Mark Scheme

June 20xx

**MARKING INSTRUCTIONS****PREPARATION FOR MARKING****SCORIS**

1. Make sure that you have accessed and completed the relevant training packages for on-screen marking: *scoris assessor Online Training*; *OCR Essential Guide to Marking*.
2. Make sure that you have read and understood the mark scheme and the question paper for this unit. These are posted on the RM Cambridge Assessment Support Portal <http://www.rm.com/support/ca>
3. Log-in to scoris and mark the **required number** of practice responses (“scripts”) and the **required number** of standardisation responses.

YOU MUST MARK 10 PRACTICE AND 10 STANDARDISATION RESPONSES BEFORE YOU CAN BE APPROVED TO MARK LIVE SCRIPTS.

**TRADITIONAL**

Before the Standardisation meeting you must mark at least 10 scripts from several centres. For this preliminary marking you should use **pencil** and follow the **mark scheme**. Bring these **marked scripts** to the meeting.

**MARKING**

1. Mark strictly to the mark scheme.
2. Marks awarded must relate directly to the marking criteria.
3. The schedule of dates is very important. It is essential that you meet the scoris 50% and 100% (traditional 50% Batch 1 and 100% Batch 2) deadlines. If you experience problems, you must contact your Team Leader (Supervisor) without delay.
4. If you are in any doubt about applying the mark scheme, consult your Team Leader by telephone, email or via the scoris messaging system.

5. Work crossed out:
  - a. where a candidate crosses out an answer and provides an alternative response, the crossed out response is not marked and gains no marks
  - b. if a candidate crosses out an answer to a whole question and makes no second attempt, and if the inclusion of the answer does not cause a rubric infringement, the assessor should attempt to mark the crossed out answer and award marks appropriately.
6. Always check the pages (and additional objects if present) at the end of the response in case any answers have been continued there. If the candidate has continued an answer there then add a tick to confirm that the work has been seen.
7. There is a NR (No Response) option. Award NR (No Response)
  - if there is nothing written at all in the answer space
  - OR if there is a comment which does not in any way relate to the question (e.g. 'can't do', 'don't know')
  - OR if there is a mark (e.g. a dash, a question mark) which isn't an attempt at the question.Note: Award 0 marks – for an attempt that earns no credit (including copying out the question).
8. The scoris **comments box** is used by your Team Leader to explain the marking of the practice responses. Please refer to these comments when checking your practice responses. **Do not use the comments box for any other reason.**  
If you have any questions or comments for your Team Leader, use the phone, the scoris messaging system, or e-mail.
9. Assistant Examiners will send a brief report on the performance of candidates to their Team Leader (Supervisor) via email by the end of the marking period. The report should contain notes on particular strengths displayed as well as common errors or weaknesses. Constructive criticism of the question paper/mark scheme is also appreciated.

Annotation	Meaning

## 11. Subject-specific Marking Instructions

### INTRODUCTION

Your first task as an Examiner is to become thoroughly familiar with the material on which the examination depends. This material includes:

- the specification, especially the assessment objectives
- the question paper and its rubrics
- the mark scheme.

You should ensure that you have copies of these materials.

You should ensure also that you are familiar with the administrative procedures related to the marking process. These are set out in the OCR booklet **Instructions for Examiners**. If you are examining for the first time, please read carefully **Appendix 5 Introduction to Script Marking: Notes for New Examiners**.

Please ask for help or guidance whenever you need it. Your first point of contact is your Team Leader.

**USING THE MARK SCHEME**

Please study this Mark Scheme carefully. The Mark Scheme is an integral part of the process that begins with the setting of the question paper and ends with the awarding of grades. Question papers and Mark Schemes are developed in association with each other so that issues of differentiation and positive achievement can be addressed from the very start.

This Mark Scheme is a working document; it is not exhaustive; it does not provide 'correct' answers. The Mark Scheme can only provide 'best guesses' about how the question will work out, and it is subject to revision after we have looked at a wide range of scripts.

The Examiners' Standardisation Meeting will ensure that the Mark Scheme covers the range of candidates' responses to the questions, and that all Examiners understand and apply the Mark Scheme in the same way. The Mark Scheme will be discussed and amended at the meeting, and administrative procedures will be confirmed. Co-ordination scripts will be issued at the meeting to exemplify aspects of candidates' responses and achievements; the co-ordination scripts then become part of this Mark Scheme.

Before the Standardisation Meeting, you should read and mark in pencil a number of scripts, in order to gain an impression of the range of responses and achievement that may be expected.

In your marking, you will encounter valid responses which are not covered by the Mark Scheme: these responses must be credited. You will encounter answers which fall outside the 'target range' of Bands for the paper which you are marking. Please mark these answers according to the marking criteria.

