

## Definitions and Concepts for AQA Computer Science A-level

### Topic 11: Big Data

---

#### 11.1 Big Data

**Big Data:** An umbrella term used to refer to typically unstructured datasets that are large in terms of storage size, data streaming rate and/or variety.

**Fact Based Model:** A data model consisting of facts such that each fact captures a single piece of information. †

**Graph Schema:** A data model where the structure of a database is defined in terms of nodes, edges and properties.

**Nodes (Graph Schema):** The representation of an entity.

**Edges (Graph Schema):** The representation of a relationship between two entities.

**Properties (Graph Schema):** The representation of attributes and information stored with each entity.

*Definitions with a '†' taken from [AQA AS and A-level Computer Science specification version 1.5](#)*
