| Question number | Answer | Notes | Marks |
| :---: | :---: | :---: | :---: |
| 1 a | ```reference to line/curve/temperature /graph/it AND not reached minimum / not constant / not level /not horizontal / still falling /decreasing/changing``` | I gnore reference to correlation I gnore has not reached zero / x-axis Ignore does not become | 1 |
| b | (better) insulator (than glass) OR poor conductor (of heat) | Accept equivalents such as prevents heat from entering / keeps out heat better <br> Allow stops heat escaping / traps heat <br> Reject references to keeping temperature constant Ignore references to breaking glass | 1 |
|  | effervescence / fizzing / bubbles OR colourless solution/liquid formed <br> Neutralisation <br> endothermic | Accept carbon dioxide gas <br> Accept gas given off/evolved/formed <br> I gnore identity of gas <br> Accept solid disappears/dissolves <br> Ignore hissing and other sounds <br> Accept acid-base / acid-alkali <br> M1 and M2 independent <br> Accept answers in either order <br> Do not penalise contradictions such as exothermic and endothermic - this answer is worth 1 mark | $1$ <br> 1 <br> 1 |

ii
\end{tabular} \& \begin{tabular}{l}
product formulae or names / products (word) above reactants \\
(approximately) vertical line between reactants and products / between two levels AND \\
labelled \(\Delta \mathrm{H} /\) energy change / heat change / enthalpy change
\end{tabular} \& \begin{tabular}{l}
Horizontal line not needed Ignore formula errors and one or two missing product(s) I gnore curves and intermediates \\
I gnore arrowheads on vertical line I gnore sign of \(\Delta \mathrm{H}\) Mark can be awarded for exothermic reaction Accept 2310 or any other number in place of \(\Delta H\)
\end{tabular} \& 1