Please read carefully all the scripts in your allocation and make every effort to look positively for achievement throughout the ability range. Always be prepared to use the full range of marks.

**LEVELS OF RESPONSE QUESTIONS:**

The indicative content indicates the expected parameters for candidates' answers, but be prepared to recognise and credit unexpected approaches where they show relevance.

Using 'best-fit', decide first which set of BAND DESCRIPTORS best describes the overall quality of the answer. Once the band is located, adjust the mark concentrating on features of the answer which make it stronger or weaker following the guidelines for refinement.

- **Highest mark:** If clear evidence of all the qualities in the band descriptors is shown, the HIGHEST Mark should be awarded.
- **Lowest mark:** If the answer shows the candidate to be borderline (i.e. they have achieved all the qualities of the bands below and show limited evidence of meeting the criteria of the band in question) the LOWEST mark should be awarded.
- **Middle mark:** This mark should be used for candidates who are secure in the band. They are not 'borderline' but they have only achieved some of the qualities in the band descriptors.

Be prepared to use the full range of marks. Do not reserve (e.g.) high Band 3 marks 'in case' something turns up of a quality you have not yet seen. If an answer gives clear evidence of the qualities described in the band descriptors, reward appropriately.

	<b>AO1</b>	<b>AO2</b>	<b>AO3</b>
<b>High (thorough)</b>	Precision in the use of question terminology. Knowledge shown is consistent and well-developed. Clear appreciation of the question from a range of different perspectives making extensive use of acquired knowledge and understanding.	Knowledge and understanding shown is consistently applied to context enabling a logical and sustained argument to develop. Examples used enhance rather than detract from response.	Concerted effort is made to consider all aspects of a system/problem or weigh up both sides to an argument before forming an overall conclusion. Judgements made are based on appropriate and concise arguments that have been developed in response resulting in them being both supported and realistic.
<b>Middle (reasonable)</b>	Awareness of the meaning of the terms in the question. Knowledge is sound and effectively demonstrated. Demands of question understood although at times opportunities to make use of acquired knowledge and understanding not always taken.	Knowledge and understanding applied to context. Whilst clear evidence that an argument builds and develops through response there are times when opportunities are missed to use an example or relate an aspect of knowledge or understanding to the context provided.	There is a reasonable attempt to reach a conclusion considering aspects of a system/problem or weighing up both sides of an argument. However the impact of the conclusion is often lessened by a lack of supported judgements which accompany it. This inability to build on and develop lines of

H046/01

Mark Scheme

June 20xx

			argument as developed in the response can detract from the overall quality of the response.
<b>Low (basic)</b>	Confusion and inability to deconstruct terminology as used in the question. Knowledge partial and superficial. Focus on question narrow and often one-dimensional.	Inability to apply knowledge and understanding in any sustained way to context resulting in tenuous and unsupported statements being made. Examples if used are for the most part irrelevant and unsubstantiated.	Little or no attempt to prioritise or weigh up factors during course of answer. Conclusion is often dislocated from response and any judgements lack substance due in part to the basic level of argument that has been demonstrated throughout response.

<b>Assessment Objective</b>	
<b>AO1</b>	Demonstrate knowledge and understanding of the principles and concepts of computer science, including abstraction, logic, algorithms and data representation.
<b>AO1.1</b>	Demonstrate <b>knowledge</b> of the principles and concepts of abstraction, logic, algorithms, data representation or other as appropriate.
<b>AO1.2</b>	Demonstrate <b>understanding</b> of the principles and concepts of abstraction, logic, algorithms, data representation or other as appropriate.
<b>AO2</b>	Apply knowledge and understanding of the principles and concepts of computer science including to analyse problems in computational terms.
<b>AO2.1</b>	Apply knowledge and understanding of the principles and concepts of computer science.
<b>AO2.2</b>	Analyse problems in computational terms.
<b>AO3</b>	Design, program and evaluate computer systems that solve problems, making reasoned judgements about these and presenting conclusions.
<b>AO3.1</b>	Design computer systems that solve problems.
<b>AO3.2</b>	Program computer systems that solve problems.
<b>AO3.3</b>	Evaluate computer systems that solve problems, making reasoned judgements about these and presenting conclusions.

