condensation	1
(c)	(i)	bond	1
	(ii)	$(C_6H)_{14}$	1
	(iii)	cracking	1
(d)	(i)	poly(butene)  allow with or without brackets	1
	(ii)	Advantage = energy is released  do not accept more than one tick in the advantage column	1

Disadvantage = carbon dioxide is produced

do  ${\it not}$  accept more than one tick in the disadvantage column

[10]

1

(b) Marks awarded for this answer will be determined by the Quality of Written Communication (QWC) as well as the standard of the scientific response. Examiners should also apply a �best-fit� approach to the marking.

#### 0 marks

No relevant content.

#### Level 1 (1-2 marks)

There is a **basic** description of at least one advantage **or** one disadvantage caused by using plastic shopping bags made from poly(ethene)

#### Level 2 (3-4 marks)

There is a **clear** description of both an advantage **and** a disadvantage, caused by using plastic shopping bags made from poly(ethene).

Level 3 (5-6 marks)

There is a **detailed** description of both advantages and disadvantages caused by using plastic shopping bags made from poly(ethene)

## **examples of the chemistry/social points made in the response:** ignore cost unqualified

#### **Advantages:**

- Simple properties eg strong / low density / water resistant
- Bags can be reused (for shopping) or another <u>specified</u> use eg bin liners
- Money charged for bags can go to good causes or encourage reuse
- Poly(ethene) bags can be recycled eg made into milk bottle crates
- Poly(ethene) bags can be burned to provide heat for buildings/generation of electricity
- New bags are now made that can biodegrade

#### Disadvantages:

- (Older) bags can take many years to biodegrade
- There is a shortage of landfill space
- Bags are made from (crude) oil which is a non-renewable resource/running out
- Large amounts of energy/fuel are used for the production of poly(ethene)
- Production of poly(ethene) releases carbon dioxide/causes global warming
- Specified issue caused by litter eg visual pollution or effect on wildlife
- <u>Burning bags</u> release carbon dioxide / causes global warming

М3.	(a	) (i	i) hydrocarbons  accept alkanes	1	
		(ii)	distillation	1	
	(b)	(i)	vaporising	1	
		(ii)	cracking	1	
	(c)	В		1	
	(d)	(i)	new plastic products are made from the used plastic bags	1	
		(ii)	not biodegradable  accept does not decompose  allow does not rot	1	
		(iii)	advantage – energy is released	1	
			disadvantage – carbon dioxide is produced	1	[9]

M4.	(;	a) (	(i) carbon	1
			hydrogen  accept in either order  ignore number eg 2 carbons  4 hydrogens	1
		(ii)	(a carbon carbon) double (bond)	1
	(b)	poly	(ethene)	1
	(c)	any f	ignore pollution / cost / global warming / harms environment / recycling  made from crude oil  non-renewable resources     accept resources are running out  litter     accept go to landfill  not biodegradable  use energy to make  when burned or biodegraded carbon dioxide is released  encourage customers to reuse bags / use their own bags     accept reduces carbon emissions / footprint	
			αυτερι τεαάνες υπροπειποδιοπό / μουτριπί	2

[6]

#### **M5.** (a) (i) any **one** from:

- bond / join (together)
   ignore polymerisation / heat
- double bond opens

1

#### (ii) any **one** from:

- heat / energy
   ignore many processes / distillation / cracking / polymerisation
- cost of fuels / the crude oil
- construction of the factory / plant
- wages / salaries

1

#### (iii) any **two** from:

ignore gases released / burning / habitats

- non-biodegradable accept remains a long time
- landfill sites are filling up / limited accept land / space used up
- waste of a resource / could be recycled / reused accept crude oil is running out

2

#### (b) any **two** from:

- renewable / sustainable
   ignore recycling
   ignore crude oil is running out
- less fuel <u>burned</u>

### accept less energy / heat needed

- biodegradable
- <u>natural</u> resource
- plants absorb carbon dioxide

2

[6]

M6.		(a)	(i) $C_2H_4$	1	
		(ii)	poly(ethene)	1	
	(b)		is not biodegradable	1	
		(ii)	not enough landfill sites / space  accept landfill sites are filling up <b>or</b> plastics remain for <u>years</u> <b>or</b> plastics not broken down  ignore cost / waste of resources / not biodegradable / wildlife	1	
		(iii)	less (crude) oil / fuels / energy used  accept (crude) <u>oil</u> is a non-renewable resource	1	[5]

# **M7.** (a) (i) hydrogen must be name

1

(ii) a line of four or more ethene molecules joined to the original two with single bonds

at least two other ethene molecules joined to the original two in a chain gains  ${\bf 1}$  mark

2

- (b) (i) any **two** from:
  - non-biodegradable
     accept remains a long time
  - landfill sites are filling up / limited
     accept land / space used up
  - waste of a resource / could be recycled / reused ignore references to tablets / animals

2

- (ii) any one from:
  - (two) different polymers / plastics / materials
  - need to be separated
  - limited collection points / many need to be collected
  - tablets may still be present