Question		Answer	Marks	Guidance
	(b) (i)	<ul style="list-style-type: none"> <li>A primary key must have a unique value for each record (1 – AO1.2) – however it is possible for two films to have the same name (1 – AO2.1).</li> </ul>	<b>2</b> <b>AO1.2</b> <b>(1)</b> <b>AO2.1</b> <b>(1)</b>	One mark (AO 1.2) for identification of appropriate reason.  One mark (AO 2.1) for applying knowledge to given context.
	(ii)	<ul style="list-style-type: none"> <li>A secondary key is indexed allowing for faster searching (1 – AO1.2) and users are likely to want to search by film (1 – AO2.1).</li> </ul>	<b>2</b> <b>AO1.2</b> <b>(1)</b> <b>AO2.1</b> <b>(1)</b>	One mark (AO 1.2) for identification of appropriate reason.  One mark (AO 2.1) for applying knowledge to given context.
	(c)*	<p><b>Mark Band 3–High Level (7-9 marks)</b></p> <p>The candidate demonstrates a thorough knowledge and understanding of a wide range of legal issues the company might have considered and suggests extensive measures that the company can take to ensure compliance; the material is generally accurate and detailed.</p> <p>The candidate is able to apply their knowledge and understanding directly and consistently to the context provided. Evidence/examples will be explicitly relevant to the explanation.</p> <p>The candidate provides a thorough discussion which is well-balanced. Evaluative comments are consistently relevant and well-considered.</p> <p><i>There is a well-developed line of reasoning which is clear and logically structured. The information presented is relevant and substantiated.</i></p>	<b>9</b> <b>AO1.1</b> <b>(2)</b> <b>AO1.2</b> <b>(2)</b> <b>AO2.1</b> <b>(2)</b> <b>AO3.3</b> <b>(3)</b>	<p><b>AO1: Knowledge and Understanding</b></p> <p>The following is indicative of possible factors/evidence that candidates may refer to but is not prescriptive or exhaustive:</p> <p><b>Legal (I)ssues and (S)olutions:</b></p> <ul style="list-style-type: none"> <li>(I) Company needs to ensure it has the right to stream the films it does...</li> <li>(S)...It can do this by approaching the copyright holder and buying a licence to use it.</li> <li>(I) Having a peer to peer model may affect this as often a distinction is drawn in contracts between streaming and downloading media.</li> <li>(S)...One way round this may be to ensure that the cache is encrypted.</li> <li>(I) The company may be allowed to stream to users on in one particular country...</li> <li>(S)...To do this it can filter users by IP address or the address to which their credit card is registered.</li> <li>(I) Laws in a country may restrict some films being viewed by people of certain ages...</li> </ul>

Question	Answer	Marks	Guidance
	<p><b>Mark Band 2 –Mid Level (4-6 marks)</b> The candidate demonstrates reasonable knowledge and understanding of a range of legal issues the company might have considered and suggests some measures that the company can take to ensure compliance; the material is generally accurate but at times underdeveloped. The candidate is able to apply their knowledge and understanding directly to the context provided although one or two opportunities are missed. Evidence/examples are for the most part implicitly relevant to the explanation The candidate provides a reasonable discussion, the majority of which is focused. Evaluative comments are for the most part appropriate, although one or two opportunities for development are missed. <i>There is a line of reasoning presented with some structure. The information presented is in the most part relevant and supported by some evidence.</i></p> <p><b>Mark Band 1-Low Level (1-3 marks)</b> The candidate demonstrates a basic knowledge of legal issues and matters of compliance with limited understanding shown; the material is basic and contains some inaccuracies. The candidate makes a limited attempt to apply acquired knowledge and understanding to the context provided.</p> <p>The candidate provides a limited discussion which is narrow in focus. Judgments if made are weak and unsubstantiated. <i>The information is basic and</i></p>		<ul style="list-style-type: none"> <li>• (S) ...Users can be required to register by credit card for which they must be 18.</li> <li>• (I) Will be required to store data about customers meaning it must act according to the DPA...</li> <li>• (S)... It must register to the ICO ensure its data is kept securely and adhere to the principles of the DPA.</li> </ul> <p><b>AO2.1: Application</b> The selected knowledge/examples should be directly related to the specific question. The example below is not prescriptive or exhaustive:</p> <ul style="list-style-type: none"> <li>• Discussion on the copyright and patents act related to the context</li> <li>• Discussion on the data protection act for users</li> <li>• Discussion on computer misuse act</li> </ul> <p><b>AO3.3: Evaluation</b> Candidates will need to consider computing related laws in relation to the question and will make some comments evaluating the issues and solutions they are discussing. The following is indicative of possible evaluation points that candidates may refer to but is not prescriptive or exhaustive:</p> <ul style="list-style-type: none"> <li>• Why companies need to comply with computing related laws?</li> <li>• What are the risks if a company is not complying with the data protection act for users involved?</li> <li>• Discuss the quality of films and services that will be available to users either from company's servers compared to a user's computers</li> <li>• Discuss the legal implications of streaming films</li> </ul>
